“ My Lord, I have said that the situation in several parts of the country is an anxious one. That however does not mean that in my opinion things are really going from bad to worse. On the contrary I entirely share the view which was so clearly and firmly expressed by your Lordship on the opening day of this Council—a view in such striking contrast to the nervous opinions that one hears on so many sides, especially in this city—that the general situation is far easier to-day than it ever was during your Lordship's time. There is no doubt whatever that the Reform Scheme, despite considerable dissatisfaction about details, has largely eased the tension of the situation and has brought over to the side of the administration factors that might otherwise have remained sullenly or

helplessly aloof. There is no doubt also that these wicked assassinations and dacoities which have been disfiguring the page of Indian history since last year have at last roused the Indian community to a sense of the great danger in which it stands. Our community is a slow-moving community, but once it begins to move, it moves surely. And any one who can read the signs may see that it has shaken off its lethargy and begun to advance to the support of law and order. My Lord, the crop of violence that has now come to the surface had its grounds prepared five years ago. I sincerely believe that no new ground is being added to it, and though we may not have seen the last of these outrages, I think we are nearer the end than many imagine. But the juncture is a most difficult and delicate one, and if ever any juncture called for the utmost tact and conciliation, such as we have now learnt, despite repressive measures to which you have been from time to time driven, to associate with your Lordship's name, that juncture is the present. Angry cries for reprisals, however natural and even justified will not mend matters and will certainly not assist the task that lies before the Government. My Lord, I am not one of those who think that any appreciable section of the Indian Press has always been seditious or that the Press in India has, on the whole, done more mischief than good. On the contrary, our Press has been in the main a potent instrument of progress, it has quickened our national consciousness; it has spread in the country ideas of justice and equality not only between man and man but also between class and class; it has stimulated our public spirit, it has set us higher standards of public duty. And till five years ago, I do not think that, barring a very few exceptions, any section was actually seditious, if by sedition a desire to see British rule overthrown is understood. A considerable proportion was no doubt often ill-informed, prejudiced, even intolerably bitter in its comments on the administration and its measures, but this sprang mainly from ignorance and from a feeling that grievances were not redressed, and not from any actual hostility to the rule itself. During the last five years seditious ideas have no doubt spread more or less in all parts of the country and in some parts more rapidly and extensively than in others. This, however, has been due to special causes which are now well understood and over which it is unnecessary to dwell. I think, my Lord, my countrymen are now growing alive to the fact that nothing is more surely destructive of our hopes of future progress than the spread of these ideas in the land. In my opinion, our first duty is to help in removing these ideas from the air, and because I feel this most strongly, I am prepared to let the Government apply to the situation even the drastic remedies contemplated by this Bill. I do not know if we shall succeed in overcoming the evil altogether. Even if it lies dormant for a time, there is much in the situation itself which will constantly tend to stir it into fresh activity. I have already said that several causes have combined to bring about the present state of things. It is of course impossible to go into all of them, but one of them may be mentioned—it is the writings in a section of the Anglo-Indian Press. My Lord, I doubt if many Englishmen realise how large a share these writings have had in turning so many of my countrymen against British rule. The terms of race arrogance and contempt in which some of these papers constantly speak of the Indians and specially of educated Indians cut into the mind more than the lash can cut into the flesh. Many of my countrymen imagine that every Anglo-Indian pen that writes in the Press is dipped in Government ink. It is an absurd idea, but it does great harm all the same. My Lord, I feel bound to say that this Bill by itself cannot achieve much. It is even possible that the immediate effect of its passing will be to fill the public mind with a certain amount of resentment. And unless the powers conferred by it are used with the utmost care and caution, the evil which they are intended to combat may only be driven underground. Force may afford temporary relief, but it never can prove a permanent remedy to such a state of things as we have in this country. It is only in the co-operation of all classes and the steady pursuit of a policy of wise conciliation on the part of Government that the best hopes of thoughtful men on both sides for the future of this land must lie."

The Hon'ble SARDAR PARTAB SINGH said :—"My Lord, the Bill which is to-day before this Council I am sure has the unanimous support of all

my fellow members from the Punjab and of myself. It will, I am confident, be welcomed with the keenest gratification by all the law-abiding classes in our Province, and the law-abiding classes I am happy to say practically comprise the whole population, with the exception of a small number of persons whose ranks have been recruited through the influence of a disloyal and seditious Press working upon the susceptible imaginations of young men of the student class. Efforts have from time to time been made by the journalist agitator class to enlist the general population, and the peasant in particular, in the campaign of hostility against Government. Such efforts, my Lord, I am happy to say, have so far signally failed. The agitation which culminated in the riots at Rawalpindi sought to make capital out of the assessment operations of the revenue-officers, but so far as I am aware, not a single zamindar is known to have participated in those riots. For the disgraceful scenes which were witnessed in Lahore when the editor of the *Punjabee* newspaper was convicted, the persons responsible were the youthful admirers of the advanced journalism, which in 1907 had reached a state of outrageous contempt for constituted authority, which threatened to annihilate all respect for the Government of the country. That the Press is made the mouthpiece of the seditious everywhere, that the Press is the seat of the mischief, we have had a striking piece of testimony.

"In reply to a 1st of January address presented to him by a deputation of the Hindu community, the Lieutenant-Governor of my Province took occasion to review the present unsatisfactory condition of affairs in the country generally and to call upon the leaders of the Hindu community to take some steps more practical than the mere passing of resolutions to bring about an amelioration in the conditions of the body politic. Since I have reached Calcutta, I have noticed in the Lahore telegrams an announcement that an influential Hindu syndicate has been formed to buy up the *Punjabee* newspaper. If I may venture to make a suggestion to my countrymen from the other provinces, those who may not yet have seen their way to render any practical assistance to Government in the campaign against sedition, may I suggest that the acquisition of control of the more disloyal newspapers, either with the purpose of suppressing them entirely, or with a view to modification of their tone and politics, would be an operation productive of most salutary consequences. Nor is the Hindu community alone in recognising the seditious newspapers as the source of the disease from which we are suffering. His Highness the Raja of Jhind, following I believe the meritorious example of the Maharaja of Jaipur, has prohibited absolutely the importation to his State of some of the more objectionable journals. The co-operation of the ruling Princes with the Government of India in the campaign against sedition is to my mind the brightest feature of the present situation. And I am confident that my own relative the Maharaja of Kapurthala will not be backward in his measures for dealing with the enemies of Government should such an occasion arise. The ruling princes of India, my Lord, have reason to be deeply grateful to your Excellency for providing in this Bill a clause protecting them from the whole tribe of traducers and blackmailers, who from the shelter of British territory use the columns of the more disreputable journals to calumniate the highest and noblest in the land. My Lord, to my mind the time has come when those who have any stake in the country should openly be on the side of law and order express their abhorrence of sedition and anarchy in the strongest terms, and do all that lies in their power to strengthen the hands of Government at this crisis. My Lord, with the foregoing remarks, I beg to support this measure."

The Hon'ble RAJA VAIRICHERLA VAIRABHADRA RAJU BAHADUR OF KURUPAM said:—"My Lord, I entirely agree with the tenor of the new Press Bill as a whole. It is, no doubt, a genuine effort on the part of the Government to put a substantial check on the uncontrollable, slanderous pen and to enable irresponsible persons to realise their own position before recklessly rushing into print. It is a regrettable but doubtless necessary step under existing conditions. At the same time, I believe that, if the Government had acted more promptly and decidedly in the first instance, in crushing the advance of sedition, the necessity for this measure would not have arisen now. It was, however, only Your Excellency's astonishing patience, that striking characteristic of a strong and an able administrator, that led you to postpone the evil day, hoping against hope that the

misguided and misleading adversaries of Government would come to see the error of their ways before it was too late. It was this long-suffering shown by Government, in having patiently undertaken 47 successful prosecutions instead of in the first instance taking one drastic measure that would have nipped the whole of the movement in the bud, that has been construed into weakness, and undue and hostile advantage has been taken of the same.

"I appreciate the Bill because it saves the worry and trouble of expensive and tedious Press prosecutions and has the peculiar feature of giving much less scope for police interference at the first instance. A respectable Press has nothing to fear from this Act. Your Excellency's Government has given India ample proof that it does not desire to suppress fair and just criticism of its measures. This Act will lie heavily on the shoulders of those only who seek to undermine or subvert British rule. Sedition-mongers will now receive short shrift. It is but urgent that, with a strong hand and iron will, the Government should take decisive steps to knock sedition on the head, but, at the same time, it is fitting that it ought to take all necessary care not to stifle public opinion. While giving ample powers to the Magistrate, the Act has also to provide against the misuse of such powers so as not to bring discredit to the fair name of the most benevolent British rule. I would therefore humbly suggest a slight alteration in the Bill in sections 3 (1) and 8 (1) which deal with the powers of the Magistrate. I would suggest that, instead of leaving it to the sole discretion of the Magistrate to determine the amount of security or to declare whether a particular article, book, pamphlet or statement published is seditious or not, that he be guided by at least three non-official gentlemen of local standing to be notified by the Local Government for each such district to form an Arbitration Court with the Magistrate as president who shall have a casting vote when necessary. And since the local gentlemen shall be in immediate touch with the antecedents and circumstances of the person concerned, they will be in a better position to help the Magistrate in arriving at a correct decision as to the nature of the case under inquiry. This will be in perfect keeping with the spirit of the Reform Scheme and, I humbly hope, will calm down the objections urged in certain quarters against the Bill. With this humble suggestion I give this measure my warm and hearty support, since we zamindars know that Government interests and ours are one and that we both must stand or fall together. We have nothing to fear while under the ægis of British rule, we shall have much to fear if that power ceases to be dominant.

"Even if we are blind to the advantages accruing from British rule, even if we are dead to the remembrance of past benefits and kindness received from the British Government and allowed ourselves to be actuated only by sordid self-interest, even then, I say, we must feel that we are serving our own interests best by doing all in our power to strengthen the hands of the Government in heartily supporting this measure."

The Hon'ble MR. DADABHOY said —"My Lord, the Bill before us marks another step in the repressive policy that has unfortunately been followed during the past three years, and forms a part of a series of measures taken with the object, which has the sympathy of every loyal Indian, of suppressing sedition and anarchy. It is a matter of poignant grief to us all that such a restrictive measure should be almost synchronous with the introduction of the largest administrative reform undertaken since British occupation, and should further be associated with the honoured name of a Pro-Consul who has broadened the basis of British Indian administration such as has never been attempted before. Free Press, my Lord, the earlier history of the country notwithstanding, is now after such long enjoyment a valued institution in India, and any, the least, encroachment upon its rights, whatever the pressure under which it is made, is viewed with some little suspicion and disappointment by the people. The Bill can therefore never be a popular measure, and will fail to evoke the enthusiastic support of the country which the Hon'ble mover apparently expects. But the people fully realise the gravity of the difficulties which beset the Government at the present moment; they are as much anxious as the Government for the eradication of an evil that promises to involve the good and the bad, the guilty

and the innocent, in one common ruin. All said, my Lord, educated India is anxious for the continuance, nay the permanence, of British suzerainty. The highest dictates of policy and self-interest prompt their loyalty to the British Raj; at the same time they are actuated by a natural desire for improvement, and they rely upon constitutional methods for the realisation of their hopes. In these circumstances they can have no interest in the subversion of law and order. They are whole-heartedly with Government in their efforts at the maintenance of these. But unfortunately they do not see eye to eye with Government as regards the *modus operandi*, and they regard the Bill under discussion as likely to defeat its own object, by rousing the suspicions of the people, by alienating their sympathies, and by giving a handle to seditionists for secret vilification of the Government.

"My Lord, for the Hon'ble Sir Herbert Risley I have the greatest respect. We all admire his scholarship; we gladly acknowledge his large and varied administrative experience. But he will permit me to say that Austrian authorities and the policy of the Iron Chancellor of Germany are the least calculated to secure popular support to the measure. Indians are the citizens of the British Empire, the most progressive Empire in the world; and they have been taught by their rulers to regard the free institutions of that noble Empire as the wisest means of national development and national advancement, and as objects well worthy of patriotic pursuit. What therefore a backward Continental country does or does not do is beside the mark. The narrow policy of such a country can never serve as a model for the enlightened British administrator. Besides, if the comparison between India and Austria be so close, why cannot India have the same sort of Parliament which Austria has? The people may inquire if Austria has any such special electorates as we have now come to have.

"It is at least questionable if the new measure will attain its ambitious object,—'the major, the vital, the all-important object of curing a grave evil.' The laws recently passed have admittedly failed to suppress anarchy. The present Bill is brought forward as a supplementary measure, and if this again fails, as it is feared it will, more drastic measures might have to be thought of. Eventually we might exhaust our resources of preventive legislation, and still fail to attain our aim and to check anarchism.

"My Lord, in my humble opinion, there is some misapprehension about the causal connection between the writings of the less violent Press, for the control of which this Bill is meant, and the growth of anarchy. The Hon'ble mover thinks the causation is clear, but his own references to the past history of the Press would seem to throw doubt upon the dictum. The Press, I understand from his introductory speech, was equally bad in 1877; the journalists then used to preach rank sedition. And yet murderous attacks were not known for thirty years. Anarchism is of very recent growth. The seditious Press can under the circumstances hardly be held responsible for the genesis of anarchism. The tone of the Press would appear to have improved since 1877, judged by the well-considered pronouncements of Your Excellency's illustrious predecessors, Lords Dufferin and Curzon. On March 23rd, 1888, eleven years after Sir Richard Temple condemned the Press, Lord Dufferin, in the course of his reply to the farewell addresses presented to him in Calcutta on the eve of his departure from India, speaking of 'the protection and freedom of speech extended to them (the people) by the laws of England,' said, 'a freedom which a considerable portion of the Indian Press, I gladly acknowledge, exercises with sagacity, discretion, and moderation.' Lord Curzon, in February 1902, as Chancellor of the Calcutta University, observed: 'On the contrary, I think that Native journalism in India is steadily advancing, and that it is gaining in sobriety and wisdom.'

"We must look to other causes and other quarters therefore for the introduction of the cult of anarchism. To my mind the etiology is simple. Anarchism must have some grievance to work upon which, among inexperienced, thoughtless, impulsive and volatile young men, has developed a loss of faith in constitutional methods, a morbid penchant for indefensible violence. It will be

true statesmanship to remove this root cause, and thereby to restore to Young India their former faith in lawful and constitutional representations and in British justice and British sympathy. My Lord, there is need more for sympathetic treatment than repression; there is greater need for a continuity and expansion of the benevolent and progressive policy Your Excellency has so generously initiated. It has been truly said of anarchists that repression often fails to repress. Lord Morley on June 6th, 1907, observed. 'A policy of severe repression is worse than useless.'

"Besides, the Hon'ble member says that there is 'a murderous conspiracy' in the land, and that 'their organisation is effective and far-reaching, their numbers are believed to be considerable, the leaders work in secret and are blindly obeyed by their youthful followers.' That being so, the view appears too optimistic that any control over the Press will check the activity or the growth of the body. It is difficult to believe that a body working in darkness and blindly following astute leaders should depend for nourishment upon journalistic pabulum. For the suppression of anarchism we must depend upon the ordinary penal laws and, even more than that, upon sympathy. According to Lord Morley, 'the Indian people are peculiarly responsive to sympathy and personal influence,' and when the people are drawn to the side of Government by sympathy, the ground will become uncongenial for the growth of anarchism, and it will cease to disturb the peace for want of recruits. A Press law, the severest of its kind, is a weak check to the operations of the anarchist. It will hardly do much to dispel from the minds of educated Indians that impatience at administrative limitations, that yearning for autonomy which is likely to be mistaken for sedition. Truer words have not been said than what fell from Lord Morley on the occasion of introducing the Reform Scheme into the House of Lords.—

'Supposing you abolish freedom of the Press or suspend it, that will not end the business. You will have to shut up schools and colleges, for what would be the use of suppressing newspapers, if you do not shut the schools and colleges? Nor will that be all. You will have to stop the printing of unlicensed books. The possession of a copy of Milton, or Burke, or Macaulay, or of Bright's speeches, and all that flashing array of writers and orators who are the glory of our grand, our noble English tongue—the possession of one of these books will, on this peculiar and puerile notion of Government, be like the possession of a bomb, and we shall have to direct the passing of an Explosive Books Act. All this and its various sequels and complements make a policy if you please. But after such a policy had produced a mute, sullen, muzzled, lifeless India, we could hardly call it as we do now, the brightest jewel in the Imperial Crown.'

"I admit, my Lord, certain journals having incited the youth of the country to violence, but it is not for the suppression of them that the Bill has been introduced. They can be and are dealt with under the previous Acts. The more violent among them have already been suppressed. While the present measure will not affect them it will cause heartburning among the whole people. 'Security,' in the criminal administration of the country, has ugly associations, and no one can be expected to submit to that preventive treatment without feelings of humiliation. English precedents in this matter are an unsafe guide. In India the people are sensitive to a degree. Treatment which will not elicit comment in England might give serious offence to the Indian. The popular irritation will be there, and might unhappily further aggravate the evil. The expediency of the measure after all is problematical.

"So far about the policy. The details, too, are not wholly satisfactory. The grounds on which action may be taken against offending papers are, I respectfully submit, too wide and comprehensive to allow of free, *bona fide* criticism of the acts of Magistrates and Judges. It is doubtful if the effect of such criticism can be entirely free from a tinge of disaffection. Besides, the provincial papers with small working capital will be at the mercy of the subordinate executive. The Local Government, it is true, has the initiative, but in practice Magistrates will largely influence the decision. A demand for security, against which there is no appeal to any tribunal, will mean closure in their case. The exercise of the right of appeal to the High Court against forfeiture, valuable as it is, in their case will be beset with difficulties which not many will be

able to surmount. So far as this aspect of the Bill is concerned, the main objection is that it substitutes executive action for judicial trial, and in effect shifts the *onus probandi* as regards merits from the prosecution to the defence. A journalist is at first in a manner convicted of sedition, and then if he can establish his innocence before the highest tribunal, his stain can be removed, and he can be allowed to ply his trade. This is incompatible with the enlightened jurisprudence that has for a century-and-a-half impregnated and ennobled the administration of criminal justice in this country.

"My Lord, people also regret it has not been possible for Government to allow the country more time for a free discussion of a measure of this import. The Hon'ble mover has reminded this Council that some of the provisions of the Bill have been taken verbatim from Act IX of 1878. It would seem that the procedure of discussion followed then has almost been followed on this occasion, in disregard of the salutary principle laid down by the Hon'ble Sir Alexander Arbuthnot in moving the amendment of that Act in October 1878:—

'There is no principle to which the Government of India attach a higher importance—there is no policy upon which they lay greater stress—than that of submitting their legislative projects to the freest and fullest public discussion. They would greatly deplore any general departure from that policy, and if such a result were to follow from the course which it was deemed expedient to pursue on the occasion to which I am referring, they would regard it as seriously detrimental to the public interests and prejudicial to the efficiency of the administration.'

"My Lord, I offer these criticisms in sorrow, in all humility, from a sense of duty, and not in a spirit of opposition to Government. I realise its difficulties, and I sympathise with it, I have no desire to embarrass it in the least in the presence of a portentous danger, and in proof of the sincerity of my profession I support the measure, even though it appears to me inexpedient. I do not object to the Government assuming larger powers for the maintenance of law and order which is the first duty of all Governments. Anarchism is not discriminating in its choice of victims, and is as much a menace to the peaceful citizen as to the official. Duty and self-interest alike therefore prompt the willing co-operation of the nation with Government in its crusade against this new pestilence. The only question is,—what is the most effective way of putting down the evil? I wish, my Lord, this was settled by Government in consultation with the leaders of the different communities. The time has not yet passed for that, and the collaboration of the Government and the people may yet evolve something more effective and harmless than a restrictive Press law. Meanwhile, when Government suggests a remedy, albeit a remedy that does not commend itself to the people, policy and prudence would counsel a trial, whatever the temporary inconvenience. These considerations prompt my vote on this occasion, and I readily respond to Your Excellency's call for support. But the working of the law within a short time, I apprehend, will prove its unsuitability to the circumstances of the country, and of its ineffectiveness as a preventive of anarchy and sedition. Once Government is convinced, conducted as it always is on enlightened principles, I am sure the law will be repealed, and the Indian Press will once again enjoy that liberty of speech which is inseparably associated with British administration. A law of this nature can never be anything but a temporary measure. As the *Spectator* forcibly observes 'We must always look upon such measures as temporary precautions, India cannot be governed by series of restrictions which contain no seed of progress, no possibility of fructification.' In according my support to the measure, I earnestly hope and trust that the cloud on the Indian sky will pass away before long, and leave the Government free to move on its accustomed lines of progress and advancement, and to further consolidate the Empire by repealing the restrictive laws and giving fuller rights of citizenship to the people."

The Hon'ble THE MAHARAJADHIRAJA BAHADUR OF BURDWAN said:—
"My Lord, in supporting this measure that is before the Council today, I wish to make a few observations. I welcome this measure, not as a repressive

measure, because repression is of doubtful merit, but because it is a protective measure against writings that lead to sedition and lawlessness. My Lord, the Press in India has got yet to learn the responsible duties of the Fourth Estate. If along with healthy criticisms about Government, Government officials, Government measures and men of mark, the editors and proprietors of the different newspapers in India were to realise that it lies within their power to foster good feelings between the Government and the people, if they were to realise this fully, I am perfectly certain, Sir, that the Government would be amply satisfied about the progress of the Press in India, and our labours on the Select Committee would then be crowned with success.

"Now, my Lord, I shall indulge in a few remarks which I trust will not be misconstrued. If we analyse the causes that have led to the present situation, if we analyse what use has been made by a certain section of the Press, we find that on the one side men without proper ideas of responsibility have abused the powers, have betrayed the confidence placed in them by Government. If, on the other hand, we were also to analyse, we would find that the unbridled license to slander has been unfortunately permitted to go on for a longer time than it was healthy for the state of affairs in India. My Lord, this brings us to the doubt that exists in the minds of many loyal Indians as to the advisability of introducing everything Western into this land, particularly politics. At present the unrest or discontent lies amongst a certain section of the educated community of India. The awakening of the masses of India has yet to come, and as a patriotic Indian I trust it will come some day but I wish that awakening to be guided into proper and healthy channels that can be good for the Indians. I therefore think, Sir, that when this liberty of speech was introduced into this country, if a little more care had been taken to foresee the results, we would not have had the outcry that we have today regarding this mild measure before us.

"My Lord, Western socialism too is beginning to make a headway in India. Fortunately, that socialism is at present only known to some of the educated men in the country, and that is why the educated mind does at times get perplexed, for instance, when it sees that, while the Government takes active measures for putting down sedition in India, it allows a Labour Member, or in other words a white sardar coolie in the shape of Mr. Keir Hardie, to have the audacity to say that 'the time had come for the Crown to be thrown into the melting pot.' My Lord, these are the dangers of Western socialism. If this socialism permeated among the masses of India, and took a deep root there, no amount of loyal zamindars or loyalists would be able to do anything, for things would be too advanced their own prestige would be gone by then. It is therefore, my Lord, that with humble submission I beg to point out that the time has come to seriously consider whether we are to allow India to be made the dumping ground of Western politics, political thoughts and socialism. My Lord, our rulers come from the West, our beloved Sovereign lives in the West; therefore it is essential that we of India must be westernised to a great extent. But the rulers, especially the Government officials in this country, to maintain their vast Eastern Empire, must also meet us half-way, must also easternise themselves to that extent which would help in the restoration of that good will between the rulers and the ruled which unfortunately is in certain quarters under a cloud at present

"With these few remarks, my Lord, I support the Bill."

The Hon'ble SIR HAROLD STUART said.—"My Lord, I shall not trespass for long on the forbearance of the Council, but I should like to offer a few observations on some of the criticisms that have been directed against this Bill. One of the first arguments that I wish to notice is that of those who allege that no further control of the Press is required beyond that given by the existing law. Now, my Lord, the existing law has failed in several directions. It has no doubt brought about a great diminution, if not an entire cessation, of open incitements to violence, and any success which has been obtained in that way is a strong argument in favour of the Bill, for such success must, I think,

be attributed to the fact that for incitements of that kind—those violent incitements to murder—the offending press can be forfeited. But the application of the existing law to ordinary seditious publications, the kind of seditious matter which is defined in the Indian Penal Code, has failed to produce the desired improvement. That law has been systematically enforced since June 1907, and, as the Hon'ble Member in charge of the Bill pointed out, not a single prosecution has failed. Yet seditious libels continue to be published, and at the present moment several cases are pending before the Courts. The punishments inflicted have been severe, but they have not been deterrent. They have not even deterred the convicted paper from offending again. We have had three papers convicted twice, and against one of these a third prosecution is now pending. We have had two papers convicted three times and we have had another paper convicted six times. In no case, however, has the prosecution deterred the conductors of those papers from again giving vent in their journals to seditious libels. Prosecution indeed often gives an advertisement to the offending paper and its circulation increases directly with conviction. The same results were experienced in Ireland before the passing of the Act of 1870 on which this Bill is modelled, and this was one of the main reasons advanced by the Government of that day for the passing of those provisions of their Act.

"Now, my Lord, the Hon'ble Mr. Gokhale has suggested today that the Government instead of passing this measure, or at any rate as an alternative to this measure, might have employed more largely the provisions of section 108 of the Criminal Procedure Code. That section gives power to a Local Government to direct the Magistrate to call upon the registered printer or publisher of a newspaper to furnish security to be of good behaviour, i.e., to abstain from publishing seditious matter. My Lord, the Government of India and the Local Governments have been most anxious to use that provision, and at the beginning of these troublous times every endeavour was made to do so; but we very soon found that it was absolutely useless. There was a Bombay paper the publisher of which was bound over, I think, in security for Rs. 1,000 to be of good behaviour. He promptly cancelled his registration as publisher, another person under no security was registered as publisher, and thereafter we had absolutely no control over that paper. The section to which the Hon'ble Mr. Gokhale has referred with so much approval is in fact a useless weapon in our hands, and it would not be possible to amend it without abandoning its principle altogether. It is useless to take security for individual good conduct, and the Bill now before the Council transfers security from the individual to the paper or the press.

"My Lord, there is another direction in which the existing law has failed. It fails on account of the uncertainty regarding its applicability to veiled sedition—to those indirect attacks upon the intentions and good faith of the Government—attacks not upon particular measures taken or omitted by the Government, but attacks of a quite general character directed against the Government as such, against the Government because it is an alien Government.

"Then again another argument which I should like to notice is that which alleges that there is no connection between the Press and these revolutionary conspiracies to assassinate officers of the Government and those private individuals who assist the law by giving information. Well, my Lord, that is not the view of the Local Governments, that is not the view of the great majority of the members of this Council. It is not the view of that great body of educated men who see the situation steadily and see it whole. The persistent attacks on the Government, the continued preaching of the disadvantages of the British connection, particularly impress the minds of adolescents, to whom indeed they are addressed. Boys have been deliberately dragged into politics. One paper of great influence declared some time back that 'in all great movements boys and young men play a prominent part, the divine message first comes to them; and they are persecuted and they suffer for their faith.' I will not read the next sentence which sounds blasphemous to Christian ears though I daresay the writer did

not intend that; but he goes on — 'And the faith that is inseparable from childhood and youth is the faith that has built up great creeds and has diffused them throughout the world' We know too that part of the revolutionary plan of campaign has been to sow the poison of sedition by means of the printed word, in newspapers, books and pamphlets. That has been their policy from the beginning, and a paper seized in Calcutta only the other day shows that it is their policy still. Nor are we left in any doubt as to its effects. These revolutionary societies are societies not of the raiyat who is alleged to be overtaxed, not of the artisan whose industry Britain is said to have killed, not of the trader who is said to have been robbed of his commerce. They consist of none of these, but of educated young men and boys, individuals who cannot have suffered any of these alleged oppressions of British rule, but whose immature minds have been led astray by what they have read. A number of them have given accounts of their perverted political education, and again and again we find that the first step was the reading of seditious newspapers.

"No one believes that the suppression of sedition in newspapers and books and pamphlets will immediately stop anarchy. The disease is too far advanced for that. But we do contend that it will cut off or very greatly diminish the supply of potential anarchists. And I feel convinced that every parent throughout the country will welcome with an enormous sense of relief this attempt to prevent his sons being led astray by the poisonous literature which passes itself off as a patriotic Press.

"My Lord, we have been assured (in the Press rather than in this Council, though it has been mentioned here too) that if we curtail the freedom of the Press we shall drive sedition underground. That argument will not bear examination. Violent sedition must always plot underground; if it came out in the open it could be suppressed at once. Have not the conspiracies of which we have already had experience worked underground? And can any one honestly say that they have been driven underground by restrictions on the Press? The Manikola conspiracy had its origin years ago when Press prosecutions were practically unknown. It was in full operation before June 1907 when the policy of systematic prosecution was inaugurated, and up to the time of its culmination the law of the Press in India was exactly the same as the law of the Press in Great Britain. There was complete freedom of the Press, but that did not prevent dangerous sedition. The so-called safety valve was working freely and still we had an explosion. The argument when applied to revolutionary violence is a futile argument. It rests too upon an entire misconception of the real meaning of that much abused phrase, the 'Freedom of the Press.'

"Some of those who use that expression seem to have but a vague idea of its meaning. It means nothing more than this, that a man may print without any previous license, but subject always to the consequences of the law. If a man publishes a paper he is exposed to the penal consequences, as he is in every other act if it be illegal. But to judge from what has been said and written in India of late there seems to be a claim that the publisher of a newspaper or a book should have a greater liberty than the ordinary citizen. That has never been the law of England, and it can never be the law of India. The law in both countries says what may not be published and prescribes the penalties for such publication. This Bill does not go beyond that. It has somewhat extended the definition of what may be called prohibited matter, but it leaves the individual free to publish what he likes at his own risk. The freedom of the Press really means freedom from censorship and the license, and this Bill provides neither for preliminary censoring nor for any arbitrary system of licensing.

"I do not think it is necessary to refer in any detail to the definition of what I have just described as prohibited matter. But I should like in that connection, my Lord, to refer to one argument which has been used and which requires some notice. It has been urged that an editor can never feel sure whether he is committing an offence or not. I should be quite content to refer that question to an impartial tribunal of editors. I will content myself with a quotation from a speech of Sir James Fitzjames Stephen, made in this Council when he was introducing the Bill to pass section 124-A of the Indian Penal Code. 'I do not

believe,' said Sir James, 'I do not believe that any man who sincerely wished not to excite disaffection, ever wrote anything which any other honest man believed to be intended to excite disaffection' That is equally true of the offences other than disaffection with which this Bill deals. No honest editor has anything to fear. To the dishonest editors we desire to give neither sympathy nor protection.

"The Hon'ble Mr. Dadabhoy has told the Council that the taking of security imposes some sort of a stigma. This is certainly not the case and there is high authority for the contrary view. Professor Sidgwick in his *Elements of Politics* says that it is not unreasonable to require every newspaper to be registered and to require the person registering to deposit security to a certain amount in the hands of a public official. Professor Dicey in his work on *The Law of the Constitution* declares :—'No sensible person will argue that to demand a deposit from the owner of a newspaper or to impose other limitations upon the right of publishing periodicals is of necessity inexpedient or unjust.' So much for authority. But we have also, my Lord, a number of precedents. Every member of the Stock Exchange and of Lloyds is required to deposit security. Every member of an Inn of Court is required to deposit security. Every member of the Universities of Oxford and Cambridge, and probably of other Universities also, though I cannot speak with certainty of them, is required on entrance to deposit what is called caution money, and that deposit is retained so long as his name remains on the books of his College. I do not believe that any of us ever felt that that imposed any stigma upon us. Those are English examples, but I enquired yesterday and I learnt that members of what is called, I think, the Brokers' Association in Bombay are equally with the members of the English Stock Exchange required to furnish a deposit. Is that considered a stigma? Is it considered that these gentlemen are dishonest when they enter upon their profession of brokers. Is it considered for a moment that, when the Government and private employers demand security from their cashiers and their treasurers, that they regard those employés as dishonest? Not at all. Such security is simply taken as a security against some remote chance of subsequent lapse, and it conveys no more stigma in that case than it will in the case of the security which under this Bill will be demanded from publishers of newspapers and keepers of printing-presses.

"My Lord, there have been complaints that the Bill has been hurried through its stages and that time has not been given for the consideration of criticisms. I doubt if we should have had a single additional criticism if the Bill had been before the public for a month. We had on the Select Committee learned and capable members who presented the case against the Bill with completeness and marked ability. Their eloquent arguments were fully considered and will again be considered by the Council today. Lord Lytton's Act was far more drastic than this Bill and the state of the Press was certainly not so bad as it is now, nor had it produced such terrible consequences; yet that Act was passed at a single sitting. Hon'ble Members had that Bill in their hands for only a few hours and the present Bill has been before them for several days, and has been referred to a Select Committee and has been adequately discussed, while a number of amendments will be moved today to vary its various provisions.

"My Lord, this is not a drastic or arbitrary measure. The counterpart of its provisions will be found in an Act passed by so great a liberal statesman as Mr. Gladstone. As he said in his speech in the House of Commons 'the question is whether the measure is required by the circumstances and whether it is adapted to the circumstances' My Lord, we believe that it is adapted to the circumstances; that it is required by the circumstances no one can doubt for a moment. The evil done by a section, a large section, of the Press is great and growing. It may be true that the worst papers are the small papers, but those papers are very numerous, and even some of the most important, those with large circulations, have pursued a policy of persistent misrepresentation, tending to undermine the loyalty of the people towards the King and the Government by law established. This goes on throughout the country. It is here a little and

there a little, but *'Gutta cavat lapidem non vi sed semper cadendo.'* We must put an end to this continual dropping of poison, and we must do so before it is too late."

The Hon'ble NAWAB SAIYID MUHAMMAD SAHIB BAHADUR said:—"My Lord, with your Lordship's permission I desire to say a word or two on the Bill before us as I do not wish to record a silent vote. I admit that the present evils are greatly due to the teachings of certain journals, and I think it is absolutely necessary to have some sort of control over that section of the Press which is believed to exercise an undesirable control upon the student class. It is to be much regretted that the Government were forced to have recourse to legislation such as proposed in the present Bill. At the same time I venture to think that any repressive measure will not be taken by your Excellency's Government, unless, as was pointed out by your Excellency in the course of the graceful and admirable speech in which you were pleased to welcome us to this Council, it is very necessary for the observance of the law which is the first duty of every Government to maintain. But I am sorry I am unable to support all the details of the Bill. No doubt it has been modified by the Select Committee in some of its important respects, but the provision to take security from all those who start new presses still finds a place in it. The object of the Bill as stated by the Hon'ble Sir Herbert Risley is to strengthen the measures which have hitherto been taken to deal with anarchy and sedition, and although I feel some doubt about it I sincerely hope that it will have the desired effect. I believe that the Bill when passed into law will be put into operation only on rare occasions and that it will not permanently remain on the Statute-book. I also hope the Government will very soon be able to eradicate and suppress the present evils which have unfortunately made an appearance in this country. My Lord, with this hope and belief I beg to support the Bill."

The Hon'ble RAO BAHADUR R. N. MUDHOLKAR said:—"My Lord, it is with feelings of profound sadness that I rise to take part in the necessary and important but none the less painful and depressing proceedings of to-day. It can be a matter of no pleasure to an Indian to survey and contemplate the present situation in the country and to have to admit that there has arisen therein a spirit, a propaganda and a movement, which are as dangerous to the people as they are to the Government. Murders, organized dacoities, attempts at train-wrecking, bombs and throwing missiles at passing trains must in any society and under any circumstances be a source of grave uneasiness and anxiety to the Government and to the leaders of the community. But when these deeds are of a political character, are political in their origin and have a political aim, and further, when they come from persons of respectable descent, whose characters are in other respects unobjectionable, and who are not guided by any considerations of pecuniary gain or personal aggrandisement, who show a recklessness and daring not seen in the ordinary criminal, the matter is of infinitely graver import, rouses the most distressing apprehensions and well nigh produces despondency. To the Government this means that over and above the duty of keeping down the ordinary criminal element, which infests every society more or less, it is called upon to cope with a far more dangerous malady, the appearance of a spirit of revolt against it among sections of the community which ordinarily range themselves on the side of law and order, and are even now interested in the maintenance of law and order. The assassinations which began at Mozufferpore and culminated the other day in the foul murder in the High Court, the bombs, the train-wreckings and some of the dacoities are all, it must be admitted, connected—connected that is not in the sense that they are organized by the same individuals or associated individuals, but that they are the products of the same set of doctrines, the same sentiments and views aiming at the same object. It is only natural that Government should insist upon putting these down. No sensible man can deny that it is necessary for Government to do so.

"The people of this country are equally, I would say even more, interested in the suppression and extermination of anarchy and terrorism. To those

Indians who have been striving to obtain, by peaceful development, a higher political status, an assimilation, as much as circumstances would permit, of Indian citizenship to British citizenship, it means not only a serious immediate interference with their programme, but possibly its complete destruction and the impossibility of the efforts of the sober men of both the European and Indian communities that all should work for the good of India and the whole British Empire. We are fully alive to the fact that the withdrawal of England from India means rapine, bloodshed, misgovernment, anarchy—the destruction of everything that makes life worth living. Not only the progress but the very existence of Indian society is threatened by the anarchist propaganda.

“My Lord, what makes us most uneasy is that it is among the youth of the country, the members of the rising generation on whom all our hopes are centred and for whom we have to work and labour and strive, that this anti-social movement is spreading. The number affected till now is very small—might be called insignificant, a mere drop in the ocean of Indian humanity. But this drop—this microscopic minority—comes from among those who constitute the intellectual cream of the nation. The boys are mostly from the middle classes, who form the backbone of the community and represent its intellectual activity and moral worth. As I have just said, my Lord, to us the rescue of these raw and impressionable minds from the dangerous propaganda of the revolutionary school is a most momentous matter.

“I must also with grief admit the existence of that equally dangerous but more insidious poison, the dissemination of sedition, the spread of the feelings of hatred of British rule and antipathy for the British people, by rousing and inflaming the prejudices and passions of the people. Criticism of the most unsparing type, keen, searching, vigorous, is wanted, as much in the interest of the Administration as of the people. But it cannot be tolerated that under the guise of criticism the very foundations of Government should be undermined and its smooth working endangered. This undermining process is, it must be admitted, carried on by some persons. Neither the spread of the revolutionary cult, nor the creation of an atmosphere of race hatred and enmity, will conduce to the good of the country. Nothing but disaster will flow from them. And they must be put down. The existing substantive law is comprehensive enough to secure punishment of anarchical methods and all forms of sedition. But its machinery is slow for times of great excitement, and what is more, it is not efficacious for preventive purposes, I am sure Hon'ble Members will admit that prevention is far better than punishment and that it is our duty to save these young men from moral poisoning.

“I have, therefore, with great regret and with very great reluctance, been forced to the conclusion that effective action of some such kind as that proposed by this Bill is imperatively needed at the present juncture. On the other hand, we ought not to lose sight of the fact that nowhere in the British Empire is a free Press more needed in the interest of the ruling Power itself than in India and that the proposed legislation is likely to seriously interfere with the free expression of opinion. These are considerations which cannot be lightly treated, much less disregarded. But as there is a far greater danger, a far more serious evil actually existing, which, if not eradicated, means the disorganization, possibly the disruption of our society; there is no option but to incur some risk of improper exercise of the power given by this law. My Lord, open opposition to this Bill and private misgivings about its essential features are far less intense than what they would have been at other times on account of the confidence and faith reposed in your Lordship's Government. All the same, there is considerable apprehension among the members of the educated community that the present measure, while it would be ineffectual to strike down anarchism, would curtail the liberty of the Press. There is some risk of this kind, I cannot deny. But, as I have said just now, in view of the far more serious actually existing evil, this risk must be faced. I only hope and trust that the extraordinary power which would be conferred by the law on the Local Government would not be lightly resorted to.

“There are one or two matters in regard to which I would at the proper time suggest modifications. But there is one question which might be called

a question of principle which I would beg to submit here to the Council, and that is the period for which this law is to remain in operation.

'The evil which the Government and the Indian community are called upon to grapple with, is not an old and persistent one. It is of recent origin and is of the nature of a temporary aberration. For exceptional circumstances, exceptional remedies are required, and are permissible. But they should not, I submit, be continued a day longer than absolutely necessary. The control of the Press by the executive and the exclusion of the jurisdiction of the ordinary Courts of Law are, nobody can deny, departures from the fixed principles and the well settled policy of the British system of jurisprudence. They are, if I may say so, opposed to the very genesis of that jurisprudence, nay to that of the British constitution itself. I earnestly ask the Council to consider the desirability of permanently substituting executive control for judicial remedies and excluding for all time to come the jurisdiction of the Courts of Law. I do not deny that exceptional times like the present may necessitate the adoption of a more summary procedure and sharper methods than what are suitable for ordinary times, just, as even in England, the suspension of the Habeas Corpus Act has been found necessary at times, or, as in ancient Rome, the Senate and the Comitia were superseded in times of danger by a Dictator. My Lord, we have the precedent of the Irish Crimes Act, and it can safely be followed. My exact proposals in this matter I shall at the due time lay before the Council

"There are certain matters, having a bearing on the whole question which I would beg Your Excellency and the Hon'ble Members of the Council to take into consideration. While it is true that the spread of revolutionary doctrines and anarchical methods have made no slight progress during the last five years, and while the activity of a certain section of the Press in the dissemination of sedition has considerably increased during the same period, the general tension which existed in the years 1901 to 1905 or 1906 has been to some extent relieved. The hopelessness, the pessimism and bitterness born of deferred hopes and despair, the serious apprehensions as to whether the solemn pledges of Parliament and the promises given by Royal Proclamations may not be after all set aside, which then characterized the writings of even the moderate section of the Indian Press, have greatly disappeared under the influence of the wise, liberal and generous policy of Your Excellency's Government and the present Ministry. With particular acts and particular measures fault is no doubt found, and criticism is freely applied to them. But Your Lordship and Lord Morley have revived the buoyant faith in British justice, good faith and liberalism which had been rather rudely shaken during the five years which preceded Your Excellency's Viceroyalty. I ask permission to quote only one instance to show how great has been the lessening of this tension and how great is the confidence reposed by many typical educated Indians in Your Lordship and the present Secretary of State.

"The *Indian Patriot* of Madras, one of the ablest dailies conducted by Indians, said in a recent issue —

'If Lord Minto now proposes a measure, the general predisposition will be in its favour, and this is due to the confidence which His Excellency has inspired in his sympathetic regard and solicitude for the people. He has acted throughout as though he were determined not to go beyond actual necessity in enacting new penal laws. And so far as there is actual necessity, there will be no disposition among reasonable people to oppose any reasonable proposal. It will be widely acknowledged that if the Government are now obliged to introduce more repressive measures, the fault is not theirs altogether. If the crimes that had occurred were not repeated as they have been, as the Viceroy himself said, he would have let by-gones be by-gones. But in the face of the further occurrences, of the most diabolical and the most dastardly crimes, such an attitude is impossible. Nobody can expect Government merely to look on when crimes are repeatedly perpetrated. If they do so, they will justly deserve the blame for inattention to their grave responsibilities. But they have also to see that there are people interested in suppressing the Indian Press, and to them, almost anything is good enough justification for such suppression. The public in India are bound to take a just view of both aspects, the aspect

which faces Government and the aspect which appeals to us, and to reconcile both as best as we can, always recognizing the imperative necessity of breaking the power of the anarchical gang'

"I can quote passage after passage from newspapers and periodicals published in the different provinces to show how in spite of the exacerbation in certain quarters the general situation is more satisfactory than it was three or four years ago. My Lord, distrust in Government, antagonism to it, or cantankerousness towards individual officers, is not the normal attitude of the educated Indians. And just as the general sullen discontent and dissatisfaction which filled the air three years ago have appreciably diminished under the influence of the policy which dictated the new constitutional reforms, may we not hope that a large number of those now writing or speaking with unjustifiable violence, will return to sobriety and reason, if, along with firm measures adopted to repress sedition, action is taken to modify those measures which have caused popular dissatisfaction or injuriously affected popular interests. A few reprobates may be incapable of being touched by kindness or generosity, but the majority of those who have strayed away from the path of duty, wisdom and propriety are not, I firmly believe, my Lord, beyond redemption, if conciliation is joined to firmness."

The Hon'ble SIR VITHALDAS D. THACKERSEY said:—"I am coming from a part of the country which is engaged in industrial pursuits and belong to a community which is not usually engaged in political agitation. At the same time we all consider the liberty of the Press to be very sacred, and appreciate the great advantages of a free Press in a country like India. At the same time we cannot shut our eyes to the exigencies of the present situation. During the short time that I was in Bombay, after the first meeting of the Council, when an indication was given in Your Lordship's speech of some such measure to be brought before this Council, I took special care to gather the opinions of several leading men in Bombay and Baroda; and I must say that all of them admitted with regret that after the mad acts of our own anarchists, every well-wisher of the country and the supporter of law and order has no other course open to him but to strengthen the hands of the Executive Government to wipe out the poison which is being disseminated broadcast. At the same time there was a general feeling that in any measure that may be brought forward care should be taken to protect the innocent. On going carefully through the Bill it cannot be denied that when extraordinary powers are proposed to be given to the Local Government, every care seems to have been taken to secure full justice to the aggrieved party by an appeal to the highest judicial tribunal in the land.

"My Lord, there are however one or two points which I should like the Council to consider. The Government have properly excluded the present keepers of printing-presses and the present publishers of newspapers from the liability of depositing security: and I think that that principle should be further extended to all new concerns. We have to be careful that no action of ours should entail hardship upon the growth of harmless small presses though conducted by the poor but for their honest means of livelihood. The other direction in which I should like the Bill to be modified relates to giving an opportunity to the accused to submit an explanation before any judgment is passed against him. Circumstances may arise where a satisfactory explanation may be forthcoming and an unnecessary and unpleasant action may be avoided. If the present distinction between the existing and the future presses is to be retained, I think explanations should be added to sections 3 and 8 that a mere change of a keeper of an existing printing-press or publisher of an existing newspaper, owing to death or retirement, will not count as a new registration under this Act, provided no offence has been committed by him. Unless such explanation is added, in course of time the keepers of the existing printing-presses and the publishers of newspapers shall have to deposit security, and I may say that in that eventuality it will entail a great hardship upon many honest pressmen of small means. With these objects in view I have given notice of

certain amendments which I will move at the proper time. As I have said in the beginning of my speech, exceptional circumstances have arisen and the Council should with a full heart support the Government to meet the situation. But, at the same time, in our anxiety to remove the evil, we should not lose sight of the possible hardship our action may inflict upon honest people whom it is not the desire of Government or this Council to punish."

The Hon'ble MR. ABDUL MAJID said — "My Lord, I rise to support this Bill. It is said that this Bill is exceptional, but, my Lord, the circumstances are exceptional at the present time also. My opinion, and my humble opinion, my Lord, is that by passing this Bill no doubt an effective control would be had over the Press, but the real question is whether the real evil will be touched. The real evil is the spread of the poison of anarchism among the people of this country, and, my Lord, I submit that some measures should be devised to uproot that poison from the soil of India. My Lord, there should be an effective control over the Press, but at the same time there will be this difficulty. At the present time we only know the ideas current in this country through the medium of the Press, but when such an effective control of the Press will be held by the Executive, is it not possible that at the same time these feelings will go underground and the Government will have to be vigilant, and they will at the same time have to be more cautious, in order to find this underground current of ideas? However, my Lord, these are matters which Government know much better than we who are in this Council today, and we ought to support every reasonable measure which the Government think necessary in order to meet the present circumstances. If this is the idea of Government, that the provisions made in this Bill are sufficient to stop the spread of anarchical ideas among the people, then I for one will give it my full support.

"Now, my Lord, coming to the Bill itself, any impartial observer will see that no doubt there are changes in the Bill, and that a good deal of power is going to be given to the Executive, but it seems to me that the Bill has got safeguards, and such safeguards which in my humble opinion will save the innocent quite well. We have got this much in the Bill that if any action is taken by the Local Government and anybody is aggrieved by it, he can go to the highest tribunal, and have the matter settled and decided and tried by the highest. What better safeguard do you require than that? My Lord, it is said that the Bill will be a sort of check on the liberty of the Press, but I think that, instead of being a check on the liberty of the Press, it will be a sort of assistance to those who want and a sort of lesson to those who are in duty bound to keep the dignity of the Press. It is the duty of all to support loyalty. It is those who do not realize their position, that write things which are disloyal, things which may cause disaffection, things which may cause the spread of disloyalty among the people of this country. It is said at the same time that the objects of this Bill can be secured by recourse to the provisions of certain old Acts, but it is well known that when we come to a judicial trial, things are done there, things are put there publicly, which, instead of stopping, spread the same ideas all over the country. I think that the summary remedy provided in the Bill is much better than the cumbrous machinery of a judicial trial. My Lord, with these few remarks I support this Bill."

The Hon'ble BABU BHUPENDRA NATH BASU said — "My Lord, in rising to address the Council on this occasion, I must say I feel no small amount of hesitation. The outrages that have tarnished the fair fame of the country for the last two years have made our task, the task of those who seek for ordered progress and constitutional reform, one of extreme difficulty and of some danger. I do not fear the danger, but I feel the difficulty. I cannot escape the sense of shame and the weight of sorrow. Those misguided youths who have belied the teachings and traditions of the Hindu religion, who have disregarded the dictates of humanity and transgressed the bounds of reason, they little know what immense harm they have done to the cause of their country and how heavily we are handicapped today in our work. I feel that in the present crisis, with the memory of recent outrages in our mind, the Government may take whatever

powers it pleases. The bare narrative of the crimes with which the Hon'ble mover of the Bill has contented himself is enough to call for a strong and stern remedy. That a remedy must be found and rigorously applied for this new evil in Indian life, we are all agreed. But, my Lord, the question is, does the remedy lie in the measure before us today? I shall assume for the purpose of my argument that there is throughout the Indian Press such a spirit of hostility to Government that the whole Press must be put under the control of a special law: I shall assume for the moment that the Press is silenced or banished. I shall assume that the English rulers of India succeed in effectually stifling her voice. What then? Will it stop the lawlessness, the violence which we all condemn and deplore? If it did, though repulsive to my instincts as a British subject, even though born under an Eastern sky, I would welcome it with all its drawbacks. My Lord, the history of other countries where the experiment has been tried of keeping the Press under severe control ought to serve us as a guide. Notwithstanding the strictest censorship Russia has not been able to banish anarchy from her midst. The roots of anarchy go much deeper than the ephemeral pages of the periodical Press: the effusions in the Press are merely the foam on waters agitated by causes working far below the surface. The literature of the French Revolution was not its cause, but merely its accompaniment, its exponent if you will. I do not think, my Lord, the present law will protect us from the anarchical crimes with which we are threatened, nor will it stop the insidious work of those who are trying to sow the seeds of hostility against British rule in India. They work in the dark and away from the public gaze: they avoid meetings and are gathered to conspiracies by forces which a legislative enactment can hardly reach. The parasite which produces the fever in the blood must be killed: temporary makeshifts are of no use. My Lord, on an occasion like this it may be permissible to quote Bacon, the philosopher and man of the world combined. 'The surest way to prevent seditions is to take away the matter of them, which is of two kinds—much poverty and much discontentment.' My Hon'ble friends must have noticed that most of the youths who have committed the crimes had passed or left the stage of the student and were drifting on the uncertain currents of chance to find some safe haven or refuge. We read, my Lord, from time to time accounts of young men committing suicide because unable to maintain themselves or their family: what inducement to them to cling to life? My Lord, this is neither the time nor the occasion to emphasize the fact that there is a great deal of discontent in the country, but it cannot be overlooked. During the years preceding your Lordship's administration, an amount of irritation was created, the like of which it would be hard to recall in the history of India. The people were treated with contempt and their aspirations with ridicule: to these must be added the aloofness of the bureaucracy, its assumption of superiority and its indifferent disregard of Indian sentiment. The middle classes felt most severely the weight of the iron hand. New aspirations had been aroused. Japan had made a triumphant vindication of the honour of the East and shown the capabilities of Eastern races. Persia and Turkey had already shown signs of reviving life, and China was rousing herself from the slumber of ages. In India things seemed dark, and for the moment people despaired. Young men who had travelled to Europe, America and Japan came back filled with new ideas. Without experience of the conditions of the Indian polity, they cut themselves away from the recognised leaders of Indian thought and formed organizations of their own: to these they were able to inveigle boys and youths who were brought up in high ideals of social life, permeated by the asceticism and purity which characterize the middle classes of India: with nothing to do and nothing to lose, except a life which to them was of not much value, they have fallen easy victims. They have taken to a life which is cut off from the world: they have taken to studies, which are not of the mundane and have been worked up to a state of ecstatic fanaticism. They are not affected by what the world says, by what the newspapers say: they have their own teachers, who give them eclectic instruction which they seem to follow blindly, and the proposed legislation cannot reach them. Apart from the ineffectiveness of the proposed remedy, its drawbacks

if not dangers, are very great. I take it from the assurance given by the Hon'ble mover, from the general character of your Lordship's administration, that there is no intention to curb the legitimate liberty of the Press in India, no desire to check the growth of knowledge, no desire to circumscribe the expansion of the mind of India, and that on the contrary there is every desire to safeguard these great interests. My Lord, English rule in India would be intolerable alike to the Englishman and the Indian if India were kept only as a preserve for the middle classes of England, only as a hunting ground for the adventurer or as an untapped field for the capitalist. Englishmen at all times have recognized that England has a mission in India, the mission of elevating India from her present position and enabling her to take a place in the comity of nations. My Lord, these are not mere idle sentiments a long series of distinguished Anglo-Indian administrators have fully recognised the responsibility and solemnity of the mission; our late Queen, who through a long and brilliant reign bound India with chains of love to the Throne of England, was its most eloquent exponent, and our gracious Sovereign, to whom India must be a living reality, has emphasized in his latest message to the Indian people and Princes this aspect of British rule in India: it is this aspect which has reconciled to foreign dominion the intellect and the military ardour of the Indian populations, and it would be a disaster indeed if anything were to obscure it. My Lord, I cannot conceal from myself the uneasy feeling that the Bill we are going to enact into law today will have this effect. It will in the first place levy a tax on knowledge it must be known to the Hon'ble mover that most of our Pressmen are very poor, that many of the papers do not pay and the printing-presses hardly suffice for a bare livelihood for their proprietors the exceptions are so very few indeed. This deposit in advance which the proposed law requires will render the expansion of presses in India a matter of very great difficulty. The proprietors of printing-presses in Bengal, many of whom I know, are mostly poor men and devoted to the cause of learning. My Lord, there are many and striking differences in the ideals of life between the East and the West. One is that in the East, wealth has never been looked upon as the criterion either of gentility or respectability. Poverty in India has never been looked upon as a crime, for a man who can afford to be wealthy, it is an honour to be poor this class of press proprietors will be gone the cost of publication will increase, cheap school books, cheap periodicals and literature will go, and the progressive diffusion of knowledge will suffer a severe set back this will be due not only to the inability to provide a deposit which may amount to Rs 5,000 for the printer and the publisher, but also to the apprehension that if the deposit can be scraped through, it is liable to be forfeited at any time. My Lord, the Hon'ble mover said that the existing presses will not suffer, will not be called upon to make the deposit unless they offend. My Lord, who is to require the security to be given? The Local Government the examples in which a newspaper may offend have been given by the Hon'ble Home Member in his introductory speech some of the allegations in newspapers and political writings which he finds fault with and on which in some degree he bases the present measure are as follows—I quote his own words 'the Government drains the country of its wealth, it has impoverished the people and brought about famines on a scale and with a frequency unknown before its railways and canals have brought malaria, it has deprived the Indian artisan of his trade, it allows Indians to be ill-treated in the colonies, it levies heavy taxes and spends them on the army,' and so on. My Lord, each and every one of these statements has been made by distinguished Anglo-Indians and Indians whose loyalty is unquestioned. I do not seek on this occasion to justify or refute them. The famous expression 'bleeding India to death' was Lord Salisbury's. Commissions appointed by the Indian Government have expressed the opinion that malaria has followed in the wake of the railways and canals. An English historian of no mean repute has shown how the Industries of India were ruined by legislation in England, and even now at the bidding of Manchester we are levying countervailing duties on our own manufactures. Lord Ampthill, who once held the office which your Lordship is occupying today, has pleaded in language of

eloquent pathos for the Indian in South Africa. If the statements in the Indian Press summarized by the Hon'ble mover justify the introduction of this measure, they will also justify the taking of security from papers already in existence. No newspaper dealing with politics will escape, no press which publishes books on economics will escape, no public man, whether he was the late Marquis of Salisbury or that aged and veteran servant of India, Dadabhoy Naoriji, whom Indian rulers delight to honour, would escape, and I am afraid to think whether Lord Morley himself would be able to avoid the operation of the law. My Lord, my Hon'ble friend has referred to the Press legislation of 1878 and to the speech of Sir Ashley Eden which had preceded that unfortunate enactment. My Lord, I have not seen the extracts on which Sir Ashley Eden based his animadversions on the Vernacular Press. And my testimony, even if I had seen them, would not much avail. I shall take the liberty to quote Mr. Gladstone to show that those extracts were not so dangerous after all. Mr. Gladstone said in the House of Commons : ' they (the people of India) have or think they have plenty of causes of complaint. I am sorry to say I regard this Press Act as one of the most salient among them : but as I observe most of all from reading extracts sent home in order to make a case for the Act, all these complaints in India appear to me to be particular complaints. They complain of the errors of Government just as we complain of them in this country.' Yet on the strength of these extracts the Government here passed the Press Act of 1878, and the statements of officials then made based on these extracts have been dug up from their grave after the lapse of thirty years in support of the present measure. My Lord, this shows the danger to which the Indian Press will be exposed under the new law. If a man with the breadth of view and wide culture of the Hon'ble mover, a profound student and scholar, can take exception to the Press on grounds like these, what chance is there for the Press when the Secretary of a Local Government in times of panic, in the hurry of multifarious duties, has to decide the fate of a journal submitted as offending by the Magistrate of the district? The result will be that at no distant date most, if not all, Indian presses will have to furnish security or go; and knowing the conditions of my country as I do, I feel certain that they will go, security or no security. My Lord, the law indeed proposes to provide a safeguard but what is the value of that safeguard after all? How many press proprietors in India will be able to afford the expense? Very few indeed. How many newspapers will be able to stand extinction for the period for which it may remain suspended? I shall be surprised if any will stand it. Therefore I said, my Lord, that the effect of the legislation will be to enhance the cost of knowledge, to restrict its growth, to narrow its sphere and so extinguish the indigenous newspaper Press of India, the result will be disastrous. My Lord, I will take the liberty to quote from the memorable reply which Sir Charles Metcalfe, the liberator of the Indian Press, gave to a deputation which waited upon him :—' It rests with them to show that the communication of knowledge is a curse and not a benefit and that the essence of good government is to cover the land with darkness : for otherwise it must be admitted to be one of the most imperative duties of a Government to confer the incalculable blessing of knowledge on the people, and by what means more effectively can this be done than by the unrestrained liberty of publication and by the stimulus which it gives to the powers of the mind?' Continuing, he said, ' if their argument be true, the spread of knowledge may eventually be fatal to our rule in India I close with them on that point, and maintain that whatever may be the consequence it is our duty to communicate the benefits of knowledge. If India could only be preserved as a part of the British Empire by keeping its inhabitants in a state of ignorance, our domination would be a curse to the country and ought to cease.' My Lord, I am quite sure your Lordship, who has throughout your rule shown a generous appreciation of the problems of Indian administration, does not want to go back upon these principles. The statesman who is at the helm of Indian affairs in England will not go back upon them, and I feel confident that your Lordship has given sanction to the present legislation in the view that it will not have the effect of stifling the Indian Press I have ventured to show that that

view is not correct. My Lord, I do not know what are the actual materials which my Hon'ble friend has got before him. I frankly admit that the writings of a certain section of the Press require to be checked, they have mistaken license for liberty. I believe however that their number is not so large as to call for a special legislation in which the loyal but the outspoken section of the Press will be equally involved. My Lord, I have before me statistics for the year 1902 the number of registered printing-presses was 2,192, the number of newspapers 708, the number of periodicals 575, the number of books published in English 312, in Indian languages 7,081, these numbers must have considerably increased since, but there were only 47 cases in which it was thought fit to take proceedings, all of which succeeded. The *Sandhya* has gone, the *Jugantar* has gone, the *Bande Mataram* has gone, and others which offended against the law have also gone. If we have got plenary powers under the law as it stands, and we have the powers of confiscating the press, of having the offenders tried by special tribunals, powers which have never been thwarted, why have a measure which may have an effect, and to my thinking will certainly have the effect, which is not desirable? If it is the publicity of a trial, take steps to avoid publicity; if it is the delay in the proceedings, take steps to curtail it. My Lord, what we complain of is that the Bill provides punishment before trial, which even the Austrian Government does not, a temporary censorship would be better, because, while it will emasculate, it will not extinguish the Press, it will stifle criticism of Government, but not put a tax on knowledge. My Lord, it would be impertinent in me to dwell on the advantages of a free Press, specially to a Government situated as the British Government is in India, it is an institution with which the greatest names in England are associated, it is the foundation of its civic liberty. Consecrated by the impassioned and matchless eloquence of Milton and vindicated by the writings of Burke and Mill, its growth has been unimpaired in England for the last 300 years. While in India for 70 years or more we have enjoyed its blessings and knowledge has grown more and more. My Lord, I have shown that the present situation, the anarchical movement, is not owing to the license of a particular section of the Press. I do not deny that such license has been harmful and must be put down, but I maintain that the existing laws are sufficient, if not, let us strengthen them. But, My Lord, I cannot agree that a measure should be passed which to my mind threatened the very existence of an indigenous and free Press in India, which will choke the springs of knowledge, which will bar the road to progress and which will not after all secure the object in view. The Press may go, but will that stop the mischief? I shall take the liberty to quote Lord Morley himself. In December 1908, from his place in the House of Lords, he said 'supposing you abolish freedom of the Press or suspend it, that will not end the business. You will have to shut up schools and colleges, or what would be the use of suppressing newspapers if you do not shut the schools and colleges? Nor will that be all. You will have to stop the printing of unlicensed books. The possession of a copy of Milton or Burke or Macaulay or of Bright's speeches, and all the flashing array of writers and orators who are the glory of our grand, our noble English tongue, the possession of one of these books will on this peculiar and puerile notion of government be like the possession of a bomb, and we shall have to direct the passing of an Explosive Books Act. All this and its various sequels and complements make a policy if you please. But after such a policy had produced a mute, sullen, muzzled, lifeless India, we could hardly call it, as we do now, the brightest jewel in the Imperial Crown.'

"My Lord, it will be impossible to touch the picture drawn with such master strokes without spoiling its effect. To the British nation British rule in India may be a source of glory, of prestige, of rank in the scale of nations: to us it is our very life, and what is dearer than life? To us it is our only hope, our only hope of a brighter future for our country: it is to us the rescuing hand held out to a drowning man in the darkness of the night. To us it means much more than Empire, much more than glory and fame and prestige: and because we want that this rule should continue on an ever-widening base, welding the peoples of India into a nation, justly proud of its comradeship with Eng-

land, possessing common rights, [common privileges and sharing common dangers, that I venture to ask that this Bill may not pass into law. Your Lordship has inaugurated a noble scheme of reform; let it have a fair chance, let it bring peace to my distracted country; and in the meantime we shall support Your Lordship's Government in any measure it may bring forward to punish but not to anticipate the guilty."

The Hon'ble MR. LYON said:—"My Lord, I am sure that many of those who support the present Bill will be fully prepared to sympathise with those Hon'ble Members who have expressed regret that the first measure passed in this new Council should affect the public Press. Indeed, it is probable that the sentiments that have been expressed in this connection would find many echoes in any assembly of His Majesty's subjects in India. But at the same time it seems essential that in the circumstances in which we find ourselves placed we should as an assembly of practical men face the problems with which we have to deal and descend from the heights to which some Hon'ble Members would wish to lead us. We have no hope that by this measure we shall extirpate anarchy, but we do believe that we shall strike at treason in its beginnings by trying to control seditious teachings in the Press

"I think, my Lord, that many others must have waited, as I did, in the expectation that in the speech of the last Hon'ble Member who spoke, and in some of the other speeches, we should have found some acknowledgment of the firm and unwavering adherence to the great principle of the liberty of the Press which has been exhibited by the Government of India during the past three years, and some indication that the fact had been realised that, in spite of great provocation and serious abuse of the privileges which that liberty carries with it, any curtailment of those privileges had been steadily refused. But although this outstanding factor in the present position has been ignored, and although the Government's previous record appears to have been forgotten, I think that there is ample evidence in this Bill of the scrupulous care with which these privileges have been regarded by Government and of the reverence for the principle of the liberty of the Press which it has shewn. Since the Bill has been introduced it has been examined by the public Press and it appears to have satisfied the most jealous scruples of liberal critics after a most thorough examination. Indeed, I think it would be difficult to find a measure which would combine any effective power to combat the present evils with such absolute security for honest and temperate critics. The Bill is in all essentials entirely preventive. It warns; it takes security; it does almost everything it can to prevent the commission and repetition of offences, before it raises its hand to strike. In the first place it asks for security from those who wish to start a new press. The privileges of which I spoke just now carry with them responsibilities which have hitherto been ignored. Persons who wield them should have some stake in the country, something to lose, and, in view of the present exceptional circumstances, it seems hardly too much to ask that they should give some security for good behaviour. There is no need to prove in this Council the necessity for such a provision, or to quote any of those articles which have given rise to this legislation. The methods of distilling the poison of race hatred are well known. These privileges have been used to blackmail the wealthy, to intimidate the weak, to extort subscriptions from zamindars and to enforce the boycott by means of social persecution, and the cruelty of that social persecution is not always present to those who have received training in Western methods. Ample security is given in the Bill for small presses which are to be started for literary, educational or religious purposes, and I doubt whether any Magistrate would be restrained in the exercise of his powers if he grants exemptions to such laudable undertakings. But Government ask that the responsibility attaching to public journalism should be enforced when it is employed to generate sedition, and I venture to suggest that the old theory of the public Press as a safety valve is no longer tenable in India. The papers with which we have to deal too often generate steam which can only find an escaping valve in crime

"The second object of the Bill is to meet offences in the large majority of cases with a warning and the taking of security. Surely these are lenient methods of dealing with such difficulties. Jurisdiction to deal with such cases is given to no less an authority than the Local Government, and the Local Government is answerable to the Government of India, and also I would note to its own Legislative Council, and I do not think that those Hon'ble Members who would deprecate any importance being attached to the control of the Legislative Council can be counted to be in the right, as all who have studied the methods of Parliament in England know what control, what pressure, what influence can be exercised by a reasonable and reasoning minority, however small, in that Parliament

"As for the offences which are made penal under this Bill, they were carefully hedged round from the very commencement by the carefully drawn section which deals with them, and they have come back to us from the Select Committee reduced in number and even more strictly defined. Read with the explanations which accompany them, I do not believe that there is one which Hon'ble Members will not hold sufficient to disqualify a printer or a publisher from his work, and it will be observed that it is only the repetition of such an offence which will find punishment under this Bill. In such circumstances, my Lord, I believe we shall be wise if we discount all the gloomy forebodings as to the results of this legislation which we have just now heard and if we look forward to a future when the youths of this country shall have been protected from the greatest danger that now assails their manhood, and when a healthier and more sane public opinion shall have rendered inoperative even the mild precautionary provisions of the present Bill."

The Hon'ble MR. SHAMSUL HUDDA said — "My Lord, it is not without feelings of considerable sorrow and regret that I feel myself constrained to support the principle and policy of this Bill. I realise, my Lord, that for every man who deserves the treatment which the Bill accords to him there will be ten or more who do not deserve it. I also realise that the Bill is likely to render editors of newspapers a little nervous and timid and thereby prevent to a certain extent that fair and free discussion of grievances which has done so much to improve the administration of this country. Whilst, however, realising all these difficulties, I feel at the same time that the circumstances at the present moment are exceptional and deserve exceptional treatment. If I felt, my Lord, that there is anything like widespread discontent among the masses of the people, I would have said that repressive measures are not suitable because they would only aggravate the feeling, but I feel that the dastardly crimes which have sent a thrill of horror through the length and breadth of this country are not sympathised with by the people and that those who are guilty of these crimes are irreconcilables whom no concession will reconcile. My Lord, although I do not think that the measure which is before us will prove an efficient check to the spread of sedition, the consideration that presses me most is this, that, if those who are responsible for the peace and good government of this country think that they require a certain weapon to cope with the evil, it would be a serious responsibility for the non-official members of this Council to refuse to them that weapon. It is for this reason, and for this reason alone, that I support the Bill."

The Hon'ble MR. KENRICK, K.C., said — "My Lord, it was not my intention to interpose in this debate at this stage at all. My views have already been expressed before the Select Committee, which it was my privilege to serve on. However, the utterances of the Hon'ble Mr. Bhupendra Nath Basu have drawn my fire, and I desire, my Lord, to answer very briefly some of the arguments which were put forward by the Hon'ble Member, which I venture to describe as fallacious, as specious, and as dangerous. In the first place, the Hon'ble Member referred us to the teachings of history. He instanced the case of Japan, he instanced Turkey and Persia. Well, my Lord, one moment's consideration will disclose the fallacy of drawing any argument from the historical view of things taken in Japan that is in no sense applicable to the present state here. The movement in Japan, my Lord, as is perfectly well known, was not in

itself a movement which in any way involved the subversion of the existing Government, and that, my Lord, is the object which is indoctrinated by the seditious portion of the Press, which it is the aim of the present Bill to control. Turkey again was aiming, as we all know, at securing an advancement on the path of progress by the substitution of a more modern constitution for the old ideas which had previously guided her and which were obviously crude and unsuitable to modern demands. Practically, therefore, there is no argument to be drawn from Turkey, Persia or Japan as regards the desirability or the reverse of the present measure. This Bill stands on its own footing: it has to meet circumstances which have arisen in this country. The Hon'ble Member said, and advanced it as an argument, that it will not destroy anarchy and that it will not prevent outrages. But, my Lord, is that any argument at all? Assuming that it will not—and, unfortunately, most of us suppose that it will not—destroy the existing anarchical sentiment that prevails in a portion of the community, is that any reason at all for not taking such firm measures as we can take to meet an undoubted evil? The Hon'ble Member said that the Press is not the sole cause of this. We may assume that it is not the sole cause of the present state of things, but it is a very marked contributory cause, a cause that has undoubtedly contributed to the present state of things, and, as such, it is necessary to control it. The Hon'ble Member spoke as though he were unaware of the torrent of anarchical literature which has unfortunately been flowing in this country during the past few years. He cited Mr. Gladstone's views as to the state of the Press in India at the time when Mr. Gladstone was speaking. That has no application to the present circumstances at all. It is obvious that Mr. Gladstone had not before him anything like the class of literature which too unfortunately is so prevalent at the present time in this country and has been for many years past. The Hon'ble Member seriously asked us not to 'choke the springs of knowledge'—as though indeed this measure, this moderately drawn measure, moderately drawn having regard to the circumstances at the present time,—could in any way choke the springs of knowledge. That is a misconception of the object and purpose of the measure which is at present under consideration. There is no desire, as was pointed out by the Hon'ble Member who introduced this Bill, to choke the springs of knowledge. On the contrary there is the freest possible room for criticism in every form. Fair and proper criticism will not come within the scope of this measure. But though the measure, as I submit, in no way tends even in the slightest degree to choke the springs of knowledge, as the Hon'ble Member said it would do, it may, and I trust it will tend towards choking the malignant attacks upon the Government which have been only too frequent in recent years.

"The Hon'ble Member spoke of the protection of the Press. He said that the Press must be protected. True but, my Lord, how about the protection of the public, how about the protection of the servants of the public, too many of whom have unfortunately fallen victims to the seditious doctrines that have been spread by a certain section of the Press? It is very well to sympathise with the Press as a whole, but we must have sympathy and a wider sympathy for the victims of the deadly teachings of the Press.

"The Hon'ble Member referred to extracts from the Press, and spoke as though they were very trivial and very unimportant in their bearings. As a matter of fact there is not one or two or a dozen, but hundreds or thousands of extracts from the newspaper Press of the last few years and which unfortunately is still continuing—extracts which, if I were to read here, would without any doubt be capable of one construction only, *viz.*, the most direct incitements to murder, direct incitements to rebellion and to subversion of British rule. And at the very least, a large number of them directly use such expressions as must have the inevitable result of inculcating the most deadly hatred of British rule and of British officials. It is to meet that continuous current which has been flowing, and is still flowing, that the present measure has been introduced.

"The Hon'ble Member, if I understood him aright, demurred to the representations made by the Hon'ble Sir Herbert Risley when he was introducing this Bill. Sir Herbert Risley stated, if I may say so, in the most moderate

language, certain of the evils which the Press undoubtedly had been preaching and the doctrines that it had been disseminating which are subversive of all lawful authority. Indeed I was struck by the extreme moderation of Sir Herbert Risley in making those references. He instanced a few of the evils which the Press were and still are continually preaching, but he by no means took as illustrations the most violent of the teachings which have been and still are being continually published and disseminated. One might point to thousands of extracts each one of which breathes the most deadly hatred of British rule. Some of them—I am referring for the moment to certain newspapers which have come under my notice but which are happily suppressed—directly incited, and in no unequivocal language, to the preparation of explosive bombs which they directed should be kept in every house. That is the sort of literature there was in the past. If at the present moment the utterances of the Press are less directly deadly in their nature, it is undoubtedly due to prosecutions which have put fear into that section of the Press. At the same time these prosecutions have been found ineffective to stamp out the continual current of abuse and calumny which the Press (a certain section of the Press and the one at which the Bill is aimed) still throw at the British Government and at British rule. If I were to read extracts that I have at my disposal it would make the blood of every loyal British subject boil with indignation.

"Then, said the Hon'ble Member, 'do not punish before you prove the individual guilty.' My Lord, the whole scope of this measure is—and this cannot be too strongly emphasized—preventive, and not punitive. It is to prevent the continuance and the recurrence of these hideous attacks that have been so violently made and which are obviously so subversive of all lawful authority in this country, that this measure is being introduced.

"And, lastly, the Hon'ble Member referred to the freedom of the Press. There is no one here who does not admire that elementary principle of the British constitution, the freedom of the Press. But this is very often misunderstood. The freedom of the Press means its freedom within the limits imposed by the law, and those limits are continually being exceeded by a certain section of the Press in this country. The fullest criticism is permitted by the law: the fullest criticism is still permitted by this measure, and will in no way be prejudiced. There is the utmost scope for the advancement of every legitimate argument, and the only class of argument which is cut out by the measure is that class of argument which it is desired effectively to stamp out, *viz.*, malignant misrepresentations and statements involving assertions of corrupt methods in the Government and in the officers of Government. Such statements cannot and should not be permitted, and it is the aim of the measure which is before this Council to stamp out, not free criticism, but the abuse of free criticism and the attribution to Government and to its officers of malignant and corrupt methods. And that being so, in the peculiar circumstances of the times, one must feel that it is a measure that will receive the support of every loyal subject, and that it in no way militates against the principles of the freedom and liberty of the Press."

The Hon'ble PANDIT MADAN MOHAN MALAVIYA said—"My Lord, it is perhaps an advantage that I rise to lay such views as I have on this Bill before the Council, after having had the benefit of listening to the many able speeches which have been delivered in connection with it. I regret, however, to say, my Lord, that having heard all those speeches, I am still unconvinced as to the necessity of this Bill or of dealing with it in the manner in which it is being dealt with. A great deal of regret has been expressed both in this Council and outside it that a measure of the extraordinary importance of this Bill should be dealt with in the hurry in which it is being dealt with. Reference has been made to the hurry in which the Vernacular Press Act was passed in 1878. My Lord, one mistake does not justify another. In the present instance, neither in the long and lucid speech of the Hon'ble mover of the Bill nor in the subsequent speeches that have been made has any explanation been offered as to why it is necessary to rush this measure as it is being rushed. My Lord, the great

advantage which the Government has thought it necessary to secure to the public in connection with measures which are brought before the Legislative Council in giving publicity to them is that those who are interested in the measures should have the fullest opportunity of expressing their opinions regarding them and of submitting them to your Excellency's Council in order that those opinions may be considered before deciding the final shape which the measures should take. As soon as this measure was introduced, it was referred to a Select Committee. The Select Committee have no doubt considered the Bill, but if there had been a general discussion in the Council of the principle of the Bill and the general lines of criticism had been known to the Committee, I am certain, my Lord, that it would have been a great advantage to the Select Committee in doing their work. I have received telegrams from my own province, from the President of the United Provinces Congress Committee, from the President of the Peoples' Association at Lucknow, and from the Secretaries of the Mahajana Sabha at Madras asking me to lay them before the Select Committee and your Excellency, and to urge that more time should be given for the consideration of the Bill. My Lord, it is not enough to say that the Bill has been published and that it has been before the public for three or four days. The measure being of the importance which it is, I submit that a great deal more time should have been given to the Press and the public to consider and to criticise the Bill particularly as no circumstance has been mentioned which could justify its being hurried through the Council.

" Now, my Lord, coming to the Bill itself, we are no doubt confronted by the outstanding fact, the unfortunate outstanding fact, that there have been certain anarchical crimes and outrages committed in this country. Every good man must deplore and detest these crimes. They are hateful in the sight of God and men, and they have been condemned all over the country in unmistakable language. If it were shown that any particular measure was necessary to extirpate the germs of anarchical crimes, I am sure the whole country would rise as one man to support the measure, and to thank your Lordship's Government for introducing it. But it is evident from all the remarks that have been made both by official and non-official members that there is very little expectation entertained that this measure will really have any substantial effect upon anarchical crimes. I do not deny that it may check the distribution of the poisonous literature which some newspapers have been indulging in; but that it will have any effect upon those men who have gone into the wicked camp of the anarchists or terrorists, I do not think many members entertain even the hope that it will achieve that result. That being so, my Lord, we have to consider what are the circumstances which justify the passing of such a measure as the one before us. The whole country, as I say, all decent people, are united, are of one mind with the Government in desiring that whatever measure may be necessary for the purpose of putting down anarchical crime should be adopted. But it must be shown that a particular measure is calculated to secure that object. The Hon'ble mover of the Bill said in his opening speech that he had to justify the Bill before the Council and to show why and how the laws which exist already are not sufficient to deal with the situation. My Lord, he referred to the murderous conspiracy which has come into existence, and he said that the outrages which that conspiracy had committed or attempted to commit were the direct result of the teachings of certain journals. The Hon'ble the Advocate General also, in the speech with which he has just now favoured us, spoke of the stream of poisonous sedition which has been passing through several of these journals. My Lord, the picture which the Hon'ble mover of the Bill has drawn of the existing situation would suggest a question in many minds as to whether there was any law in the land which could deal effectively or at all with the poison of seditious literature which was passing through the papers. One would imagine that there was no law which could deal with the abuse of the liberty of the Press as it was described in the speech of the Hon'ble mover of the Bill. But, my Lord, as the Council knows, there is already a great deal of legislation existing in our Statute-book which seeks to deal and which does deal with all abuses of that liberty. The Hon'ble Member began by saying that it was his duty to show why the Government could not be content to rely on the ordinary criminal law. He ended by

merely asserting, not proving, that that law was insufficient. I am sorry I did not find any explanation in the speech of the Hon'ble Member as to why these provisions had been found to be not sufficient or wherein they had been found to be insufficient. The Hon'ble Sir Harold Stuart has tried to make up for the omission and has said that section 108 of the Criminal Procedure Code has been found to be a useless weapon. He said that there had been three papers which had been convicted twice, two papers which had been convicted three times, and one which had been convicted six times. My Lord, a repetition of an offence by six papers out of a total of, I believe, nearly 800 papers in the country, does not show that there is not sufficient provision in the existing law to deal with cases of sedition or attempts to promote sedition. The situation therefore demands that before we give our assent to a new and stringent measure being placed on the Statute-book, the existing provisions of the law should be dispassionately examined.

Now, my Lord, there are two matters to which I would especially invite attention. The present Bill, as the Council has noted, defines what would be regarded as prohibited matter, and the publication of which would expose a man to the penalties or to the consequences which are described in the Bill. Among the matters so prohibited, as the Hon'ble mover of the Bill pointed out in his speech, are certain offences which are already provided for in existing Codes. Take, for instance, those mentioned in clause (a) of section 4 of the Bill, to incite to murder or to any offence under the Explosive Substances Act, 1908, or to any act of violence, these are fully provided for by Act VII of 1908—an Act for the prevention of incitements to murder and to other offences in newspapers. The Hon'ble mover said that it was thought advisable to include them in this Bill in order that the Government may, if necessary, take action of a less severe kind than that prescribed by the Act of 1908. I submit, my Lord, that the outrages that have been committed of late, would make one think that this was not the time when the Government would seek milder methods to deal with cases which fell within the purview of that Act. Clause (b) relates to the offence of seducing any officer, soldier or sailor in the Army or Navy of His Majesty from his allegiance or his duty. Section 131 of the Indian Penal Code already provides that any person who attempts to do any of these acts shall be punished with transportation for life or with imprisonment which may extend to ten years and shall be liable to fine. Then, my Lord, the third clause incorporates the provisions of sections 124A and 153A with the addition of an offence against Native Princes or Chiefs. And the clause which seeks to protect judicial officers serving His Majesty from being maligned or unjustly attacked. These, my Lord, are the most important provisions of the Bill. And I beg to invite the Council's attention now to the provisions of section 108 of the Criminal Procedure Code. Under that section any person who disseminates either orally or in writing or attempts to disseminate or in any wise abets the dissemination of any seditious matter, that is to say, any matter the publication of which is punishable under section 124A of the Penal Code, or any matter the publication of which is punishable under section 153 of the Indian Penal Code, or any matter concerning a Judge which amounts to criminal intimidation or defamation under the Indian Penal Code, that section provides that if any editor or printer or publisher or proprietor of a newspaper shall be guilty of any of the offences specified there, the District Magistrate or the Chief Presidency Magistrate shall have the power, with the previous sanction of the Governor General or of the Local Government, to call upon the person so offending to show cause why he should not be bound down with or without sureties to be of good behaviour for a certain period. I submit, my Lord, that this is a provision which should enable the Government to deal with cases of persons who disseminate seditious or other objectionable matter, who, that is to say, publish prohibited matter or such matter as the present Bill says will be prohibited matter. Then, again, as I have said before, there is the Newspapers (Incitements to Offences) Act. That Act was passed in 1908 after the writings of certain journals, to which the Hon'ble mover of the Bill I think referred, had led to the commission of some outrages. Now, my Lord, section 3 of that Act provides that where, upon an application made by order of or under authority from the Local Government, a Magistrate is of opinion that a newspaper contains any incitement to murder or to any offence under the Explosive Substances

Act, 1908, or to any act of violence, such Magistrate may make a conditional order declaring the printing-press used, or intended to be used, for the purpose of printing or publishing such newspaper or found in or upon the premises where such newspaper is or at the time of the printing of the matter complained of was printed to be forfeited, and to make such a conditional order of forfeiture absolute unless the person concerned appears and shows good cause against it. These two sections, my Lord, give ample power under the existing law to the Government to deal effectively and speedily too with persons who abuse the liberty of the Press. It has not been shown in what respects these provisions are insufficient, and I submit that justification for introducing a new measure has not been established. It may be said, my Lord, that the procedure and punishment provided by section 108 are insufficient to deal with cases of persons who repeatedly commit the same offence. I am unable to understand why in such cases also a repeated application of the provisions of that section should not put an end to the evil activities of such persons. But assuming that it would not, I submit that the proper course would have been to ask for an amendment of that section in order to incorporate more penal provisions to effect the end which the Government has in view and not to introduce a new measure.

"If, my Lord, the necessity of a new Act has not been established, then I submit that the matter should end here. Assuming, however, that a real necessity has been felt for giving greater power to the Courts, assuming also that the course of amending the existing Acts has for any valid reason not commended itself to the Government, and the Government feel in all the circumstances of the case that a new Act should be passed, I should like then to hear some explanation as to why a great, a novel, and, I submit with great respect, a dangerous departure has been introduced into this Bill against the principle of all the existing enactments which the Government has passed during the last fifty years and more. My Lord, under the Criminal Procedure Code, once the sanction of the Governor General or of the Local Government is obtained to proceed against any editor, printer, publisher or proprietor of a newspaper to require him to give security for good behaviour, the whole procedure which is regulated by the provisions of that Act is judicial, and the whole matter is left to be dealt with judicially by the Magistrate. So also in the case of the Newspapers Offences Act which deals with offences of a far more grave character. The Government passed that enactment less than two years ago and they considered it both just and wise to adhere to the principle of leaving it to the Magistrate and the Courts established by the Government to decide what matter fell within the definition of seditio and what did not. I do not understand, my Lord, why this new departure should have been made in the present Bill by which, instead of leaving it to the Magistrate to decide what matter came within the definition of prohibited matter and what did not, the Local Government is empowered to take upon itself to decide what matter is seditious without giving an opportunity for hearing to the person against whom it may so decide. I submit, my Lord, that this is a departure which is not justified by the existing circumstances of the country. The crimes at the prevention of which the Newspapers Offences Act aims are, my Lord, more serious, are certainly not less serious, than the crimes which it may be hoped that the present Bill may tend to prevent. That being so, I submit that if the Legislature has thought it right to leave it to the Magistrate to decide whether a newspaper contained incriminating matter within the meaning of that Act, it should have been left also to the Magistrate to decide what matter came within the definition of prohibited matter under the proposed law. My Lord, the Bill raises 'a political question,' to quote the weighty words of Mr. Gladstone uttered in the House of Commons in connection with the Vernacular Press Act of 1878, 'of great importance, of the utmost delicacy, namely, whether it is wise for the Government to take into its own hands and out of the hands of the established legal jurisdiction the power of determining what writing is seditious and what is not.' In the course of the same debate Mr. Gladstone observed that 'the most unfortunate feature which the measure presents is the removal of Press prosecutions from the jurisdiction of the judicial establishments of the country in order that they may be dealt with as matters of executive discretion.' The Bill

before us seeks to revive that feature of the Vernacular Press Act which was so justly condemned by Mr Gladstone. My Lord, the argument that in taking proceedings against offending printers or publishers under the ordinary criminal law there would be a great deal of publicity given to the offence and that would be a public disadvantage, is not a new one. It had been urged to support the Press Act of 1878. Speaking in reference to that argument, Mr. Gladstone said 'The argument that is made for the abstraction of these matters from the Courts of justice is one which strikes at the root of our policy, and the best part of our policy, in India.' It is said 'oh no, we will not prosecute in the Court, for if we do that the prosecution will bring these men into popularity, and the mischief of the prosecution will be greater than that of submission to the evil' My Lord, this argument has no greater force today than it had in 1878, and, I submit, it is not an argument which is worth considering in the face of the great danger involved in the departure which it is sought to make from the principle upon which the entire system of the administration of justice is built, and which the Government has followed throughout in enacting all its laws. That being so, I respectfully submit that if the Government feel that a new measure must be passed, this novel principle which has been introduced into the Bill should be eliminated, and power should be left to the Magistrate as in other enactments to deal according to law with what may be regarded as prohibited matter. There can be no possibility, my Lord, of the effect of this measure being weakened by adhering to the right principle it will still be quite as potent for preventing mischief as the present measure can be. The sanction of the Local Government will yet be necessary before any action is initiated, but once the proceedings have been initiated the matter will be left to be dealt with by the Magistrate acting as a Judge, and any order that he may pass will rightly and properly go up to the High Court for revision or in appeal. I may say here that I do not see why an appeal should not be allowed from an order asking for a deposit of security as well as from an order for forfeiture of that security. If an order is made by the Magistrate of the district or the Chief Presidency Magistrate and it is taken up in revision or appeal before a High Court, there will be a greater assurance in the public mind that the merits of the order will receive due consideration, than, my Lord, human nature being what it is, and the circumstances of the country being what they are, there would be when an order passed by the Local Government on the executive side will be brought up for revision before the High Court. So far then with regard to the necessity of the new measure and in regard to the new change of principle which it introduces. I submit, my Lord, that the necessity of it has not been proved, the justification not established.

"Let us now consider some other aspects of the Bill. The Hon'ble mover of the Bill has stated the objects of the Bill to be somewhat larger. He has stated that the object of the Bill is 'to provide for the better control of the Press or to confine the Press—the whole Press, European and Indian, English and Vernacular—within the limits of legitimate discussion.' My Lord, that clear statement of the object clears the ground to a great extent for discussion. It naturally gives rise to the question whether the condition of our Press, European and Indian, English and Vernacular, in this country is such as to justify any legislation to keep it within the limits of legitimate discussion. My Lord, the Hon'ble mover of the Bill has given us a history of the liberty of the Press in this country. He has told us that during the last seventy years, with the exception of two short periods of one and three years respectively, the Press in India has been free: he has told us that these two periods were, one the short period in the dark days of the mutiny, and the other the period of the Vernacular Press Act. My Lord, the Vernacular Press Act was repealed within three years and action was taken under it only once. We can take it then that there was no necessity for Government to restrain the liberty of the Press in actual practice. Up to the year 1907, the Hon'ble mover of the Bill has said that there had been only sixteen Press prosecutions. My Lord, I ask the Hon'ble Member to say if in Austria to which he referred, or in any other country to which he might refer, the Press has as a whole behaved better or been conducted more respectably than in India

during the last seventy years. The remarks of the Hon'ble Member would lead one to think that the Press had been offending for a long time: he has spoken of the great forbearance which the Government exercised in dealing with the Press: he spoke of that forbearance as extreme: he said that some people thought it was excessive: and he complained that in spite of that much forbearance being shown, the Press did not mend its ways but went from bad to worse. My Lord, if the picture drawn by the Hon'ble Member were true, it would have cast a most serious reflection upon the administration. If it were true, it would show that while the administration saw that the Press was going steadily from bad to worse, it did not take any steps to check the evil course. But happily for the Press and for the Government we have in the remarks quoted by my Hon'ble friend Mr. Dadabhoj the testimony of more than one very high official of Government that the Press of this country has as a whole behaved respectably and honourably and that it has given little ground for complaint. I will not quote, my Lord, what the Hon'ble Member may regard as ancient history. Sir Herbert Risley gave us the history of the Press up to the year 1907, and he then drew attention to the Resolution which Your Excellency's Government was pleased to issue in that year for the better control of newspapers. In that Resolution it was stated that 'the Governor General in Council has no desire whatever to restrain the legitimate liberty of the Press to criticise the actions of the Government, and he would be most reluctant to curtail the freedom of the many well-conducted papers because of the misbehaviour of a few disloyal journals.' My Lord, barely two years have passed since your Lordship was pleased to graciously acknowledge that the many papers in this country were well conducted and that the journals which were disloyal were a few. I venture to say, my Lord, that that is the position even today. With the regrettable exception of a few papers in some parts of the country, the great bulk of them are still well conducted. If this is so, the case which my friend sought to make against a general restriction of the liberty which the Press has enjoyed, the case which he sought to make for taking legislative action to confine the whole Press within the limits of legitimate discussion, has not, I submit, been made out. Your Lordship will be pleased to remember that the last two years and a half have been a period of exception. Up to the beginning of the year 1907, or I will go back a little earlier, up to nearly the end of the year 1905, the Press generally behaved in an excellent manner, even in the province of Bengal. I do not think that there were many papers till then the conduct of which could be much complained of. My Lord, we all know then the unfortunate but momentous event which occurred about the end of 1905. We all know the act of violence, as many millions of people believe it, which was committed by Lord Curzon's Government in partitioning Bengal against the prayers and protests of the people. And it is from that time, my Lord, that the evils which we are now deploring, and which have led to several deplorable results, largely date their origin.

"My Lord, it was in 1906 that a certain portion of the Press assumed a tone of bitterness and even hostility which continued to grow also in 1907, but I submit, my Lord, that that evidenced abnormal condition. The causes of the change in the tone of the Press were discernible by everybody who cared to think about it. We regret them, but we cannot overlook them. It was due to the cause to which I have referred and to the bad feelings which were excited in the year 1905 and in the succeeding year by certain official acts and utterances. I am sorry to say therefore that the régime of your Lordship's predecessor was largely responsible for diverting a section of the Press from its honourable course into a course which has caused immense pain to all lovers of the country, to all lovers of peaceful progress and good administration. My Lord, the evil is there, but in dealing with it, in taking steps to extirpate it, let us remember the causes which have brought it about, so that our judgment may be tempered as the circumstances of the case may require. Let us remember also that since the time these newspapers began to abuse the liberty which they enjoyed, the Government has not been sitting idle. At no stage during the last three years could it be said that the Government failed to do its duty in regard to the

suppression of all expressions of seditious opinions. We are told that the Government has been mild—the impression among the people generally is that the Government has been unduly severe, but, my Lord, there is another class of opinion which holds that the Government has been firmly mild and sympathetically severe as it thought the occasion required it to be. As soon as it felt that there was a necessity for doing so, it passed the Newspapers Offences Act in 1908, which can by no means be described as a mild measure. That Act has led to the suppression of certain journals which offended most severely; others have been tamed down or have died out. If there is any journal existing which still offends against the law, there is provision enough in the existing Code to stamp it out of existence. There is not a single member in this Council who would desire that any mercy should be shown to such journals, no one who desires that they should be allowed with impunity to abuse the liberty of publication which they enjoy. But I submit that unless the existing enactments are shown to be insufficient, that unless it is shown to be necessary to introduce new legislation, the Government should not place one more repressive measure on the Statute-book. I am sure your Excellency would be most unwilling to place one such other measure on the Statute-book. There is no doubt that this Bill, if passed, will become a new source of discontent. This is evident from what I have seen of the comments that have already been made in some papers and from the many communications to which I have referred. Your Lordship was pleased in the noble and gracious speech with which you opened this expanded Council, to point out that, deplorable as were the outrages which the anarchists had committed, they were mere passing shadows. Your Lordship will allow me to quote your Lordship's words. You were pleased to say :

'Though I have no wish to disguise from you the anxieties of the moment, I do not for an instant admit that the necessity of ruthlessly eradicating a great evil from our midst should throw more than a passing shadow over the general political situation in India. I believe that situation to be better than it was five years ago. We must not allow immediate dangers to blind us to the evidences of future promise. I believe that the broadening of political representation has saved India from far greater troubles than those we have now to face.'

"My Lord, that being the situation, that being the correct reading of the situation, there is very little justification for introducing and passing the measure that is now before the Council. If it cannot be abandoned, my Lord, I submit that there should be at any rate time allowed for further consideration of this measure. There is a real danger felt that the provisions of the Bill as it stands will seriously affect the legitimate liberty of the Press. Those provisions are unnecessarily wide and drastic. I will not take up the time of the Council by dwelling on them in detail. By way of illustration I beg to invite attention to the fact that the Bill has discarded even the very reasonable provision which existed in the Vernacular Press Act of 1878, whereby the Local Government was required to give notice in the first instance to an offending newspaper, a warning so that the publisher might avoid offending again. Section 6 of that Act required that such a warning should be given, and section 7 laid down that if the warning was not heeded certain consequences were to follow. I submit, my Lord, that such a provision at least should have been included in this Bill. Secondly, there is danger from the Bill not only to new presses but also to existing presses. In the case of new presses there is no reason shown for requiring everybody who wants to start a press to deposit a security. The fact that there are certain persons in the community who abuse their liberty does not justify action being taken against persons who have not so misconducted themselves. To require every newspaper which may now come into existence to deposit a security is, I submit, placing an unnecessary barrier in the path of journalism and casting an undeserved slur upon the good conduct of the person who may wish to start a paper. If, however, the Government insist that some security must be deposited, it is nothing but reasonable to suggest that the Magistrate should only require it from a person in whose case he considers that there are grounds for believing that he might make use of the press for evil or seditious purposes. My Lord, considering that the liberty of the Press has not generally been abused

during the long course of seventy years, I submit it is fair to ask that this change at least should be made in the Bill. I do not wish that an offender should be saved from the consequences of his evil action. I am only anxious that persons who are not guilty, who have never allowed any idea of disloyalty or sedition to enter their minds, should not be punished because some other person or persons have offended. Then, my Lord, in the case of existing presses, the Bill says that whenever any person goes to register himself as a publisher of a paper, the Magistrate shall demand a security from him. I submit that will mean that if the publisher of a paper which has existed for thirty years and which has never offended dies and a new publisher goes to make an application to have himself registered as such, or if the owner of a paper or a press which has existed for fifty years dies and the son or the heir goes to make an application that he should be registered as the keeper of a press or the publisher of the paper, he will be called upon to give a security. I submit that this is extremely hard and unjust. The Bill does not give the protection which it was thought at the first reading of the Bill was given to existing presses.

"My Lord, I will not take up much more time of the Council. I am only anxious that the provisions of the Bill which have created an apprehension in the minds of the people that the liberty of legitimate discussion which is highly beneficial to the people and the Government will be curtailed, should be given up or recast. My Lord, when the Press is left at the mercy of the Local Government, when it is left to the Local Government by merely issuing a notice to demand a security, I submit the freedom with which newspapers have expressed their criticisms of the acts and omissions of Government is very much likely to suffer. After all, Local Governments are composed of human beings who are liable to err, and we have had instances of Local Governments committing mistakes which sometimes the Government of India have had to correct. If it should happen, my Lord, that a paper has been writing a little more outspokenly than it should have done, if a paper has offended by a series of criticisms passed upon the Local Government, any incautious or careless expression in it might much sooner be construed as falling within the definition of prohibited matter than might be the case if the paper had not been so criticising the Government. A notice issued to the keeper of the press or the publisher to deposit a security will, I fear, in many instances, at least in some instances, lead to the extinction of the paper. The paper might be owned by an individual who may not be in a position to lose the little property he has. It may be owned by a Company, and they may wish at the first indication of danger to close the business to avoid the threatened loss. In that way, my Lord, I submit papers generally will be constrained to write under a greater sense of restraint than is needed for the purposes of good administration or of fair discussion. For these reasons, I submit that the further consideration of this Bill should be postponed. And in support of this submission I would remind the Council of what Mr. Gladstone said in connection with the Vernacular Press Act. He said 'I think, if one thing is more obvious than another, it is that, whatever we do give, we should not retract, and that when we have communicated to India the benefit which is perhaps the greatest of all those that we enjoy under our own institutions, *viz*, the publicity of proceedings in which the nation is interested, and the allowance of sufficient time to consider them at their several stages, to afford securities against wrong and error—it is deplorable in a case like this in India that the utmost haste. should have been observed, not in amending or altering, but in completely over-turning, so far as the Press was concerned, a cardinal part of the legislation of the country'. I have omitted the word 'Native' because the present Bill affects the whole Press, European and Indian, English and Vernacular. My Lord, I submit that those weighty observations give us very sound guidance as to the lines which this Council should pursue. We should not expose ourselves to a similar criticism by passing this Bill today. No possible injury can happen if the further consideration of this Bill is postponed in order that the public should have further time for consideration. Members of the Council should have a further opportunity of weighing the Bill, and the Government

of reconsidering its decision as to the necessity of a new measure, or at least of introducing the new principle, *viz.*, that of substituting executive discretion for judicial decision in determining whether a man has been guilty of some of the most serious offences of which any man can be guilty."

The Hon'ble MR S. P. SINHA said —" My Lord, as a Member of your Lordship's Government, who has had a great deal to do with the preparation of the measure now under discussion, I feel it my duty to make a few observations on the Bill, for certain misconceptions which apparently still exist with regard to its scope and purpose should, if possible, be dispelled, though I had hoped that after the lucid speech from my Hon'ble friend the Home Member it would hardly be necessary for me to have to transgress upon the attention of the Council today.

" My Lord, I ask Your Lordship's leave to begin by expressing the regret that I share with most Hon'ble Members of the Council, and speaking personally for myself, the humiliation that I feel that we should today have to take part in the passing of a measure--which undoubtedly, I do not for a moment seek to conceal it--which undoubtedly, places greater obstacles than have hitherto existed upon the freedom of the Press. But, my Lord, while I feel the pain and the humiliation, I also feel consolation in being able to take part in a measure which I believe will have a great influence for good on the future of my country. It is because I believe this to be a wise, fair and just measure that I have agreed to take part in the introduction of this measure.

" My Lord, I call upon my countrymen— whose confidence I claim to have earned—I call upon them to give their cordial support to this measure and to do the utmost that lies in their power to make it a success and to show that the Government is not called upon to enforce the Act either by their executive or judicial powers, for the matter rests entirely in their hands. My Lord, I will not deal—I am not able to ascend to the sublime heights to which some of my learned friends in the Council have invited us today—with the disquisitions about the freedom of the Press, about the inestimable boon of a free Press, and matters of that description. However appropriate they may be on general grounds, I confess I am not fully convinced of their relevancy with regard to a Bill of the particular nature that we are considering. The question, and the only question, to my mind is this. Is there a necessity for the measure that we are considering today? And if there is, are the means which we are proposing adapted to the end which we have in view? Now, if I have understood my friends who have spoken before me aright, it seems to be universally conceded that the liberty of the Press, the freedom of the Press for which we all have a great affection, has been in many cases most grossly abused. Is that, or is that not so? I have not heard any of my friends, I have not heard my learned friend Mr. Gokhale, for whom I have the greatest regard, I have not heard my friend Babu Bhupendranath Basu, with whom I have worked for many years, I have not heard either of them deny that the liberty of the Press has been grossly abused. If that is so, are we not to try and find a remedy? I can understand the argument, 'why not have recourse to the existing law? Are not the provisions of the Penal Code, the Seditious Meetings Act, the Newspapers (Incitements to Offences) Act, which were passed only the other day, are not these stringent enough, are not these sufficient?' Well, if I cannot satisfy the Council that they are neither stringent nor sufficient, I will accept their verdict and say that the Bill which we have introduced is unnecessary and probably inexpedient. But let us see if as a matter of fact the provisions of the existing law are sufficient. Now my Hon'ble friend Mr. Gokhale has urged with characteristic force, that we have in the provisions of section 108 of the Criminal Procedure Code a weapon and an instrument ready to our hands which we have neglected to work, which we might have worked to greater advantage, and, if we had, there was no necessity whatever for a measure of the kind before us. Now my Hon'ble friend is not a lawyer himself. Fortunately or unfortunately, I have been for many years a lawyer, I have had practical experience of the working of section 108, and I have had a good deal of

practical experience of the working of the sections dealing with sedition in the Penal Code, and I feel perfectly certain when I explain to the Council the difficulties of prosecutions under this sedition section and of prosecutions under section 108 of the Criminal Procedure Code, they must inevitably come to the conclusion that those provisions are neither sufficient nor stringent enough. Now let us deal first with section 108 which is of the same nature, the remedy is of the same nature, as the one we are now trying to provide namely, preventive. Sir Harold Stuart, I think, pointed out its inefficiency and I desire only to add that in my experience I found it to work in that way. Thus when you call upon a man to furnish security under section 108 because he has been publishing seditious matter or because he has been publishing matter which excites race hatred, or because he has been publishing matter for the purpose of intimidating Judges, supposing you succeed in proving that that is the man who has published or printed the matter in question—it is not always easy to do so—but supposing you succeed in proving that the man you hauled before the Magistrate under section 108 is the man who has printed or published or disseminated seditious matter, what is done? All that he is required to do is to enter into a bond or to give security, in other words, that he will not do it again. Well, when I have got that, how far have I got towards my end? Assume I prove it. I can prove it if he is a publisher, because he has to make a declaration under the Act of 1867 that he is a publisher. But he goes home and makes a declaration that he is no longer a publisher of that paper, so that the law cannot touch him. No, more, he puts up a friend of his, a man of straw, a dummy editor, to write, or rather to copy out what he has written himself. How do I benefit by the bond which I have taken? How do I prove that the man who engaged solemnly before the Courts of Justice to be of good behaviour in the future has transgressed? Humanly speaking, it is impossible to prove it. It is difficult enough to prove that the man is actually responsible for the dissemination of the poison. But when you have proved it and when you have got an order punishing him, when you have got it, you are no further than you had been before you ever came into Court. Well, that is the section that we are referred to saying, Why don't you work that? It has been worked, it has been in practice found to be unsuccessful, and with the explanations which I have given is any one surprised that it should be unsuccessful?

“Well, then, I will deal now with the section with regard to sedition, the section which we are unfortunately so familiar with for the last few years, section 124-A. My Hon'ble friend refers with great force to the observations of Sir Herbert Risley and says that we confessed ourselves that during the last two years we have had 40 prosecutions, and that in these prosecutions we have had cent. per cent. of convictions. What more do we want? We have succeeded in every case. The law is potent enough to deal with such cases. Well, it would look like that to people who are not behind the scenes. If my Hon'ble friends think that “because” there were 40 prosecutions that there were only 40 seditious articles. I can tell them that they are greatly mistaken.

“My Lord, I have been the confidential adviser of the Government of Bengal and the Government of India for many years past, or had been rather—I beg my friend Mr. Kenrick's pardon. During that time I know what the procedure was that we had to go through before we initiated prosecutions for sedition. It would go from the lowest officer who dealt with it to the highest, each officer recording his note and each had to say whether he thought the case good enough to prosecute it. When all that had been done it would be referred to the Legal Remembrancer to the Government of Bengal whether he thought that a conviction would be obtained. And if the Legal Remembrancer thought that it would, it would then go to the Standing Counsel or the Advocate General, or the two together, to say whether they thought it was a proper case for conviction. Well it does not seem to be a very expeditious process, does it? As a law officer of the Crown one would never advise a prosecution of the Press unless one was absolutely certain of being able to obtain a conviction. There is the secret of why there have been cent. per cent. convictions, because out of ten cases we have had before us we would not allow prosecutions to be initiated in 9 out of 10. And there is very good reason, I think, for it is not that the law officers do not do their duty: there is every reason why law officers should be particularly careful in matters of this description.

One abortive trial for sedition creates more mischief than 10 successful prosecutions. I appeal to all lawyers who are present here, in fact to all men of common sense, as to whether that is not so. If you fail in one case of prosecution for sedition, the immediate effect is that you create an impression that the Government is tyrannical and oppressive and trying to suppress expressions of free opinion and legitimate criticism, and the man who, after all, may be a criminal, who has just escaped with the skin of his teeth, is raised into a martyr and a hero. Well, that is the effect of these prosecutions for sedition. I hope I have shown satisfactorily that it is not always possible to say that because there are convictions cent per cent that therefore all the cases of sedition have been dealt with and that the law can easily reach all the persons who are actually guilty. It is also to be remembered that in a Criminal Court the accused must be given the benefit of the doubt. If there is the slightest element of doubt you cannot send the editor or the proprietor or the publisher or the printer to jail. That is one of the elementary principles of English jurisprudence. But does anybody want that doubtful matter—I do not say absolutely seditious matter—but does the Council want, do my Hon'ble friends want that even doubtful matter should be disseminated among the young men of the country? I venture to say on behalf of parents that they do not: that if they were to answer they would say at once 'We object to doubtful matter being placed before our sons and daughters in order that their minds may not be poisoned by literature of this description.'

"I hope I have said sufficient to convince the Council that the existing law, either under section 108 of the Criminal Procedure Code or under section 124-A of the Indian Penal Code, is not strict enough for the purpose of meeting the evil complained of—license of writing—which requires to be checked. If it is admitted that the existing law is not sufficient for the purpose, it follows that something besides the existing law is necessary, and according to the best of our lights this is the measure which we put forward as an adequate means towards that end.

"My Lord, it has been described as drastic, as interfering with legitimate criticism, as interfering with the liberty of the Press. Let us for one moment examine the provisions of this Act and see if there is any foundation whatever for this criticism. Now, we provide that, so far as existing newspapers and existing presses are concerned, we should not require anything under this Act so long as they remain within the law—nothing in this Act should touch them. Does that sound very drastic? Does that sound as if the Government is intending to choke knowledge or to block the progress of education? Is it to be seriously suggested that papers of the description which we have in view in enacting this measure are papers which are potent instruments for the dissemination of knowledge? I disclaim on behalf of this Council any such idea. Well, you have this, that the existing papers and the existing presses are not to be required to give any security at all, but we ask that persons starting a press for the first time, or persons starting a newspaper after this Act is passed, should give security. It is said that this casts a slur? Where is the slur? Indeed, on the other hand, what my friends suggest, that it should be after an enquiry that the security should be required, would cause a slur, and it would cause a slur which would be immovable by any process known to the law. My Hon'ble friends Pandit Madan Mohan Malaviya and Mr. Gokhale suggested—I am not sure that I am in order in dealing with these details of the Bill—that if you require security you cause a slur upon the man. And how do they get rid of that? Why, by telling the Magistrate that security is to be required only when the Magistrate thinks that he is a man likely to preach sedition. Which view or which provision would cause a slur—our provision which says that every man who comes will have to give a security for good behaviour without any imputation whatever on his character because we have nothing against him, will our provision cast a slur or will the provision of our Hon'ble friend that the Magistrate is to make an enquiry to find out whether he is seditious or not, and if he thinks that he is seditious, to require security? And, mind you, there is no appeal against it; it is final, absolutely conclusive, if the Magistrate says

'give security; you are a seditious person, you ought not to be allowed to print anything; put down two hundred or five hundred rupees, as the case may be.' I say that that is not an improvement on the Bill and my Hon'ble friends are not quite familiar with the provisions of the Bill. I admit that the time they have had to peruse the Bill and to digest its contents has not been very great, but this is a sample of the criticism which I am sorry to say has been extended to this Bill.

"Now I do not desire to be long, but I only want to say a few words with regard to my second point, namely, if there is a necessity, is the Bill which we have put before the Council adapted to meet the end which we have in view, and further is it so very drastic as it is sought to make out? Well, most Members have said, and I repeat it, that we do not expect that the man who is already armed with a Browning pistol or a dagger or with a bomb will be affected by the provisions of this Act. If he is out in the street watching for a man to be killed, he is not likely to stop to read the Act and to be checked or deterred by any provisions of the Act. But what we seek to do is to cut off the fuel from the fire, the supply of the material which is used for the purpose of the anarchist propaganda. Will it or will it not have this effect? Will it not prevent these from reaching the ears of the young men whom they get hold of? I venture to think that, at any rate, it is worth trying. Let us try and see if this does not cut off the source of supply without which the propaganda must fail sometime or other. Well I say therefore that it is one of the means—we do not say that it is the only means or that it alone will serve that end, but it seems to us a means—one perhaps of the many means which are necessary to effect the object which we have in view. That being so, there being the necessity and this being a means of carrying out the object which we have in view, the only other question that I think this Council ought to consider is, is the Bill too drastic, or in other words does it go beyond the necessities of the case? If it does, we do not want it, we want that and that only which is strictly and absolutely necessary for the purpose we have in view. Well I confess that after great thought and great consideration and the most anxious care that I could bestow upon it, it seemed to me that the Bill as framed and as put before the Council does not err on the side of being too drastic. Let me for one moment—I think it is not very necessary because Sir Herbert Risley explained it clearly and better than I can—but let me remind you of the nature of the provisions of this Act. We do not touch existing newspapers. We ask the new papers or the new presses which are to be started after the new Act is passed to give security for what? Rs. 500 is the minimum. The Bill as originally introduced asked for Rs. 5,000 as the maximum. We have reduced it in Select Committee to Rs. 2,000. The Magistrate therefore in regard to new presses and new papers has the power to require security to be given, not for an unlimited amount, but anything between Rs. 500 and Rs. 2,000; but unless we are to assume that the Magistrate is by nature and design a malevolent creature, we may take it for certain that in ordinary cases he will not ask for more than Rs. 500, the minimum. It is only in extreme cases, and if he has reason to think that it might be misused, that he would ask for anything more than the minimum. Well Rs. 500 to Rs. 2,000 does not seem to be an extraordinary sum to require the person who will have a printing press, a potent instrument for evil as well as for good, it does not seem to me that it is an extraordinarily large sum to ask the keeper of a printing press to deposit. With regard to the publisher also, a man who is to have the power of disseminating broadcast literature which might have great influence for evil as well as for good, we do not think it is a large sum to require the publisher to put down. We want responsible persons to have the conduct of these newspapers and the publication of books which would have such influence upon the youth of the country. I do not think that any right-thinking man will say that, in asking for that security, we have fixed it so high as to make it impossible for well-intentioned persons with small capital to embark on an enterprise of this kind; that we have made it impossible for them to carry on legitimate business. Well, when the security is given, the money is in Court; it may be that if it had remained with the man he would have been able to get more out of it than the $3\frac{1}{2}$ per cent. which will be realised

upon it as invested in Government securities, and all the time the money is in Court interest is accruing on the money as on Government securities, because no money is kept in Court locked up in box. The moment you put it in, it is invested in Government securities, and the man who puts in the money will be getting his $3\frac{1}{2}$ per cent. interest on his money. He might have made more of course. We know that in India it is possible to get very much larger rates of interest, particularly in country districts; but still it is not such a very great deprivation to be compelled to take $3\frac{1}{2}$ per cent. with regard to money which you are bound to provide as a security for good behaviour. And it is only because the circumstances are exceptional and because privileges have been abused, that we are obliged to have recourse to a measure of this kind. When the security has been put in, the keeper of the press or the publisher of the newspaper has nothing to fear unless he publishes matter prohibited by the law. When he has done that, what is the punishment to which we subject him? The security between Rs. 500 and Rs. 2,000 which he has deposited is declared to be forfeited,—by whose order? By the order of the highest executive authority in the Province, the Local Government. It is a great power which we no doubt confer upon the Local Government. It is to be exercised on the gravest responsibility, it is to be exercised under safeguards which I will presently mention, which will make the Local Government hesitate before it makes an order of forfeiture, because there is a tribunal who may sit over it and reverse its decision. That in itself is a great check. It will incline the Local Government to be careful and cautious before exercising this great right. There will be a great sense of responsibility created by the very fact that there is a tribunal which can deal with it afterwards. Well then, supposing the Local Government makes that order of forfeiture, what happens? Is this man prevented from going on with his paper? Has this man got to shut up his printing-press? No, he has only to come and say 'I now ask that you should give the further security that you have provided for, and that I should have another chance.' It is not that, on the first offence being committed, the Local Government takes his security and shuts up his business and shuts up his paper. That is not so, on the first offence the Local Government orders that the security, and the security only, shall be forfeited. He can the very day, or the very next day, give further security and go on with his paper and the press, and at the same time appeal to the High Court. If the High Court sets aside the order of the Local Government, what happens? He gets back the second security which he has put in, and the first security which was ordered to be forfeited comes back to the position in which it was and remains as the original security. So all that has happened is—on the first order of forfeiture being made, all that has happened is—that he is kept out of the double security for the period between the date of the first order and the date of its possible reversal in the High Court. Well, no doubt that is a curtailment of a right, no doubt that he loses something, but all I say is this. It is a sacrifice which every right-thinking citizen is bound to make, having regard to the exceptional circumstances for which this exceptional legislation is introduced. It is a sacrifice, but it is not a very heavy sacrifice, and it is a sacrifice which you ought cheerfully to make having regard to the fact that there has been undoubtedly a good deal of sedition in the Press, and who will take upon himself to say that this kind of literature has not had its influence upon the youths whose outrages we all deplore and condemn? It is a sacrifice; it is a curtailment of a right, but it is not a very great one.

"It is of no use to attempt to convince us that it is a very drastic measure, because we feel sure that it is not. We have put in all kinds of safeguards. I will mention another which my Hon'ble friends seem to have forgotten in their hurried perusal of the Bill. When the Local Government makes the order of forfeiture, the Bill provides that it must state or describe the offending words or articles, or pictures, or engravings, or whatever it is upon which it bases its order. No making an order which is vague, which is indefinite, no order without allowing the man to know what he is being punished for, but a definite order stating the very words of the article, or describing it as that which the man is being punished for. Is not that a

safeguard? Apart from the tribunal of appeal, is it not a safeguard to provide that a man will not have his security forfeited without being told exactly what he has written that is taken exception to?

"I will tell the Council of another safeguard which my learned friends seem to ignore. We provide this. It is our desire to let bygones be bygones; we do not want to get hold of anything that has been done in the past. We only want that, after the Act is passed, they should not transgress again; that is all that we require, and we provide that, when an order of forfeiture has been made and the man comes to the High Court, the Local Government will be entitled only to rely, in support of the order that they have made, upon anything that has been written after the passing of this Act and not before the passing of this Act. They will not be able to say, 'this man is a notorious sedition-monger; for the past three years he has been preaching hostility and sedition'. They are not allowed to do that, all they can say is, all that the Local Government can say is that 'from and after the 7th of February 1910 this man has been writing seditious articles,' and it is to these and these alone that we assign the sedition for which he is punished. Is not that a safeguard? Does that look a drastic provision? Is that any indication of a desire to choke the sources of knowledge? Gentlemen, all that this Bill intends to effect is that nobody should, by writings in the public Press, create bitterness and hostility and hatred towards the Government by law established, towards the allies of the Government, and towards any class or sections of His Majesty's subjects in British India. Does anyone want to do it? Does anyone think it is desirable that there should be any writing of that kind, creating bitterness, hostility and hatred either towards His Majesty, or towards his Government, or towards the Native Princes of India, or towards any class of His Majesty's subjects? Again I claim to speak on behalf of the educated middle class of my countrymen to whom I belong. I say the answer is emphatically no, we do not want any writing of that description. We do not want that such writings should continue and that they should continue to poison the minds of the youth of the country."

The Hon'ble MALIK UMAR HYAT KHAN said.—"My Lord, some years ago, when I had the honour of an interview with Your Excellency, I strongly advocated that some action should be taken against the seditious Press. I am glad to find now that the Government has considered it expedient to take such action. The Press here, like that in other civilised countries, does not represent the public feeling, but, on the contrary, some seditious people get the chance of becoming editors and thus through the medium of their papers convey their feelings to the innocent public, who are not educated but can only read and write and are apt to be infected by the Press comments. Every printed paper is regarded by them as a message from heaven or at least as an interpreter of national views or feelings.

"I am glad that Princes and other responsible persons whose interests are interwoven with those of the State and the land are aware of the consequences and bear similar views. The question was that the Parliament might not be in favour of a repressive measure. But I wish some of its members were here on the spot, and I think they would have been the foremost to move for the introduction of such a measure. The law is always meant to meet the requirements of a country and has to be varied and modified according to circumstances.

"It is all very well for those who have more experience of England to speak about the liberty of the Press there, but we should be guided by our own circumstances, refer to our own conditions, and solve our problems in our own way.

"No one can deny that recently there has been an abnormal change in the country towards the development of anarchism, and we want abnormal measures, some legislation of a stringent character demanded by the situation to cope with the evil and to check it. Though I don't think that this Act will uproot the mischief hitherto worked by the preachings of the revolutionary Press, platform speeches, by the aggrieved and unemployed

youths, and, if I may be allowed to say so, by some speeches in the Parliament and in this very Council, but we know it is a step in the right direction. We don't want to take any half-hearted or spasmodic measure but a drastic and decisive step. Much has to be done for India, and the energy of the Press can be directed to far better purposes.

"It makes a material difference when a certain section or community is offering wholesome comments or criticisms on measures of administration and when it desires to injure others and tries to overthrow the foreign rule and attain self-government. India has been ruled by foreigners from ages, and I can positively say that it is utterly impossible for it to hold its own even for a moment if freed from British administration, on account of the diversity of castes and creeds, races, religions and languages, the radicals of which differ so widely that it is impossible for them ever to unite.

"It will be seen that the great Muslim Emperor, Akbar, and a famous spiritual leader of Sikhism, Guru Nanak, and several others have tried to effect a general union, but the situation, if it is not the worst, is just as bad as before.

"I hope I will not be taken for a blind supporter of the Government as I belong to a Province where there has been no increase of anarchical crimes and no general discontent, and where the landowning class, which I have been given the honour to represent here, has always proved most loyal and trustworthy.

"I am deeply interested in the welfare of my country and have it always at my heart and perhaps more solemnly than most of the so-called showy platform patriots now-a-days liked by inexperienced fanatics who do not know that they are doing a great harm to their country when it is in a stage of great advancement.

"I don't say that we have got the most perfect administration. There may be always room for improvement, but excuse me to say that it is the best possible administration India has ever enjoyed.

"It is time we should put a stop to revolutionary preachings and bring the liberty of the Press within the limits of legitimate discussion, and I believe this Bill will have the whole-hearted support of all the loyal communities of India.

"I hope I shall be excused for saying that while speaking here we should not try to show our boldness in criticising Government measures but should also realise that we are responsible hands of the administration and should try our best to co-operate to combat the present evils and get this most needed measure through without any division, if possible."

The Hon'ble Mr. CHITNAVIS: "My Lord, I have the honour to represent on this Council special interests, and I feel I should not give a silent vote on this occasion. In my remarks I voice the opinion of the bulk of my constituents. It is an irony of fate that the first important Bill before the enlarged Council should be one seeking to control, be it in ever so small a measure, the liberty of the Press, such as we have, through British magnanimity, come to associate with British Government in India for three-quarters-of-a-century and the thought fills me with pain that circumstances have arisen in our midst to force our support to almost any well-considered measure, arming Government with extraordinary powers of control and punishment. Under pressure of danger, it is excusable for individuals and Governments to adopt extraordinary methods. I am convinced the Bill should be supported not because I hope it will root out anarchy, but because in trying times the Executive Government, responsible for the maintenance of law and order, without which no progress is possible, is entitled to the cordial co-operation of the community in their efforts at the suppression of an evil deplored by us all, the Press not excepted. The claim for support, always strong, is much stronger in the case of Your Excellency's Government on account of the large-hearted and far-reaching concessions they have graciously made. A check of some kind on a portion of the Press would also appear to be called for in the interests of parents and guardians and the younger generation. It is of the utmost importance that journalism should be the profession of gentlemen of the highest attainments,

imbued with high ethical ideas, and that they should bring to the consideration of public questions a calm, judicial temper and a large outlook, always remembering the heavy responsibility that rests on their shoulders. The Press plays an important part in the development of a nation, and it is a misfortune if, through reckless writing, it forfeits the respect of the community and the confidence of Government, and moves the turbulent elements of the society to commit violence which renders progress impossible.

" But at the same time that I support the Bill, I appeal to Your Excellency to do something for the reclamation of the misguided youths of the country. Surely British statesmanship ought to be able to devise means for that. The leaders of the people may with advantage be taken into the confidence of Government. The Government and the people working together in mutual trust and whole-hearted co-operation can do much to suppress turbulence, restore peace, and render the struggle for existence among young men less disheartening, thereby depriving anarchism of its votaries. The Bill is only preventive in its scope. Something more positive is required to infuse into Young India a healthier public spirit. The methods of the anarchist are the worst calculated to secure to his countrymen that independence for which apparently he works. An anarchist propaganda has never secured and can never secure independence to any nation. Independence in the material as in the moral world can only be earned by strict discipline and unswerving loyalty to law and order. Anarchism retards the fruition of the country's hopes and its progress. Self-government is attainable only under the ægis of the British Government by a process of slow and peaceful evolution. These truths make little impression on fanatics. Reason is clouded in them by sentiment, and they are swayed by their own ungovernable frenzy. And the result is what has alarmed the whole country, a startling demonstration of fury. Every effort should be made to check this frenzy. The nation has now roused, and no sympathy is felt in any quarter for the youthful assassin. This carries in it a hope for the future. There is yet another element of hope in the situation: youths are responsive to kindness. It should be still possible to attract them by clemency and encouragement to the side of law and order, to give a healthy direction to their ideas, and to divert their fervour and activity into profitable channels. The feelings of abhorrence expressed in this Council Chamber to-day echo the feeling of the whole country, and the people will have reason to be grateful to Your Excellency if the present measure is productive of the good that is expected from it. I was present at and took part in the debates on a Bill of a similar nature in 1898. Many non-official members, and I among them, then strongly opposed the measure, but circumstances since then have greatly changed, and I find to-day a general feeling both in this Council and outside it to support Government in any judicious measure calculated to put a stop to the present state of things.

" In conclusion, my Lord, I earnestly hope that the Bill will produce a salutary change in the tone of the Press, and that before long it will be possible for Government to repeal the measure."

The Hon'ble ZULFIKAR ALI KHAN said — " My Lord, after the brilliant defence of the Bill made by my Hon'ble friend Mr. Sinha I do not consider there is any necessity to speak at all, but as all of us have our different views about it I think I may as well be given an opportunity to express the views which I entertain about the Bill which is before the Council to-day. This Bill touches the principles of the liberty of the Press in India and embodies one of the most important measures recently adopted to check that license of the Press which has given birth to the anarchical movement in this country. I have no doubt that all sober-minded men will support the Government in its efforts to maintain peace and order and secure the uninterrupted welfare of the masses in India whose happiness is no doubt imperilled by the mischievous activities of certain fanatics, who are the enemies, not only of Government, but of their own country as well. During the last decade we have witnessed a systematic campaign carried on by a section of the Press, especially the Vernacular Press, to inflame the minds of young men and to create an atmosphere of unrest by deliberately misrepresenting

the acts of Government, and thereby destroying public confidence in the justice and good intentions of the authorities. This sort of writing inaugurated a reign of terror which culminated in murderous outrages of a most abominable character. The motive which prompts young men to resort to violence is apparently to make the government of the country impossible and to destroy the seeds of civilization which have been planted in this country during the last century and a half. No consequence of this subversive propaganda could be more natural, more plainly inevitable, than the introduction of this Bill. I am sure it is not the intention of Government to chloroform the Press into silence, or restrict fair and honest criticism of the administration, for no enlightened Government would ever think of curtailing the liberty of the Press to such an extent. But the anarchical conspiracy which has been discovered requires that no further abuse of the liberty of the Press should be tolerated. That section of the Press which has all along remained free from contamination and has worthily striven to form and guide healthy public opinion will, I am sure, continue to enjoy the power and prerogative of its high mission to help and enlighten the Government and the public in their united efforts towards progress and prosperity."

The Hon'ble RAJA OF DIGHAIPATIA said :—" My Lord, I rise to address this House in a spirit of great hesitancy and under a sense of great responsibility. As a loyal citizen, I feel it my bounden duty to support the principles of the Press Bill introduced by the Hon'ble Home Member at the last meeting of the Council. I am quite sure that the time has come when some strong measures should be taken to control literary license and illegitimate criticism of public affairs in the Press in India. A Press that indulges in literary license and travels beyond the limits of legitimate discussion and encourages revolutionary propaganda is undoubtedly a great danger to the State and to the public in general and therefore needs badly to be controlled. But it is to be hoped that only a very small section of it falls under such category and the bulk are as loyal as ever, diffusing nothing but healthy literature and knowledge. Under the circumstances, while admitting the absolute necessity of some control over a section of the Press, I fear that the present Bill in some cases may be prejudicial to the best interests of good and healthy literature.

"The men who start printing-presses in India do not generally belong to an opulent class and can hardly afford to pay heavy securities which the new Bill will require of them to deposit. Considering that a large number of printing-presses confine themselves to merely printing text-books as well as social and religious works and more often than not steer clear of all political publications, I humbly think that this Bill will interfere materially with the development and expansion of this section. As regards the section of the Press which deals with politics, no doubt this measure will improve their tone and make their owners more careful in future, though, I am afraid, it may prove to a certain extent deterrent to honest criticism at times."

"It is a well-known fact that a large number of people who write for the Press in India have to deal with a language about which their knowledge is limited, and it will not be a matter of surprise if, in commenting on public measures, legislations and administrative acts, some of them should have the misfortune to use erroneously any English words, phrases or idioms, in such a way that might be construed to have a 'tendency' to commit an offence in terms of section 4, sub-section (1), of this Bill. Since, as I believe, it is not the intention of the Legislature to penalise an imperfect acquaintance of a foreign language nor the misapplication of foreign words, phrases or idioms, I venture to submit that proper latitude will not be grudged to such errors and the intention of the writer will be considered fully in all such cases.

"My next submission to your Lordship is that the measure will be found doubly hard for a man in ordinary circumstances who happens to be a publisher of books and newspapers and owner of a press at the same time.

"However much I feel the necessity of some sort of control over the Press of this country at the present moment, I appeal to your Lordship tha

the present Bill may not be allowed to remain in force for a period of more than five years. Let us hope within five years' time a healthy change will come over the general situation in India. But if unfortunately our hopes are not realised, the Government may by notification at any time renew this legislation. In 1898 the Government of India found itself compelled to make the law of sedition more stringent than before in view of the many acrimonious and bitter things that were being said at the time by a certain section of the Press; but only five years after, in 1902, Lord Curzon, speaking as Chancellor of the Calcutta University, was pleased to remark that the Indian section of the Press was 'gaining in sobriety and wisdom.' Therefore, my Lord, there is no reason to be absolutely despondent as regards the situation in India five years hence, and we fervently hope that if such a day should ever come, it would be possible for the Government of India to remove this measure from the Statute-book. In this connection, I may be permitted to draw your Lordship's attention to the fact that the Seditious Meetings Bill, which was intended to meet an equally emergent situation, was enacted to remain in force only for three years.

" Though I have been obliged to make these observations on the general trend and clauses of this Bill, I heartily approve of its principles and have no hesitation in supporting it."

The motion was put and agreed to

His Excellency THE PRESIDENT stated that he proposed to take the two amendments which stood in the Hon'ble Babu Bhupendra Nath Basu's name at the end of the other amendments

The Hon'ble MR. GOKHALE moved that in clause 3, sub-clause (1), of the Bill to provide for the better control of the Press as amended by the Select Committee, for the word "every" in the first line, the word "any" be substituted, for the words "shall, at the time of making the same deposit," in the sixth line, the words "may be required, at the time of making the same, to deposit" be substituted; and after the word "India" in the thirteenth line, the words and figures "if, in the opinion of the Magistrate, there are reasonable grounds to believe that the press is intended or is likely to be used for any of the purposes described in section 4, sub-section (1)," be added. He said:— " My Lord, I may briefly explain what my amendment is. Clause 3, sub-clause (1), provides that when any person wants to keep a printing-press after the passing of this Bill, he shall ordinarily be required to deposit security ranging between Rs 500 and Rs. 2,000, the Magistrate in exceptional cases being empowered to dispense with the deposit of the security or to vary or cancel any order from time to time that he might make. Now the object of my amendment is to reverse this, and what I propose comes to this: that ordinarily every keeper of a press, after the passing of this Act, i.e., everyone who wants to keep a new press, shall be free to come and make the declaration without offering security, and that only where the Magistrate thinks that the press is intended or is likely to be used for the publication of prohibited matter, that he should demand security. My Lord, my Hon'ble friend Mr Sinha, whom we are all proud to see on that bench there, and to whose powerful speech we listened with great pleasure, though he gave some of us very little quarter—Mr. Sinha dealt with this amendment of mine by anticipation and therefore I am at a little disadvantage in placing it now before the Council. However, let me explain my position briefly. My Hon'ble friend seemed to suggest that this amendment had been moved by us owing to a misapprehension of the object of Government and owing to our not having studied the Bill properly. Now with all respect, let me assure my Hon'ble friend, that a Bill of 26 sections does not take very long to study. It is true we had only four days, but so far as I am concerned, I had studied the thing carefully before I sent my notice of amendment. I really think that, in spite of all that fell from him, this would be a better provision than the provision which the Government proposed in the Bill. My Lord, the Hon'ble Mr. Sinha himself stated that the object of Government was to provide only for the bare requirements of the situation, they did not want to

go an inch further than the situation demanded. Now what are the requirements of the situation? The situation required that every new press which might reasonably be suspected of being likely to be used or intended to be used for the publication of seditious matter, should be kept under strict control first of all by the deposit of a security. It is quite true that it may be a difficult matter for a Magistrate to make an enquiry and make up his mind as to whether he will demand a security or not, but the Magistrate ought to face this difficulty as he does in so many other cases. In any case, it would be a smaller evil than this one where you demand security from every one. Mr. Sinha bracketed me with another member as saying that this would cast a slur on the person from whom the security was required. I believe he had in his recollection some remarks made by me in Select Committee, but so far as my speech of to-day was concerned, I never said a word about a slur being cast on anyone—

[The Hon'ble MR SINHA.—“I beg the Hon'ble Member's pardon; probably he is right, I was thinking of what he said in Select Committee”] And in my minute of dissent I have confined myself to this ground only, that the deposit of security ranging between Rs 500 and Rs. 2,000 would be a financial burden, and in many cases it would be an unnecessary financial burden. ‘My Lord, I have especially the cases of our backward communities in view. The backward communities of this country are now coming forward and there is a general demand for education and for educational organs of their own. On the Bombay side recently there have been three or four conferences of backward Maharattas, and at every one of those conferences a desire was expressed to have an organ of their own. Now I am quite sure some of these bodies will find it difficult to put together more than a thousand or two thousand at the outside and set up a press and have an organ of their own. If the keeper of every new press is to be required to deposit security as a matter of course—of course there is the discretion given to the Magistrate in exceptional cases, but I do not suppose ordinarily it will be exercised—if every keeper of a press is to be required to offer this security, I think it would work as a great hardship on these small concerns. Again, where the same individual wants to have a small press and issue a small paper, he may be required to deposit two securities of two thousand each. The Hon'ble Mr. Sinha says that ordinarily the Magistrate will require only Rs 500. Well, I am prepared to take a good many things from Mr Sinha, but I am not prepared to take that from him, as that would depend on the Magistrate and not on the Law Member of this Council. My Lord, I therefore think that my proposal would be better than the provision which the Government have introduced into their Bill.

“The Hon'ble Sir Herbert Risley told us that the object of this provision was to meet the case of those old offenders who take new forms and again and again come up in different garbs. Well, if the Magistrate is given this discretion, that would be effective, and a financial burden which would be felt as a hardship by many would be prevented. I therefore suggest that my amendment should be put to the meeting.”

The Council divided—

Ayes—9.

The Hon'ble Pandit Madan Mohan Malaviya.
The Hon'ble Mr. Sachchidananda Sinha.
The Hon'ble Babu Bhupendra Nath Basu.
The Hon'ble Mr. M. Mazharul Haque.
The Hon'ble Nawab Saiyid Muhammad Sahib Bahadur.
The Hon'ble Mr. G. K. Gokhale.
The Hon'ble Rao Bahadur R. N. Mudholkar.

Noes—50

His Honour the Lieutenant-Governor.
The Hon'ble Mr. J. O. Miller.
The Hon'ble Sir G. Fleetwood Wilson.
The Hon'ble Mr. S. P. Sinha.
The Hon'ble Sir Herbert Risley.
The Hon'ble Major-General R. I. Scallan.
The Hon'ble Mr. R. W. Carlyle.
The Hon'ble Mr. L. M. Jacob.
The Hon'ble Mr. W. Maxwell.
The Hon'ble Mr. J. S. Meston.
The Hon'ble Mr. J. B. Brunyate.

Ayes.

The Hon'ble Mr. Mahomed Ali Jinnah.
The Hon'ble Sir Vithaldas Damodar Thackersey.

Noes.

The Hon'ble Sir H. A. Stuart.
The Hon'ble Mr. S. H. Butler.
The Hon'ble Mr. Abdul Majid.
The Hon'ble Raja Partab Bahadur Singh of Partabgarh.
The Hon'ble Raja Sir Muhammad Ali Muhammad Khan.
The Hon'ble Malik Umar Hyat Khan.
The Hon'ble Zulfikar Ali Khan.
The Hon'ble Sardar Partab Singh.
The Hon'ble Mr. M. W. Fenton.
The Hon'ble Mr. F. A. Slacke.
The Hon'ble Maharajadhiraja Bahadur of Burdwan.
The Hon'ble Mr. J. M. Holms.
The Hon'ble Mr. C. H. Kesteven.
The Hon'ble Mr. C. G. Todhunter.
The Hon'ble Surgeon-General C. P. Lukis.
The Hon'ble Mr. H. W. Orange.
The Hon'ble Mr. J. M. Macpherson.
The Hon'ble Mr. J. Andrew.
The Hon'ble Raja Vairicherla Vairabhadra Raza Bahadur of Kurupam.
The Hon'ble Mr. H. O. Quin.
The Hon'ble Mr. F. Rawson.
The Hon'ble Kanwar Sir Ranbir Singh.
The Hon'ble Mr. W. C. Madge.
The Hon'ble Mr. C. W. N. Graham.
The Hon'ble Mr. F. A. T. Phillips.
The Hon'ble Mr. M. B. Dadabhoy.
The Hon'ble Mr. G. M. Chitnavis.
The Hon'ble Mr. F. C. Gates.
The Hon'ble Maung Bah Too.
The Hon'ble Mr. P. C. Lyon.
The Hon'ble Maulvi Abdul Karim Abu Ahmad Ghaznavi.
The Hon'ble Raja Pramada Nath Ray of Dighapatia.
The Hon'ble Maulvi Syed Shamsul Huda.
The Hon'ble Mr. C. Stewart-Wilson.
The Hon'ble Mr. F. E. Dempster.
The Hon'ble Lieutenant-General Sir Douglas Haig.
The Hon'ble Sir T. R. Wynne.
The Hon'ble Mr. G. H. B. Kenrick.
The Hon'ble Colonel F. B. Longe.

So the motion was negatived.

The Hon'ble BABU BHUPENDRA NATH BASU moved that in clause 3, sub-clause (1), for the words "five hundred" and "two thousand" respectively the words "two hundred" and "one thousand" respectively be substituted. He said :—"The meaning of the amendment is this that in the Bill as submitted by the Select Committee the amounts are fixed at the minimum of five hundred and the maximum of two thousand rupees. I venture to submit to this Council that the minimum should be reduced to two hundred and the maximum to Rs. 1,000. Would your Lordship permit me to put these two separately, first the minimum and then the maximum. I wish to put the minimum at Rs. 200. My Lord,

the Hon'ble Mr. Kenrick has said that there is no intention to choke the springs of knowledge, and my Hon'ble friend Mr. Sinha was also pleased to say that the Bill has not the remotest chance of in any way interfering with the spread of education. Well, my Lord, as regards my Hon'ble friend Mr. Sinha, we have listened to his arguments with great attention. I have known him for many years and we have always entrusted to him the leading of a forlorn hope, and I have often seen him carry that forlorn hope to a successful issue by his brilliant dash, skill and leadership. In this case also I am afraid he has almost persuaded many of us. Unfortunately, we on the other hand, earnestly, sincerely and honestly believe that the Bill may interfere with progress, and in order to mitigate that effect of its really putting a bar on the road to progress, and also in view of the fact that the Bill is only going to be a preventive measure and not a punitive measure, I would respectfully beg of this Council not to make the conditions too hard. As my Hon'ble friend Mr. Gokhale has pointed out earlier to-day, there are many keepers of presses who are poor men and who start their presses for different objects altogether. It will not be unknown to my friend Mr. Sinha, that in the Jessore and Faridpur Districts the so-called depressed class, the Namasudras, are endeavouring to raise themselves in the scale of society and they are thinking of taking steps to spread education in their midst and of starting an organ of their own which will deal with social questions, so that the difficulties under which they labour at present may be removed. In these cases it will not be possible—and I say so because I know of what I speak—in these and other cases it will not be possible for the people to find the money for the security. Not only in these cases but in many others even in the Metropolis of India I know of many presses which start to print job work, which will not be able to find the money. The Magistrates will hardly have the time and may not feel inclined to go into the merits to decide whether security should or should not be taken. With these remarks I will ask the Council to fix the minimum at Rs. 200."

The Hon'ble SIR HERBERT RISLEY —"My Lord, I am afraid that I cannot accept this amendment. In Select Committee we reduced the amount to Rs. 2,000, and I am afraid I am not prepared to reduce it any further. It is desirable that there should be substantial security. As has been pointed out, the amount of the security is not necessarily the amount of the sum itself but the amount of interest that is required to raise it.

"As for the Namasudra movement, I know all about it and I am in entire sympathy with it. It is, however, out of the question to suppose that this will interfere with a magazine started for the purpose stated by the Hon'ble Babu Bhupendra Nath Basu. That would clearly come within the purview of the dispensing clauses and properly be dealt with by that means."

The motion was put and negatived.

The Hon'ble MR. GOKHALE moved that in clause 3, sub-clause (2), for the words "five thousand" in line 14, the words "two thousand" be substituted. He said —"My Lord, this refers to the cases of old printing-presses. The cases that I have in view are those of small presses in small taluka towns, not at the headquarters of a district or in any of the big cities. They are very small concerns. Sometimes the whole of one of these concerns may not be worth more than Rs. 500 or Rs. 1,000 and all sorts of things are printed at it. Take the case of a place where one of these presses was situated and where a wandering dramatic company produced a drama of an objectionable character. It might happen that the press might print a hand-bill about the drama without knowing what it was printing, and might get into trouble, especially if it is not on good terms with the local officials who are all small officials. Now if Rs. 5,000 is demanded from such a man as security, the poor fellow will be crushed out of existence. There is no provision here for an appeal to the High Court, and that is final. I therefore suggest that in place of Rs. 5,000 the sum should be fixed at Rs. 2,000. Even Rs. 2,000 will be a considerable sum, and if the man offends again there are other provisions that would apply in his case."

The Hon'ble SIR HERBERT RISLEY :—"I regret that I cannot accept this amendment. The clause deals with a case where an offence has been committed, and in that case it is proper that the amount of security demanded should be larger than in the case where no offence has been committed. As for the case mentioned by the Hon'ble Member, I am justified in saying that we may take it that the people who administer this Bill will be reasonable; they will know that if there is the slightest suspicion of vindictiveness not only will they be immediately pulled up but their action will tend to discredit them."

The motion was put and negatived.

The Hon'ble BABU BHUPENDRA NATH BASU moved that in clause 3, sub-clause (2), for the words "five hundred" and "five thousand" respectively the words "two hundred" and "one thousand" respectively be substituted. He said—"This amendment is practically the same as the one I moved just now in respect of sub-clause (1) of clause 3."

The Hon'ble SIR HERBERT RISLEY : "The same arguments apply and with even greater force to this, and I cannot therefore accept it."

The motion was put and negatived.

The Hon'ble PANDIT MADAN MOHAN MALAVIYA moved that in clause 3, sub-clause (2), after the words "the Local Government may," for the words "by notice in writing require the keeper of such press to deposit with" the word "direct" be substituted, after the word "situated" the words "to require the keeper of such press to show cause why he should not be ordered to deposit" be inserted, and for the words "Local Government" in the third line from the end of the clause, the words "the Magistrate" be substituted. He said—"The object of my amendment is to make the order for the deposit of security a judicial order and not an executive order. I need not say more."

The Hon'ble SIR HERBERT RISLEY : "This strikes at the entire principle of the Bill and I would ask the Council to reject it."

The motion was put and negatived.

The Hon'ble MR. GOKHALE moved that in clause 3, sub-clause (2), of the Bill, after the word "India" in line 17, the words and figures "or to enter into a bond, if the keeper of the press offers to do so, binding himself not to use his press again for any of the purposes described in section 4, subsection (1)," be added. He said :—"I have taken the substance of this amendment from the Act of 1878. As a matter of fact, in this particular, the present Bill is more drastic than the Act of 1878. The Act of 1878 gave the option to an offending party to enter into a bond, and, if he bound himself not to offend again like that, the Government accepted the bond and things went on without further trouble. I think it would be a desirable thing to have this provision again in the case of small concerns that might otherwise be crushed out of existence by the demand of a heavy security. If a man has offended, especially through inadvertence, he would be all the more ready to bind himself. The man who has offended intentionally will offer security and will go to the High Court when the security is forfeited, whereas the man who has erred through inadvertence will apologise, express contrition and give any undertaking that the Government might ask him to enter into. As the object of the Government is to prevent sedition and not to get money out of these people, I suggest that this amendment should be accepted."

The Hon'ble MR. SINHA :—"On behalf of my friend, Sir Herbert Risley, I am unable to accept the amendment proposed. I would only point out that the Hon'ble Mr. Gokhale is in error in thinking that under the Act of 1878 the option either to deposit the amount or to enter into a bond was in any way given

to the keeper of the press or the publisher. Under that Act the Magistrate could require the publisher of the newspaper to give security or enter into a bond, and it was the Magistrate's option and not the publisher's. So that the Hon'ble Member is wrong in thinking that we are trying to be more severe in the Bill as framed than it was under the Act of 1878. I am therefore unable to accept the amendment."

The motion was put and negatived.

The Hon'ble BABU BHUPENDRA NATH BASU moved that in clause 3, sub-clause (2), after the words "the keeper of such press" the words "to enter into a bond in a sum not exceeding one thousand rupees binding himself not to allow the press to be used for any of the purposes aforesaid or to deposit with the Magistrate within whose jurisdiction the press is situated security for the amount of such bond" be added, and the portion of the same sub-clause beginning with the words "to deposit" and ending with the words "may think fit to require" be omitted. He said—"My amendment is on the same lines as that of the Hon'ble Mr Gokhale, only in this case I propose to give the option to the Magistrate either to call for a bond or to call for a deposit, and that is on the same lines as Lord Lytton's Act."

The Hon'ble MR. GOKHALE—"My Lord, I beg to support this amendment. I know that it will be said that after all it does not mean very much, but if the two things are put together in the Bill it would be a sort of a suggestion to the Local Government that they should offer a choice to the party concerned of the two alternatives."

The Hon'ble MR. SINHA—"My Lord, we are unable to accept that. There is really no substance in what the Hon'ble Member is asking for. This is after an offence has been committed and it gives the option to Local Governments to call upon the offender to put down security. I do not see where the harm or the injury comes in at all."

The motion was put and negatived.

The Hon'ble SIR VITHALDAS D THACKERSEY moved that to clause 3 the following explanation be added—

"Explanation—A declaration made under section 4 of the Press and Registration of Books Act, 1867, by reason of the death or retirement of the keeper of a printing-press, shall not be deemed to be a declaration within the meaning of this section."

He said—"I have heard very carefully the remarks of the Hon'ble Member in charge of the Bill and of the Hon'ble the Law Member, and they have clearly given us to understand that the existing presses are not to be touched and that they shall not be required to pay deposits. As it has been so well pointed out, there are many presses, held by men of small means, and unless an explanation as I propose is added the object will not be secured, since on the death of a father his son shall have to pay a deposit, and if he is not able to deposit security he shall have to close his business, which had gone on during his father's and perhaps during his grandfather's time for years. As it is not the intention that the present presses should suffer any penalty, I beg that this explanation be added to clause 3."

The Hon'ble SIR HERBERT RISLEY—"I am unable to accept this amendment. The difficulty is that we cannot really be sure of their *bond fides* in the matter. There may be *benami* transactions, *mala fides* of various kinds, and we are bound to guard against that."

The motion was put and negatived.

The Hon'ble MR. GOKHALE moved that in clause 4, sub-clause (1), the words "or may have a tendency" in the ninth line be omitted. He said:—"My Lord, this amendment refers to the definition of what is objection-

able matter. The definition runs as follows:—'Whenever it appears to the Local Government that any printing-press in respect of which any security has been deposited as required by section 3 is used for the purpose of printing or publishing any newspaper, book or other document containing any words, signs or visible representations which are likely or may have a tendency, directly or indirectly, whether by inference, suggestion, allusion, metaphor, implication or otherwise, 'to do any of the things that are mentioned below, viz., 'to incite to murder, etc.,' 'to seduce any officer, soldier or sailor in the Army or Navy of His Majesty from his allegiance or his duty,' 'to bring into hatred or contempt His Majesty or the Government by law established in British India,' and so forth, the Local Government may, etc., etc. Now, my Lord, this is fearfully comprehensive. I will take only one of the things mentioned, the feeling of contempt. Now what is provided here is that the writing should not be *likely* to promote a feeling of contempt towards the Government, 'directly or indirectly, whether by inference, suggestion, allusion, metaphor, implication, or otherwise.' Surely this is comprehensive enough and should suffice. The Bill however goes further and lays down that the writing in question should not even have a tendency, directly or indirectly, etc., to produce such a result. I fear this might be made to include almost any adverse criticism. For instance, let us take the case of the Excise Department of the Government. Suppose in criticising it I say that drunkenness is on the increase owing to liquor shops being located near temples and other convenient places. This may be interpreted as having a tendency to suggest that the Government is driving the people to drunkenness and is therefore bringing the Government into contempt in the eyes of people who abstain from liquor. Or take another instance. Suppose I say that last year, when the Indian Councils Act was under consideration, Lord Morley promised that, as soon as might be after the passing of the Act, Indian Members would be appointed to the Executive Councils of the Governors of Madras and Bombay, and yet nothing has yet been done. I may be told that my statement has a tendency to bring the Government into contempt, as it may be taken to attribute a breach of faith to the Secretary of State for India. I think the object that the framers of this Bill have in view will be amply met by retaining the other words 'likely, directly or indirectly, whether by inference, suggestion, allusion, metaphor, implication or otherwise,' and omitting the words 'or may have a tendency.' I therefore propose that the words 'or may have a tendency' be left out."

The Hon'ble SIR HERBERT RISLEY —"I regret that I am unable to accept this amendment. The latter part of clause 4 (r) has been most carefully considered by us, and we framed it in the form which it has with the express object of covering the frequent cases—the too frequent cases—of what has been described in the debate as veiled sedition. That is the reason why we put in the words 'or may have a tendency.' And I submit, Sir, that there is no difficulty whatever in ascertaining what is the tendency of a paper. The Local Government can be under no temptation at all to strain the provisions of the section. They will look at things generally and, knowing that the eyes of all the world will be on them, they will be the less liable to exhibit any excess in the direction of working this section. As for the cases which the Hon'ble Member cited, it seems to me that these are clearly covered by the exception to the clause."

The Hon'ble BABU BHUPENDRA NATH BASU said —"I support my friend Mr. Gokhale. In reply to what has fallen from the Hon'ble Sir Herbert Risley, I would remind him probably it is within his knowledge that during the period when Sir George Campbell was the Lieutenant-Governor of Bengal, the late Babu Kristo Dass Pal was the editor of a paper known as the *Hindu Patriot*. No more loyal citizen of India existed at this time than Babu Kristo Dass Pal, and his paper was considered one of the most loyal papers then in existence. And yet, in a Resolution in the local Gazette, Sir George Campbell described the paper as seditious, and I know he was taken to task for it by Lord Northbrook. So that it is quite possible that Local Governments may make mistakes,

as the Government of Bengal did in the case I have just cited, and which may be in the memory of my friend Sir Herbert Risley."

The motion was put and negatived.

The Hon'ble PANDIT MADAN MOHAN MALAVIYA moved that in clause 4, sub-clause (1) (d), the words " or to do any act which he is not legally bound to do, or to omit to do any act which he is legally entitled to do " be omitted.

The Hon'ble SIR HERBERT RISLEY " I am unable to accept the amendment."

The motion was put and negatived.

The Hon'ble PANDIT MADAN MOHAN MALAVIYA moved that at the end of clause 4, sub-clause (1), last paragraph, for the words " the Local Government " the words " the Magistrate " be substituted, for the word " declare " the words " require him to show cause why " be substituted; and for the word " to " in the last line the words " should not " be substituted. He said — " My reason is the same as that given by me in moving a previous amendment, i.e., I want a judicial decision instead of an executive order."

The Hon'ble SIR HERBERT RISLEY. " I am unable to accept the amendment "

The motion was put and negatived.

The Hon'ble BABU BHUPENDRA NATH BASU moved that in clause 4, sub-clause (1) (d), after the words " in fear " the words " of injury to his person, reputation or property " and in (f) after the word " injury " the words " to his person, reputation or property " be added. He said — " These are the words which I have borrowed from the Indian Penal Code, and the addition, if accepted, would define or at least limit the objects to which the person's fears may be excited. I think it would be a useful limitation in this definition "

The Hon'ble SIR HERBERT RISLEY: " I am unable to accept the amendment, and for this reason. It seems to me that the addition of these words, which the Hon'ble Member proposes to add, will be to exclude pressure brought to bear upon the members of the family of the person, that is to say, that these words will exclude from the purview of the Act the most subtle and the most dangerous form of intimidation that has been resorted to in recent years "

The Hon'ble BABU BHUPENDRA NATH BASU. " In that case, my Lord, I do not press it."

The motion was withdrawn.

The Hon'ble BABU BHUPENDRA NATH BASU moved that in clause 4, sub-clause (2), after the word and figure " sub-section (1) " the words " and not complied with " be added, and at the end of the same sub-clause the words " after the expiration of ten days from the issue of such notice; provided no such amendment shall take effect if in the meantime an application to set the same aside has been made to the High Court as hereinafter provided until the matter has been disposed of by such High Court " be added. He said — " This declares, as in the Bill, ' where a notice has been issued under sub-section (1), the declaration made in respect of such press shall be annulled.' That stops the press at once unless, as my friend the Hon'ble Mr. Sinha suggested, the party is able to put in the additional security which would be the added security and which would be a much heavier amount and thus carry on the press. For the purpose of avoiding that inconvenience I add this ' that after the expiration of ten days from the issue of such notice; provided no such amendment shall take effect if in the meantime an application to set the same aside has been made to the High Court as hereinafter provided until the matter has been disposed of by such High Court.' In this instance, as soon as the appeal is made, the press stops at once, but I provide that let a notice issue, the notice of

annulment, and let the offending party have ten days time within which to move the High Court, and if he succeeds in moving the High Court then the press will not be stopped. Of course I am aware that in the meantime much injurious matter may issue from the press, and this would be an argument against me. But, my Lord, if human actions are to be judged by ordinary standards, it is practically out of our purview altogether that after a man has been under notice of annulment and after his appeal to the High Court he will go on again writing sedition against the Government or any class of His Majesty's subjects, and that it being a very short time which I have provided, I think the amendment may be accepted by your Lordship."

The Hon'ble MR. S. P. SINHA —"On behalf of Sir Herbert Risley I would accept the amendment in a somewhat modified form. The section runs as follows: 'Where a notice has been issued under sub-section (1); the declaration made in respect of such press shall be deemed to be annulled.' That is, as soon as the notice is issued, the declaration is deemed to be annulled with this notice. I am willing to accept the amendment in this way 'After the expiry of ten days from the date of the issue of a notice under sub-section (1), the declaration made in respect of such press shall be deemed to be annulled.' But not in regard to the High Court, that if there is an appeal to the High Court the paper is to go on till the decision of the High Court, which will ordinarily take some time. We will accept the ten days."

The Hon'ble BABU BHUPENDRA NATH BASU —"I modify my amendment accordingly. However, we are grateful for small mercies. I may appeal to my Hon'ble friend, the Hon'ble Mr. Sinha. If you only give me ten days and they do not postpone the annulment until after the decision of the High Court, it practically confers no benefit upon the offending journal. And you treat the offender in the case of a book less severely, supposing I publish a seditious book that goes on circulating. Whereas in the case of a printing-press you stop it altogether. Of course I am entirely in your hands."

The Hon'ble MR. S. P. SINHA:—"I do not think my friend has quite apprehended the position. This section refers to the printing-press, the keeper of which is not to go on printing in his press from the moment that he has been required to deposit a further security that was the section originally drafted. We thought that it would give rise to some difficulty because the intention of the Bill is that after the order has been made for the forfeiture of the security he should be entitled to deposit further security and then go on, and that some little time ought to be given between the date of the order and the date of the deposit of the further security he may not be able to do it immediately or the next day. It is for that purpose we agreed to give ten days, so that, notwithstanding the order of forfeiture is made, he will still have these ten days during which time he can use his printing-press, and if on the tenth day he deposits his security he can go on all along. In the meantime he can go to the High Court."

The Hon'ble BABU BHUPENDRA NATH BASU —"I accept that."

The Hon'ble MR. GOKHALE:—"Since my amendment which follows is the same in substance, I would like to say a few words upon this amendment. Since Government are prepared to accept the suggestion that the notice of annulment should not be effective for ten days, I do not see why they should not go a little further. Otherwise what is the meaning of the appeal you allow to the High Court? You may, if you like, shorten the period of appeal from two months to, say, fifteen days. If after the notice of annulment the keeper of a press appeals to the High Court, say, within fifteen days to have the order set aside and the High Court expedites the hearing of the case, the whole thing may be decided in a comparatively short time. You propose to compel the man to stop his work even if he has appealed to the High Court that your order may be set aside. This may cause great hardship because he may have entered into contracts to deliver printed matter on a certain day, and

unless he offers fresh security, which may be up to ten thousand rupees, you will not allow him to go on. If the appeal is a remedy, I do not see why you should object to extending the period a little further."

The Hon'ble MR. S. P. SINHA.—"I think my Hon'ble friend makes the suggestion in his happy ignorance of the High Court. It is not possible for the Bill to direct the High Court to expedite the appeal; we could not do it. And although the appeal may be filed within the fifteen days, the time within which the appeal is to be heard will depend upon the state of business in the High Court, and unfortunately it is likely to be delayed for some considerable time. We cannot allow the order to be suspended during the very considerable period that is almost certain to elapse between the date of the order and the hearing of the application to set aside this order. Whereas with regard to the ten days, we make that concession in order that his business may not be stopped, and he goes on. If the High Court sets aside this order, he gets back the further security or the original security."

The Hon'ble MR. MUDHOLKAR :—"^AMy amendment is also on the same subject and with the same object. As my friend Mr. Gokhale has pointed out, it is not only the case of newspapers we are dealing with, but we are dealing with the case of printing-presses. There are numerous printing-presses who do nothing except job work, such as printing books and doing other things. Let us take the case of a press which is issuing a large number of books daily; there is printed a book which contained some objectionable passages, and for that the man is called upon to pay enhanced security and the security is ten thousand rupees. Now ten thousand rupees would mean an utter loss of business to the majority of printers of the Indian community. Certainly they will be simply unable to carry on the work. They will have to close their business and it will mean in many cases utter ruin for life. They would be entirely unable to carry out their contracts, their work will be stopped, and the whole thing will come to a crash. I had suggested yesterday to the Hon'ble Sir Herbert Risley and the Hon'ble Sir Harold Stuart the amendment which stands in my name, and which is intended to meet the case of those men who through inadvertence have committed some offence, and I propose that if the man gives an undertaking that he would not do any of the things laid down in section 4 (1) and executes also a bond, and further agrees that if during the pendency of the appeal he commits the same offence, then *ipso facto* the heavier penalty imposed under section 6 comes into effect, the man automatically becomes amenable to the enhanced punishment. As the object we have to prevent is the repetition of the offence during the pendency of the appeal to the High Court, that will be sufficient. My Lord, what we are anxious for is to secure some immunity to persons who have really no intention of carrying on the trade in illicit literature, but who through oversight have come into difficulty. I would request the Member in charge of the Bill to consider all these amendments together and see whether it is not possible by combining them together to meet the real difficulty of the situation which I have submitted to him."

The Hon'ble SIR HERBERT RISLEY.—"I am afraid I am unable to accept this except to the extent we have just indicated. Otherwise we have no security against a man of straw."

His Excellency THE PRESIDENT: "I understand the Hon'ble Babu Bhupendra Nath Basu to accept this."

The Hon'ble BABU BHUPENDRA NATH BASU: "Yes, I accept it."

The motion that in clause 4, sub-clause (2), for the words and figure "Where a notice has been issued under sub-section (1)", the words and figure "After the expiry of ten days from the date of the issue of a notice under sub-section (1)" shall be substituted, was then put and agreed to.

The Hon'ble BABU BHUPENDRA NATH BASU moved that in clause 5, for the words "one thousand" and "ten thousand," respectively, the words "five hundred" and "two thousand five hundred" respectively, be substituted. He said :—"My Lord, after the lapse of the first security the amount of deposit required is that it shall not be less than one thousand or more than ten thousand. It would be impossible for the most, the largest number of proprietors of printing-presses in India, amongst us Indians, to find security for ten thousand, to deposit ten thousand, with the apprehension always present in the mind that the whole of the ten thousand may be gone. My Lord, as I have said, that the definition of offences is very wide, and as my friend the Hon'ble Mr. Gokhale has pointed out that any expression which might be construed as showing ill-will towards Government or bringing it into contempt, it may be taken as sufficient to forfeit the security. Having regard to the fact that the ten thousand rupees cannot be found in these circumstances, and that this will practically mean the closing of the press, I would respectfully appeal to the Hon'ble the mover of the Bill to reduce the amount of the security."

The Hon'ble SIR HERBERT RISLEY : "I am afraid I cannot agree to this proposed reduction. The margin left here is very large and we are justified in assuming that in administering the Act regard will be had to the character of the press with which the Magistrate has to deal."

The motion was put and negatived.

The Hon'ble PANDIT MADAN MOHAN MALAVIYA moved that in clause 8, sub-clause (1), after the word "newspaper" in line 1, the words "started after the commencement of this Act" be added.

The Hon'ble SIR HERBERT RISLEY : "I have declined to accept a similar amendment."

The motion was put and negatived.

The Hon'ble MR. GOKHALE moved that in clause 8, sub-clause (1), before the word "shall" in line 6, the words "and who is not the keeper of the printing-press at which the newspaper is printed" be inserted. He said :—"My Lord, the object of my amendment is to provide for the case of a well intentioned person who wants to start a small *bonâ fide* press and also a small newspaper. Under the Bill, this individual, being the keeper of the press and also the publisher of the newspaper, will be required to deposit two securities, one for the press up to a maximum of Rs. 2,000, and the other for the newspaper also up to Rs. 2,000. Virtually it means that because this man wants to publish a small newspaper and have a press of his own, he will be called upon to deposit Rs. 4,000. I think in such a case the Government may well be satisfied with one security."

The Hon'ble SIR HERBERT RISLEY : "I am prepared to accept my Hon'ble friend's amendment in a modified form, namely, 'Provided that if the person registered under the same Act as printer of the newspaper is also registered as the keeper of the press where the newspaper is printed, the publisher shall not be required to deposit security so long as he is so registered.'"

The motion that in clause 8, sub-clause (1), of the Bill, after the words "Government of India" the following proviso shall be added "Provided that if the person registered under the said Act as printer of the newspaper is also registered as the keeper of the press where the newspaper is printed, the publisher shall not be required to deposit security so long as such registration is in force"; and in the existing proviso, for the words "Provided that" the words "Provided further that" shall be substituted, was then put and agreed to.

The Hon'ble BABU BHUPENDRA NATH BASU moved that in clause 9, sub-clause (2), after the word and figure "sub-section (1)" the words "and not complied with" be added, and at the end of sub-clause (2) the words "after the expiration of ten days from the issue of such notice; provided no such annul-

ment shall take effect if in the meantime an application to set the same aside has been made to the High Court as hereafter provided, and the matter has been disposed of by such High Court" be added. He said:—"This is the same clause which in a modified form has been already accepted; if the same concession is granted, we will accept it.

The motion that in sub-clause (2) of clause 8, for the words and figure "Where a notice has been issued under sub-section 1(1)", the words and figure "After the expiry of ten days from the date of the issue of a notice under sub-section (1)" shall be substituted, was then put and agreed to.

The Hon'ble PANDIT MADAN MOHAN MALAVIYA moved that in clause 8, sub-clause (2), all the words after "the Local Government may" be omitted, and the following substituted therefor, namely: "cause a notice in the form in the schedule hereto annexed or to the like effect to be served on the printer or the publisher of such paper," and add to the Act the following Schedule:—

"SCHEDULE.

Form of notice under section 8 (2).

Whereas a certain newspaper (*state name of newspaper*) contains words, signs or visible representations (*as the case may be*) of the nature described in section 4, sub-section (1), of the Indian Press Act 1910, this is to give notice to all whom it may concern, and to give all such persons a warning, according to the provisions of section 8, sub-section (2), of the said Act "

and then the following new clause be added —

"8 (3) If, after such a notice has been served on the printer or publisher, the newspaper in respect of which it has been issued contains any words, signs or visible representations of the nature described in section 4, sub-section (1), the Local Government may, by notice in writing, require the publisher to deposit with the Magistrate, within whose jurisdiction the newspaper is published, security to such an amount, not being less than five hundred or more than five thousand rupees, as the Magistrate may think fit to require, in money or the equivalent thereof in securities of the Government of India "

He said:—"I have taken this from the Vernacular Press Act of 1878. I think this at least may be accepted."

The Hon'ble SIR HERBERT RISLEY: "I am unable to accept the amendment. In practice no doubt the notice will usually be given, but it is not desirable or necessary that this formal obligation should be inserted in the Act "

The motion was put and negatived.

The Hon'ble SIR VITHALDAS D. THACKERSEY moved that after clause 16 the following clauses be added, namely —

"16A. The Local Government before passing an order requiring a keeper of a press or a publisher, to deposit security under section 3, or section 8, or before passing an order of forfeiture of any security deposit under section 4, 6, 9 or 11, and of the printing-press under section 6, shall give an opportunity to the keeper of the press, or the publisher of a newspaper, to submit any explanation that he may wish to give."

"16B. The Local Government may upon good cause shown cancel any forfeiture made under this Act "

He said:—"The object, my Lord, of this amendment is that before any action is taken or an order of forfeiture is passed, the accused party may have an opportunity of being heard. It is just possible that he may have a very reasonable and satisfactory explanation to give, and all the unpleasantness may be avoided. At the same time I do not wish to curtail the power of the Local Government to confiscate objectionable publications when they think necessary. I have therefore allowed that portion to remain."

The Hon'ble SIR HERBERT RISLEY: "I am unable to accept this amendment. There is no doubt whatever that reasons of high policy demand that Local Governments should administer this Act with the utmost tenderness.

There obviously may be cases in which it would be futile to call for an explanation. As for the second part, there is no object in empowering a Local Government in this Bill to do that which it can always do by virtue of its own executive authority."

The Hon'ble SIR VITHALDAS D THACKERSEY: "I have taken that portion from the Act of 1878"

The Hon'ble Mr. GOKHALE: "I beg to support this amendment. I really do not see why Government should not accept it. If the Government think that the man has offended, they can ask him to give an explanation. I do not see what there is in this that in any way detracts from the object which the Government have in view. It is an unnecessary hardship that a man should get up one morning and find there is an order of forfeiture, coming upon him as a bolt from the blue. I therefore support the amendment."

The Hon'ble SIR HERBERT RISLEY: "I can only say that there may be many cases in which it is necessary to secure promptness. There is not the slightest prospect of the law being harshly administered, and it is not desirable that Local Governments should be tied down by the law to require an explanation in every case."

The motion was put and negatived.

The Hon'ble PANDIT MADAN MOHAN MALAVIYA moved that in clause 17 for the words "of forfeiture" the words "requiring security to be given or declaring a security or other property to be forfeited" be substituted. He said.—"There ought to be opportunity given to a man who is called upon to deposit security to have the matter considered by the High Court, so that if a mistake has been committed he may have an opportunity of getting it rectified."

The Hon'ble SIR HERBERT RISLEY: "I am unable to accept this amendment; it has already been decided."

The motion was put and negatived.

The Hon'ble BABU BHUPENDRA NATH BASU moved that in clause 19 the words "and may award costs and damages" be added. He said — "My Lord, in clause 19, where the High Court may, on revision of the facts, set aside an order of forfeiture, I wish to add the words 'and may award costs and damages.' The party finds that heavy punishment is inflicted upon him. You make him forfeit his deposit and you make him incur heavy cost in moving the High Court. If the High Court is satisfied that the order is wrong or was not based on proper or sufficient material, why should not the High Court also be empowered to award costs or damages? Clause 22 provides that the party affected will have no other remedy. If he has no other remedy, and if he has been unjustly punished, why should we object to the High Court being also empowered, in cases where it finds that an order of forfeiture was wrongly made, to award costs and damages? That would be a very wholesome check upon the attitude of the Executive."

The Hon'ble SIR HERBERT RISLEY: "I am afraid I am unable to accept this amendment. My Hon'ble friend has put it as if this is a question of civil procedure; but these are questions of criminal procedure, it is not consistent with the form of criminal proceedings that the element of damages should be introduced."

The motion was put and negatived.

The Hon'ble Mr. Gokhale moved that at the end of the Bill a new clause be added, namely —

"27 This Act shall remain in force for three years only from the date on which it receives the assent of the Governor General."

He said :—"My Lord, I urge this amendment most strongly on the acceptance of the Government. I think that the Government will lose absolutely nothing by accepting it, whereas they will gain a great deal by accepting it. There is no doubt whatever that if after the expiry of three years the general situation in the country requires that similar legislation should again be in force, there would not be the smallest difficulty in the way of the Government passing another Bill like this through this Council as it is constituted. Look at the fate of the only amendment on which the Council has so far divided today. It was not only defeated but positively slaughtered. Therefore there would be no difficulty whatever in getting any required legislation through this Council. But, my Lord, the advantage of accepting this amendment would be this. It would at once show to the public the exceptional character of this legislation. It would be an invitation to large sections of the public to co-operate with the Government in terminating a state of things which has rendered that legislation necessary. I think large sections of the people who would otherwise feel it a grievance that this Bill has been passed would not feel the same objection to the Bill if this amendment is accepted. I therefore urge strongly that this legislation should remain in force for three years only."

The Hon'ble MR. MUDHOLKAR said —"My Lord, I also beg to support the amendment because the amendment which stands in my name is practically to the same purpose. Both these amendments, I may say, have been proposed after consulting a number of non-official members. My Lord, there is a very strong feeling among persons of responsible disposition to support Government in the exceptionally difficult situation in which they and the country are placed. I would only make this request, that as these are exceptional times when exceptional measures are required, the operation of these should be confined only to the continuance of those exceptional conditions. My Lord, as I pointed out in my speech made some time ago, there is an important principle which belongs as much to British jurisprudence as to Indian jurisprudence which has to be laid aside for purposes of the safety of the Empire, *vis.*, the exclusion of the jurisdiction of the Civil Courts and of the Criminal Courts and the clothing the Executive with the powers of the Judiciary. My Lord, we admit the necessity of taking this extraordinary power on account of the exceptional circumstances, but I would beg the Council to consider the great importance of the principle which is involved in the separation of the Judicial from the Executive functions in ordinary. There is no principle which has been more unreservedly admitted and considered more sacred and which is regarded as more in accord with the British constitution than the principle of the supremacy of law, and I would beg the Council to see this, that the clothing the Executive with extraordinary powers should be confined to the narrowest possible limits and should not go beyond the exigencies of the situation. When these exigencies cease it would be a fit occasion for the expiry of the Act. It would be not a little difficult to obtain a repeal of the Act. I say as in the case of the Irish Act, this present Act should expire of itself at the end of three years unless its continuance then is considered necessary by the Governor General in Council. I would therefore most earnestly request Government to consider the propriety of the amendment, which is suggested in the most friendly spirit and with a view of loyally co-operating with the Government in the great and difficult task which they have before them."

The Hon'ble SIR VITHALDAS D. THACKERSEY said —"My Lord, I support the amendment. It must have been plain to Government that in spite of the diverse opinions held by several members, considering the present situation, the Council as a whole has supported this measure in order to meet the situation; and I think when the situation improves, the measure must be reconsidered in the light of the situation at that time."

The Hon'ble MR. DADABHOY said —"My Lord, I venture to add a word in support of this amendment. I support it from a different standpoint. There is a thing like penitence even with the most violent section of the Press, and we should

give the seditious Press an opportunity of reclaiming themselves and regretting the past. If a hope is held out that this Act is to apply for a limited period only and it will be repealed when the situation improves, it will have a very salutary effect. I therefore appeal to every member of this Council to support the amendment. If after three years the present state of affairs continue, there will be no difficulty in the Legislature further extending that period; on the other hand, the adoption of such a course will raise hopes in the Press generally, and the conductors of newspapers will have the satisfaction of feeling that the Government have given them an opportunity of correcting their past errors and that if matters improve in the next few years through sobriety and restraint in their language, they will be restored to their former position. For these reasons I pray—I earnestly request—every member of this Council to leave aside all considerations and support this amendment. The object of the present legislation will be gained and there will be absolutely nothing to lead to the conclusion that any principle has been abandoned."

The Hon'ble BABU BHUPENDRA NATH BASU said:—"My Lord, the Hon'ble Member in introducing the Bill said it was suited to the circumstances. If that is accepted it will mean that Government only meant to introduce the Bill for the purpose of dealing with exceptional circumstances; that there is no desire to act in such a way as to restrict permanently the legitimate aspirations of the Press. Therefore, my Lord, I hope that this amendment will be accepted."

The Hon'ble MAULVI SYED SHAMSUL HUDA:—"I have much pleasure in supporting this amendment. I feel that an Act of this nature should not be allowed to remain on the Statute-book one moment longer than is necessary. I am convinced, my Lord, that the cloud which obscures the sky will soon vanish. If a time limit is imposed on this Act, it will be an incentive to the people, to the proprietors of newspapers and keepers of presses, so to conduct themselves as to make the renewal of such a measure unnecessary. I, therefore, my Lord, support this amendment."

The Hon'ble SIR HERBERT RISLEY:—"My Lord, I am afraid I can hold out no hopes that I am going to accept this amendment. It will involve a very serious danger and impair the effectiveness of the Bill. In England the license of the Press is controlled, and we see it controlled every day, by public opinion. Now here in this country there is very little public opinion and its place must be supplied by the law. This law, when it is passed, will be, as I have said before, a great public educator; and I think we should not hold out any hope that that wholesome influence of education will stop at the end of a hard and fast period. When, Sir, we get a Press temperate in tone and honest in intention, then it will be possible to repeal that law; but we cannot predict with any degree of certainty that that end will be attained after two or three or even after five years. The Hon'ble Mr. Gokhale told us at an earlier stage of the debate that the air was thick with antagonism. How soon will it clear? Can we be certain that it will be cleared within a certain number of years? If it is not, and if the Bill is limited to that period, then when the period expires it will be necessary to re-enact it. Out of that will come an undesirable excitement and general feeling. On the other hand, if the people concerned have themselves applied the remedy that we desire, nothing will be easier than to repeal the Act, and I submit, Sir, that to meet the people by repealing the Act will be a far more impressive way of doing that than this motion proposes to do."

The Hon'ble MR. GOKHALE:—"My Lord, I can only say that I am greatly disappointed at the answer of the Hon'ble Sir Herbert Risley. However, I should not have ventured to take up any more time of this Council but for a reference which the Hon'ble Member made to a remark of mine in this morning's speech. I did no doubt say that the air was thick with feelings which were antagonistic to the continuance of British rule. But one way of clearing the air of those feelings, one way of counteracting the mischief that exists, is to

show some confidence in the people, and this would be done by limiting the operation of the Bill to three years. I do not wish to add anything more. It is a matter of regret that an appeal from so many quarters has met with no response."

The Council divided :—

Ayes—16.

The Hon'ble Pandit Madan Mohan Malaviya.
The Hon'ble Mr. Abdul Majid.
The Hon'ble Raja Partab Bahadur Singh of Partabgarh.
The Hon'ble Mr. Sachchidananda Sinha.
The Hon'ble Babu Bhupendra Nath Basu.
The Hon'ble Mr. M. Mazharul Haque.
The Hon'ble Nawab Saiyid Muhammad Sahib Bahadur.
The Hon'ble Mr. G. K. Gokhale.
The Hon'ble Rao Bahadur R. N. Mudholkar.
The Hon'ble Mr. M. B. Dadabhoy.
The Hon'ble Mr. G. M. Chitnavis.
The Hon'ble Maulvi Abdul Karim Abu Ahmad Ghaznavi
The Hon'ble Raja Pramada Nath Ray of Dighapatia.
The Hon'ble Maulvi Syed Shamsul Huda.
The Hon'ble Mr. Mahomed Ali Jinnah.
The Hon'ble Sir Vithaldas Damodar Thackersey.

Noes—42.

His Honour the Lieutenant-Governor.
The Hon'ble Mr. J. O. Miller.
The Hon'ble Sir G. Fleetwood Wilson.
The Hon'ble Mr. S. P. Sinha.
The Hon'ble Sir Herbert H. Risley.
The Hon'ble Major-General R. I. Scallan.
The Hon'ble Mr. R. W. Carlyle.
The Hon'ble Mr. L. M. Jacob.
The Hon'ble Mr. W. Maxwell.
The Hon'ble Mr. J. S. Meston.
The Hon'ble Mr. J. B. Brunyate.
The Hon'ble Sir H. A. Stuart.
The Hon'ble Mr. S. H. Butler.
The Hon'ble Malik Umar Hyat Khan.
The Hon'ble Zulfikar Ali Khan.
The Hon'ble Sardar Partab Singh.
The Hon'ble Mr. M. W. Fenton.
The Hon'ble Mr. F. A. Slacke.
The Hon'ble Maharajadhiraja Bahadur of Burdwan.
The Hon'ble Mr. J. M. Holms.
The Hon'ble Mr. C. H. Kesteven.
The Hon'ble Mr. C. G. Todhunter.
The Hon'ble Surgeon-General C. P. Lukis.
The Hon'ble Mr. H. W. Orange.
The Hon'ble Mr. J. M. Macpherson.
The Hon'ble Mr. J. Andrew.
The Hon'ble Raja Vairicherla Vairabhadrarazu Bahadur of Kurupam.
The Hon'ble Mr. H. O. Quin.
The Hon'ble Mr. F. Rawson.
The Hon'ble Kanwar Sir Ranbir Singh.
The Hon'ble Mr. W. C. Madge.
The Hon'ble Mr. C. W. N. Graham.
The Hon'ble Mr. F. A. T. Phillips.
The Hon'ble Mr. F. C. Gates.
The Hon'ble Maung Bah Too.
The Hon'ble Mr. P. C. Lyon.
The Hon'ble Mr. C. Stewart-Wilson.
The Hon'ble Mr. F. E. Dempster.
The Hon'ble Lieutenant-General Sir Douglas Haig.
The Hon'ble Sir T. R. Wynne.
The Hon'ble Mr. G. H. B. Kenrick.
The Hon'ble Colonel F. B. Longe.

So the motion was negatived.

The Hon'ble MR. MUDHOLKAR moved that at the end of the Bill the following new clause be added, namely :—

" 27. This Act will come into operation at once, and will remain in operation for a period of three years, that is, up to the 7th of February 1913. But the Governor

General in Council may by notification extend its operation for a further period of two years, that is, up to the 7th of February 1915."

He said :—" My Lord, my amendment is one which goes a little further than Mr. Gokhale's amendment. My Lord, after the fate which the last amendment received, it would be leading a forlorn hope to press this again. But as in this amendment there is a further period to which, by a notification, the Governor General can extend the operation of this measure, I would again ask whether it would not be possible to do something to meet a request coming from so many persons belonging to the Council."

The Hon'ble BABU BHUPENDRA NATH BASU :—" My Lord, again there is an amendment which stands in my name : "and shall be in force for three years, or for such further period as the Governor General in Council may determine." I suppose that leaves it to the Government at any time it chooses, without passing any Act, to determine the operation of the Act. I do hope that may be accepted."

The Hon'ble SIR HERBERT RISLEY : "I am unable to accept either of these amendments for the reasons which I gave just now."

The motions were put and negatived.

The Hon'ble SIR HERBERT RISLEY moved that the Bill, as now amended, be passed.

The motion was put and agreed to.

His Excellency THE PRESIDENT said :—" Gentlemen, this is the first great measure which has been dealt with by the new Imperial Council, and I congratulate Hon'ble Members on the thoughtful tone of the speeches to which we have listened; and though some exception has been taken to the nature of the powers conferred upon Local Governments, I would ask Hon'ble Members to bear in mind that in framing the Bill the Government of India has had to consider, and to meet as far as possible, very considerable diversities of public opinion. We believe that the Act as now passed avoids unnecessary and irritating interference, and at the same time affords ample machinery for dealing with the evil it is intended to meet. The causes which have rendered legislation necessary were so fully and ably explained to you by Sir Herbert Risley on Friday last and were so eloquently laid before you by the Hon'ble Mr. Sinha today that I need not attempt to repeat them to you. I would rather draw your attention to the political importance and significance of today's discussion. The members of this greatly enlarged Council, thoroughly representative of Indian interests, have passed what may be justly called a repressive measure, because they believe with the Government of India that that measure is essential to the welfare of this country. In so doing they have furnished the proof which I have always hoped and believed that they would furnish—that increased representation of Indian interests and communities would not weaken, but would vastly strengthen, British administration. That being so, I hope I am right in assuming that we are at the commencement of that new political era of which I have so often spoken, and that the presence on this Council of the leading public men of India may afford the Viceroy's Government the loyal advice of which it has so often stood in need.

"In accordance with this view the Government of India has decided to obliterate, as far as they have it in their power to obliterate, the sore feeling caused by the action which has been forced upon them by past emergencies. We have determined to release the State prisoners who were deported, under Regulation III of 1818, fourteen months ago. Our justification for their release is based upon the belief that the political position has entirely changed, that the political movement of which they were the leaders—seditious

as it was—has degenerated into an anarchical plot, which can no longer be legitimately included as part of the political agitation in which they were so culpably implicated. We believe that we are no longer confronted by a political movement such as they inaugurated, but are face to face with an anarchical conspiracy waging war against British and Indian communities alike, and that it will be long before we can exterminate the evil unless those communities agree to work together hand in hand. We believe that their mutual efforts will be greatly encouraged by the release of the deportees as showing that Government is willing to trust the influential classes of the people and to rely upon their co-operation and loyalty.

"But though we have come to this decision, we cannot for an instant disregard the probability of further attempts at outrages, and that probability we are determined to combat with all the weapons at our disposal.

"In the meantime we trust that the Act which this Council has passed today will efficiently control the source from which so much evil has emanated."

The Council adjourned to Friday, the 18th February 1910.

J. M. MACPHERSON,
*Secretary to the Government of India,
Legislative Department.*

CALCUTTA ;
The 21st February 1910. }

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA,
ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND
REGULATIONS UNDER THE PROVISIONS OF THE
INDIAN COUNCILS ACTS, 1861 TO 1909 (24 & 25 VICT.,
C. 67, 55 & 56 VICT., C. 14, AND 9 EDW. VII, C. 4).

The Council met at Government House on Friday, the 18th February 1910.

PRESENT : •

His Excellency THE EARL OF MINTO, P.C., G.C.M.G., G.M.S.I., G.M.I.E.,
Viceroy and Governor General of India, *presiding*,

and 53 Members, of whom 47 were Additional Members.

OATH OF OFFICE.

The following Additional Member, before taking his seat, made the prescribed affirmation of his allegiance to the Crown :—

The Hon'ble Mir Allah Bakhsh Khan of Talpur.

QUESTIONS AND ANSWERS.

The Hon'ble MR. DADABHOY asked :—

"1. Anent my question of 15th January 1909, on the subject of the abnormal rise in the prices of food-stuffs, and the appointment since of an officer to conduct the inquiry, will Government be pleased to state their intentions about the composition of the Commission, and the scope of the inquiry ?

"2. Is it the intention of Government to place a few non-officials on the Committee as suggested by the Hon'ble Mr. Chitnavis in 1908 ?

"3. With a view to ensure thorough investigation of the question, will Government be further pleased to order an open inquiry at important centres ?

"4. For a clear comprehension of the official action by the public, will Government be pleased to place on the table the correspondence on the subject between them and the Secretary of State ?"

The Hon'ble SIR GUY FLEETWOOD WILSON replied :—

"In answer to questions (1) and (2) put by the Hon'ble gentleman, I have to point out that there are two separate and distinct stages in regard to this inquiry. The first stage is to collect and analyse the facts, to examine the local conditions by which they are influenced, and to estimate their effect. The second stage is to investigate the reasons underlying the facts and to decide what remedy, if remedy is necessary, lies within the power of the Government. In other words, it is necessary to diagnose the disease before going into the question of treatment. For the first stage of the inquiry a Committee would appear to be the least suitable machinery. The collection and compilation of facts and figures can better be effected by a single official of special experience and training in statistical work, assisted by an adequate staff. For this first stage, therefore, we do not think it advisable to appoint a Committee. We propose to entrust this part of

the inquiry to Mr. K. L. Dutta, an experienced officer of the Finance Department. I am however able, without further delay, to give the Hon'ble Member the terms of reference upon which he will be asked to report :—

- (1) What has been the actual rise in prices in India during the past fifteen years? Has this rise affected all commodities alike or is it specially marked in the case of food-grains? Are there marked differences in respect to enhancement of prices as between different areas?
- (2) To what extent is the rise in the prices due to what may be styled 'world factors', and how far may it be ascribed to local conditions?
- (3) Does it appear that the rise is a permanent feature, or is it temporary only?
- (4) If it be more or less permanent, what are its probable economic effects on the country as a whole and on the different sections of the community?

"In reply to questions (3) and (4) put by the Hon'ble Member, I have to say that adequate steps will be taken, and full provision will be made, to enable Mr. K. L. Dutta to obtain the best and most reliable information available at important centres throughout India.

"It is not considered either necessary or advisable to lay on the table the correspondence which has passed between the Government of India and the Secretary of State."

The Hon'ble MR. DADABHOY asked :—

"Is the Government aware that assessment of the Indian income-tax is not uniform, generally without data and unpopular?"

"With a view to secure smoothness in the working of the Act and to inspire confidence among the people, will the Government be pleased to give to the Civil Courts jurisdiction to hear appeals against the assessment, or, in the alternative, to join non-officials with the Revenue-officers in the assessment and the hearing of objections?"

The Hon'ble SIR GUY FLEETWOOD WILSON replied :—

"I am afraid I do not quite understand in what sense the Hon'ble gentleman suggests that the assessment of the income-tax is not uniform. The rates are the same for all India; and the procedure of assessment, though it is prescribed by rules framed for each province by its own Local Government, follows the same lines everywhere. We are aware that the data for assessment are of somewhat unequal value; but the assessing officers employ whatever reliable data are obtainable. I do not contend that the tax is a popular one; but I should hesitate to apply that term to any tax, so far at least as the taxpayer is concerned.

"The Government of India are not prepared to give the Civil Courts jurisdiction in the assessment of taxes. The experiment of associating non-officials in the assessment is in operation in certain provinces, but it would be impracticable to employ non-official assessors in the hearing of objections."

The Hon'ble MR. DADABHOY asked :—

"Does the Government propose to introduce into schools a regular course of ethical education? If so, will such education be purely secular? With a view to disarm hostile criticism and to secure public support and co-operation, will Government be pleased to settle the details with the help of a Committee of Educationists, official and non-official?"

The Hon'ble SIR HARVEY ADAMSON replied :—

"No proposal to introduce into schools a regular course of ethical education has as yet been deliberated on by the Government of India. It is a matter to which the Government of India attach considerable importance."

The Hon'ble MR. DADABHOY asked :—

"Is there any truth in the newspaper report that the Secretary of State for India in Council has approved of a scheme, involving an increased annual expenditure of five lakhs of rupees, for the improvement in the pay and prospects of the ministerial officers of the Judicial and Revenue Courts and offices of Bengal? If it be a fact, will the Government be pleased to extend to the other provinces the same kindness, and to place ministerial officers of all parts of India on the same footing in respect of pay and prospects?"

The Hon'ble SIR HARVEY ADAMSON replied :—

"A scheme for the revision of the pay of ministerial officers attached to Judicial Courts, to the offices of Commissioners of Divisions and to district and sub-divisional offices in Bengal was sanctioned by the Secretary of State in May 1909. The cost of the scheme was nearly 5½ lakhs. The last general revision of the pay of ministerial officers in the province was made in 1868."

"Questions affecting the pay of ministerial establishments are primarily for consideration by the Local Governments concerned, and the Government of India have no reason to believe that uniform rates of pay for such establishments throughout India are either necessary or desirable."

The Hon'ble MR. DADABHOY : "Will the Government be pleased to inform us if any demand for increased pay has been made by Local Governments."

The Hon'ble SIR HARVEY ADAMSON : "I am afraid I require notice of that question."

The Hon'ble MR. DADABHOY asked :—

"Is the Government in a position to state the total area of pasture lands in the country, and further, whether there has been a decrease in it during the past fifty years? Is it aware that the present area is insufficient for the support of cattle, and that lands that should be left as village commons are included in reserved forests? Will the Government be pleased to revise, with the help of a Committee on which non-officials should be adequately represented, the rules framed under the Indian Forest Act so as to have in every village a sufficient quantity of land for pasture?"

The Hon'ble MR. MILLER replied :—

"I am unable to give the Hon'ble Member definite information as to the total area of pasture lands in India, as such lands are not separately classified in the Agricultural Statistics. They are included in the figures relating to fallow and waste land, and to forests which the Hon'ble Member will find in Table No. 2 at page 50 of the printed volume of Agricultural Statistics. No definite comparison is therefore possible with the conditions of fifty years ago, but there can be no doubt that owing, chiefly, to the great increase in cultivation, and in some places owing to the spread of irrigation, the area available for pasture has largely decreased during that period. It is impossible to say whether over the whole of India the grazing area is insufficient for the cattle; this must be matter of opinion, but there is no doubt that in many parts of the country grazing grounds have been seriously curtailed. The Government of India are not aware that lands that should be left as village commons are included in reserved forests, but have no doubt that any cases of the kind in which there may be room for reasonable doubt will be carefully considered if brought to the notice of the Local Government. The subject of the maintenance or of the further provision of pasture land involves much wider considerations than the question indicates."

Local Governments are fully alive to its importance. No action under the Forest Act could possibly secure the provision of a sufficient quantity of such land in every village. This could only be done by interfering with the land-owner's freedom of action in devoting to cultivation land hitherto used for pasture. As regards grazing in the forests, the rules under the Indian Forest Act are framed for each province by the Local Governments concerned, and Local Governments are fully aware of the importance of providing grazing facilities in forests and also of utilising forests for the provision of fodder as far as this can be done with due regard to the maintenance of the forests themselves. The Government of India, therefore, are of opinion that the Committee proposed by the Hon'ble Member could not serve any useful purpose, and they are not prepared to appoint it."

The Hon'ble MR CHITNAVIS asked :—

"Is Government aware that official tours, notwithstanding the good intentions of the officers, cause great inconvenience in small villages to villagers and landholders who have to arrange the camp and supply provisions?"

"In view of the obvious desirability of reducing the inconveniences incidental to the tours to a minimum, while maintaining necessary supervision by officers, will Government be pleased to consider if convenient centres cannot be fixed in the interior for official camps, and, if they can be, to advise Local Governments to fix such centres in consultation with gentlemen interested in the matter?"

The Hon'ble SIR HARVEY ADAMSON replied :—

"The question raised by the Hon'ble Member is discussed at length in paragraphs 670 and 671 of the Report of the Royal Commission on Decentralization in India. The Commission suggest that tours should be carefully planned, so as to afford a reasonable length of stay at selected centres, from which visits can be made to outlying parts. Such halting places should be in large villages at which supplies are easily procurable and where lodging is available for persons who have business with the touring official. The Commission do not suggest that halting places in the interior should be fixed by the Local Government nor in view of the varying conditions of different provinces and the nature of the work that has to be done in camp would this plan be practicable. The opinions of Local Governments have been invited on the proposals of the Commission, and copies of the Hon'ble Member's question and my answer will also be forwarded to them."

INDIAN COMPANIES (AMENDMENT) BILL.

The Hon'ble MR. MAXWELL presented the Report of the Select Committee on the Bill further to amend the Indian Companies Act, 1882, and said he proposed to move that the Report be taken into consideration at the next meeting of the Council.

• DOURINE BILL.

The Hon'ble MR. MILLER presented the Report of the Select Committee on the Bill to provide for the prevention of the spread of Dourine and gave notice that on a subsequent occasion he would move that the Bill be taken into consideration.

INDIAN PAPER CURRENCY BILL.

The Hon'ble SIR G. FLEETWOOD WILSON moved that the Report of the Select Committee on the Bill to consolidate and amend the law relating to the Government Paper Currency be taken into consideration,

The motion was put and agreed to.

The Hon'ble SIR G. FLEETWOOD WILSON moved that the Bill be passed.
The motion was put and agreed to.

INDIAN MUSEUM BILL.

The Hon'ble MR. MAXWELL : " I beg to move that the Bill to consolidate and amend the law relating to the Indian Museum be referred to a Select Committee. A few amendments in the Bill have been suggested by the Asiatic Society of Bengal and the British Indian Association, but they do not affect the main principles involved in the measure, and refer only to matters of detail. We have, however, thought it advisable that the Bill should be referred to a Select Committee in order that the various points with which it deals may receive adequate consideration.

" I therefore move, my Lord, that the Bill be referred to a Select Committee consisting of the Hon'ble Mr. Harvey, the Hon'ble Mr. S. P. Sinha, the Hon'ble Mr. Macpherson, the Hon'ble Colonel Longe, the Hon'ble Babu Bhupendra Nath Basu, the Hon'ble Maharajadhiraja Bahadur of Burdwan, the Hon'ble Mr. Graham, the Hon'ble Mr. Madge, and myself."

The motion was put and agreed to.

CENTRAL PROVINCES COURTS (AMENDMENT) BILL.

The Hon'ble SIR HARVEY ADAMSON moved that the Bill to amend the Central Provinces Courts Act, 1904, be referred to a Select Committee consisting of the Hon'ble Mr. S. P. Sinha, the Hon'ble Mr. Phillips, the Hon'ble Mr. Macpherson, the Hon'ble Mr. Dadabhoy, the Hon'ble Mr. Chitnavis, the Hon'ble Rao Bahadur R. N. Mudholkar and the mover.

The motion was put and agreed to.

INDIAN PENAL CODE AMENDMENT BILL.

The Hon'ble SIR HARVEY ADAMSON moved that the Bill further to amend the Indian Penal Code be taken into consideration.

The motion was put and agreed to.

The Hon'ble SIR HARVEY ADAMSON moved that the Bill be passed.

The motion was put and agreed to.

The Council adjourned to Friday, the 25th February 1910.

J. M. MACPHERSON,
Secy. to the Govt. of India,
Legislative Department.

CALCUTTA;
The 21st February 1910. }

SUPPLEMENT TO
The Gazette of India

No. 9 } CALCUTTA, SATURDAY, FEBRUARY 26, 1910.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the Gazette may receive the SUPPLEMENT separately on a payment of five Rupees per annum, delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

FINANCIAL STATEMENT

OF THE

GOVERNMENT OF INDIA

FEBRUARY 1910.

ACCOUNTS	1908-1909
REVISED ESTIMATES	1909-1910
BUDGET ESTIMATES	1910-1911

MEMORANDUM EXPLAINING THE DETAILS OF THE ESTIMATES	277—372

SPEECH OF THE HONOURABLE FINANCE MEMBER INTRODUCING THE FINANCIAL STATEMENT FOR 1910-1911.

Introductory.

On this occasion, when the first Financial Statement under the new rules is presented to our greatly enlarged Council, I may be permitted to indulge in a brief retrospect. In February, 1860, just fifty years ago, my predecessor and namesake, the Right Honourable James Wilson, in an elaborate speech, laid the earliest of India's annual financial statements before the Legislative Council of those days. His speech, as I have said, was elaborate, it covered the whole ground of the financial and economic position of India. But the accounts which it introduced were set forth in a single short table, printed on a sheet no bigger than the proverbial sheet of note paper. To this were appended a few statistics of debt, trade and cash balances, the whole thing barely occupied ten octavo pages. There was of course no discussion. The revenues for the coming year were estimated at £38 millions and the expenditure at £42 millions. The total external trade, imports and exports combined, was valued at only £60 millions (it is now over £200 millions) and the total debt of India was £98 millions (it is now over £250 millions). We have gone a long way in these fifty years, and our conditions are widely different from what they were in 1860; but there is a curious parallelism between parts of Mr. Wilson's speech and some of the things which I shall have to say to-day. He had to deal with a deficit; he had to convey a grave warning (which was long unheeded) of the precarious nature of our opium revenue, and he had—as alas! is my fate also—to suggest additional taxation.

2. It is not, however, the matter, but rather the form and the treatment, of our financial statements that I set out to review. The full expository speeches and the brief figured tables were continued by Mr. Wilson's successors for thirteen years. Though about 1866 we find the abstract of revenue and expenditure developed and classified into major heads—a far shorter list than we now have, but numbered and arranged much in the present style. In 1873 and for the three following years, there were no Budget meetings, the old law of 1861 did not permit the Council to meet for other than legislative business, and the finances of those years involved no legislation. The statement in those circumstances took the shape of a formal minute published in the *Gazette*. In 1877, however, with a great famine overshadowing the finances, a Budget meeting had again to be convoked, and the statement was presented by Sir John Strachey in a speech of portentous length. It occupied 40 pages of printed foolscap, and was supplemented by another 34 pages of a minute in which the Finance Member examined the figures in fresh detail. In 1881, Major Baring (now Lord Cromer) restored comparative brevity; but in 1882 he reverted to a speech which occupies 52 printed pages, explaining that there was no other means of describing the figures with accuracy, and that his attempt at condensation in the previous year had been misunderstood. After that, came a series of annual minutes, with a wealth of detail, but a decided tendency to technicality. During this period the form in which our figured statements are now shown was worked out under Lord Cromer's orders, and in 1890, Sir David Barbour split up the explanatory speech or minute into two parts. His intention evidently was that the first part should be mainly a discussion of policy and the second an examination of results. It was some time before this ideal was reached and Part I in the course of years got more and more overloaded with figures, technical and difficult. But in 1900, Sir Clinton Dawkins got back to the original idea. Part II, prepared by the Financial Secretary, became a detailed exposition of the figures, adapted to the student or the specialist, while Part I was the vehicle used by the Finance Member for a broader review of the position and for his declarations of financial policy.

3. Of the nature of the discussions on the past Financial Statements I need say little, as they were described in a picturesque passage of the speech with which Sir Edward Baker summed up the Budget debate of two years ago. Prior to 1892 no discussion at all was permissible. In the following year the rules under the Indian Councils Act, 1892, had come into force, and members were at liberty to offer any observations they might wish on the Statement, but not to put any motion or divide the Council. The observations allowed by the rules became in time lengthy and

comprehensive non-official members ranged over the whole field of Indian administration, and official members were drawn into the defence of the acts and policy of their departments. There was no other recognised occasion during the legislative session, either for the former to criticize or for the latter to expound.

4. So much for the old order which is now passing. Let me turn to the new. What I submit to the Council to-day is the result of direct evolution from the system that has been worked out during the last fifty years. The Financial Statement which the new rules prescribe will be found in the set of tabulated figures displaying, in their logical and time-honoured classification, the closed accounts of last year, our latest estimates of revenue and expenditure for the current year, and our preliminary forecast for the ensuing year. The explanatory memorandum which the rules require is the old Part II of previous years. It is prepared, however, in greater detail than before, yet with less repetition, and an attempt is made in it to explain succinctly the movements of the figures under each important head of account, as well as to give a conspectus of our Ways and Means operations. But, in order to summarise the lessons of the figures and to review the general position, I propose to retain, in the remarks which I shall now offer to the Council, our old Part I in a slightly different and less technical garb.

5. As regards the discussion, a still greater change will mark the new procedure. To-day the rules do not permit discussion. It would in any case be manifestly unreasonable to expect members to speak, almost on the spur of the moment, upon the large and complicated questions which emerge from the Financial Statement. But on a later date, which I believe Your Lordship intends to fix for next Friday, the Council will proceed to what roughly corresponds with the Committee stage of the estimates in the House of Commons. We shall take up first the consideration of our proposals for fresh taxation, for a new loan, and for additional grants to Local Governments. Then, after a short interval, the Council will again assemble in what I may term Committee of the whole House, and each "major head" in the accounts which is open to discussion will be explained in turn by an official member who has special knowledge of the branch of the administration concerned. At both of these stages it will be open to any member by way of resolution after due notice given, and subject to a few reservations, to call attention to any matter which is directly relevant to the figures under consideration, to criticize the necessity for any entry, or to ask for further information regarding it. All such resolutions, if in order, may be duly debated. In this way ample opportunity will be afforded for a genuine scrutiny of the estimates by the Council, and for a criticism which is based on precise facts. We believe that the result will be helpful to the Government, and will foster the growth of an informed public opinion upon the vital problems of our public finance. Having, during a public service which covers a period not far removed from half a century, attended nearly every financial debate in the Mother of Parliaments, I hope that I shall not be considered presumptuous if I venture, in passing to impress upon Members of Council that it is rather by the painstaking examination of specific items of expenditure than by the framing of abstract resolutions on organic changes in financial policy that economy can best be attained. Also that advantageous services can be more readily provided for by means of savings effected, than by appeals for additional funds which the finances of India cannot produce without casting additional burdens upon her people.

6. Towards the end of March—the 23rd being the date fixed for this year—I shall present the Budget in its final form, after embodying in it all corrections that may result from the detailed discussions and any other changes which the passage of time may necessitate. On that occasion there will be no further debate. At an adjourned meeting, however—fixed for the 29th March—members will be at liberty to make observations on the Budget, without moving resolutions or asking the Council to divide. In addition to the new and more intimate discussion on the detailed figures, we thus retain the old liberty of general criticism. But I trust that the closing debate will be materially shortened after the comprehensive examination to which the estimates will have been subjected at their earlier stages. I may also venture on a hope that questions of wide general policy will not, so far as possible, be tacked on to these proceedings. Other opportunities are now given for raising debates on matters of general interest, and it will be more convenient to us all, and more economical of time, if these opportunities are taken, instead of loading the Budget with disquisitions on side issues. There are, it is true, very few aspects of our administration which are not reflected in our Budget: but after all the Budget is primarily a provision for the public services of the coming year. It is a business document, and it will be to our credit as a Council if we handle it in a business-like manner.

Revised Estimate of 1909-1910.

7 When I introduced the Budget for the current year, I entered a plea for caution and economy. On almost every side there were auguries of better harvests and reviving trade. But recovery was likely to be slower than it had been in times of the country's convalescence from previous famines, because the trade conditions of the world remained dull and unsettled. A year ago, prices were still high; the country was still feeling the effects of over-speculation and a glut of imports, and the loss of our opium revenue was a standing menace. That caution has been justified, but we have also been justified in our resolution to face the difficulties of the year without extra taxation, and we now believe that the year will close with a surplus remarkably close to, and slightly in excess of, the small margin of revenue for which we budgeted.

8 From the agricultural point of view, the year has been a good one, and the country may be said to have shaken off the effects of the drought of 1907. At the beginning of last April, it is true, there were still over 100,000 persons in receipt of State relief, but distress during the hot weather was nowhere very severe. It was confined for the most part to limited areas in Bihar and the United Provinces, and by July all relief operations were closed. Except in Bengal and parts of the United Provinces, which suffered from a shortage in the winter rains, the outturn of the spring harvest was not unsatisfactory. Later, the improvement became more definitely marked, for the monsoon broke early and the rainfall was unusually abundant and well distributed in nearly every part of the country. Famine and scarcity were at last at an end. The autumn and winter harvests were everywhere good, and in many places excellent. Bumper rice crops have been reaped in Bengal and Eastern Bengal, while the autumn harvest in the Punjab is estimated to be 21 per cent in excess of the average for the previous five years. The only complaints we have heard - and they are not serious - come from some of the Madras districts which are suffering from the failure of the north-east monsoon in October. In them however the excellent rainfall of the previous months replenished the various sources of irrigation, and no serious anxiety is felt, though the yield of the cold weather crops cannot be a full one. In all other parts of the country the accounts of the spring crops are very satisfactory though more rain would be useful in some places. If no untoward event occurs in the next month, an excellent harvest should usher in the ensuing year.

9. It was natural therefore and proper that, when the end of the regular monsoon showed the agricultural position to be assured, a general air of hopefulness should pervade the country. I am afraid however that it did not penetrate the Finance Department, where the state of the public exchequer was felt to be by no means free of anxiety. On making our usual preliminary revision of the estimates in November, we found falling prices, easy money, and a tangible rise in the purchasing power of the people. Trade however was still slack, and the recovery seemed likely to be slow, irregular and hesitating. The land revenue, including large amounts of famine arrears, had been coming in well, but in nearly every other important respect our receipts were below expectations. The most disappointing section was our Railway earnings, which reflected the slowness of the general improvement, being almost a crore short of what we had counted on realizing by the end of October. Backward Customs returns, particularly from piece-goods and silver, indicated how seriously the import markets had been glutted, and a marked shortage in the Post Office receipts bore testimony to the dullness of general business. Our revenue from Forests, from Salt, from Excise, was also behindhand, while on the other side of the account, our budgeted expenditure seemed likely to be fully required. We were therefore compelled in ordinary prudence to explain the situation to our big spending Departments and to Local Governments, and to call upon them to exercise all possible economy in view of our diminished resources. The appeal was loyally responded to, and the savings in expenditure which were thus secured have played a considerable part in the improvement of the financial position that has taken place since November.

10. To that change there have been other contributory factors - the good harvest of cotton and oilseeds, with their effect both on railway traffic and on the spending power of the peasantry, the increasing activity of the import market, and the big rice movements which are beginning in Burma, with the accompanying rise in export duties. But the most dramatic feature in the situation has been the sudden and unexpected development of our Opium revenue. I must diverge for a moment to explain this movement and the events which led up to it.

11. As I mentioned last March we intended to sell 42,300 chests of Bengal opium during the current financial year, and in view of the fluctuating mood of the China market, we based our estimate of receipts on the cautious average of Rs. 1,350 a chest.

In Malwa we had apparently reached a curious *impasse*. The Bombay godowns were full, and duty had been paid in advance upon a very large quantity of opium which still lay in Malwa and which the recently imposed restrictions would not allow to be shipped until 1910. In the circumstances, though it was impossible to foresee how the trade might move, we assumed that further payments of duty against the 1911 shipments might be expected, and we budgeted cautiously for the receipt of duty upon something between 8,000 and 9,000 chests. Up to October, our moderation seemed justified. The China market was dull, with a slightly rising tendency. The prices fetched by our Bengal opium varied between Rs. 1,150 and Rs. 1,450, and the clearances from Malwa were not more than would ordinarily be required for home consumption. In October however a sharp rise in the China prices took place. I need not discuss the complicated factors in the remarkable speculative movement which was thus established, and over which, so far as the China market is concerned, we had of course absolutely no control. The first result of the movement was another rush to pay duty in advance. The trade had got wind of our proposal—to which I shall allude hereafter—to give Malwa a larger share of the 1910 exports, and although we had guaranteed no priority of shipment after 1910, the exporters were prepared to take their chance and, so to speak, to register their claims. During the first half of November, duty was paid on 17,000 chests, when the Indore authorities very properly stopped the rush and refused to receive any more payments. We were at the time in correspondence with the Secretary of State regarding the distribution, as between Bombay and Calcutta, of our reduced exports; and as soon as that matter was settled, we decided how to deal with our unexpected windfall of revenue. The decision was to retain the duty paid in respect of chests which under our revised programme could be shipped in 1911, to grant priority of shipment to those chests in the order in which duty had been received, and to refund all payments that had been made in respect of chests which could not be either used for home consumption or exported to China in 1911, thus leaving us a free hand regarding the 1912 exports. This closed the episode for the time being, so far as concerns the Malwa revenue. But the excitement in the China market had an immediate and startling effect upon our Calcutta prices also. From Rs. 1,439 a chest in October, the selling price suddenly bounded up to Rs. 1,800 in November, and even this price, unprecedented for nearly half a century, was outstripped in January, when the average ran up to Rs. 2,044, only to be again and still more strikingly exceeded by the figure of Rs. 2,397 which was obtained at the sale in the current month.

12. The net result of this great appreciation in the value of Indian opium in China is that our revenues in the current year, after deducting the refunds to which I referred above, will gain about £1,000,000 beyond what we budgeted for. So far as possible, the windfall has been utilized on the sound principle of meeting non-recurring liabilities which would otherwise have hampered our finances in future years. We have in this way been enabled to restore the depleted balances of Bengal, Eastern Bengal and Assam and the Central Provinces, to complete our promised grant to the Rangoon river training scheme, and in various other directions to fulfil obligations which will lighten the burden on the general revenues hereafter.

Such being the main features in this eventful and difficult year, I proceed to show how far our original estimates of revenue and expenditure have been supported or modified by the results as we can now forecast them with the actual figures of ten months in our possession. I shall do so in round figures and on general lines, neglecting minor variations.

Revenue

13. The total revenue which we expected, when our Budget for the year was framed, was £73,750,000. The revenue we now hope to realize is £74,303,700, being an improvement of £552,800. The Provincial section will be better by £798,700, the bulk of which comes from the improvement in land revenue and from the additional grants that we are making to three Local Governments. The Imperial section, on the other hand, shows a deterioration of £245,900 and it is to the explanation of this figure that I invite the Council's attention.

14. Land Revenue is the first head under which our estimate has been materially varied. The fine harvests have enabled the current revenue to be collected promptly, as well as an unexpectedly large slice of the arrears which lay over since the late famine. The total increase over our Budget figure will be £393,000. The Imperial portion of this would be roughly one-half but instead of sharing in the increase, the Imperial Government is actually credited with an amount of Land Revenue which is worse than our original estimate by £494,000. The apparent anomaly has already been explained, for it is by transferring the necessary amounts from our own share of the receipts under this head to the Local Governments concerned that we give effect to the

grants made to the two Bengals and the Central Provinces in aid of their diminished balances. Apart from this, all the other gains and losses to the Imperial revenues are true gains and losses, and not mere transfers to Provincial exchequers. The largest of the gains is the £1,106,000 (gross) by which we benefit from Opium and the heaviest of the losses is £644,000 by which our total net Railway earnings are expected to fall short of our Budget Estimate. Of the latter, about £73,000 is due to small excesses in the working expenses on certain railways where the charges for repairs, renewals and coal had been under-estimated. The balance represents a shortage in the traffic returns, due to the slow recovery in business, the tardy movement of crops, and the depression in the coal trade. Lines serving the Gangetic plain and its adjoining country are most prominent among the losers the Great Indian Peninsula Railway, with its big cotton connection, and the lines which traverse Southern India have done very much better; but the losses outweigh the gains.

15. I would now ask the Council for a moment to balance these three divergencies from our original figures. On the one hand we have the windfall of £1,106,000 from Opium. This is a departure from our estimates which is due to the vagaries of a market influenced by wholly abnormal causes and entirely outside our control. Upon the other hand we have, first, the reduction of £494,000 in the Imperial receipts from Land Revenue. As I have explained, this is more than accounted for by the grants made out of our opium receipts to Local Governments and to local bodies in order to fulfil obligations that we should otherwise have had to defer. Secondly, we have the drop of £644,000 in our net Railway receipts. You see how closely these three variations balance; and now, if you exclude them, you will find that the aggregate discrepancy between the Budget estimate and that which I now present, taking all our other sources of Imperial revenue, is the comparatively small shortage of £213,000. In this total there are no individual fluctuations of any importance, and I venture to say that the result is not an unsatisfactory proof of the care with which our original estimates were framed, and that it reflects very great credit on the officers of the Finance Department.

16 The most prominent of the minor differences appear under Customs Excise and Interest. The Customs revenue will probably fall about £157,000 below our Budget figure. The imports of petroleum, metals and manufactured articles generally have been dull, and the lateness of this year's rice exports has helped to pull down our estimate, in spite of the higher yield from silver and from Java sugar. Excise will yield us about £246,000 less than we had budgeted, and half of this loss will fall on Imperial revenues. The steady progress of reform (including the curtailment of outstill areas) and the continuous rise in our excise duties have gone far to check the rapid expansion of the revenue from intoxicants which took place during the recent cycle of prosperity, and in some parts of India these influences appear to have been supplemented by very welcome movements in favour of temperance. The variation under Interest is in the opposite direction from those I have just mentioned. It shows an improvement of £159,000 over the Budget figure, due partly to increased receipts from interest on overdrafts of railway capital by companies in India, and partly to the successful employment by the Secretary of State of his spare balances in short loans to the London money-market.

Expenditure

17. I turn now to the expenditure of the year which is coming to its close. We had budgeted to spend £73,720,500 our latest figures indicate that we shall need only £73,350,700, and that the Imperial share of the saving will be £284,000. To this very satisfactory result the chief contributor has been the Army. The total reduction on our budgeted provision for Military Services will be about £391,000, effected partly in generous response to our call for economy last November, and partly by shorter purchases of ordnance and other stores in England. I shall return to this subject in more detail a little later. The other chief economies occur under the salaries and contingencies of the various Civil Departments, where we expect a saving of £122,000, and under the charges on account of Civil Works, which will be £113,000 less than we provided in the Budget. We have thus been able, not without some real sacrifices, to secure a genuine curtailment of expenditure amounting, under these few prominent heads, to no less than £626,000, and there are a number of minor reductions which I do not stop to specify. Against these, there are outstanding excesses over the Budget grants under three heads but it is gratifying to observe that in two of these cases there has been only a nominal, and not a real, increase of expenditure. The first of these is Refunds, where we shall require an addition of £128,000 to our original figure, this being almost wholly due to our decision, as I have already explained, to return the duty paid on Malwa opium which cannot be sent to China.

before 1912. The second case of nominal over-spending appears under the Famine Relief and Insurance grant. By the peculiar constitution of that grant, any lapse in the budget allotments either for famine expenditure (whether Imperial or Provincial) or for protective works, in a year when the total grant does not exceed the prescribed million, is not added to our revenue surplus but goes automatically to swell that portion of the grant which is used for the reduction or avoidance of debt. In other words, it is cast into our general balances with a view to capital expenditure, and must thus be debited against revenue. The result in the current year is that the Imperial share of the Famine grant will be raised by £91,000, being the amount by which the grants taken by Local Governments for the cost of direct famine relief have happily proved to be unnecessary. The third chief excess over budget provision appears in our Interest charges, which we expect to be £125,000 higher than the original estimate. This is partly due to a smaller share in the total having been charged to the Railway and Irrigation accounts, partly to a change in the average rate, which is re-calculated on the latest data every year, and partly to the higher discount which the Secretary of State had to pay on his India bill in England.

18 I may now briefly summarize the finances of the year, so far as the Imperial section of the accounts is concerned. We budgeted for a surplus of £230,900: we now hope to realize a surplus of £269,500. Our revenue has declined by £245,900 but our charges have been reduced by £284,500, the balance of £38,600 representing the improvement in our surplus. Considering the difficulties of the year, I regard this result as distinctly satisfactory. It is possible that some further changes may be necessary before we finally dispose of these estimates at the end of March, for the Council will fully realize that the present statement is technically at least—a preliminary draft—but I do not anticipate any substantial alterations.

Budget Estimate for 1910-1911.

19 It is with some reluctance that I leave the narrative of a chequered but not unsuccessful year, to take up a less agreeable task. The new financial year which will begin five weeks hence, gives promise of opening under favourable auspices, with good harvests, active markets, expanding trade. The heavy remittances of capital from abroad, both in gold and in Council drafts testify to the prosperity which is expected in the private finances of the country. Do we anticipate an equal buoyancy in its public finances? In many respects I do. We believe that, if the monsoon rains are adequate, the land revenue will be punctually collected, that our customs receipts will rise, our railways do well, and most of our other heads of revenue show an improvement. But unfortunately I cannot expect a surplus, without the help of additional taxation, which accordingly it will be my unenviable duty to propose. For this state of affairs there are two plain and adequate reasons. In the first place, the reduction of our exports of opium to China will cause a serious fall in our opium revenue. In the second place we are obliged to abandon to Eastern Bengal and Assam a much larger share of its land revenue than it has hitherto retained, for the present resources of the Local Government have proved quite insufficient for the needs of the new province. These two factors dominate the position for 1910-11. Apart from them we should have been able to meet the normal growth of our expenditure from our growing revenues. Though I view with grave anxiety the steady growth of our expenditure, yet I realise that, without a general re-casting of our scale of public charges, we cannot extend indefinitely those retrenchments of a temporary and emergent character which have been forced upon us in the last two years. I should have been prepared therefore to budget for a moderate addition to the current year's charges and to look to the natural improvement of our resources to cover that addition without asking for any extra taxation. But the loss under Opium and the needs of Eastern Bengal have made equilibrium impossible and a permanent strengthening of our resources is inevitable. The best way in which I can explain the situation will be to take the Council through the allotments which we wish to make for expenditure in 1910-11, to examine how far our revenue, in normal conditions and with the existing scale of taxation, would have been sufficient for our charges, to show where, and by how much, it will fall short, and finally to describe the special measures which we consider necessary to equate our resources with our requirements.

Expenditure

20. The total expenditure which we have to provide for in 1910-11 is £75,652,500. This is £2,301,800 in excess of our total estimated expenditure in the current

year; but £1,101,000 of the difference is due to increased charges which will be met from Provincial resources, so that the Imperial increase which I have to justify is roughly £1,200,000. The Council may take it that out of this sum, £500,000 is required by the commercial departments of Government, and £700,000 by those ordinary administrative services from which we receive no direct monetary return. A further analysis indicates that it will be sufficient to consider the excess as falling under five groups of heads—Interest, Posts and Telegraphs, Salaries and Expenses of Civil departments, ordinary Civil Works, and Military services. The five groups of services which I have just named are going to cost us almost exactly £1,200,000 more than they have done in 1909-10, the minor variations may safely be neglected.

21. The Interest charges, which form the first of my five groups, are shown under various heads, but in the aggregate they come to nearly £408,000 more than in the current year. The interest on ordinary debt, as I will explain immediately, will hardly be raised at all in India, but there will be an increase of about £270,000 in England. On the small loan which we propose to take in India, our total discount charges (apart from all question of the rate) should be easier than they were this year; and we ought not to have interest to pay on advances to our treasury from the silver branch of the Gold Standard Reserve, as was the case for a few months in 1909-1910, so that on the whole our next rupee loan should not cause a net addition to our interest liabilities in the coming year. But in England the case is different. A full year's interest has to be paid on the Sterling loan of 7½ millions which the Secretary of State raised last month and increased payments have to be made to the sinking funds which are now established for meeting the discount on our English loans. I still have to explain £138,000 of the total increased expenditure under Interest. By far the greater part of this is a consequence of the fresh capital which certain of the Companies working State lines will raise and deposit at the India Office until they require it. About half of the balance represents debits against us in India in certain complicated transactions with the Bengal-Nagpur Railway Company, which I need not describe in detail; the remainder stands for our increasing interest liabilities on savings bank deposits, on the new general provident fund, and the like. Practically the whole of the increased charges which I have been describing under this head are a compulsory and inevitable result of the extension of our Capital expenditure on productive works.

22. The second category of increased expenditure is our Post Office and Telegraph charges, where we expect a growth of about £81,000. In the case of the Post Office the growth is small (£24,000) and of normal character, and it is more than covered by increased receipts. The third and fourth categories comprise the additional provision in next year's estimates for ordinary Public Works (roads, buildings, etc.) and for the salaries and expenses of what are known as the Civil Departments. The great bulk of this outlay is met by Local Governments from their own provincial resources, but certain charges, both in England and in India, are exclusively Imperial, and show an increase of about £155,000. For that part of the decennial census operations which will take place next year, we have provided five lakhs, which is £32,000 more than in the current year. The other individual variations are of comparatively small importance, and the total excess allotted under Civil Departments is £97,000. On ordinary Public Works the increased expenditure will be £58,000, this much being considered necessary in order to allow of the progress of a number of works which had to be postponed in the current year. The fifth category is the Military charges, to which I shall return later and in more detail. The expenditure here is taken at £536,000 more than in the current year. Out of this excess £128,000 goes in the combined naval and military operations which have had to be undertaken to check gun-running in the Persian Gulf, and £408,000 are for the general purposes of military efficiency. As I have said, I shall take up this subject again, but I wish to emphasize that what we are providing for military expenditure next year is in reality (apart from the Persian Gulf expenditure) considerably less than we provided in the current year's budget. His Excellency the Commander-in-Chief, however, gave me his cordial co-operation—for which I take this opportunity of thanking him—in reducing expenditure at a time when the outlook was causing us serious anxiety, the result being, as I have said above, a very welcome reduction in the 1909-1910 allotments. To compare next year's grants with what has actually been spent in the current year is thus deceptive; the temporary curtailment of expenditure now in force could not be a permanent reduction.

Revenue.

23. I next proceed to consider our probable income, and its adequacy to meet our budget of expenditure. Our Imperial requirements for 1910-1911, as I have briefly

described them, demand a provision of £50,257,800. During the year which is now closing, we expect our Imperial revenue to be £49,326,500. To maintain bare equilibrium therefore, we must be able to count on improving the revenue by close on a million sterling while we shall have to get considerably more if we are to budget for a reasonable surplus or working balance, such as every prudent Government must insist on. In order to see whether this is practicable, I will now ask the Council to go very briefly through the chief heads of revenue with me and ascertain what increases they will yield. In this examination, we had better leave Land Revenue and Opium to the end, as they will require somewhat careful examination.

24 From Railways, at the outset, it is apparent that we cannot expect much assistance. The gross receipts of State lines show a remarkable improvement of nearly £1,130,000 but the increase in current expenses is almost equally great. The Railway Board, who are the responsible advisers of the Government in the matter, urge that the economies which we are now enforcing must, in the interest of our railway development, be at least temporarily relaxed, and that advantage should be taken of our increased earnings to push on the more essential renewals and repairs which on several lines have recently been deferred. I have been obliged to accept that view, and I have budgeted for a net improvement of only £38,000 from our railway revenues as a whole. Most of our other main heads however promise better. From Customs, on the existing tariff, we should expect an improvement of £183,000. There is a steady upward movement in imports, which ought to continue, and give us a moderate increase, particularly from liquors, petroleum, piece-goods, metals and manufactured articles generally; while in view of the big crops in Burma and Bengal, the rice export may reasonably be taken at a figure somewhat higher than was realised in the last good year, 1905-1906. A substantial increase in Excise seems equally certain even if there were no further enhancement in duties. There is invariably a rise after a year of good harvests, and illicit practices are being steadily worn down by the strengthening of the preventive forces in the different provinces. We estimate therefore that our share of the revenue from this source will be, on the present rates of duty, some £109,000 better than in the current year. The Posts and Telegraphs, under the stimulus of the revival in trade, should give an increase of £96,000. A group of other heads, which are all more or less sensitive to the general condition of the people,—Salt, Stamps, Income-tax and Mint—will yield, as we estimate, an improvement of about £165,000. Irrigation receipts will be diminished by the plentiful rainfall, and Interest is taken at a reduced figure as the Secretary of State's loanable balances may not be so high as in the current year. But against these we are able to set a number of minor increases under Forests and a variety of other heads which I need not enumerate. The chief of these is the military receipts, from which we hope for an improvement of £63,000, owing to the new arrangements for clothing, larger sales of dairy produce, and other causes.

25 The net result for all the heads with which I have thus briefly dealt is an anticipated increase of £638,000 in next year's receipts. I come now to our Land Revenue estimate, which is affected by the absence of famine arrears and works out to about 23 lakhs below what we count upon realizing in 1909-1910. The Imperial share of this decrease would, in natural course, be about £105,000, but *per contra* we should have to set the large improvement that has its origin in the peculiar circumstances of the current year. I refer to the subsidies which our recent Opium receipts have enabled us to make to certain provinces and local bodies, and which aggregate about £633,000. These grants being non-recurring, their absence from next year's accounts would have absorbed the decrease in arrears collections and raised the Imperial share of the Land Revenue by £528,000 net. Add this to the increase of £638,000 under the other improving heads of revenue, and it is apparent that we should have almost fully covered the increase of £1,200,000 in expenditure. At the risk then of some repetition, I trust I have made it abundantly clear that we have not allowed any increase of expenditure which could not have been met from the normal and moderate expansion of our ordinary revenues.

26. We thus return to the special causes which interfere with that expansion. The first is the necessity for a revision of the provincial settlement with Eastern Bengal and Assam. How the necessity arose, I will discuss later. For the present all I need mention is the result, *viz.*, that we have agreed, with the Secretary of State's approval, to increase the Local Government's share of the revenues which it collects by £255,000, involving an equivalent recurring loss to Imperial finances. The second and by far the greater of our difficulties is the loss in Opium revenue, which we estimate (net, after certain adjustments) at £872,000 as compared with the present year.

27. When the agreement into which His Majesty's Government entered with China on our behalf was announced, it was at once apparent how seriously the Indian revenues

were bound to be affected. The effects of the curtailment of our opium exports have hitherto been somewhat obscured by the events which I have already described both a year ago and to-day. But they are now coming into operation, and their operation is all the more vigorous because it has been deferred. In the calendar year 1910 we shall, as required by the agreement, export 5,100 chests less than in the calendar year 1909. Translating this arrangement into terms of the financial year, we can sell only 37,560 chests of Bengal opium in 1910-1911 against the 42,300 chests sanctioned in 1909-1910. In the current year we take the average selling price at Rs. 1,610 a chest for next year, owing to the continued high prices in China, we believe that Rs. 1,750 a chest is a reasonably safe assumption. The result is that, on Bengal opium by itself, we hope to restrict our loss to £160,000. But for Malwa opium, a comparison of the actual exports of the two years affords no guide to the financial position. As I have explained before the whole of the duty payable to us on the exports permissible up to the end of December 1911 has already passed into our treasury; and for this good and sufficient reason we do not budget for receiving any further dues on Malwa opium during the financial year 1910-1911. The consequence is that, as compared with the receipts during the current year, we must prepare for a loss of £718,000.

28. I have now explained our requirements. I have given an estimate of what our revenues would be under normal conditions. I have shown where the conditions are other than normal, and I have described the gap that actually intervenes between our requirements and our resources,—a gap which may roughly be measured by the shortage of £1,127,000 due to opium and the new settlement with Eastern Bengal and Assam. To fill that gap, the Government of India are compelled to impose extra taxation which is estimated to yield £1,133,000.

Fresh Taxation.

29. The taxation which we propose falls under three main heads. The bulk of what we require will be raised by increasing the existing Customs duties on liquors, on tobaccos, on silver and on petroleum. In this way we hope to obtain an additional revenue of £967,000. Certain consequential alterations in the excise duties upon beer and so called "foreign" liquor made in India will bring in a further £33,000. The balance, or £133,000, we propose to take by enhancing the Stamp duties on certain instruments which I shall enumerate later. The Government of India have not come to this decision without the most anxious consideration. There was no avoiding the deficit there was no temporary palliative for it. The profits from our railways will no doubt improve, and the elasticity of most of our other heads of revenue is happily assured. But we cannot in prudence treat the decline in our Opium receipts as other than permanent, and in the present uncertainty as to China's achievements, we must keep in view the possibility of its being continuous. Nor can we, apart altogether from the Opium question, shut our eyes to the heavy demands upon the Indian exchequer which lie ahead of us, in the cause of education, to name only one pressing requirement. It has become our clear duty to strengthen the basis of our revenues, and we have endeavoured to do so in the way which will be least burdensome to the country. A variety of other schemes for increased taxation, several of which will readily occur to the minds of my honourable friends, were fully considered, but the balance of advantage seemed to rest with the combination which I have described, and this has the full approval of the Secretary of State.

30. So far as our Customs proposals are concerned, we have held fast by the general principle that our tariff is a revenue, and not a protective, tariff. But substantial duties on wine, beer, spirits and tobacco are in no way inconsistent with that principle, while they constitute one of the most legitimate forms of taxation in every civilized country. Our proposals regarding liquors are intended to simplify the existing rates, and to raise them by from 30 to 50 per cent. Upon tobacco the present taxation—5 per cent. *ad valorem* on manufactured, and nothing at all on unmanufactured tobacco—is ludicrously inadequate. In 1907-1908 over 6 million pounds of tobacco were imported into India, and all that it paid to Government was £25,000, in England it would have paid forty times as much. What we now propose is a set of rates which, in the case of cigarettes, is represented by Rs. 2 a lb. They may diminish import for a time, but incidentally they may check the rapid growth of the cigarette habit, which is not without its danger to the rising generation in India. On petroleum we simply propose to raise the present rate from 1 anna to 1½ annas per gallon. On silver we intend to take a fixed duty of 4 annas an ounce instead of the 5 per cent. *ad valorem* which it now pays. The enormous import of those two commodities marks them out as fitting objects for an increased contribution

to the exchequer, and we prefer to take the extra taxation which we require by substantial duties upon a few articles of comparative luxury rather than by interfering with the all-round uniform rate upon a variety of less important articles, many of which may be described as necessities.

I hope I shall not be charged with framing a swadeshi budget. In the sense which may be seen indicated on Bryant and May's match-boxes ("Support Home Industries") I think swadeshi is good, and if the outcome of the changes I have laid before Council result in some encouragement of Indian industries, I for one shall not regret it, but I would emphasise the fact that the enhanced customs duties are attributable solely to the imperative necessity of raising additional revenue. There is not the slightest inclination towards a protective customs tariff. Even in free-trade England we have always imposed considerable customs dues, not to protect industries but to raise revenue. That is all we are doing in India, and I cannot but think that in countries which depend mainly on agriculture, where the population is poor and there are no large and profitable manufactures, it will be long before you can dispense with customs receipts as a part of the revenue essential for the administration of the country.

31. The increase which we propose in stamp duties will touch only a limited class of documents. We do not interfere with the charges on bonds, conveyances, leases, mortgages, cheques or receipts. But we intend to raise the duty on bills of exchange, on the issue and transfers of shares and debentures, and on agreements for the sale of those securities. Full details of the new rates are given in the Bills which will be presented to the Council to-day to give effect to the changes.

32. With the aid of these new taxes, we hope to secure an Imperial revenue of £50,503,700 in the ensuing year. I have already stated our expenditure requirements at £50,257,800, so that we budget for a surplus of £245,900. It is a very, very small margin for a year in which many surprises may await us, and any shortage in the monsoon would sweep it clean away. But our estimates throughout are studiously cautious, we were anxious to avoid the levy of a single superfluous rupee of extra taxation, and with reasonable good fortune I trust that a modest surplus will carry us through, as it has done in the current year. I invite the Council to contrast our situation with the present difficulties which beset the Chancellor of the Exchequer in England, or the £8,000,000 of extra taxation in France, or the loan of £4,600,000 with which Prussia hopes to cover its deficit next year, or the still heavier loans that have been forced upon Germany for the current needs of its administration in these two years.

Military Expenditure.

33. I deal now in more detail than was possible in the foregoing remarks with some of the bigger Departments. I begin with the Military services, the expenditure upon which under their various heads for five years is as follows —

	GROSS.					NAT.
	Army	Marine	Military Works	Special Defences	Total.	All Military needs.
1906-1907	£ 19,057,845	£ 602,318	£ 1,127,515	£ 138,358	£ 21,586,086	£ 20,169,343
1907-1908	18,647,533	445,024	1,166,943	116,287	20,415,787	19,248,354
1908-1909	19,177,266	476,957	907,362	29,044	20,650,629	19,602,988
1909-1910 (Budget)	19,350,900	473,400	855,600	27,900	20,708,200	19,653,000
1909-1910 (Revised)	18,948,000	479,100	853,800	36,700	20,317,600	19,233,100
1910-1911 (Budget)	19,488,500	484,300	879,600	1,500	20,853,900	19,706,500

I mentioned last year that it had been decided to abolish the grant for special expenditure and to revert to the system which was in force prior to 1904-05. Provision is now made for this purpose to the extent warranted by the state of our finances. During the five years ending with 1903-04 a sum of about £6 millions in all was allotted. Then followed Lord Kitchener's reorganisation and re-distribution schemes. In prosecuting these schemes and carrying on the work already begun and meeting ordinary new requirements which presented themselves from time to time we spent about £7 millions between the years 1904-05 and 1908-09.

34. In March last entirely new conditions presented themselves. The general financial position was not satisfactory and, as regards military expenditure, we were faced

with the obligation to provide for nearly £¹/₄ million for the increased payments to the War Office on account of the British Army in India and for the pay concessions to the Indian Army. The rates for food supplies too were still rising. To meet these new charges, all of them practically unavoidable without throwing an additional burden upon general revenues we had to economise in many directions, and as our political relations had improved it was decided to proceed more deliberately with schemes of reorganisation. After restricting the provision to the lowest limit the Budget figure for 1909-10 was placed at about £85,000 less than that of the previous year.

35. Considering the extent to which this year's Budget had to be cut down and the extraordinary demands which I have alluded to above, our latest estimates of the probable actuals of the year disclose a very satisfactory state of affairs. The net military expenditure for 1909-10 is expected to be £370,000 less than that of 1908-09, the reduction being due in the main to a substantial decrease in food charges in India and in expenditure on stores in England. The position has enabled us to take in hand at once the improvement of the accommodation for the Indian Army, a measure of importance and urgency to which the Commander-in-Chief called our attention soon after his arrival. It has become obvious that, with the persistent rise in prices and wages, comfortable and durable buildings can no longer be constructed at the cost which was previously regarded as sufficient. In the lines which are now being built we are adopting a sound type of construction and are entrusting the operations to the Military Works Services instead of to regimental agency.

36. The other principal measures involving special expenditure which we have undertaken are referred to in the Memorandum explaining the Financial Statement. I will merely mention that we have established in the current year a Cavalry School of instruction, the organisation of the new artillery ammunition columns has been practically completed, progress has been made with the provision of accommodation for additional troops at Quetta, Jubbulpore, Ahmednagar and Nowshera, and there has been an advance in the output of quick-firing guns and short rifles from the Gun and Rifle Factories. We have also improved the arrangements for financial control by extending to all British troops and the Supply and Transport Corps the new system under which accounting and audit duties are undertaken in separate offices and by moving out two more Audit Offices to Divisional Head Quarters. Finally we have had to provide for the expenditure on the arms traffic operations in the Persian Gulf. Of the total sum which we have allotted for this purpose, viz., £218,000, a sum of £45,000 will fall into the accounts of the present year.

37. For the coming year, apart from the special provision for the arms traffic operations in the Persian Gulf, we propose to allot £120,000 less than the amount provided in the current year's Budget. We have been able to provide for a somewhat larger expenditure on special measures than in this year and to restore some of the temporary reductions made in March last. Among the more important measures with which we propose to proceed in 1910-11 are the improvement of accommodation for the Indian Army, and the building operations referred to above; the organisation of military companies for maintaining communications in the field, a requirement which is now universally recognised as essential; the purchase of horses to commence the reconstitution of an artillery reserve, and the supply of intrenching tools to the field army and of a uniform pattern of rifle carrying equipment to the Indian Cavalry.

We anticipate a further increase in the output of guns and rifles from our factories, but it is necessary to supplement the local production of rifles by purchase from Home, and we have accordingly provided funds for this purpose. The Royal Garrison Artillery in India is being reorganised, and we expect a considerable saving from this measure. We are also remodelling the system of Ordnance Factory accounts on the advice of the Home experts.

For the expenditure in 1910-11 on the arms traffic operations we have provided £173,000. On the other hand we have been able to maintain a large part of the reduction in our store demands which has been effected during the current year; we anticipate a further substantial improvement in regard to the food charges, and we hope to obtain a considerable saving by using the R.I.M.S. *Duffin* in the Home trooping service for two voyages and dispensing to that extent with the employment of hired transports.

38. We have also been able to provide for a possible increase in the railway rates for military traffic, consequent on the desire of the Railway Companies to modify the tentative arrangements made two years ago for the adoption of a vehicle mileage rate for military traffic, which, though administratively advantageous, is thought to involve an undue loss to the railways.

Railways.

39. It has become customary to bring together in this part of the Financial Statement the figures of capital expenditure on railways during the last five years and the similar estimate for 1910-1911. I accordingly present the table as usual, it includes capital outlay, whether incurred by the State or through the agency of guaranteed assisted companies

	1905-1906	1906-1907	1907-1908	1908-1909	1909-1910 (Revised)	1910-1911 (Budget)
	£	£	£	£	£	£
Open lines including rolling stock	5,121,300	5,948,067	7,328,000	8,532,740	7,738,730	7,875,800
Lines under construction—						
(a) Started in previous years	3,662,073	3,526,066	3,006,800	1,366,200	1,203,470	2,424,200
(b) Started in current year	215,057	176,667		146,130	400,130	566,676
	8,999,430	9,650,800	10,334,800	10,045,070	9,342,330	10,866,670

40. On the 31st March 1909, the total length of open lines was 30,808 71 miles, classified according to gauge as follows —

5' 6" gauge	16,001 95
Metre	13,083 49
Special gauges (2' 6" and 2')	1,723 27
TOTAL	30,808 71

During the current year we have added to these approximately the following mileage —

5' 6" gauge	456 90
Metre	317 43
Special gauges (2' 6" and 2')	77 63
TOTAL	851 96

During the ensuing year it is intended to increase this length by 520·55 miles.

41. In the current year the return on the capital at charge amounts to 4·48 per cent, as compared with 3·69 in 1908-1909, 4·75 per cent in 1907-1908 and 5·38 per cent in 1906-1907. The rate of interest which we have taken for the year on the debt chargeable to railways is 3·384 per cent

The position has greatly improved since last year, although the traffic returns have not come up to expectations. The improvement is largely due to the acceptance by the railway administrations of the reasonable and indeed inevitable limitations imposed by budget provision. The grants for working expenses etc., are unlikely to be exceeded by more than the comparatively unimportant sum of £85 000, and this excess may be taken as due to unprecedented floods on the North-Western Railway and the cyclone which worked serious havoc on the Eastern Bengal State Railway. If we take the railway revenue account as a whole and set the interest charges, the annuities and sinking fund payments, and the minor debits (cost of land, etc.), against the net earnings, we find a surplus of £828,500 which accrues to general revenues. Last year there was a net loss to the State, for the first time since 1898-99.

42. Our anticipated results for the ensuing year have already been alluded to. The gross earnings are expected to respond to the trade revival, but the larger grants which we have been advised to provide for improvements in the permanent-way, rolling stock, and general equipment, as well as the increasing charges on railway debt, will depress the net surplus. It is estimated at only £486,200. We should have been glad of a greater measure of assistance from our railways in a year of considerable difficulty, but we accept the situation in the confident hope that our sacrifices now will result in a substantial and permanent increase of our net railway profits in the future.

Irrigation.

43. The financial position of our great Irrigation undertakings may be gathered at a glance from the following table, which carries on and brings up to date the information that it has been customary to give in previous Financial Statements

	1906-1907	1907-1908 *	1908-1909	1909-1910. Revised.	1910-1911, Budget.
<i>Productive Works.</i>					
Capital outlay to end of year	£ 25,745,780	£ 26,978,016	£ 28,002,898	£ 29,081,500	£ 30,225,800
Direct receipts	2,307,959	2,160,389	2,213,644	2,251,400	2,190,300
Land Revenue due to Irrigation	999,989	1,035,088	1,084,773	1,120,700	1,122,300
TOTAL	3,307,948	3,195,477	3,298,417	3,372,100	3,312,300
Working Expenses	920,310	981,804	1,011,140	1,061,600	1,062,700
Interest	870,962	905,887	930,708	965,900	1,002,400
TOTAL	1,792,272	1,887,691	1,941,848	2,027,500	2,065,100
NET PROFIT	1,510,676	1,307,786	1,356,569	1,344,600	1,247,200
<i>Protective Works.</i>					
Outlay on construction to end of year	2,019,081	2,382,855	2,736,094	3,176,600	3,612,200
Direct receipts	34,272	47,625	33,980	53,000	64,300
Land Revenue due to Irrigation	6,992	5,445	6,271	7,400	7,500
TOTAL	41,264	53,070	40,251	60,400	71,800
Working Expenses	18,322	22,205	25,449	27,100	30,300
Interest	64,269	75,025	86,619	100,000	114,900
TOTAL	82,591	97,230	112,068	127,100	145,200
NET LOSS	41,327	44,160	71,817	66,700	73,400
<i>Minor Works and Navigation</i>					
Direct receipts	183,705	232,045	219,334	231,400	220,200
Expenditure	856,898	838,728	879,339	906,900	915,100
NET LOSS	673,193	606,683	660,005	675,500	694,900

* The figures for 1907-1908 include the capital outlay to the end of 1906-1907 on the following Minor Works transferred to the productive class from 1st April 1907 —

		Rs	£
United Provinces	Dun Canals	10,40,873	69,400
	Bijnor "	2,49,476	16,170
North-West Frontier Province	Kabul River Canal	9,77,683	65,180
Madras	Shattatope anicut system	4,07,014	27,130
	Tirrukkoyilur anicut system	3,13,259	22,220
	Cheyeru anicut system	3,98,916	26,600
	Poincy anicut system	2,30,767	15,390
	Lower Coleroon anicut system	14,89,605	99,310
	TOTAL	51,20,593	341,800

44. At the end of 1908-1909, 55,140 miles of main and branch canals and distributaries had been constructed, commanding 47 million acres of culturable land, the area actually irrigated in the year was 22,187,430 acres. The productive works during that year yielded a net return of 8.17 per cent on the capital outlay of £28 millions, after paying all charges exclusive of interest. The net profit to the State was £1,356,000.

45. The revised estimate for 1909-1910 shows a net profit of £1,345,000 on productive works and a net return on capital outlay of 7.94 per cent. At the end of the current year we expect to have 55,601 miles of main and branch canals and distributaries constructed to command 47,396,402 acres of culturable land, and we hope actually to have irrigated about 21½ million acres during the year. In addition to the canals in operation, there are altogether 44 projects which are either under construction or awaiting sanction or being examined by the professional advisers of the Government, of these 14 are productive and 25 protective. They are designed to irrigate 3.24 million acres and 3.61 million acres, respectively, at a total capital cost of nearly £11½ millions and £19½ millions, respectively. The former are expected to yield a net return of 7.40 per cent. on the outlay.

46. The most important works which received sanction during the year are the Tendula project in the Central Provinces and the Hathras Branch of the Upper Ganges canal in the United Provinces. A reference to the former project was made in paragraph 62 of the last year's Financial Statement. It is one of the most promising schemes of the class of protective irrigation works, as it will protect a large tract of country which has suffered severely from drought in recent years. The estimated return on its capital outlay is 3.9 per cent, and work will be started as soon as we are in

a position to allot funds from our current revenues. The Hathras Branch canal is designed to serve portions of the Aligarh, Etah and Agra districts of the United Provinces where it will irrigate an area of 109,500 acres annually. It is a work of the productive category, the return on the capital outlay being estimated at 14·31 per cent. Satisfactory progress continues to be made in the construction of the three canals comprised in the Triple canal project in the Punjab, but it is feared that the original estimate of cost will be largely exceeded. It has been decided to adopt a level crossing instead of a syphon to carry the water from the Upper Chenab across the Ravi river for the supply of the Lower Bari Doab canal.

The important Sind project for the construction of a barrage at Sukkur, and for the system of five canals to take out above it, has been under preparation, the design for the barrage is now under the consideration of the Government of India. The Sarda-Ganges-Jumna Feeder scheme has also been under investigation during the year. Mention was made of these projects in paragraphs 63 and 64 of my last Financial Statement.

Opium.

47. I fear the Council must be weary of my references to Opium but I must revert to the subject again for a few minutes. It is a question of grave importance to our revenues and to various interests both in British India and in Malwa, especially to many humble people for whom the poppy cultivation is their daily bread. As far as our arrangements with China are concerned, our position is the same as when I described it last year, though we shall probably continue our progressive reduction of exports into 1911 while we await unequivocal evidence as to the success or otherwise of China's efforts to put down cultivation and consumption. But in one important respect, we have made a change in our domestic arrangements. We have decided to alter the distribution of our exports, so as to allow the Malwa States a larger share in them during the next three years. The intention is in this way to allow the large stocks of Malwa Opium to be cleared, and the capital locked up in them to be released, and to afford the Durbars and cultivators more time to adapt themselves to the inevitable decline in poppy cultivation. We are enabled to make this change by the greater readiness of the Bengal growers to take to other crops. It may be convenient that I should take the opportunity of announcing the figures of export that will be permitted in the next three calendar years, on the assumption that the curtailment of our exports to China will continue. They are as follows —

YEAR	NUMBER OF CHESTS		
	Bengal	Malwa.	Total
1911	31,440	15,160	46,600
1912	26,520	14,980	41,500
1913	21,540	14,860	36,400

Meanwhile, the policy of reducing and concentrating cultivation in Bengal is being steadily pursued, and, subject to the Secretary of State's approval, an important step will be taken in that direction next year by the amalgamation of the two Agencies.

48. In my last Financial Statement, I made little more than a passing allusion to the International Opium Commission which met at Shanghai in February 1909. Its proceedings had not then reached us, and the bearing of its recommendations on India was uncertain. Since then, however, we have had an opportunity of examining the Commission's conclusions, and the Council will naturally expect some indication of the attitude of the Government of India towards the policy which the Commission advised. I cannot enter into any detail because we are still consulting the Local Governments concerned, and corresponding with the Secretary of State on a number of the questions involved. But the Commission was a thoroughly representative body, its conclusions were unanimous, and there is nothing in its findings to deter us from expressing our acceptance of the general principles which it laid down. We accept them all the more readily that the interests of India were amply and skilfully pressed on the

Commission by our representative, Mr. J. B. Brunyate. Aided by his knowledge of the subject, the Commission was enabled to appreciate the importance and complexity of the opium problem in this country.

49. Out of the nine Resolutions in which the Commission formulated its advice, only four have a direct bearing on India. Resolution No. 2 recommends measures for the gradual suppression of opium-smoking. I need not remind the Council how near we are in India to the legal prohibition of this particular form of the opium habit. Absolute prohibition is virtually our ideal, and we are prepared to take every reasonable step towards enforcing it, as our action in the past has clearly shown. In Burma we have had to deal with special difficulties, and our experience warns us to tread warily but even in that province absolute prohibition for foreigners, as well as for Burmans, will be taken into serious consideration. The difficulties will be great but they may not prove insuperable, and we are ready to give the whole question our best attention. The Commission's third Resolution suggests that we should re-examine our regulations for the use of opium in the light of the experience gained by other countries. This we are prepared to do. We retain full liberty to protect the legitimate household and medicinal use of opium, but increasing stringency against its use as a luxury or an intoxicant, higher rates of duty and more vigorous preventive action command our entire approval. Resolution No. 4 advises the adoption of reasonable measures for prohibiting the export of opium and its preparations to any country which forbids their entry. The exact mechanism for giving effect to this advice will require examination: but the principle involved is equitable and we fully accept it. The fifth Resolution—the last with which we are immediately concerned—urges on each Government the control in its own territories of the manufacture, sale and distribution of morphine or any similar opium derivative. We gladly welcome the recommendation. The morphia habit and the cocaine habit are becoming serious dangers in India, the enforcing of prohibition through the control of imports and of consumption is a matter of extreme difficulty: and it is only by the proper regulation of the supply of these drugs at its source that we can hope to hold them in check. It will thus be seen, I trust, that the Government of India are in full accord with the views expressed by the Commission and will take any practicable means of making them effective.

Provincial Finance.

50 I must now say a word about the finance of the provinces—a subject which has recently caused no small embarrassment to the Government of India. For all the provinces taken together, we have the following results —

	Actuals, 1909-1909	Revised, 1909-1910	Budget, 1910-1911
	£	£	£
Revenue	24,171,904	24,977,200	24,760,900
Expenditure	24,839,247	24,293,700	25,394,700
Surplus	683,500	
Deficit	667,343		633,800

The surplus in the current year is in reality fortuitous, being due partly to abnormally heavy collections of Land Revenue and partly to the special subsidies with which the Imperial Government helped three of the provinces in the peculiar circumstances which I have already described. The revenue collections exceeded those of the previous year by about £700,000 (Provincial share), the greater part of which may be regarded as famine arrears. The grants-in-aid of Provincial balances which we have paid through the current year's accounts come to a total of £496,000. On the other hand, the deficit for next year includes a special draft of £133,000 upon their balances by the Madras Government. Making these allowances, we are driven to the conclusion that the provinces in the aggregate are steadily over-spending their income by about half a million a year. The position is thus one which compels most serious reflection. It differs considerably in different provinces. Madras, for example, keeps well within its means and has a large credit balance for special or non-recurring expenditure. The United

Provinces, with its new settlement and a respite from famine, will no doubt be able to avoid deficits in normal conditions, and to build up a strong balance against emergencies. Eastern Bengal and Assam enters next year upon its new settlement, which I shall shortly describe, and ought in future to be able to confine its expenditure within the limits of its resources. The Central Provinces finances have been severely tried by the recent famine, which was administered with a care for the interests of the general taxpayer which the Government of India cordially appreciate. The ordinary services of the province have suffered accordingly and until the leeway is made up, there may be some excess of expenditure over the normal revenue, though we hope it will be neither large nor prolonged.

51. In the other four large provinces, I am afraid that the situation is less assured. g. Bombay, it is true, has substantial balances, but they are being somewhat rapidly diminished, and care will have to be exercised to prevent the scale of recurring expenditure from settling into permanent excess over the normal revenues. From Burma and the Punjab we have recently had special appeals for assistance. To accept these appeals would have been virtually to admit that the provincial settlements of these provinces are inadequate, and we cannot make any such admission. Burma has undoubtedly suffered from a set back, which I hope may be merely temporary, in its Forest receipts, but we do not consider that in either province there is a case for revising and amplifying the standing arrangements. It will be the duty—disagreeable and unpopular, but inevitable—of the Local Governments to overhaul their expenditure and to adapt it to their normal resources. That duty has already been undertaken in Bengal by our colleague, the present Lieutenant Governor, and I am glad to have this opportunity of expressing my acknowledgment of the courage and thoroughness with which Sir Edward Baker has enforced economy in that province.

52. We have now framed a semi-permanent settlement with Eastern Bengal and Assam, the last province where the settlement was on a temporary and provisional basis. This closes our long list of re-settlements, and I can hold out no hope of any general revision of these arrangements. They were made, before I came to India, with scrupulous care, and were intended to foster provincial independence, economy and foresight. Nor do I see any near prospect of our being able to undertake a further share of the recurring expenditure of Local Governments. Our own necessities will not improbably force systematic retrenchment upon us, which will affect Imperial and Provincial services alike, and in the meantime Local Governments can best co-operate with us, and best mitigate future difficulties, by examining the causes of the insidious growth of expenditure, and by sharply checking them.

53. The special grants which we have given in the current year to the more impecunious provinces were meant partly to restore their normal scale of expenditure on civil works and partly to enable them to close 1910-1911 with the prescribed minimum balances*. For the next year the only additional grants which we intend to give are £255,000 to Eastern Bengal and Assam under its new settlement, £21,000 to Bengal for police reforms, and £21,000, distributed among five provinces, in aid of University and Collegiate education. The police grant is one of the last that is claimable for the reforms which were sanctioned on the advice of the Police Commission. The need for pressing on the reforms is most prominent in Bengal, and our general position puts it out of our power to accord similar treatment in 1910-1911 to the other provinces whose grants have not yet been paid in full. The University grants are a renewal and continuation of what we have been allotting since 1904.

54. As I have more than once referred to it, I shall describe very briefly the new settlement with Eastern Bengal and Assam. The existing settlement was made in 1906, and was to run for three years, in order to allow us to gain experience of the needs of the province. It was known that the Eastern Bengal districts required development, but the cost of the operation was largely guess-work. The temporary settlement, as we had believed probable, turned out inadequate; but at the end of its three-years' term, the Imperial finances were not in a state to justify a revision which was clearly going to involve a large transfer of Imperial funds to the Local Government. The consequence was that the province had to continue working with a deficit, and getting deeper into debt to Imperial revenues. We have now, in consultation with the Lieutenant Governor and his officers, given our most careful consideration to the special difficulties of the province and arranged, with the Secretary of State's approval, to provide it with such a moderate addition to its resources as the efficiency of administration seems to demand. *The result is that

* I do not allude to grants which are passed through Provincial accounts as subsidies to local authorities.

our fixed subsidy, to balance the standard figures of revenue and expenditure, has had to be raised by £255,000 a year. We have also, out of our high opium receipts in the current year, cancelled the province's overdraft and raised its balance to the prescribed minimum of 12 lakhs: this has cost us £246,000, which of course is non-recurring. I trust that with this liberal assistance the new province will now advance along the paths of financial stability.

55. I conclude this portion of my remarks by explaining certain contributions from Provincial to Imperial revenues which will appear as new recurring assignments in the estimates of the eight major provinces for 1910-1911. Our measures for obtaining extra taxation will mean, as we estimate, an increased revenue of £166,000 under Excise and Stamps, but, as these are "divided" heads and we require the whole of the extra revenue for Imperial purposes, we have appropriated the Provincial share of £83,000, by taking contributions from the Local Governments concerned. The amount which we thus take from each province is based on a rough estimate of what the province is likely to collect on account of the higher duties.

Ways and Means.*

56. Hitherto we have been considering almost exclusively the current revenue and expenditure of India. I must turn to the operations upon our cash balances, both in India and in the Secretary of State's custody in London. As the Government of India is its own banker, it is into our general cash balances that all our current revenue is paid, and from them that all our current expenditure is drawn. They are also the reservoir for the proceeds of all sterling and rupee loans, whether raised by Government or by railway companies which work our State lines, for the whole of our unfunded debt, and for all the miscellaneous deposits which are not earmarked for separate custody. All the provincial balances merge in them, and in them are absorbed all the repayments and interest of State loans or advances to local bodies and private individuals. Similarly, it is out of our cash balances that we take all our capital expenditure on railways and irrigation, all the advances which Government makes to local authorities and private persons; and all the money used in the discharge of our permanent, temporary or unfunded debt, or in the repayment of deposits. Finally, it is through our cash balances, owing to their being located partly in England and partly in India, that Council Bills are usually drawn and the greater part of Government's remittances between England and India effected. It is with our cash balances therefore that our estimate of Ways and Means are concerned.

57. For 1910-11 we count on opening with £12,503,227 in our balances in India, and £12,758,615 in England the latter figure including £2,064,118 on account of the Gold Standard Reserve, and being further swelled by part of the proceeds of the £7½ million loan which the Secretary of State floated last month. Our chief requirements during the year will be our capital expenditure of £12,000,000 on railways and irrigation, and £946,300 for the discharge of permanent debt; to which may be added a net debit of £741,100 for transactions on account of the Gold Standard Reserve, the total of these liabilities coming to £13,687,400. To meet these, we shall have our revenue surplus of £245,900 and a further £500,000 from the Famine Grant. The Secretary of State has still to realize £1,637,600 out of his January loan, and certain Railway Companies are expected to raise fresh capital amounting to £2,597,500. Our unfunded debt receipts are estimated at £1,119,200 and the net result of our advance and remittance accounts, etc., will be a credit of £348,600. From the aggregate of these resources we shall thus obtain £6,448,800: and our high opening balances will be reduced during the course of the year by £6,238,600, thus bringing our available means up to £12,687,400. This leaves us still short by £1,000,000, and we intend to borrow that amount (1½ crores of rupees) in India. We estimate our closing balances on the 31st March 1910 at £12,404,127 in India and £6,619,115 in England, £1,323,018 of the latter being held on account of the Gold Standard Reserve.

58. Besides the transactions which I have thus described, the year will be marked by the purchase of the Indian Midland Railway. This liability will be met partly by taking over Debentures and partly from the proceeds of temporary loans which the Secretary of State will raise in England.

59. The announcement regarding borrowings is made subject to the usual reservation, and the Government of India retain full discretion to vary the programme, as now declared, in any way and to any extent that may be thought advisable.

60. The present intention of the Secretary of State is to draw bills on India for £16,500,000, but this also is subject to a similar reservation. The figure represents a

forecast of the Secretary of State's requirements; but additional bills will be sold, so far as may be, if needed to meet the demands of trade.

Exchange and Currency.

61. I propose now to pick up the narrative of our currency affairs and to continue it from the point up to which I was able to carry it in the Budget discussions last March. During the year 1908-09, the Government of India fought a strenuous campaign against the fall in exchange—the first that had been forced upon them since the adoption of the gold standard. When the year closed, the movements of trade were rapidly becoming more normal, and exchange was firm at 1s 3 $\frac{3}{4}$ d. with a tendency to rise. But though the battle had gone in our favour, its losses remained with us in the attenuated condition of our gold resources. In spite of the marked recovery which began in September 1908, the gold holding, in securities and cash, of our gold standard reserve was under 8 millions on the 31st of last March, and the reserve in India was laden, besides its standing silver nucleus of 6 crores, with the large sum of 988 crores in rupees, which we had withdrawn from circulation in exchange for the issue of gold in London. The gold in our currency chest at the Bank of England had fallen to 1 $\frac{1}{2}$ millions; and the amount of sovereigns in our hands in India was practically negligible—about £92,000. Our gold resources at the beginning of the current financial year were thus represented by a total figure of 9 $\frac{1}{2}$ millions sterling. A year earlier, on the 1st April 1908, they had been as high as 21 millions; and before the American financial crisis of October 1907, they had reached the substantial figure of 24 $\frac{1}{2}$ millions. It was with this contrast in my mind that I have considered it my duty to represent the urgency and importance of building up our gold resources again by every means in our power.

62. It is on the volume and direction of India's trade with the outside world that we must primarily depend for the strengthening of our gold position. We may husband our gold when we have it, we may cause it to fructify, we may even in emergency take exceptional means to supplement it. But it is the relation between our imports and our exports which, in the last resort, decides whether we are to keep our gold or to lose it. When I took stock of the position a year ago, our external trade, after the dislocation caused by the famine in Northern India and by the general depression in the world's markets, was beginning to resume its normal proportions. The very heavy imports of piece-goods, metals and silver which had helped to upset the balance in 1908 were at last easing off; the value of private merchandise and treasure which came into India by sea during the last three months of 1908-09 having been less by the enormous sum of 10 $\frac{1}{2}$ crores than in the corresponding quarter of the previous year. Along with this there was a substantial quickening in the export trade; big shipments of opium left Bombay in January, a good average cotton crop began to move, and the market for yarns in China revived after some temporary dullness. There was thus a considerable demand for currency, emphasised by the sharp reduction which our 1908 operations had effected in the stock of rupees available for circulation. The Secretary of State was able to sell very heavy drafts during the two busiest months of the year, and before the end of March he had found it possible to restore to the gold standard reserve about two millions of the gold which it had parted with. Such was the state of affairs when we last discussed the subject in this Council.

63. When the current year began, the improvement in the outlook had become unmistakable. Northern India was safe with a fine spring harvest; and the foreign market for our yarns, cotton and oilseeds continued active, while the imports of bar-silver fell very substantially from the high figure they had reached in the previous year. In May began large exports of wheat, which were abnormally heavy while they lasted. They ceased abruptly in August, and brought to a close the first phase of the year's trade movement. During the five months from April to August the net exports on private account amounted to close on 20 crores, as against 16 $\frac{1}{2}$ crores in the same period of 1906, 16 $\frac{1}{2}$ crores in 1907 and an actual (though small) net excess of imports in the five corresponding months of the anxious year 1908. Up till August then everything was wholly favourable to the improvement of our position. In September there came a slight check. Wheat had worked itself out for the time being, and there was a sharp drop in cotton and seeds. Simultaneously with this, imports bounded up again, the new crop of Java sugar was coming into the market, and large consignments reached India of piece-goods and precious metals. On the month's account the net result was a balance of net imports to the extent of about 1 crore. In this, I need hardly say, there was nothing unseasonable, and I should not have referred to the point had it

not been for the immediate effect on exchange to which I shall allude below. Clearly, however, the reversal of the balance in September was a merely transitory incident. By October the autumn harvests were safe, and a bounteous monsoon offered the best of prospects for the following spring. Trade soon flowed back into its normal channels; and since then the balance has been steadily in our favour; thanks mainly to the heavy exports of cotton, tea and jute, both raw and manufactured. During the third quarter of the year (last October to December) the exports as a whole exceeded the imports by 2 crores in value, against $1\frac{1}{2}$ crores in 1908 and 2 crores in 1907; but the excess would have been very much greater if it had not been for the large arrivals of gold (about $5\frac{1}{2}$ crores) in December.

64. It is instructive to watch how closely the fluctuations in exchange followed the broad movements of trade which I have outlined above. Beginning April at $1s\ 3\frac{1}{2}d$, the rate stiffened to $1s\ 4d$ by the end of the month, thus returning to parity for the first time since Christmas 1907. It slipped back a point or two after the middle of May, but the Secretary of State met with no checks in his sale of bills until well into August. With the abrupt stoppage of the wheat exports, a shade of weakness came over the market. The reduced supply of export bills, combined with easy money (Bank rates of 3 per cent. in both Calcutta and Bombay), forced down the rate once more below gold point. I immediately put into force what may now be regarded as the regular and stereotyped procedure for checking a slump; and on the 2nd of September, and again on the 9th, the Comptroller General offered to sell bills on London at $1s\ 3\frac{1}{2}d$, up to £500,000 worth in each week. The bills actually taken during the fortnight amounted only to £156,000; the Secretary of State at his end cut down his offers of remittances, and the market was almost immediately restored to confidence, exchange rising by rapid stages back to parity on the 23rd of September. From October onwards there has been no further sign of trouble, Council bills have been sold in very large quantities, at prices ranging from par to $\frac{1}{2}$ nds above, with $\frac{1}{2}$ nds for telegraphic transfers, and gold has begun once more to come freely into the country.

65. In currency affairs, effects sometimes follow causes with gratifying rapidity. As the result of the heavy demand for remittances to finance our revived export trade, the Secretary of State expects, in addition to satisfying all the requirements of his home treasury, to be able to raise the gold standard reserve by the end of March to over £14½ millions, that is, to repay to it the whole of the gold which had to be withdrawn in 1908 in support of exchange. Our currency reserve in London stands at $1\frac{1}{2}$ millions; but the sovereign is once more visible in India, the stock of gold held by us in this country having risen to over $5\frac{1}{2}$ millions at the end of January, when it was still rapidly increasing. Within two years after the first breaches had been made in our position, our walls have been rebuilt and we are engaged in the further strengthening and extension of our defences.

66. I should be lacking in candour if I allowed the Council to think that we are yet satisfied with the sufficiency of our defences. We have come successfully through one financial crisis and one famine. But there have been blacker times in the financial world than the crisis of October 1907, and there have been longer and more widespread famines in India than the one which is now happily at an end. My desire is to see our gold resources strong enough to carry us over not one, but two, years of short exports, and to keep exchange stable through at least twice the period during which we supported it in 1908. I do not say that even then we should regard our position as absolutely clear, but what I have indicated seems as much as we need aim at for the present. I should now like to add a caution on the other side. I wish to dissociate the Government from the notion that a reduction in our gold holdings is an evil *per se*, and I trust that nothing which I have said above will be taken as indicating sympathy with that idea. There would be nothing more fallacious than to conceive of our gold reserves as being something that we put away in safety and strive to protect at all hazards. They exist to be used; and they are efficient only in so far as they are capable of being freely used for the purpose for which they were created. To hoard our gold when there is a clear case for employing it, would be fatal to our currency policy; and it may, and usually will, be just as much our duty to disperse our reserves when the balance of trade is against India, as it is our duty to build them up when the balance is in our favour. The increasing delicacy of the exchange standard and the more frequent manifestations of nervousness in the market—I use the term in no offensive sense—may require us to open our gold reserves more often than has hitherto been necessary, but we shall not hesitate to do so whenever exchange clearly needs support.

67. It is therefore with genuine satisfaction that I am able to announce two recent decisions which ought to increase the efficiency of our gold reserves. The Council will

remember that, in August 1907, upon the advice of the Indian Railway Finance Committee, it was determined to employ one-half of the profits on our rupee coinage in capital expenditure upon railways. The sum of £1,123,604 was actually diverted in this manner. But for the future, as has now been decided, the whole of our coinage profits without reservation will be paid into the gold standard reserve until such time as the gold held by us, in that Reserve and in the Paper Currency department combined, reaches the figure of £25 millions sterling. The second important change concerns the form in which the gold standard reserve is held in England. For the future, instead of tying up the whole amount in investments, the Secretary of State has consented to keep 1 million sterling uninvested, letting out this sum in short loans or putting it into bank deposits. Of the balance, he will hold a considerable portion in high-class securities with a near date of redemption, and the remainder in Consols or other approved stock. When we are next obliged to sell sterling bills on London, the Secretary of State will thus be able to meet them in the first instance from cash which is virtually at call. When this is exhausted, he can draw on his short-dated securities, upon which cash can always be obtained by sale or loan if it is impossible to wait for their maturity. If the crisis still continues, it will become necessary to realize—and to realize gradually and carefully—the more permanent securities. It will be for the Secretary of State in Council to carry out this operation, and he accepts the responsibility for doing so if occasion arises. I trust that the Council, as well as the large and important community who are vitally interested in such matters, will find in these arrangements and in the actions of Government during the last two years, no uncertain proof of the determination of those who are responsible for the Government of India to uphold the gold value of the rupee.

Conclusion.

68. In introducing the Budget last year I used the perhaps infelicitous expression "a gamble in rain." So far the gamble has resulted in a win, but I think every one will agree that, although the monsoon must always remain a dominating factor in forecasting the revenue and expenditure of India, it would be neither prudent nor right to approach the compilation of a budget from a gambling standpoint. Broadly speaking, it should be possible by the experience of past years, tempered by a careful review of possibly changed circumstances, to form a fairly close estimate of revenue and expenditure. The monsoon will, however, always be a factor in regard to which hope must of necessity take the place of calculation and that in itself renders budgeting in this country a matter of abnormal difficulty. All we can do is to calculate upon a reasonably good harvest, and in the literal and best sense, put our trust in Providence.

69. To the best of my ability I have estimated our assets and liabilities for the ensuing year. The outcome necessitates some additional taxation. I can understand a certain malicious satisfaction in extracting revenue out of multi-millionaires. But this is not a rich country. A large proportion of its people are poor, an appreciable proportion are very poor. No right-minded man can impose additional taxation on India with a light heart. To me it is a very genuine sorrow to be obliged to do so. I did not sow the storm but I am reaping the whirlwind.

I am confident that I may count on your sympathy.

I believe I shall have your support.

GUY FLEETWOOD WILSON.

The 25th February 1910

FINANCIAL STATEMENT

OF THE

GOVERNMENT OF INDIA,

FEBRUARY 1910.

I.—General Statement of the Revenue, and Expenditure charged

Comptroller General.

J. S. MESTON,
Secretary to the Government of India.

FORT WILLIAM,
FINANCE DEPARTMENT;
February 25, 1910.

MEMORANDUM EXPLAINING THE DETAILS OF THE ESTIMATES.

1. In this memorandum the variations between the Revised and the Budget estimates of the current year, and between the latter and the Budget estimates of next year, are explained in detail for the major heads of account. Under most of the heads details by provinces have been given, and it may be explained that the figures shown against "India General" represent the transactions of the Central Government, including all expenditure directly controlled by it, of the minor administrations of Ajmer-Merwara, Baluchistan and Coorg, and of the convict settlement in the Andamans. The Budget estimates of Provincial and "Divided" expenditure in 1910-1911 generally represent the allotments proposed by the several Governments and Administrations with whom regular provincial settlements have been concluded, and fuller details of the figures will no doubt be given in their Financial Statements by the Local Governments which have respective Legislative Councils. It will be understood that the estimates now presented are not final. Alterations in the figures may be necessitated in the interests of accuracy or by the recommendations of the Imperial and Provincial Legislative Councils, or in consequence of important factors which come to light in the course of the next three weeks. All such alterations will be embodied in the Budget which will be presented to the Council on the 23rd March.

2. The broad totals of revenue and expenditure for the last year, the current year and the ensuing year are as follows —

				Accounts, 1908-1909
				£
Revenue	.	.	.	69,761,535
Expenditure charged to Revenue	.	.	.	73,492,245
		Deficit	.	£3,737,710
				Revised, 1909-1910
				£
Revenue	.	.	.	74,303,700
Expenditure charged to Revenue	.	.	.	74,034,200
		Surplus	.	£ 269,500
				Budget, 1910-1911.
				£
Revenue	.	.	.	75,264,600
Expenditure charged to Revenue	.	.	.	75,018,700
		Surplus	.	£ 245,900

These figures exclude all capital, debt and remittance transactions.

3. The accounts of 1908-1909 are not discussed in this Memorandum, but it has in the past been usual to give a brief explanation of the divergences between the revised estimate of revenue and expenditure for last year, as submitted to the Council twelve months ago, and the actual accounts of the year, as closed, audited and compiled in the Comptroller and Auditor General's Annual Appropriation Report. The revised estimates of 1908-1909 published in March 1909 were based upon the approximate figures of eleven months plus a forecast of the figures for the twelfth month of the year. To the extent, therefore, to which the March actuals differed from that forecast; to which the audit detected errors or misclassification in the figures of the earlier months; to which book adjustments had to be made between last year and this year, or between one major head and another, up to the time when the accounts were finally closed in last December,—to that extent will the revenue and expenditure now before the Council differ from the estimate which they had to consider at the last Budget meeting. The differences as a rule are unimportant. They involve no question of principle, and their net effect is measured by something under 3 lakhs.

The total revenue has turned out about £133,000, and the total expenditure about £150,000, more than the revised estimate, with the result that the year's deficit was £17,000 larger than was anticipated. The figure is relatively small, though it is the outcome of wider fluctuations on both sides of the account. Railways yielded about £97,000 below the estimate, a heavy fall in the takings on the Great Indian Peninsula line and special activity in renewals and repairs on the North-Western line being mainly responsible. The Military figures were worse by about £72,000 net; chiefly as the result of heavier expenditure on food supplies, railway charges and pensionary charges. In the Mints, an unexpectedly large return of copper and bronze from circulation changed an expected coinage profit from that section of the currency into a loss, and led to a deterioration of £89,000 from the estimate. But on the other hand there were considerable savings under ordinary Public Works,—about £67,000, net, the Land Revenue receipts improved by about £63,000, particularly in Burma and Bombay; and the Salt returns rose by over £59,000, the issues in March having made a sudden spurt.

4 Pages 93 to 102 of this Memorandum have been communicated by Mr. J. B. Brunyate, C I E, Secretary to the Government of India in the Military Finance branch, and the rest of the Memorandum has been drafted by Mr Bhupendra Nath Mitra, M A, special Budget Officer in the Finance department

" " XXIX—Irrigation	22,21,000	23,59,000	23,51,000

5. The Imperial expenditure shown against "Other Provinces" in the table at page 21 represents the cost of survey and record-of-right operations on a large scale in Bengal and Eastern Bengal and Assam undertaken more for administrative than for fiscal purposes. The expenditure is of a temporary and varying character and was accordingly not considered suitable for inclusion in the quasi-permanent financial settlements with the two provinces. Three-fourths of the charges are eventually recovered from landlords and tenants for the protection of whose rights the operations are primarily undertaken; and the recoveries are shown in the table as Imperial revenue against "Other Provinces."

REVENUE.

(a) Wholly Imperial.

6. The latest estimate for the current year is Rs 136 lakhs better than the Budget forecast, owing mainly to larger collection of famine arrears in Ajmer-Merwara, where an excellent *rabi* harvest has been gathered, and to the introduction of revised settlement rates in the Quetta *tahsil* in Baluchistan. The Budget Estimate for 1910-1911 is Rs 4.15 lakhs higher than the Revised for the current year—a reduction in the collections in the minor administrations owing to the absence of famine arrears being more than counterbalanced by larger recoveries of survey and settlement expenditure in Bengal and Eastern Bengal and Assam.

Revised, 1909-1910

Budget, 1910-1911

(b) Divided and wholly Provincial.

7. The total collections in 1909-1910 are expected to exceed the Budget estimate by Rs 65.06 lakhs. The largest increase takes place in Burma (22.42 lakhs) where a substantial improvement is likely to occur in the Ordinary revenue, owing to an extension of cultivation and an excellent rice crop, as well as in the Petroleum revenue in consequence of activity in the Yenang-yaung oil-fields. In Bengal, United Provinces and Bombay the excellent agricultural prospects of the year have permitted a higher collection of famine arrears than was provided for in the Budget. Part of the improvement in the Punjab is due to the same reason, but a greater portion of it has been caused by purchases of proprietary rights in the Chenab Canal colony which were not foreseen when the Budget was framed. In Madras also, higher realisation of arrears and the introduction of re-settlement rates in certain districts have contributed to a small improvement over the Budget Estimate. The improvement would have been greater but for the unfavourable character of the north-east monsoon which has necessitated larger season remissions. It is in the Central Provinces alone that any material decrease from the Budget Estimate is likely to take place, as it seems probable from the progress of collections that the provision made in the Budget for the recovery of arrears will prove over-sanguine.

Revised, 1909-1910

8. The total Budget for next year is Rs 26.91 lakhs less than the Revised Estimate for 1909-1910. In Bengal, the United Provinces, Punjab and Bombay any normal growth in the revenue is more than counterbalanced by the heavy receipts of famine arrears during the current year. In the Central Provinces and Eastern Bengal and Assam, the normal growth in the revenue next year is likely to somewhat exceed the decrease in the collection of arrears. But it is only in Burma and Madras, which were immune from the recent famine, that any material improvement over the current year's collections is expected in 1910-1911.

Budget, 1910-1911

(c) Adjustments between Imperial and Provincial.

9. The table at page 22 shows the amount of Land Revenue assigned for Provincial expenditure in the two years. The increase of Rs 57 lakhs in 1909-1910 over the Budget estimate in the recurring grants given under the terms of the settlements or for special purposes is mainly caused by an assignment of Rs 4.92 lakhs made to the United Provinces under the terms of its provincial settlement in connection with the reduction in certain irrigation rates.

The further increase of R44.38 lakhs in 1910-1911 is chiefly made up as follows:—

1. Increase in assignment to Eastern Bengal and Assam under the terms of its new provincial settlement	38.24 lakhs.
2. Payment to Bengal of the final instalment of its share of the Imperial grant-in-aid of police reforms with reference to the accepted recommendations of the Police Commission	3.17 "
3. Payment to Madras of a portion of the Imperial contribution promised in its provincial settlement in connection with the scheme for the reconstitution of districts	2.00 "
TOTAL	43.41 "

The remainder of the variations in the two years consist of miscellaneous adjustments in several provinces.

10. The reasons for the recovery of contributions aggregating R12½ lakhs from the several Provincial Governments in connection with the financial arrangements for 1910-1911 is that the increased taxation credited to "divided" heads has to be wholly appropriated to Imperial revenues. The distribution of the total sum is given below

	R
Central Provinces	14,000
Burma	1,35,000
Eastern Bengal and Assam	20,000
Bengal	3,89,000
United Provinces	1,22,000
Punjab	86,000
Madras	1,21,000
Bombay	3,63,000
TOTAL	12,50,000

11. The non-recurring grants given in the two years under the terms of the settlements represent the contributions required by the United Provinces and the Punjab to bring their net Irrigation revenue up to the amounts guaranteed in their provincial settlements. The Government of India have made subventions to the Central Provinces, Bengal and Eastern Bengal and Assam, partly to restore a normal scale of expenditure on civil works, and partly to raise their closing balances in 1910-11 to the prescribed minima. The distribution of the total sum of 74.41 lakhs is as follows

Central Provinces	7.09 lakhs
Eastern Bengal and Assam	36.90 "
Bengal	30.42 "
	74.41 "

12. The variation between the Revised and the Budget estimates of the current year under miscellaneous grants is mainly due to the following special assignments:

(1) Contribution towards the Rangoon river training scheme	15.00 lakhs
(2) Contribution towards the improvement of the Chittagong port	5.50 "
(3) Grants to Provincial Governments in aid of University and collegiate education, against provision made for this purpose in the Imperial Budget under Education expenditure	3.15 "
(4) Grant to the United Provinces for tank restoration works out of the special provision made in the Imperial Budget under Minor Irrigation works for improvement of irrigation	2.00 "
	25.65 "

Item (2) is subject to the Secretary of State's sanction, which has not yet been obtained. The miscellaneous grants in 1910-1911 represent almost wholly the grants-in-aid of University and collegiate education which it is proposed to continue for three more years.

EXPENDITURE.

(a) *Wholly Imperial.*

13. The saving of Rs 50 lakhs in the Budget grant for 1909-1910 is chiefly due to lapses in the provision for survey and settlement expenditure in Bengal and Eastern Bengal and Assam. The increase of Rs 19 lakhs in the Budget Estimate for 1910-1911 over the Revised for the current year also occurs mainly in the item of expenditure and is partly counterbalanced by a decrease in Ajmer Merwara where the recent survey and settlement operations have terminated.

(b) *Divided and Provincial.*

14. The total expenditure in 1909-1910 exceeds the Budget Estimate by Rs 9 lakh. In Madras and the Punjab, the Budget grants are likely to prove insufficient to meet the sanctioned expenditure, while in Burma an increase in the collection charges has followed the large improvement in the revenue. These excesses have, however, been almost wholly counterbalanced by lapses in grants in the other provinces.

15. The total Budget Estimate for next year is Rs 11.82 lakhs higher than the Revised Estimate for 1909-1910—the increase being distributed over all the provinces. The principal increases occur in Madras and in Bengal. Provision has been made in the former province for the constitution of additional district and for an extended programme of survey and settlement operations, in the latter full provision has been made for the scheme for the improvement of the pay of ministerial officers recently sanctioned by the Secretary of State. The increase of Rs 0.8 lakh in the Central Provinces mainly represents provision for scheme for the re-organisation of the Commission and for certain necessary reforms in connection with the subordinate Land Records establishments.

REVENUE.

(1) Bengal Opium

16 In the Budget estimates for the current year the average price to be obtained at the sales of Bengal opium was taken at R1,350 a chest. The year opened badly, the average price obtained at the April sales amounting to only R1,166, and though there was a sharp improvement to R1,366 in May, it was followed by a decline in the next two months. Since August, however, there has been a steady increase, and in the October sales the average price rose to R1,439. The course of prices since then has been unprecedented. Owing apparently to a depletion in the stocks of opium in China and the unquestionable evidence that India was seriously reducing its supply, there has been a marked rise in the price of the drug in China and this has resulted in an increased competition to secure the limited number of chests offered for sale in Calcutta. The average sale-price per chest jumped up to R1,800 in November, to R2,044 in January and nearly touched R2,400 in February. As a result, the revenue from this source is likely to exceed the Budget estimate by no less than R110 25 lakhs.

17 During 1910-1911 it is intended to sell 37,560 chests of Bengal opium, viz., 3,300 chests every month in the last three quarters of the current calendar year, reduced to 2,620 chests a month in the first quarter of 1911. Judging by the continuance of high prices in the China markets, we anticipate that it will be possible to obtain next year an average sale price of R1,750 per chest. The

figure is as usual speculative ; but it is reasonable to believe that considerable time must elapse before the demand can adjust itself to the reduced supply and in the meanwhile a high level of prices will, in all probability, be maintained

(ii) *Malwa Opium.*

18 As regards Malwa Opium, the Budget estimate of the current year was framed on the assumption that, as soon as the year's crop had been gathered, the imports from Malwa would re-commence with a view to secure priority of export in 1910 and subsequent years, and credit was taken for duty on the full number of chests (*viz.*, 8,700) for which warehouse accommodation was likely to be available in Bombay. The duty actually received has amounted to ₹107 76 lakhs. Against this, claims of refund to the extent of ₹1·8 lakhs have, however, been already admitted, and it is possible that a further sum of ₹15 lakhs will be eventually refunded as the Government of India do not at present give a guarantee that any opium on which duty has been already paid will be allowed priority of shipment after 1911. The necessary provision has been made under Refunds and Drawbacks (*vide* paragraph 53 below).

19. No provision has been made in the Budget estimates for 1910-1911 for any revenue from this source, as duty has already been received on all the opium which can be exported during the financial year.

(c) *Excise opium and other revenue.*

20. Under this head the Revised estimate for 1909-1910 does not materially differ from the Budget figure. The Budget estimate for 1910-1911 provides for the normal annual growth.

EXPENDITURE.

21. The Revised estimate of expenditure in the current year is expected to exceed the Budget provision by ₹19 lakhs—an excess of ₹4 22 lakhs under "Payments to cultivators," caused by an improvement in the outturn of the crop of 1909, being partly counterbalanced by savings in the grants for the establishment and other charges of the opium agencies.

22 In 1910-1911 provision has been made for about the same scale of expenditure as in the current year. The outturn of the crop now in the ground is expected to be the same as that of last year, and it is doubtful, having regard to the large diminution in the stock of opium held in reserve, whether a substantial reduction in the cultivation will be possible next year.

(a) Chiefly excise on local manufacture.

(b) Chiefly duty on imported salt.

REVENUE.

23 The consumption declined materially during the first half of the year, mainly in Northern India and Bombay. A recovery has, however, taken place in the last four months, and it is now expected that the total consumption during the year will be slightly in excess of that in 1908-1909, but 10.93 lakhs of maunds below the Budget forecast. With a duty of Re. 1 per maund, this would have resulted in a decrease of Rs. 10.93 lakhs in the Budget estimate of revenue. The allowance made in the Budget for the postponement of revenue collections involved in the extension of the credit system of payment of duty to Bengal and other provinces has, however, proved too large, and the actual shortage in revenue is likely to amount to Rs. 2.01 lakhs only.

In 1910-1911 an increase of 8.39 lakhs of maunds in the consumption and of Rs. 8.76 lakhs in the revenue (inclusive of the miscellaneous receipts) is anticipated.

EXPENDITURE.

24. Of the lapse of Rs. 4.31 lakhs in the current year's Budget grant, Rs. 2.5 lakhs occur under "Cost of Salt purchased by Government" in Madras and is caused by the season being unfavourable for salt manufacture. The balance represents savings in establishment charges arising mainly out of the non-utilisation of the provisions for steamers for Cuttack and Midnapur, for the acquisition of land for new salt works at Bhandup and for the revision of certain preventive and clerical establishments in Bombay. The Budget estimate for 1910-1911 provides for these items of expenditure as well as for the revision of the combined salt and excise establishments in Madras; a normal provision has also been made under "Cost of Salt purchased by Government."

(a) Credits for value of stamps supplied only to Local Governments and Administrations

REVENUE.

(a) *Wholly Imperial.*

25 The decrease in the Revised estimates of the current year as compared with the Budget occurs mainly in Ajmer-Merwara and is attributed to diminished litigation. The Budget estimate for 1910-11 provides for a small normal growth in the revenue

(b) *Divided.*

26 The Revised estimate for 1909-1910 exceeds the Budget by Rs 12.05 lakhs. Increased litigation and commercial activity, consequent on the return of prosperous agricultural conditions, have enhanced beyond expectation the receipts in all the provinces afflicted by the recent famine (*viz.*, the Central and the United Provinces, the Punjab and Bombay), the revenue in Bombay being also swelled to some extent by large receipts of probate duty. In Madras too, the allowance made in the Budget for growth in revenue has been somewhat exceeded. On the other hand, the continuance of famine conditions in the first half of the year in certain portions of the two Bengals seems to have interfered with the growth of revenue anticipated in the Budget, while in Burma the commercial depression which followed the collapse of the land boom appears to have continued during the year and has been responsible for a further decline in the stamp revenue

27. In 1909-1910 the revenue has been taken at Rs 30.2 lakhs higher than in the current year. Of this Rs 20 lakhs represent the proceeds of enhanced taxation which it has been decided to impose in order to avoid a deficit. The taxation takes the form of raising the present duties levied on (a) debentures, (b) share warrants to bearer, (c) transfers of shares and debentures, (d) agreements or memoranda of agreements relating to the sale of shares and securities (e) bills of exchange, and (f) probate. The estimate of the extra revenue to be realized in this manner from the Provinces is distributed as follows —

	Rs
Central Provinces	24 lakhs
Burma	1 78 "
Eastern Bengal and Assam	40 "
Bengal	7 26 "
United Provinces	1 00 "
Punjab	68 "
Madras	1 62 "
Bombay	7 02 "
Total	20 00

Apart from this special increase, allowance has been made for a normal growth in revenue in all the provinces, with the exception of the United Provinces and Bombay where it is not considered safe to count on a repetition of the abnormally high revenue of the current year

EXPENDITURE.

28 The fluctuations between the Revised and the Budget estimates for the current year, and between the latter and the Budget estimates for 1910-1911 are unimportant, both in the case of the wholly Imperial and the divided expenditure, and do not call for any remarks. The decrease in expenditure in England in 1910-1911 is due to a smaller supply of post-cards, the consumption of which has fallen off owing probably to a more extensive use of post-cards of private manufacture. It may be explained that the cost of all stamps and stamp paper supplied from England is charged under this head, and an adjustment is made in India transferring to Post office and Telegraph the cost of stamps used for postal and telegraph purposes. Similarly the cost of revenue stamps supplied to Local Governments and Administrations is debited to them in the Provincial section of the accounts by *per contra* credit in the Imperial section under this head

REVENUE.

(a) Wholly Imperial.

29. The Revised estimate for the current year does not differ materially from the Budget. In 1910-1911 provision has been made for a normal growth in revenue, but this is counterbalanced to some extent by a decrease in the transit duty levied on opium brought into the North-West Frontier Province from Afghanistan, the imports of which are not expected to be as high in 1910-1911 as in the current year.

(b) *Divided.*

30. The Budget of the current year provided for a substantial increase in the excise revenue in all the provinces as a result of the return of normal agricultural conditions as well as of the measures taken, with reference to the accepted recommendations of the Excise Committee, towards improved control, the supply of a purer liquor and the continued substitution of licit for illicit consumption. The large advance anticipated has not, however, been realised in any province with the exception of Madras and the total Revised estimate is Rs 36.79 lakhs below the Budget provision. It is probable that the continuance of high prices during a greater portion of the year has again kept down the excise revenue; while in some provinces the measures of reform introduced appear to have led to cautious bids for licenses for retail vend. In the Central Provinces and Bombay there has also been an active temperance propaganda at work, and in Burma, insufficient allowance was made in the Budget for the loss of revenue likely to arise from the restriction of issues of opium to the probable needs of consumers and their estimated means. In Madras alone does an improvement occur over the Budget estimate, the growth in revenue having again exceeded anticipation.

31. The estimate for next year is taken at Rs 37.46 lakhs higher than the Revised estimate for 1909-1910. Credit has been taken for a moderate normal growth of Rs 32.46 lakhs in the revenue, and an additional Rs 5 lakhs are expected to be obtained from the enhancement in taxation which Local Governments will enforce as a corollary to the increased tariff rates on beer and spirits; the amount being distributed as shown below —

							R
Central Provinces	04 lakhs
Burma	92 "
Bengal	52 "
United Provinces	1 44 "
Punjab	1 04 "
Madras	80 "
Bombay	24 "
							<hr/> 5 00 " <hr/>

EXPENDITURE

32. There is no material variation between the Revised and the Budget estimates for the current year in any province. The total grant for next year is Rs 4.95 lakhs higher than the Revised estimate for 1909-1910, provision has been made in almost every province for re-organisation of establishments or other fresh expenditure necessitated by the measures of reform referred to in paragraph 2.

VI and 8.—PROVINCIAL RATES.

REVENUE.

(a) Imperial.

33. The Revised estimate for the current year is practically the same as the Budget. In 1910-11 allowance has been made for a falling-off in the cess levied in Indore on Malwa opium in transit to Bombay, as it is uncertain to what extent passes will be issued next year.

(b) Provincial.

34. An improvement of Rs 2.19 lakhs has taken place in Bengal over the Budget of the current year, owing to the introduction of revaluation rates in the Santhal Parganas and the collection of arrears; otherwise there is no important variation between the Budget and the Revised estimates of the current year or between the latter and the Budget estimate for 1910-11.

EXPENDITURE.

35. The figures show little variation and call for no remarks.

TOTAL	£ 200,184	206,478	209,023	229,900	217,600	242,000

REVENUE.

36. The Revised estimate for the current year is taken at Rs 23 51 lakhs less than the Budget. No improvement in the total imports of merchandise is likely to take place during the year, and as a result, the import duty under most of the tariff heads will fall short of the Budget estimate. The only important exception is sugar, the imports of which from Java in the first nine months of the current year have been over 30 per cent in excess of those in the corresponding period of 1908-1909. Some improvement is also expected under drugs, medicines and tobacco, while the recovery which has recently taken place in the demand for imported piece-goods will secure the full revenue which was counted upon from this source. As regards silver, the imports have considerably exceeded expectation and the duty is now estimated at Rs 11 01 lakhs higher than the Budget. On the other hand, there will be a shortage of export duty as the diversion of Burma rice to Indian ports has continued to some extent, specially during the earlier months of the year, and an important decrease will also occur in the excise duty on cotton goods owing to the recent stagnation in the Bombay mills.

37. In 1910-1911 provision is made for an increased revenue of Rs 17 14 lakhs under this head. Of this, Rs 145 lakhs represent the yield of the following enhanced duties which it has been decided to levy in order to secure financial equilibrium, viz. —

Beer and wines	50 per cent additional.
Spirits (ordinary)	Rs 6-0 per proof gallon with corresponding rates on liquors and perfumed spirits.
Tobacco, unmanufactured	Rs 8-0 per lb
" cigars	" 2-8-0 " "
" cigarettes	" 2-0-0 " " (roughly)
" other sorts	" 1-10-0 " "
Silver	4 annas per oz
Petroleum	1½ " per gallon.

Due allowance has been made for a possible contraction in imports consequent on the enhancement of the duty. The contraction is likely to be greatest immediately after the enhancement is announced and it is for this reason that no benefit from the enhanced duties is expected in 1909-10. A moderate development should take place next year in the import trade in other commodities, chiefly in piece-goods, as well as an improvement in the position of the cotton mills in Bombay. An increase of Rs 18 lakhs is also assumed in the export duty on rice as, with the improvement in the agricultural prospects in the two Bengals, the demand for Burma rice in India is sure to be further reduced.

EXPENDITURE.

38 The lapse in the Budget estimate of the current year is caused by the non-utilisation of the provisions for the re-organisation of the appraising establishment and for the purchase of a steam launch in Bengal and by savings in ordinary grants in all the maritime provinces. In 1910-1911 provision has been made for the full scale of sanctioned expenditure and for the re-organisation of appraising and other establishments in Burma, Bengal and Bombay.

VIII AND 10.—ASSESSED TAXES.

39. The Imperial revenue shown against other provinces represents income-tax levied on surplus profits of railway companies in Bombay; while that shown against non-Civil Departments consists of the amounts deducted from the salaries, etc., of officers belonging to the Postal, Telegraph, Railway, Public Works and Military Services.

REVENUE.

(a) *Imperial.*

40. There is no material variation between the Budget and Revised estimates, nor between the latter and the Budget of 1910-1911.

(b) *Divided.*

41. The total revenue in the current year is less than the Budget by ^A Rs 3.49 lakhs. The more important decreases occur in Bengal and Bombay—the trade depression in 1908 having adversely affected the profits of companies on which the assessments in the current year have been based. The ^B Budget estimates for next year provide for a total improvement of Rs 8.04 lakhs. A substantial recovery is expected in Bengal with the return of normal trade conditions, in the other provinces allowance has been made for a normal growth in revenue.

EXPENDITURE

42. The figures show little variation and call for no remarks.

REVENUE.

(a) Imperial.

43. The Revised estimate for the current year is less than the Budget by Rs 32 lakhs. The revival in the export of Padouk timber from the Andamans has not answered expectations, while the improvement in revenue anticipated in the North-West Frontier Province will not be fully realised. In 1910-1911, a small increase in the receipts from the Andaman forests is almost wholly counter-balanced by a decrease in the Frontier Province, where the current year's revenue includes certain arrear receipts.

(b) *Divided.*

44. The total revenue in 1909-1910 falls short of the Budget by no less ^R than ₹10.02 lakhs. All the provinces except Burma, Madras and Bombay share in this decline. In the Central Provinces, the revenue has been affected by a poor market for grass, firewood and bamboos, by a smaller outturn of timber in certain forests and by the exemption of calves from grazing fees. In the two Bengals, as well as in the United Provinces and the Punjab, the general depression in the timber trade appears to have been mainly responsible for keeping down the receipts, though in the last-named province a portion of the decrease is caused by an adjustment by deduction from receipts of a payment made to the Frontier Province in respect of arrear revenue due to it. Important improvements over the Budget forecast occur in Burma owing to an extension of the purchase contract system, and in Bombay mainly in consequence of a keen competition at the timber sales in certain tracts.

45. In 1910-1911, a moderate growth of ₹7.32 lakhs is assumed in the total ^{Bu} revenue. All the provinces expect to share in the development, except Bombay where the completion of the clearance of *maliki* teak in the Thana forest division will restrict the income.

EXPENDITURE.

(a) *Imperial.*

46. The saving of ₹1.17 lakhs in the Budget grant for 1909-1910 occurs ^R chiefly in the working expenses of the Andaman and Hazara forests, and in the charges of the Dehra Forest Research Institute owing to vacancies in the appointments of certain Research officers. For next year, provision has been made for ^B the full scale of sanctioned expenditure.

(b) *Divided.*

47. The lapse of ₹4.03 lakhs in the Budget provision for the current year ^R is distributed over all the provinces with the exception of Madras and Bombay, where small excesses over the grants are likely to take place. The saving is largest in the Punjab and is mainly caused by the payment to the Frontier Province referred to in paragraph 44 having been adjusted not under the expenditure head but by deduction from receipts. Important savings are also expected in the working expenses of forests, and in the provision for establishment charges in the Central Provinces and Burma.

48. The Budget Estimate for 1910-1911 is ₹9.96 lakhs higher than the ^B Revised of the current year. The largest increase occurs in Burma, where full provision has been made for sanctioned establishments and for the re-organisation scheme introduced during the current year, and in Madras where operations for the development of forests are contemplated on a large scale. In Bombay, a lump provision of ₹2 lakhs has been made for the re-organisation of the subordinate forest establishments, but this is counterbalanced to some extent by smaller expenditure on conservancy and works and on temporary establishments. In the other provinces, provision has been generally made for the normal growth in working expenses and the full sanctioned scale of establishments. Special provision has been made in the Central Provinces for the re-organisation of the provincial forest service, some provision for re-organisation and other fresh expenditure also appears in the Budget of most other provinces.

Imperial.

49 The figures of both revenue and expenditure for the two years show little variation and call for no remarks.

Provincial.

50. The total revenue in 1909-1910 does not differ materially from the Budget estimate. There has been a considerable set-back in Bengal, owing probably to the commercial and agricultural depression in the earlier months. But the defects from the Budget estimate in this province, as well as in Eastern Bengal and Assam, Madras and Burma, are counterbalanced to some extent by improved receipts in the provinces recovering from the recent famine. In 1910-1911, a substantial recovery is anticipated in Bengal, while in the United Provinces the rush of litigation in 1909-1910 is not expected to continue; in the other provinces, provision has been made for a normal growth in revenue consequent on the expansion of the operations of the department.

51. The total expenditure in 1909-1910 is about the same as the Budget estimate. The grant of 1910-1911 includes provision in almost every province for the revision of registration establishments.

8. Bombay .	13,88,643	14,24,976	12,05,407	13,40,000	12,99,000	13,79,000
TOTAL INDIA R	90,14,790	87,67,795	88,14,542	87,98,000	89,51,000	88,55,000
Equivalent in Sterling £	600,986	584,520	589,636	586,500	596,700	590,300

52 The revenue recorded under this head represents tributes received from the protected states, in several cases as a result of exchanges of territory and settlement of claims, and contributions made chiefly in lieu of former obligation to supply or maintain troops. The figures do not show any important fluctuations from year to year except for arrears and their recovery and the levy of fees on succession (*nazarana*) in some cases. Thus the increase of Rs 1.53 lakhs over the Budget Estimate of the current year is chiefly due to the recovery of the balance of *nazarana* from the Chief of Mandi, while the absence of this item mainly accounts for the difference between the Budget of 1910-1911 and the Revised of the current year.

(a) *Imperial.*

53. The wholly Imperial expenditure shown against "Other Provinces" represents refunds and drawbacks in respect of wholly Imperial revenue (*e.g.*, Opium, Salt, Customs and Tributes). Of the increase of ₹18.13 lakhs in 1909-10 over the Budget estimate, ₹16.80 lakhs occur under Opium owing to the reasons explained in paragraph 18, and ₹1.94 lakhs under Customs owing to a special refund in Madras of a deposit for the payment of duty and larger drawbacks in Bombay chiefly on account of arms, cotton manufactures and silver bullion. The absence of these special refunds accounts for the difference between the Revised Estimate of the current year and the Budget of next year.

(b) *Divided and Provincial.*

54. The expenditure fluctuates considerably from year to year and is difficult to estimate. In 1909-10 the Budget will be exceeded by ₹2.31 lakhs, owing chiefly to special excise refunds in the Central Provinces and Madras. For 1910-11 a normal expenditure has been assumed.

55. The wholly Imperial expenditure shown against "Other Provinces" represents Opium, Salt and Customs compensations paid to Native States and Foreign Governments, as well as Miscellaneous compensations (*i.e.*, those of general character and not intended to indemnify against loss of a particular kind of revenue) in provinces other than Bombay. The main reason of the variation between the Budget and Revised estimates of the current year and between the latter and the Budget of next year is the payment in Bombay of certain arrears due to the Akalkot State and to the *Saranjamdars* in the Ahmadnagar district.

(a) India—Imperial

56 In 1909-1910, the total Budget estimate is now expected to be exceeded by Rs 142 lakhs owing chiefly to a larger overdraft of capital by the Bengal Nagpur Railway Company, the recovery of interest (by debit to Capital account) on funds advanced to the Company in India for the construction of new extensions and the recovery of arrears of interest on the cost of rolling stock originally purchased from State funds but eventually transferred to the capital account of

the Indian Midland Railway. On the other hand, there will be some decrease in the interest receivable in respect of Imperial loans and advances, owing to smaller realisation of arrears from Native States in Bombay and advance payments at the end of 1908-1909 by certain States in Central India and Rajputana. In 1910-1911 there will be some increase in the interest payable from the revenues of the Bengal Nagpur and Indian Midland Railways in respect of overdrafts of capital as well as in that payable from the capital account of the former railway in respect of advances for the construction of new extensions.

(b) *India—Provincial.*

57 There is no material difference between the total Revised and the total Budget estimate of the current year, a shortage in the recovery in Bengal, and to a small extent also in Madras, being more than counterbalanced by increased realisations in Bombay and other provinces. In 1910-1911, a large increase is anticipated in Bengal owing to the recovery of arrears, and small increases are also provided in Madras, Eastern Bengal and Assam, and Burma. But there will be a considerable decrease in the United Provinces and decreases of smaller magnitude in the other provinces which are recovering from the recent famine; and the total receipts for all India will be Rs 2·2 lakhs less than the Revised estimate of 1909-1910.

(c) *England.*

58. The interest realised in 1909-1910 from the investment of the cash balances of the Home Treasury of the Government of India exceeds the Budget by £63,000 (Rs 45 lakhs) owing to the sums available for investment being larger and the rate of interest higher than was estimated. The more moderate Budget figure has, however, been repeated as the Budget estimate for 1910-1911.

INTEREST ON ORDINARY DEBT.

59. The charges in 1909-1910 for Interest payable on the public debt as a whole are in excess of the Budget by £39,500 (R5 92 lakhs). The principal variations are an increase of £29,200 in interest on India Bills, owing to the

rate of discount being higher than was contemplated; and a payment of £14,600 on account of interest on the temporary loan taken from the Gold Standard Reserve during the year (*vide* paragraph 235). In the Budget of 1910-1911 necessary provision has been made for a full year's interest on the sterling loan of £7½ millions and the rupee loan of 2½ crores raised in the current year; for a higher rate of interest on India Bills, for increased sinking fund payments, for the redemption of debt in excess of money raised in connection with the new sterling loan raised in 1909-1910; and for the service of the new rupee loan announced in paragraph 238.

60. The amount of interest transferred to the Railway and Irrigation sections of the accounts depends, firstly, on the capital expenditure, and, secondly, on the rate at which interest is charged on that portion of the debt which has not been specifically raised for the construction of railways or irrigation works. Our practice is to adopt for this purpose the average rate of interest actually paid in respect of the whole of the non-specific debt in the latest year for which the final accounts are available. The result is that the rate adopted in calculating the Revised estimate for a year is generally different from that used for the Budget estimate; and this leads to a difference between the two estimates apart from that caused by a variation in the capital expenditure itself. The increase in the amount of interest to be transferred in 1910-1911 over the Revised estimate for 1909-1910 is wholly due to the progress of capital expenditure.

61. A portion of the Interest on Ordinary Debt appears in the Provincial section of the accounts. Provincial Governments are authorised to grant advances to cultivators (as well as to certain other people in special cases) under various Acts, to landholders and notabilities apart from the provisions of any law, and to municipalities and local bodies (other than Presidency Corporations), out of amounts annually placed at their disposal by the Government of India. The interest actually levied on such advances is credited as Provincial revenue. But interest at 3½ per cent a year is charged to the Local Governments on the mean between the outstanding balances of the Provincial Loan Accounts at the commencement of the year and at its close, and this is done by transferring the amount so calculated from the Imperial to the Provincial section under Interest on Ordinary Debt. The differences between the Budget and the Revised estimates of the amount to be so transferred in the current year, and between the latter and the Budget estimate of 1910-1911, are explained by the reductions in the outstanding balances of the Provincial Loan Account as shown in the table at page 44, which are chiefly due to heavy recovery of *takavi* advances in the provinces recovering from the recent famine.

INTEREST ON OTHER OBLIGATIONS

62. The increase of £16,700 (Rs 25 lakhs) in 1909-1910 over the Budget estimate is mainly caused by the payment to the revenue account of the Burma Railway Company, under the terms of its contract, of interest on undrawn balances of capital deposited by it. In 1910-1911, the payments on this account will be smaller, but the decrease will be more than counterbalanced by an increase in the interest payable by the Post Office Savings Bank, the deposits in which are expected to grow with returning agricultural prosperity as well as in that payable on the deposits in the new General Provident Fund for Government servants.

REVENUE.

63. The Budget estimates for the current year assumed a large growth in the postal revenue, with the return of normal agricultural conditions and the revival in trade. The expectation has not been fully realised and the Revised estimate is now taken at Rs 8.85 lakhs less than the Budget. Trade conditions have not proved quite so good as was anticipated, while insufficient allowance appears to have been made in the Budget for the effect of the reduction in postal rates introduced from the 1st October 1907. In the Budget of next year, provision has been made for a moderate growth of Rs 10.89 lakhs.

EXPENDITURE.

64. The expenditure in 1909-1910 in India is likely to exceed the Budget grant by Rs 1.51 lakhs. There will be an increase of Rs 2.75 lakhs under grain compensation allowances to low-paid Government servants, but this will be counter-balanced to some extent by savings under stationery and printing charges. The Budget estimate for 1910-1911 provides for the sanctioned scale of expenditure as well as for the normal development of the operations of the department; allowance has been made for a saving in the cost of audit which is expected to accrue from certain reforms likely to be introduced next year.

(a) Indian.

15. In framing the Budget estimate of the current year, no allowance was made for the usual growth in revenue which had taken place in recent years, as the effect of the change in the inland tariff which was introduced from the 1st of January 1909 could not be properly gauged. It now appears that this cautious estimate is likely to prove too high by no less than Rs 9 lakhs. A greater portion of this loss arises from State messages, both the number and the average value of which appear to have decreased during the year, and is made up to Government by savings in the cost of official telegrams. As regards private messages, so far as can be estimated at present, it seems that their average value has somewhat increased after the introduction of the new tariff, and any loss that may take

place on them during the year will probably be due to a reduction in their number caused by the continuance of the trade depression in the earlier part of the year. For next year a moderate growth of Rs 9 lakhs in the revenue is assumed with reference to a possible improvement in trade conditions.

(b) *Indo-European.*

66 There is an improvement of Rs 1.65 lakhs in the current year over the Budget estimate, mainly in the message revenue. In 1910-1911 a further small normal growth has been allowed for

EXPENDITURE

67 A lapse of Rs 5.09 lakhs is expected in the total Budget grant of the current year, owing chiefly to smaller expenditure on buildings and on purchase of stores for the Indo-European Department. In 1910-1911, provision is made by the Indo-European Department for the construction of a line through Arabistan and for increased expenditure on buildings, and by both Departments for larger purchases of stores in England.

REVENUE.

68. The Revised estimate for 1909-1910 is taken at ₹6.68 lakhs less than the Budget. The return from circulation of bronze coins issued during the last famine has continued during the year, and instead of the profit of 8 lakhs which we anticipated from this source there will be a loss of 4.5 lakhs. The profit on the circulation of nickel coins is also likely to be less than the Budget by a lakh. On the other hand, dollar coinage will yield an unexpected receipt of 1.52 lakhs.

69. In 1910-1911 the Budget is taken at ₹5.95 lakhs higher than the Revised estimate for the current year. A revival in the demand for bronze coin is expected to yield a profit of 8.5 lakhs, but on the other hand there will be a decrease of a lakh in the profits on nickel coinage and of 1.52 lakhs in the fees charged for the coinage of dollars.

EXPENDITURE.

70. The increase of ₹2.8 lakhs in the Revised estimate over the Budget of 1909-1910 has been caused by the loss on the circulation of bronze coins mentioned above, counterbalanced to some extent by savings in the establishment charges and in the grant for the purchase of stores. In 1910-1911 provision has been made for a normal scale of expenditure.

71. The cost of the Civil offices of Account and Audit is Imperial in all the provinces with the exception of the charges of the staff employed in auditing the accounts of municipalities and other local bodies, so is the expenditure of the Currency Department, as well as the payments made to the Presidency Banks for treasury work and for the management of the public debt.

(a) India—Imperial.

72. The total expenditure in 1909-10 falls short of the Budget grant by Rs 244 lakhs. There is a saving of Rs 221 lakhs in the provision made for the enlarged Legislative Council in consequence of too early a date having been assumed for the introduction of the Reform scheme, and of Rs 111 lakhs in the provision for the tour and other expenses of the Governor-General. On the other hand, there is an excess of Rs 68 lakh in the Secretariat charges, owing chiefly to the re-organisation of office establishments and the grant of family travelling allowance recently sanctioned by the Secretary of State; and some excess occurs in the grant for the Civil Account offices owing to the expenditure incurred in Bengal in connection with the removal of the office to the building lately occupied by the Military Accounts Department and the payment of leave allowances to officers in several provinces.

73. The Budget of next year is taken at Rs 15 lakhs higher than the Revised estimate for 1909-1910. Full provision has been made for the charges of the enlarged Legislative Council. The provision under the other heads is generally based on the sanctioned scale of expenditure, save that allowance has been made for the normal growth of the cost of audit and for additional establishment required at the Rangoon Currency office.

(b) India—Provincial

74. The total expenditure in 1909-1910 does not materially differ from the Budget estimate. Savings are expected in Bombay, mainly owing to the non-utilisation of the provision for the grant of local and house-rent allowances to certain officers and establishments, in Burma, the United Provinces and the Punjab, in consequence of the transfer to other heads of charges for which provision was made in the Budget under this head, as well as of ordinary lapses in grants; and to a small extent in the Central Provinces. But these have been largely counterbalanced by excess expenditure in Madras and in the two Bengals.

75. The Budget of 1910-1911 exceeds the Revised of the current year by Rs 562 lakhs. Provision has been made for an additional expenditure of Rs 157 lakhs (net) in Bengal in connection with the contemplated constitution of an Executive Council, and of Rs 66 lakh in Madras, as well as in Bombay, on account of an additional Ordinary Member of the Executive Council. Other general causes of increase in the seven major provinces are full provision for the enlarged Legislative Council, re-organisation and strengthening of Secretariat establishments, and purchase of motor cars for high officials. In the Central Provinces, provision has been made for the sanctioned scale of expenditure, for the undrawn balance of the contract allowance of the Chief Commissioner, as well as for an increase in the salaries of Secretaries and Commissioners with reference to the proposed re-organisation of the Central Provinces and Berar Commissions.

(c) England.

76. The increase over the Budget estimate in 1909-1910 and the further increase in 1910-1911 occurs chiefly under stores for India, and is caused by the manufacture of new currency note forms in connection with the recent currency legislation.

Equivalent in Sterling £	271,423	264,087	280,117	275,700	290,200	285,800

EXPENDITURE.

(a) Imperial.

77. The small increase over the Budget grant in 1909-1910 is caused by the refund of an escheated property by the Administrator General, Bengal, whose charges are recorded in the Imperial section of the accounts; and an insufficient provision on account of salaries of Assistant Commissioners in the Frontier Province. In 1910-1911 provision has been made for the sanctioned scale of expenditure.

(b) *Provincial.*

78. The total Revised Estimate for the current year exceeds the Budget by R6.49 lakhs. There is a large increase of R3.84 lakhs in Bengal mainly in connection with the prosecution of anarchical crime; and of R2.26 lakhs in Madras owing to enhanced expenditure on grain compensation allowances, creation of temporary Civil and Sessions Courts to cope with increase of work and insufficient provision in the Budget to meet sanctioned charges of Criminal Courts. Smaller excesses occur in Burma owing chiefly to the prosecution of the Kheddah fraud cases, in Eastern Bengal and Assam owing to inadequate provision under several items in the Budget, and in Bombay, as a net result of a number of unimportant variations from the Budget allotments. On the other hand, some saving in the Budget grants is expected in the United Provinces, the Punjab and the Central Provinces.

79. The total Budget for 1910-1911 is R8.06 lakhs higher than the Revised Estimate for 1909-1910. The increase is shared by all the provinces except Bengal, where provision for normal growth of expenditure and for additional outlay in connection with the scheme for the improvement of the pay of ministerial officers will be more than counterbalanced by smaller payment of fees to prosecuting lawyers and of grain compensation allowances. The more important increases occur in the Punjab (2.25 lakhs), where provision has been made for the full cost of the scheme, recently introduced, for the re-organisation of the Judicial Department, in Madras (1.86 lakhs), where the Budget contains allotments for additional temporary Civil and Sessions Courts required to cope with the increase of work, as well as for a number of new schemes, e.g., constitution of additional districts and revision of pay of certain clerical establishments, and in Burma (1.76 lakhs) and the United Provinces (1.21 lakhs) owing chiefly to provisions for additional courts and the re-organisation of certain Judicial establishments. The excess in the case of the Central Provinces is chiefly caused by provision for the scheme for the re-organisation of the Commission.

REVENUE.

(a) *Imperial.*

80. The figures do not show any important variations and call for no remarks.

(b) *Provincial.*

81. There is an increase of R2.49 lakhs over the total Budget of the current year, chiefly under court-fees realised in cash in the United Provinces and under magisterial fines in several provinces. The Budget for 1910-1911 provides for normal receipts in all the provinces.

Equivalent in Sterling £	251,718	254,403	246,234	260,700	242,400	259,900

EXPENDITURE.

Imperial.

82. Nearly the whole of the saving in the Budget grant for 1909-1910 occurs in the convict charges at Port Blair, which constitute the bulk of the expenditure shown against "India General"; it has been caused by a fall in the

cost of dietary and by a too high provision in the Budget for the re-organisation of the Military Police. The Budget for 1910-1911 is for a normal scale of expenditure and includes provision for a contemplated revision of the warder establishment in the Frontier Province.

Provincial.

83. The total Revised for 1909-1910 is Rs 2.55 lakhs higher than the Budget Estimate. The provision for dietary charges has proved inadequate in Bengal, the Punjab, Madras and to a small extent in the Central Provinces, in the first of these provinces considerable expenditure had also to be incurred in connection with the equipment of the new Presidency Jail. The saving in Eastern Bengal and Assam occurs in the purchase of raw materials for manufacturing purposes.

84. The Estimates for 1910-1911 are generally based on the probable jail population, the cost of dietary and the requirements for raw materials. Provision for the revision of warder and other jail establishments has been made in several provinces (including the Central Provinces), and necessary allotments appear in Bengal for the new Presidency Jail and in Bombay for the new jail at Shikarpore.

REVENUE.

(a) *Imperial*

85. The figures show little variation and call for no remarks.

(b) *Provincial.*

86. The decrease of Rs 2.74 lakhs in the Revised Estimate of the current year, as compared with the Budget, is chiefly due to smaller demands for jail manufactures in Bengal. In 1910-1911, some recovery is expected in this province; in the other provinces, provision has been generally made for normal receipts, save that in Burma a special increase has been allowed for, owing to the contemplated employment of convict labour in the Rangoon Jail Press.

Equivalent in Sterling £	150,310	153,051	1,8,123	149,800	149,700	146,400

EXPENDITURE

(a) Imperial.

87 The saving in the Budget grant for the current year of the Frontier province is caused by the non-utilisation of the provision for re-organisation of the police force and by lower expenditure on grain compensation allowances, the excess under India General occurs in the charges of the Central Criminal Investigation Department. In 1910-11, provision has been made for the full sanctioned

scale of the re-organised police in the Frontier Provinces for the introduction of police reforms in Baluchistan, but the excess expenditure on this account is counterbalanced in part by savings under grain compensation allowance and higher recoveries from certain local funds in Hyderabad towards the cost of police supplied to them.

(b) *Provincial.*

88. The expenditure in the current year is likely to fall short of the Budget by Rs 2.35 lakhs. The grants for the introduction of police reforms are not likely to be fully worked up to in the two Bengals and in Madras, and the total savings in these three provinces will amount to Rs 6.21 lakhs. But, on the other hand, there will be considerable excesses over the Budget grant in Burma, where sufficient provision was not made for the sanctioned scale of expenditure in connection with the military police, in the Punjab and the Central Provinces, where the progress of police reforms has been more rapid than was anticipated, and in the United Provinces owing to special purchase of arms and accoutrements. In 1910-11, provision has been made in every province for the full cost of the reforms introduced during the current year, as well as for the introduction of further reform measures.

REVENUE.

89. The figures show little variation and call for no remarks.

Equivalent in Sterling £	143,962	138,870	139,988	140,400	141,600	141,900

EXPENDITURE

90. The saving of Rs 174 lakhs in the Budget estimate of the current year is chiefly caused by ordinary lapses in grants in Burma and Bengal. The estimates for 1910-11 generally allow for a normal scale of expenditure, save in Bengal, where an increased outlay on stores is contemplated, and in Bombay where provision has been made for repairs to a Government steamer.

REVENUE

91. The revenue in 1909-10 is now taken slightly higher than the Budget estimate in anticipation of increased pilotage receipts in Bengal. The Budget for 1910-11 is taken at about the same figure as the Revised for the current year.

Equivalent in Sterling £	140,988	145,285	158,430	165,500	161,200	178,300

EXPENDITURE.

(a) Imperial.

92. In the Budget estimate for the current year provision was made under this head in the India (General) Estimates for an Imperial grant of Rs. 3.15 lakhs in aid of university and collegiate education to be distributed among the several Provincial Governments. The amount actually assigned to each Government out of this sum has been placed at its disposal by increasing its share of Land Revenue, and there is thus a saving of the whole amount in the India Estimates under this head. The saving in the Frontier province is caused by lapses in ordinary grants.

93. In 1910-1911, the Budget provides for the sanctioned scale of expenditure in all the minor administrations, as well as on account of the Imperial Director General of Education, special allowance has also been made for the further development of education in the Frontier province, Baluchistan and Bangalore.

(b) *Provincial.*

94. The total estimated estimate of the current year exceeds the Budget by only 4 lakh. Excesses over Budget grants occur in the Punjab, the Central Provinces and Eastern Bengal and Assam, partly owing to expenditure against the special Imperial grants mentioned above, and partly also to heavier payment of grants-in-aid in the first two provinces and to the provincialisation of the inspecting agency formerly paid by District Boards in the last-named province. In Bengal, the excess expenditure caused by the payment to the University of the Imperial grant of Rs 6 lakhs has been more than counterbalanced by lapses in ordinary grants and in some of the special provisions included in the Budget for the improvement of education. In Bombay also, lapses are expected in the ordinary and special provisions, while the greater portion of the special Imperial grant of 55 lakh will not be spent in the current year and has been allotted for expenditure in 1910-1911. The large saving in Burma is caused by the non-utilisation of certain provisions for the development of education.

95. The estimates for 1910-1911 allow for a large advance of Rs 29 19 lakhs in educational expenditure—the increase being larger than that provided under any other head of Civil expenditure. Provision has been made in every province for further improvement and development, as well as for the full cost of the reforms introduced in the current year. Of the total increase, Rs 3 15 lakhs are met from the special Imperial grant to be given in 1910-1911 in aid of university and collegiate education and 45 lakh in Bombay from the unexpended balance of the similar grant made in the current year.

96. The largest increases occur in the United Provinces, Bombay and Bengal where the following sums have been provided for fresh expenditure with reference to the recommendations of the Finance Committees —

	R
United Provinces	86,000
Bombay	2,96,000
Bengal	42,000

97. The more important special provisions made in the several provinces are enumerated below :—

- (1) *Central Provinces* — Opening of new schools of every description and payment of larger grants-in-aid to schools and colleges and to local bodies for educational purposes
- (2) *Burma* — Strengthening of the subordinate inspecting agency, taking over by Government of certain municipal schools and raising of certain primary schools to the middle grade
- (3) *Eastern Bengal and Assam* — Raising of the status of the Chittagong College to the first grade, and payment of larger grants to high schools and Mahomedan hostels
- (4) *Bengal* — Appointment of an Inspector of Industries, revision of certain subordinate inspecting establishments, strengthening of the staff and other improvements in Government colleges and schools, and opening of new schools of various classes
- (5) *United Provinces*.—Taking over by Government of District Boards' zilla schools, regrading of the Provincial service, strengthening of the inspecting agency, opening of new schools, development of technical and female education, payment of larger grants to aided colleges and schools.
- (6) *Punjab*.—Lump provision for building and miscellaneous grants.
- (7) *Madras*.—Strengthening of the staff in Government colleges, expansion of elementary education and re-organisation of training schools.
- (8) *Bombay* — Strengthening of the subordinate inspecting agency, development of technical education and opening of new primary schools.

REVENUE.

98. The Imperial figures call for no remarks. Under Provincial, the total revenue in 1909-1910 will not materially differ from the Budget estimate—a decrease of Rs 1 78 lakhs in Bengal, caused mainly by the non-realisation of special contributions anticipated from District Boards, being very nearly counterbalanced by the recovery of arrear contributions (1 12 lakhs) from the Hutchison College in the Punjab and by small improvements in some of the other provinces. In 1910-1911, provision is made for normal receipts in all the provinces, the large increase in United Provinces being caused by the provincialisation of District Boards' schools.

EXPENDITURE.

(a) *Imperial.*

100. The saving in the Budget Estimate for the current year is caused by the non-utilisation of certain provisions for fresh expenditure and by smaller expenditure on measures for the prevention of plague in the Frontier province. In 1910-1911, special provision has been made for the creation of an additional civil surgeoncy in Baluchistan, as well as for the revision of certain clerical establishments and higher expenditure in connection with plague in the Frontier province.

(b) *Provincial.*

101. The total Revised Estimate for the current year is taken at Rs 10.17 lakhs less than the Budget. The decrease is shared by every province with the exception of Madras, where a small excess is anticipated. In the Central Provinces, Burma and Bombay, it is caused by savings in ordinary allotments and in the grant for expenditure in connection with the plague, in Bengal by similar savings as well as by the non-utilisation of the special provisions for the improvement of the Sanitary Department and the prospects of civil medical assistants; and in Eastern Bengal and Assam, the United Provinces and the Punjab by heavy lapses in the special subventions made from Imperial revenues for the improvement of sanitation.

102. The Budget for next year exceeds the Revised for 1909-1910 by Rs 17.97 lakhs, the increase being distributed over all the provinces. Provision has been made in every province for increased outlay on the improvement of sanitation; while several provinces contemplate a more vigorous programme for the prevention of plague. Special allotments have been made in almost every province for the improvement of the prospects of civil medical assistants, in Burma for improving the equipment of certain hospitals, in Bengal for improving the prospects of assistant surgeons; in the United Provinces for the taking over by Government of the Thomason Hospital at Agra, and in Bombay for the opening of new dispensaries and for the payment of grants to certain medical institutions.

REVENUE.

103. The figures do not show any important variations and call for no remarks.

104. The Imperial outlay shown against "Other Provinces" consists of the charges of the Political Residency at Aden, and certain other expenditure—mainly in connection with political refugees and State prisoners—in several provinces.

(a) *Imperial.*

105. The expenditure fluctuates considerably with the drawings of his subsidy by His Highness the Amir of Afghanistan. It is very difficult to forecast these with any degree of accuracy, and there is always an element of uncertainty in the estimates under this head. The Budget Estimate for the current year provided for a payment of R29 lakhs on this account. It is now unlikely that more than 25 lakhs will be drawn, and allowing for a provision of this amount the Revised Estimate amounts to R7.44 lakhs less than the Budget. Other important causes contributing to the decrease are non-utilisation of the provisions for the re-organisation of certain tribal levy services in Baluchistan and of frontier militia in the Frontier province, and recovery of arrear contributions towards the cost of certain political agencies in Central India.

106. In 1910-1911, the provision for the payment of subsidy to the Amir has been taken at 20 lakhs, but the saving under this item is counterbalanced in part by increases in other directions, and the total Budget is less than the Revised by only 1.92 lakhs. The principal causes of increase are the absence of the arrear contributions mentioned above, and the provision for the re-organisation of frontier militia in the Frontier province and of the political staff and certain other establishments in Aden.

(b) *Provincial.*

107. The Revised for the current year does not differ materially from the Budget. In the Budget of 1910-1911, a small growth of expenditure has been allowed for, mainly in connection with the re-organisation of the Bombay Political Department.

EXPENDITURE.

108. The figures shown against "Other Provinces" in the table at page 67 represent expenditure incurred in the several provinces in connection with ethnographical surveys, census operations, and the pay and allowances of officers borne on the cadre of the Imperial Civil Veterinary Department, as well as the cost of the Archæological Department in Burma.

(a) *Imperial.*

109. The Revised for 1909-1910 is less than the Budget by Rs 72 lakhs. The principal savings occur in the charges of the Meteorological Department owing mainly to a reduced expenditure on telegrams caused by the revised tariff rates, and of the Survey of India, Geological Survey and Agricultural Departments in consequence of ordinary lapses in grants. In 1910-1911, a provision of 5 lakhs has been made to meet the cost of the impending census operations. Otherwise the grants of the various Departments have been generally fixed with reference to normal operations and the scale of establishments actually sanctioned. The large increase under Survey of India over the current year's expenditure is caused mainly by provision for the reorganisation of the Imperial Service recently sanctioned by the Secretary of State.

(b) *Provincial.*

110. The Revised Estimate shows a lapse of Rs 76 lakhs in the total Budget provision for the current year. Considerable savings are expected in Bengal and in Bombay, owing mainly to the non-utilisation of grants for the development of the Agricultural Department in the former province, and for the

purchase of land for the Northcote Cattle Farm in the United Provinces. Savings of smaller magnitude occur in Madras, Burma and the Central Provinces. But on the other hand, there are large excesses over Budget grants in the United Provinces and the Punjab. In both these provinces, special payments of contributions of 2 and 1 lakhs respectively have been made to the recent industrial exhibitions; but while in the former province it has been found possible to meet a portion of this expenditure out of savings in the Budget allotments, in the latter the Budget has proved inadequate to meet sanctioned outlay.

111. The total Budget grant for 1910-1911 is 6.28 lakhs higher than the Revised of the current year. The bulk of the increase occurs in Bengal, Madras and Bombay. Provision has been made in all three provinces for the further development of the agricultural and other departments whose charges are recorded under this head, and in Bengal, and also to a smaller extent in Madras, for the purchase of a larger quantity of cinchona bark. Provisions for the development of the agricultural and veterinary departments have also been made in the Central Provinces, the United Provinces and the Punjab, but they have been obscured in the first named province by the saving caused by the completion of the work in connection with gazetteers, and in the last two provinces by the absence of the special payments made in the current year in aid of industrial exhibitions.

REVENUE.

112. The fluctuations in the Imperial figures are unimportant and call for no remarks.

113. As regards the Provincial figures, the decrease in 1909-1910 as compared with the Budget estimate is chiefly due to smaller receipts from the sale of quinine in Bengal and from the chrome tanning industry in Madras. In 1910-1911 larger receipts are anticipated in Bengal from the sale of quinine, and almost all the provinces provide for a growth in departmental revenue.

Equivalent in Sterling £ England £	312 2,43,015	156 3,29,359	141 3,66,639	400 3,68,000	200 398,000	300 398,000
TOTAL .	2,43,327	3,29,515	3,66,780	3,68,400	398,200	398,300

115. Almost the whole of the expenditure recorded under this head is incurred in England. Leave allowances of officers paid in India are charged to the same head as their salaries, and the small sums shown against India represent leave allowances of officers lent to Foreign States, etc.

116. It is hardly possible to frame a correct estimate under this head. The expenditure for the current year has been greater than was anticipated, and the Budget for 1910-1911 is taken at practically the same figure as the Revised for 1909-1910.

117. The figures of Imperial revenue shown against "Other Provinces" represent the receipts of certain abolished funds, the assets and liabilities of which were taken over by the Government, as well as the subscriptions paid by members of the Indian Civil Service for securing certain pensionary benefits for their families. The charges in account of such pensions as well as of the pensions of the abolished funds are recorded in the accounts as Imperial expenditure.

EXPENDITURE.

118. The expenditure in India in the current year is nearly the same as the Budget estimate; but in England there is an excess of £17,700 (2.65 lakhs). The estimates for next year provide for the normal growth of the retired list both in India and in England.

REVENUE.

119. The variations in the figures are unimportant and do not call for any remarks.

EXPENDITURE.

(a) Imperial—India and England.

120. The grant for the purchase of stationery for the central stores in 1909-1910 was deliberately fixed at a lower figure than the actual expenditure in the two previous years, as measures were in contemplation for securing a reduction in the consumption of stationery in Government offices. Some steps in this direction have been taken during the present year, but the effect of these will not be fully felt for some time to come; and the grants for the purchase of stationery for central stores in India and in England in the current year have been exceeded by Rs 5.55 lakhs. A part of this, however, will be counterbalanced by an increase of Rs 2.03 lakhs in the value of supplies to Local Governments, etc. There will also be a large saving in the printing expenditure, which also has come under more careful scrutiny during the year. The total Imperial expenditure under this head in the current year is Rs 1.16 lakhs in excess of the Budget grant, but it is satisfactory to notice that there is a reduction of Rs 6.7 lakhs as compared with last year.

121. The grant for the purchase of stationery for central stores in India and in England in 1910-1911 has been fixed at Rs 24 lakh less than the Revised estimate for the current year, in the expectation that the measures referred to above and further measures in the same direction likely to be adopted next year will check any growth in the expenditure. On the other hand, a slightly larger decrease occurs in the supplies to Local Governments, etc., some of whom are also taking steps to secure economies, and provision has been made for a growth in the printing charges. The total Imperial Budget for next year in both India and England therefore exceeds the Revised of 1909-1910 by 1.4 lakhs.

(b) Provincial.

122. The total expenditure in 1909-1910 exceeds the Budget by Rs 3.57 lakhs. Of this Rs 2.63 lakhs occur in Eastern Bengal and Assam alone, where the requirements of the new Dacca jail press appear to have been inadequately foreseen. Some increase in the stationery expenditure has taken place in most of the provinces.

123. The increase of Rs 2.22 lakhs in the Budget of 1910-1911 over the Revised estimate of the current year occurs almost wholly in the printing expenditure.

REVENUE

124. The Imperial revenue shown against "Other Provinces" represents recoveries of the value of stationery supplied to Railways, Municipalities and other local bodies, etc.

125. The increase in 1909-1910 over the Budget estimate occurs mainly under India General and the Punjab and is caused by collection of bills outstanding at the end of the previous year. The absence of these special receipts accounts for the falling off in the receipts for 1910-1911 as compared with the Revised for 1909-1910.

XXIV AND 31.—EXCHANGE.

	Accounts, 1906-1907.	Accounts, 1907-1908	Accounts, 1908-1909.	1909-1910		1910-1911, Budget.
				Budget	Revised	
Revenue . . . R	28,50,328	14,17,664	3,93,000	...
Equivalent in Sterling £	190,022	94,511	26,200	...
Expenditure . . . R	5,16,552
Equivalent in Sterling £	34,437

126 The accounts of the Government of India are now prepared on a sterling basis, the rupee transactions in India being converted into pounds at the rate of $\text{R}15 = \text{£}1$ and then added to the Sterling transactions in England, and the comparatively small sums which have to be brought to account owing to the facts that the remittances to defray the net expenditure in England are not effected at exactly sixteen pence to the rupee, and that the Government is under obligations to carry out certain transactions with railway companies at fixed rates differing from the rate of sixteen pence to the rupee, are shown under this head.

127 In the current year the average rate to be obtained on the net remittance of funds from India to England is estimated at $\text{£}1 = \text{R}14.977$, and there is accordingly a gain of $\text{R}3.93$ lakhs under this head. In the Budget estimate for next year, it is usual to assume an average rate of $\text{£}1 = \text{R}15$, as it is not possible to forecast with any degree of certainty what the course of exchange will be in the next twelve months.

128 Charges in connection with the remittance of Government treasure are Imperial in all provinces. So is the discount paid, or the premium levied, in connection with the sale of bills at treasuries and currency offices to facilitate trade remittances of funds. The only other important items of Imperial revenue and expenditure realised or incurred in the various provinces under this head are those of an extraordinary character exceeding Rs 10,000 in amount.

EXPENDITURE

(a) India - Imperial

129 Important savings in the Budget estimate for the current year occur under remittance charges and in the reserve provision for special commissions of enquiry. In 1910-1911, an increased allotment has been made on account of the former item in the anticipation of a further improvement in trade conditions, and a reserve provision has again been made under the latter, mainly in view of the contemplated enquiry into the rise of prices.

(b) India - Provincial

130 The total Revised estimate for the current year is Rs 21 lakhs less than the Budget estimate. A considerable lapse has taken place in the United Provinces in the provision for *takavi* remissions, and a similar lapse of a much smaller magnitude in the Central Provinces. Important decreases also occur in Eastern Bengal and Assam owing to a smaller payment of contributions to district boards, in consequence of the taking over by Government of certain expenditure formerly incurred by them, and to the record under other heads of account of certain charges for which provision was made in the budget under this head; and in Bengal owing to savings in the provision for the special enquiries in connection with fisheries and other matters. On the other hand, there are large excesses over the Budget estimate in Burma, owing to the record under this head of certain charges for which provision was made under other heads, and in the Punjab, owing to higher expenditure on petty establishments and on miscellaneous contributions to district boards.

131 The total Budget for 1910-1911 is less than the Revised of the current year by Rs 73 lakhs. Provision for increased expenditure has been made in the Central Provinces, in connection with *takavi* remissions, and in most of the other provinces to allow for ordinary growth as well as for outlay of an unforeseen character. But they are more than counterbalanced by a decrease of Rs 41 lakhs in the United Provinces caused by smaller provisions for *takavi* remissions and for contributions to district boards in consequence of the taking over by Government of certain expenditure hitherto incurred by them, and by a smaller decrease in the Punjab, due to the absence of special contributions paid to certain district boards during the current year.

(c) England

132. The bulk of the variations between the Budget and the Revised estimates of 1909-10 and between the latter and the Budget of next year is explained by heavy refunds to contractors in the current year of fines incurred by them in 1908-09 in connection with the supply of stores.

133 The Budget for 1909-1910 included a special provision of Rs 9 lakhs on account of the probable proceeds of the sale to the Calcutta Port Commissioners of certain lands belonging to the Government. The amount is not likely to be received during the current year and this explains the difference of Rs 9 lakhs between the Budget and the Revised estimates. In Bombay the Budget provided for a special extraordinary receipt of Rs 1.52 lakhs on account of the sale of the buildings and site of the St. Peter's School, Mazagaon. This has been omitted from the Revised as the property is not likely to be sold, but receipts of nearly the same amount are expected from profits on rents of Government lands vested in the City of Bombay Improvement Trust and from the sale of the Karachi Custom House building.

134 Provision has been made in the Budget for 1910-11, for the special receipt of 9 lakhs mentioned above, as well as for one of 1.11 lakhs in the United Provinces to be obtained from the sale of certain property in connection with a scheme for the amelioration of the position of the Benares branch of the ex-Royal

REVENUE.

(a) *Imperial.*

family of Delhi. But owing mainly to the absence of the special receipts obtained in Bombay in the current year and to smaller recoveries of departmental charges in connection with the supply of stores to Provincial Governments and local bodies, the total Budget will be only 77 lakhs higher than the Revised of the current year.

(b) *Provincial.*

135. A sum of R4.72 lakhs was provided in the Budget estimates of the ^{R.} Central Provinces for 1909-1910 as probable receipts from the sale of cloth manufactured for Government by weavers in receipt of relief during the last famine, but R2.2 lakhs are now expected to be received from this source in the current year, a further 3 lakhs being realised next year. The decrease in revenue in 1909-1910 is, however, more than counterbalanced by increases in other provinces; the more important of these occur in Eastern Bengal and Assam owing mainly to higher receipts from unclaimed deposits in courts, etc., and in Bengal owing to special receipts from the sale of the Jorabagan thana and of the fishery trawler "Golden Crown." The former transaction is expected to bring in 2 lakhs of which 1.4 will be received in 1910-1911.

~~136.~~ The total Budget for 1910-1911 does not materially differ from the ^{B.} Revised ~~for the~~ current year; and the only important items of a special character are the ~~in~~ in Central Provinces and Bengal mentioned in the preceding paragraph.

33 TO 36.—FAMINE RELIEF AND INSURANCE.

137 There is a satisfactory saving of Rs 20 67 lakhs in the provision made in the Budget estimates of the current year for the actual relief of famine, owing to the earlier termination of relief operations in the afflicted districts in the two Bengals and in the United Provinces. A small lapse is also expected in the grant for the construction of Protective railways, owing to delay in the acquisition of land for the Dharmapuri-Hosur extension of the Morappur-Dharmapuri Railway. The amounts saved under both heads are added to the provision for the avoidance of debt, and the total grant under the group head remains unchanged.

138 In the Budget for 1910-1911, provision has been made as usual for a total grant of 150 lakhs under this group head. No portion of this will be required for actual famine relief expenditure, and the sum has been allotted in moieties for the construction of works which are likely to serve as a protection against famine, and for the avoidance of debt. It may be mentioned that half of the latter grant appears in the Provincial section of the estimates as a result of the arrangements explained in the Financial Statement for 1907-1908.

CONSTRUCTION OF PROTECTIVE WORKS.

139 The whole of the grant for Protective Railways in 1910-1911 will be spent, as in the current year, on the construction of certain famine feeder line in the Madras Presidency.

The following table gives the distribution of the grant made in next year's Budget for the construction of protective irrigation works —

	1909-1910		1910-1911, Budget
	Budget.	Revised	
1 Central Provinces	R	R	R
(i) Tank projects	13,60,000	15,11,000	15,12,000
(ii) Other projects, etc.	2,40,000	1,90,000	2,23,000
2 Burma	31,000	17,000	15,000
3 Eastern Bengal and Assam	6,000	6,000	2,000
4 Bengal			
(i) Tribeni Canal	6,89,000	8,99,000	8,10,000
(ii) Other projects, etc.	1,26,000	1,10,000	1,40,000
5 United Provinces			
(i) Berwa Canal	2,89,000	4,59,000	65,000
(ii) Ken	3,16,000	1,72,000	4,18,000
(iii) Damsan	8,32,000	7,44,000	6,21,000
(iv) Other projects, etc.	4,93,000	1,90,000	5,39,000
6 Punjab		1,000	
7 Madras	1,36,000	62,000	1,01,000
8 Bombay			
(i) Godavari Canal	14,01,000	21,14,000	15,31,000
(ii) Chankapur Tank	2,77,000	2,72,000	40,000
(iii) Pavani river project	5,00,000	3,56,000	8,40,000
(iv) Other projects, etc.	1,82,000	71,000	2,89,000
9 Minor administrations	22,000	20,000	14,000
Reserve provision, allowance for possible lapses in grants, etc.	3,01,000		2,00,000
	72,60,000	72,00,000	70,00,000

140 The expenditure shown against "other projects, etc.," in some of the provinces, and the small amounts entered against the others, include expenditure on survey and investigation operations as well on the preparation and revision of famine relief programmes. As regards the more important projects, it will be seen that the whole of next year's grant has been allotted to works already undertaken. The Secretary of State has consented to larger allotments (up to a maximum of 100 lakhs) being made for Protective Irrigation works than the limits of the Famine grant allow, provided that the extra expenditure (which will be recorded under another head) does not have the effect of reducing the revenue surplus below one crore. Obviously it is impossible to take advantage of this arrangement in 1910-1911, and the initiation of such new schemes as the Tendul has had to be deferred until better times.

Miles open on April 1	904	905

141 With the purchase of the Madras Railway on the 1st January 1908 the old guaranteed Railway ceased to exist, and the figures shown under 1909-1910 and 1910-1911 under this head in the preceding table represent certain arrear adjustments. The Gross Receipts and Working Expenses of State Railways include the following figures on account of the Jorhat Railway in Assam which is the only line whose transactions are recorded in the Provincial section of the accounts.—

	Accounts, 1906-1907	Accounts, 1907-1908	Accounts, 1908-1909	Budget, 1909-1910	Revised, 1909-1910.	Budget, 1910-1911.

Working Expenses . . .	89,102	90,157	80,960	99,000	99,000	85,000

NET TRAFFIC RECEIPTS.

142 The Budget estimates for the current year provided for a very considerable advance in the Gross Receipts of State Railways in the expectation that the seasons would be propitious and that there would be a revival in trade. The latter expectation has not been fully realised, and it is now apprehended that the receipts will fall short of the Budget by Rs 84 89 lakhs. The more important decreases occur in the earnings of the East Indian and Bengal-Nagpur Railways, which have suffered by the depression in the coal market, of the Eastern Bengal Railway, owing to a short jute crop, and on the Rajputana-Malwa and Oudh and Rohilkhand Railways owing to general depression in traffic. On the other hand, material improvements are expected in the earnings of the Great Indian Peninsula line and of the two other lines which traverse Southern India. The bumper wheat crop harvested in the Punjab last year has enabled the budget estimate for the North-Western Railway to be realized at the very high figure of 7 crores.

143. In spite of the defect in the estimates of gross revenue, the total Working Expenses in 1909-1910 exceed the Budget grant by Rs 11.03 lakhs. A considerable saving in the case of the East Indian Railway, caused by the fall in the traffic and larger debits to capital in connection with betterments, is almost wholly counterbalanced by an equally large increase under the North-Western Railway, a portion of which is due to unforeseen expenditure necessitated by flood damages and by the fire in the carriage shop at Lahore. Some saving in expenditure also occurs in the Oudh and Rohilkhand Railway, but in the case of none of the other lines is any decrease of expenditure expected to follow the decline in revenue. On the other hand, the Budget grants are likely to be exceeded on the Madras and Southern Marhatta line owing to increased receipts and necessary renewals of sleepers and repairs of flood damages, on the Burma line owing to re-laying of certain sections of the permanent-way and necessary improvements in station yards, on the Eastern Bengal line owing to outlay on the repairing of damages caused by the cyclone in October 1909, and on the Bombay, Baroda and Central India line owing to enhanced charges for coal and heavier repairs and renewals of rolling-stock.

144 Owing to the decline in the Net Receipts, important savings occur in the provision for the payment of surplus profits to the Bengal-Nagpur and East Indian lines, but these are more than counterbalanced by an increased payment of 12 lakhs to the Madras and Southern Marhatta Railway, the effect of the provisions of the new contract as well as of an improvement in the net revenue.

145 In the Budget of 1910-1911, provision has been made for a moderate increase of Rs 169.38 lakhs in the Gross Receipts on the assumption that the agricultural conditions will be normal and that there will be a further revival of trade. Out of this Rs 153.63 lakhs will, however, be required to meet increase in working expenses, and making some allowance for enhanced payment of surplus profits to Companies, etc., the improvement in Net Receipts will amount to 8.77 lakhs only.

146 The very large increase in Working Expenses is a direct result of the increasing demand on the part of the public for more efficient working and for a better service both for goods and passenger traffic; and is a necessary complement of the enhanced capital expenditure which is now being incurred with reference to this demand on the improvement of open lines. Owing to the uncertainty about the railway receipts, the Budget grants for the current year were

fixed with a close regard to economy, and the provision allowed for betterments was restricted; but with the revival in trade the Railway Board advise that it is no longer possible to wholly postpone such expenditure without impairing the value of the railway service. Large allotments have accordingly been made in the estimates for next year of most of the important lines, for the renewal with heavier rail of considerable lengths of permanent way, for the strengthening of bridges and for renewals of rolling-stock.

INTEREST CHARGES.

147. The decrease in expenditure in 1909-1910, as compared with the Budget estimate, under Interest on Debt and under Interest charged against Companies on advances, is caused by lapses in capital grants and by the variation in the rate of interest charged on certain loan funds explained in paragraph 60. On the other hand, there is a larger increase in Interest on capital deposited by Companies, this is, however, caused not by any additional deposits of capital but by larger overdrafts of capital by certain Companies, and there is a corresponding increase under Interest receipts (*vide* paragraph 56).

148. The increase in the total interest charge in 1910-1911 is a result of the growth in the capital cost of the railways.

OTHER RECEIPTS

149. The receipts shown under this head represent recoveries from the Travancore Darbar of its share of the loss on the Travancore Branch of the South Indian Railway, the Government share of the surplus profits of the Rohilkhand-Ramnan, Southern Punjab and Amritsar-Patti Railways payable under the terms of their respective contracts, dividends on certain shares of the Ahmedabad-Dholka Railway allotted to the Government in re-payment of expenditure incurred by it on behalf of the Railway; and sale-proceeds of land relinquished by Railway Companies. The decrease in 1910-1911 occurs mainly in the share of surplus profits of the Southern Punjab Railway.

OTHER CHARGES.

150. These consist of cost of land required by certain companies, the contract with which provide for the free supply of all land wanted for the purposes of the railways undertaken by them, and of miscellaneous items such as surveys and controlling establishments (including the Railway Board). A share of the cost of control is charged to the working expenses of each railway company and the recoveries thus made are adjusted by deduction from the miscellaneous expenditure. The details are —

		Accounts, 1908-1909.	1909-1910.		1910-1911, Budget

151. Taking India as a whole, the net financial result of the working of the Major Irrigation works in 1909-1910 will be better than the Budget forecast by £49,100 (7.36 lakhs). There is an improvement of R7.12 lakhs in the Direct Receipts and of R7.42 lakhs in the share of Land Revenue, but R7.2 lakhs of this are required to meet increase in expenditure. A diminution of R11.1 lakhs in the net profit is likely to take place next year. Allowance has been made for a possible falling-off of R7.26 lakhs in the Gross Revenue; and though the provision for Working Expenses is taken at R3.89 lakhs less than the current year's expenditure, there is a large growth of R7.73 lakhs in the interest charges in consequence of the considerable outlay now being incurred on new projects in the Punjab and elsewhere, the benefits of which will not be realised for some time to come. The net result under Minor Irrigation works in 1909-1910 is slightly better than the Budget estimate owing to some improvement in revenue and a small saving in the expenditure, the estimate for next year is nearly the same as the Budget of the current year.

152. The figures for Land Revenue due to Irrigation have already been examined in paragraphs 5 to 8 along with those for Land Revenue proper. The details of the other heads are exhibited in the following tables.

The Imperial figures shown against the United Provinces represent the transactions of the Betwa, Ken and Dassan canals.

DIRECT RECEIPTS.

Imperial.

153. The improvement over the Budget estimate in 1909-10 occurs mainly in Burma and is caused by the opening of new distributaries on the Mandalay canal

- and collection of arrears on the Shewbo canal. The total Budget for next year is about the same as the Revised for 1909-10, a decrease in the receipts in Burma, caused by the absence of the special arrears realized in the current year, and in the Frontier province, owing to an expected fall in the revenue of the Lower Swat canal is more than counterbalanced by increases in the United Provinces in consequence of an anticipated development of the Betwa and Ken canals, and in the Central Provinces where the large works now under construction are nearing completion

Divided and Provincial.

- 154 The total Revised for 1909-10 exceeds the Budget by R4 2 lakhs, the increase being the net result of a number of variations in the several provinces. There is an improvement of R2 72 lakhs in Bengal, mostly in the receipts of the Son canal, due to an increase in the *rabi* area irrigated in 1908-1909, as well as in that brought under lease under enhanced rates. Smaller increases occur in the Punjab and Bombay owing to greater demand for water, recovery of arrears and other causes, but on the other hand there is a decrease in the United Provinces where the extremely favourable character of the last monsoon curtailed the demand for water for *khari* millets

- 155 The Budget for next year is R7 83 lakhs lower than the Revised of the current year. A large falling-off of 8 64 lakhs is anticipated in the Punjab owing chiefly to the probable disappearance of owner's rate in the Delhi Division, and variations of less importance occur in all the other provinces where provision has generally been made for normal receipts

WORKING EXPENSES.

Imperial

156 The variations between the Budget and Revised estimates of the current year and between the latter and the Budget of 1910-1911 are mainly caused by the reserve provision entered under India General, which is allotted during the course of the year to meet necessary Imperial expenditure in excess of the Budget grant in the several provinces.

Divided and Provincial

- 157 The total expenditure in the current year exceeds the Budget by R8 94 lakhs. Almost the whole of the excess occurs in the Punjab (R7 72 lakhs) and in the United Provinces (R 95 lakh) in both of which necessary repairs of flood damages and protective works had to be carried out which were not anticipated in the Budget. The total grant for next year is R5 1 lakhs less than the Revised for 1909-1910. Provision has been made in the Punjab and in the United Provinces for a normal scale of expenditure, but a larger programme of extensions and improvements is contemplated in Bombay.

Equivalent in Sterling £	856,898	849,196	895,263	921,100	918,800	926,100

REVENUE.

158. The increase in the Revised over the Budget Estimate of the current year is caused mainly by an unexpected improvement in the receipts of the Punjab canals whose transactions are recorded in the Imperial section of the accounts. For next year, the revenue from these canals has been taken at a normal figure and this chiefly accounts for the reduction in the Budget of 1910-1911 as compared with the Revised of 1909-1910.

EXPENDITURE.

(a) Wholly Imperial.

159. The Budget Estimate of the current year included the usual grant of Rs 5 lakhs in aid of special expenditure entailed by the recommendations of the Irrigation Commission, and a reserve provision of Rs 1 lakh to meet unforeseen

requirements. A portion of the special grant is being spent on the Nar Nallah scheme in Baluchistan, but Rs 2 lakhs have been allotted to the Government of the United Provinces for tank restoration works and placed at its credit by an assignment of Land Revenue (*vide* paragraph 12); and Rs 1.8 lakhs out of both grants are being used to meet the Imperial share of expenditure in excess of Budget grant in Bombay where the charges (as well as the receipts) under the head are divided in moieties between Imperial and Provincial. These causes mainly account for the decrease of Rs 4.01 lakhs in the Revised Estimate of the current year, as compared with the Budget.

160 The Estimates for 1910-1911 exceed the Revised for the current year by Rs 4.30 lakhs. Allowance has been made for the special grant of Rs 5 lakhs and a reserve of Rs 1.5 lakhs, but no provision exists for the Nar Nallah scheme, as an allotment will be made for it later in the year from the special grant.

(b) *Divided and Provincial*

161 The excess of Rs 3.66 lakhs over the Budget grant of 1909-1910 occurs mainly in Bombay and is caused by large outlay on urgent river embankment works and special repairs rendered necessary by the severe erosion of the Indus on its right and left banks. In the United Provinces, the expenditure on tank restoration works out of the special Imperial assignment is counterbalanced to a great extent by savings in ordinary grants.

162 The total Budget for 1910-1911 is Rs 3.20 lakhs less than the Revised for the current year. Large decreases occur in Bombay and in the United Provinces owing to the absence of the special expenditure incurred in the current year. On the other hand, a more active programme is contemplated in the Central Provinces and in Burma.

164. The Imperial revenue and expenditure shown against "Other Provinces" represent the transactions in connection with the buildings of the various departments (e.g., Salt, Customs, etc.) whose receipts and charges are wholly Imperial.

EXPENDITURE.

(a) India (Imperial) and England.

165. A very considerable lapse of Rs 16.92 lakhs occurs in the Budget *Revised 1909-1910.* Estimate of the current year, mainly in the reserve provision for unforeseen requirements and in the allotments made for Imperial buildings in Burma, Eastern Bengal and Assam, Bengal and Punjab. In 1910-1911 the total Imperial grant has been fixed at Rs 100 lakhs, exclusive of Rs 3.37 lakhs allotted for petty expenditure incurred in the Civil Department in the several minor administrations and Rs 7.9 lakhs to be spent by the Baluchistan administration. The purposes to which this grant will be applied are shown below —

	R
1. Establishment, tools and plant	17,96,000
2. Repairs	23,70,000
3. Works in progress	21,43,000
4. New works —	
(a) costing up to Rs 50,000	8,55,000
(b) costing more than Rs 50,000	13,81,000
5. Payments in England on stores, furlough allowances, etc.	10,98,000
6. Reserve provision for archaeological expenditure	1,00,000
7. Reserve provision for other unforeseen expenditure	2,60,000
	<hr/> 1,00,00,000 <hr/>

166. The following is a list of the new works and works in progress on which it is probable that allotments of 1 lakh or more will be made in the ensuing year.

Provinces	Name of work	Amount of grant.
		R
Central India	New Daly College, Indore	1,20,000
Eastern Bengal and Assam	New Salt golahs at Chittagong	1,50,000
Bengal	Extension of the Central Telegraph Office building, Calcutta	1,10,000
	New Secretariat for the Department of Commerce and Industry, Calcutta	3,50,000
	Reconstruction of the Government Central Press building at No. 166 Dharamtala Street, Calcutta	1,75,000
Bombay	New Custom House, Karachi	1,00,000
	New General Post Office, Bombay	2,50,000

Provincial.

167. The Revised estimate shows a total increase of Rs 4.99 lakhs over the Budget of the current year. Certain expenditure incurred in the Civil Department, mainly on contributions to municipalities and district and local boards in connection with roads, buildings and miscellaneous public improvements (e.g., drainage, water supply, etc.), is recorded under this head, and the amount of such expenditure in 1909-1910 will fall short of the Budget by Rs 12.29 lakhs. Of this Rs 10.52 lakhs occurs in the two Bengals and is chiefly due to two causes, viz., firstly, smaller payment of contributions to District Boards, and secondly, the record under appropriate heads of certain special contributions for which provision was made here in the Budget. There is also a saving of Rs 2.81 lakhs in Madras, owing mainly to the inability of the Madras Corporation to fully utilise the grant of Rs 6 lakhs for water supply and drainage works, but this is partly counterbalanced by excess expenditure in other provinces.

168. The expenditure in 1909-1910 on roads and buildings in the Public Works Department exceeds the Budget by Rs 17.28 lakhs and this excess is shared by all the provinces with the exception of Madras where there is a small

lapse in the Budget grant. Owing to the unfavourable position of their provincial finances, the Governments of almost all these provinces were compelled to restrict very considerably the grants made on this account in the current year's Budget; and they have appropriated to Civil Works expenditure any net savings in the grants under the other heads, as well any sums that have been available owing to an improvement in their resources. The largest increase occurs in Eastern Bengal and Assam where considerable outlay is being incurred in connection with the laying out of the new headquarters at Dacca.

Budget, 1910-1911

169 In 1910-1911, Madras proposes to spend about 20 lakhs from its heavy accumulation of balances. Otherwise the grants have been fixed with reference to the condition of the provincial balances; and but for the special Imperial assignments given in the current year, the programme in the Central Provinces and Bengal would have to be cut down substantially below the normal scale. The total increase over the Revised estimate of the current year amounts to Rs 50.2 lakhs. Of this Rs 26.61 lakhs occur in the Civil Department and are chiefly due to provisions for a contribution of Rs 15 lakhs to the Rangoon Port Trust in connection with the river training scheme (of which Rs 10 lakhs will be met from the special Imperial assignment made in the current year), for a grant of Rs 5 lakhs to the Madras Port Trust and an increased grant of Rs 4 lakhs to the Madras Municipality; and for a lump allotment of Rs 1 lakh in the Punjab for expenditure that may be necessitated at Dera Ghazi Khan. The increased provision for departmental expenditure therefore amounts to Rs 23.59 lakhs, and this is distributed among all the provinces, with the exception of Burma where the state of the provincial balances does not permit of a higher scale of expenditure than in the current year, and in Bombay where a smaller programme of new works is contemplated. The increase is largest in Madras (Rs 11.11 lakhs), where it is proposed to utilise a portion of the heavy accumulation of balances in undertaking a more active programme of Civil Works with reference to the recommendation of the Finance Committee. The other important increases occur in Bengal where the expenditure in the current year had to be badly stinted owing to want of funds, in the United Provinces where work in connection with the Medical College at Lucknow will be commenced, and in the Punjab owing to larger allotments for town improvement works in the new colonies and for other purposes.

REVENUE.

170 Under Imperial the decrease of Rs 3.23 lakhs in the Revised as compared with the Budget Estimate of the current year is chiefly caused by the postponement to next year of the sale of the investments in connection with Mr. Phipp's donation to the Agricultural and Research Institute at Pusa, and the increase of Rs 4.69 lakhs in next year's revenue is due to the same cause as well as to the sale of certain Imperial buildings. The variations in the Provincial figures are unimportant and call for no remarks.

Revised, 1909-10.

171. The Revised anticipates an expenditure in India of Rs 21,45.57 lakhs (£14,303,800) as compared with the budget provision of Rs 21,59.57 lakhs (£14,397,100), the expected saving being Rs 14.00 lakhs (£93,300).

172. The most important reduction (Rs 14.76 lakhs) occurs under the charges for food supplies and compensation for dearness of food and forage, and is due to a good monsoon followed by a marked improvement in prices. The replacement of service pay by proficiency pay is producing a progressively increasing saving, which accounts for a reduction of Rs 3.50 lakhs in the current year. Ordnance expenditure in India has fallen by Rs 2.84 lakhs. A reduction of Rs 1.82 lakhs under telegrams is apparently due to the introduction of the revised rates. On the other hand there is a considerable increase (Rs 2.05 lakhs) in the pension charges for Indian troops, also some growth (Rs 75 lakh), which appears to be continuous, in the expenditure connected with the Volunteer force. Conveyance charges exhibit an increase of Rs 2.89 lakhs partly owing to the enhancement of 1st and 2nd class fares on certain railways. Two further items of increase, namely, Rs 2.80 lakhs on account of the clothing allowance for British troops and Rs 3.15 lakhs in the charges for grass and dairy farms, are to a large extent balanced by corresponding receipts. The net effect of these increases and decreases is a saving of Rs 11.28 lakhs (£75,200).

173. Five special additions to the year's expenditure aggregating Rs 6.13 lakhs (£40,900) may also be mentioned, namely —

- (1) the bonus (Rs 1.04 lakhs) of a week's pay to the lower-paid Government servants which was given in connection with the 50th anniversary of the transfer of India to the Crown,
- (2) an increase (Rs 2.08 lakhs) in the hutting grant (*i.e.*, the allotment for the repair and construction of Indian Infantry lines), and
- (3) an anticipated expenditure in India of Rs 3.01 lakhs in connection with the arms traffic operations now in progress

174. Many of the variations represent ordinary fluctuations and to a large extent cancel one another. Thus, there is an excess of Rs 3.50 lakhs in the charges for pay and allowances of regimental officers, and of Rs 1.02 lakhs in the expenditure on fuel, lighting and petty supplies. The principal decreases arise from reduced charges for Indian Army recruits (Rs 2.50 lakhs), savings due to short strength of the Supply and Transport personnel (Rs 2.50 lakhs), reduced charges for the supply and maintenance of peace stores (Rs 1.55 lakhs), and short expenditure on the personnel of ammunition columns (Rs 1.42 lakhs) which were not fully brought up to strength during the year. The net effect of the particular fluctuations here mentioned is a decrease of Rs 3.45 lakhs (£23,000).

175. Under Home expenditure a decrease of £309,600 is anticipated, the total expenditure assumed being £4,644,200 as compared with the budget provision of £4,953,800. The estimate allows for the expenditure at Home of £24,900 in connection with the arms traffic operations. The largest lapses occur under the following heads. —

	Saving in 1909-10. £
(1) Stores	218,900
(2) Payments to War Office in respect of British Forces serving in India	44,100
(3) Indian Troop Service	39,800
(4) Furlough allowances of Indian Service Officers	10,000
(5) Retired pay of Indian Service Officers	10,000

176. A part of the lapse under Stores is due to advance payments in 1908-09 and to the postponement of others to 1910-11. A part is explained by the re-examination in India of estimates and requirements under Ordnance and Clothing stores, these having been overstated in the original Budget. The savings under items (2) and (4) represent ordinary fluctuations. A large part (£24,000) of the saving under the Indian Troop Service is a definite economy, arising from the employment of the *R.I.M.S. Dufferin* for one voyage to and from England in place of a hired transport. It is hoped that this experiment may be extended to two voyages in the following

year. There is a relatively small set-off to this economy in additional expenditure (Army and Marine) in India. The charges for retired pay of Indian Service officers are at present on a gradually descending scale.

177. The Revised estimate anticipates an improvement under receipts of Rs 1.57 lakhs (£10,400). The increase is mainly due to the new clothing allowance scheme for British troops, already referred to, under which the soldier receives an allowance for clothing which was previously supplied in kind, and makes an actual payment to the clothing factory for articles of wear obtained from it.

178. Thus the net expenditure of the year is expected to be £413,300 below the Budget estimate. The improvement may be regarded broadly as due to a saving of nearly £100,000 under food charges, and to large savings at Home, mainly under stores.

179. No separate reference has yet been made to the Schedule expenditure which is merged in the above figures. As was explained by the Finance Member in paragraph 44 of the Financial Statement for 1909-10, the Special Grant originally instituted in connection with the Reorganization and Redistribution schemes was abolished with effect from the 1st April 1909, and the Government of India practically reverted to the system in force prior to 1904-05. Under this system a schedule is prepared of important measures to be undertaken in the following year, i.e., of schemes the cost of which exceeds a certain limit, now placed at Rs 50,000. In the case of a new measure the Schedule includes the total expenditure to be incurred during the year. In the case of one already in progress the Schedule states the new initial expenditure to be incurred and the further increment of recurring expenditure in excess of that attained by the end of the previous year. It thus indicates the extent to which the Budget provides for further outlay on large undertakings.

180. The total Schedule provision for Army expenditure in the Budget of 1909-10 was Rs 33.25 lakhs (£221,700), but it is anticipated that the actuals will only amount to Rs 27.35 lakhs (£182,300), practically the whole saving of £39,400 being due to the reduction of Home store demands, already referred to, by £38,000 in connection with the Schedule measure: Re-armament of Horse and Field Artillery.

The greater part of the Schedule provision has been applied to the following measures already in progress:—

	Expenditure in 1909-10	
	Lakhs	Equivalent in
	R	£
(1) Increase of reserve of rifles	70	4,700
(2) Addition of 8 new Royal Horse and Field Artillery Ammunition Columns	11 72	78,100
(3) Re-armament of the Royal Horse and Field Artillery with quick-firing guns	4 02	26,800
(4) Increase of the Indian Army Reserve	2 42	16,100
(5) Establishment of Sargodha young stock depôt	1 31	8,700
(6) Extension of dairies	0 53	3,500
(7) Revision of the medical and surgical equipment of field hospitals	63	4,200
(8) Reconstruction of accommodation for Indian troops at Bannu and Sialkot	1 42	9,500

Budget, 1910-11.

181. The Budget for 1910-11 may first be compared with the Revised for 1909-10.

The Indian expenditure anticipated in the coming year is Rs 21,96.01 lakhs (£14,640,100) against Rs 21,45.57 lakhs (£14,303,800) in the Revised, or an increase of Rs 50.44 lakhs (£336,300). The Budget figure under Army, India should, however, be increased by Rs 1.43 lakhs as a result of several correcting entries involving transfers between the Indian and the Home estimates. The real increase proposed in Indian expenditure is thus Rs 51.87 lakhs (£345,800).

182. The main cause of increase is the additional provision (Rs 15.87 lakhs) required under conveyance charges. The Railway Companies have intimated that they will withdraw, with effect from the 1st January 1910, from their

adherence to the revised rates for military traffic which were provisionally introduced on the 1st January 1908, and have asked the Government of India to agree to certain enhancements. The question is still under examination; but it has been thought necessary to provide for the contingency and an addition of R13'00 lakhs has been made on this account.

An additional provision of R1'30 lakhs has been made to meet the further growth of pension charges. The allotment for the purchase of mules was restricted in 1909-10 below the normal and R5'28 lakhs more has been provided to make up the consequent shortage of animals. The complete introduction of the clothing scheme involves an addition of R11'35 lakhs, but the expenditure will be partly balanced by receipts. The extension of the local purchase of clothing in India involves an increase of R2'40 lakhs, and the anticipated employment of the *Dufferin* for two voyages an increase of R1'48 lakhs; but these additions again will be more than counterbalanced by reductions in the Home estimates. The Indian expenditure on the arms traffic operations in 1910-11 is estimated to exceed that of 1909-10 by R6'18 lakhs.

In addition, the new recurring expenditure and the higher initial expenditure contemplated in the Schedule for 1910-11 involves an increase of R13'78 lakhs.

An increase of R7'25 lakhs under the very large but fluctuating head of pay of regimental officers and soldiers, British and Indian, also requires mention.

183 The various increases above specified aggregate R64'89 lakhs (£432,600). Against this amount certain reductions of expenditure must be set off, of which the following, totalling R17'70 lakhs (£118,000), may be separately enumerated: (1) A further decrease of R6'94 lakhs under food supplies and compensation which reduces the provision for food charges in the Budget of 1910-11 to R21'70 lakhs less than that included in the Budget of the current year. (2) A decrease of R4'39 lakhs in local Ordnance charges partly connected with economies in factories and arsenals. (3) Additional savings of R2'50 lakhs on proficiency pay. (4) A reduction of R1'00 lakh arising from the reorganization of the coast defence companies of artillery. (5) The bonus given in 1909-10 (R1'04 lakhs) does not re-appear. (6) The provision for hutting is less by R1'83 lakhs as any further allotments for the improvement of the Indian Infantry lines will be provided from 1910-11 through the Military Works head.

184 The Home estimates for 1910-11 propose an expenditure of £4,848,400 as compared with £4,644,200 in the Revised, *i.e.*, an increase of £204,200. But as already explained certain adjustments require to be made to arrive at the figure for Home expenditure actually intended, namely (1) an addition of £84,200 to the sum of £28,000 already included in the Home estimates for the arms traffic operations, (2) an addition of £34,100 to the sum provided for the purchase of rifles; (3) a deduction of £69,400 representing the expected gross saving from the use of the *Dufferin* in the trooping service; and (4) a deduction of £58,400 representing a reduction in the earlier forecast of Ordnance stores. The true increase in the Home expenditure is thus £194,700.

The increase is mainly attributable to the arms traffic operations, and to the sums, aggregating £90,500, which have been provided for the purchase of rifles. The important variations under other heads may be summarized as (1) an increase of £40,500 in the retired pay of British forces, which is at present a developing charge, (2) an increase of £27,600 in the capitation rate, which depends on the strength of British troops from time to time; (3) a further decrease of £20,000 in the retired pay of Indian Service officers, and (4) an excess of £45,000 in the saving expected from the use of the *Dufferin* as compared with the saving attained in the current year.

185. The Budget anticipates receipts amounting to R1,51'42 lakhs (£1,009,400), *i.e.*, an improvement, as compared with the Revised, of R8'24 lakhs in India, and £17,200 in England. The most important items are an addition of R6'16 lakhs in connection with the new clothing allowance scheme and of R1'68 lakhs under dairies, representing larger receipts arising from their more extended operations.

186. The net Army expenditure for 1910-11 thus exceeds the probable actuals of 1909-10 by £468,400. The facts leading to this result will be summarized in dealing with net military expenditure as a whole.

187. The main differences between the Budget of 1910-11 and that of 1909-10 may be briefly stated. The Indian expenditure to be incurred in the coming year, after adjustment as above explained, exceeds the provision in the original estimate for 1909-10 by Rs 37.87 lakhs (£252,500), but the Home figures, similarly corrected, show a reduction of Rs 17.24 lakhs (£114,900). Taking both together, the increase is Rs 20.63 lakhs (£137,600). The increase in India is broadly due to the additional cost of railway movements, increase in the Schedule, the new clothing scheme, increased provision for horses and mules, larger provision under regimental pay and allowances, the increase of pensionary charges of Indian troops, and expenditure in connection with the arms traffic operations; partly counterbalanced by a large improvement under food supplies, by savings on proficiency pay, and by considerably reduced ordnance requirements. The savings in England are accounted for, as already stated, by very large reductions in the store demands, and also by economies in trooping charges; partly counterbalanced by expenditure at Home in connection with the arms traffic operations.

188. The receipts anticipated in the new Budget show an improvement, as compared with the Budget of 1909-10, of Rs 12.39 lakhs (£82,500), the principal addition being the expected receipts from soldiers under the new clothing scheme.

189. The net expenditure shows an excess of £55,100.

190. The Schedule expenditure incorporated in the Budget, 1910-11, is Rs 38.57 lakhs (£257,100), as compared with Rs 27.35 lakhs (£182,300) in the Revised and Rs 33.25 lakhs (£221,600) in the Budget of 1909-10. The following are the more important measures to be undertaken or under consideration:—

	Further Expenditure proposed in 1910-11 (India and Home).	
	Lakhs.	Equivalent in
(a) Measures in progress.	R	£
(1) Addition of 8 new artillery ammunition columns	2.39	15,900
(2) Re-armament of horse and field artillery	3.77	25,100
(3) Light entrenching tools	2.08	13,900
(4) Extension of dairies	2.00	13,300
(5) Establishment of a cavalry school	.55	3,700
(b) New Measures.		
(6) Formation of 4 Signal Companies	4.31	28,700
(7) Purchase of short rifles for regular troops	10.33	68,900
(8) Re-armament of Militia	3.40	22,700
(9) Rifle carrying equipment for Indian cavalry units	1.50	10,000
(10) Acquisition of land for rifle ranges, etc., in Nowshera Cavalry Cantonment	.85	5,700
(11) Provision for increase in pay of transport establishments	1.90	12,700
(12) Creation of an Inspection Branch of the Ordnance Department and reorganisation of the system of Ordnance Factory Accounts	1.20	8,000
(13) Purchase of 250 reserve artillery horses	2.07	13,800

Revised, 1909-10.

Revised 1909-10,
compared with
Budget, 1909-10.
Expenditure,
Receipts and Net
Expenditure.
India and Home.

191. The total expenditure (India and Home) anticipated in the Revised exceeds the Budget provision by £5,300. The total receipts show an increase of £7,700. The net figure is thus £2,400 less than the Budget. More extensive repairs and larger issues of coal have been made on behalf of vessels of the Royal Navy, with correspondingly higher receipts. A reduction of £7,000 is expected in the expenditure on stores and coal for vessels of the Royal Indian Marine, but heavier repairs have been undertaken and an expenditure of £4,500 has been incurred in fitting and supplying the *Dufferin* for trooping work.

Schedule Expen-
diture

192. £3,300 were provided towards the construction of a tug to replace the *Elephanta* and it is expected that this amount will be fully spent.

Budget, 1910-11.

Budget, 1910-11,
compared with
Revised, 1909-10.
Expenditure,
Receipts and
Net Expenditure.
India and Home

193. The Budget for 1910-11 anticipates an increase of £5,200 in expenditure, and a decrease of £2,500 in receipts, or a net increase of £7,700. All charges on account of the arms traffic operations are being treated as special service expenditure and included under the Army head.

This net increase is mainly due to a provision of £9,500 for stores and coal for use by the *Dufferin* while engaged in trooping service. A decrease of £15,300 in the receipts anticipated from Local Governments and the Royal Navy on account of work done for them, is counterbalanced by an increase of £14,400 in the hire of vessels for the Colonial trooping service which will ultimately be recovered from the Imperial Government.

Schedule
Expenditure

194. The Budget provides £9,900 for the completion of the tug to replace the *Elephanta*.

195. Under this head, Ordinary expenditure, and expenditure on "Special Demands" i.e., on Military Works Schedule measures, are separately compiled in the ordinary course of accounting, and can therefore be separately examined.

Revised, 1909-10.

196. Under Ordinary expenditure the Revised anticipates an excess of R1'94 lakhs (£12,900) which is due to the transfer, during the course of the year, of charges (amounting to R2'71 lakhs) connected with the maintenance of electrical installations and some other items from Special Demands. A small lapse is anticipated in the allotments for actual works.

197. The Military Works receipts represent the rent of military quarters, etc., and the sale-proceeds of materials. The rent receipts are increasing with the yearly additions to the number of quarters constructed. The main cause of the improvement of R1 67 lakhs (£11,200) anticipated in the Revised is, however, the occurrence of arrear payments.

198. The expected improvement of R2'21 lakhs (£14,700) under Special Demands is due to the transfer mentioned above. Otherwise the budget provision is being very fully utilized, an additional expenditure of R5'00 lakhs having been authorised in the course of the year to enable the Commander-in-Chief to make an immediate beginning with the improvement of the Indian Infantry lines.

The bulk of the funds provided in the Budget for Schedule expenditure has been applied to buildings in progress in Quetta, Jubbulpore, Ahmednagar and the Nowshera Cavalry Cantonment where accommodation is required for additional troops, and to meet the requirements of the Gun Carriage Factory at Jubbulpore and the new Kirkee Arsenal. R1'00 lakh was also allotted during the year for the

compared with
Budget, 1909-10
India and Home.

Ordinary
Expenditure.

Receipts

Special Demands
Expenditure

conversion of vacant military buildings at Saugor to accommodate the Cavalry School which is being instituted in that place.

On Military Works expenditure as a whole, a net saving of £13,000 is expected.

Budget, 1910-11.

199. The Ordinary Military Works grant for 1910-11 has been fixed at Rs 99.82 lakhs (£665,400), i.e., Rs 4.76 lakhs (£31,600) in excess of the figure adopted in 1909-10. The increase is partly due to the transfer of charges for electrical installations, etc., already mentioned, and partly to a slight expansion of the grant which was somewhat restricted in the current year.

The increase of Rs 67 lakh (£4,500) shewn in the estimate for receipts allows for a further improvement in the rents from officers' quarters, etc.

200. The provision made for Special Demands, namely Rs 32.13 lakhs (£214,200), is Rs 1.15 lakhs (£7,600) below the Budget estimate of the current year, but would have been slightly higher but for the transfer of charges already mentioned. A large part of this sum has been allotted, in relatively small amounts, to the prosecution of work already in progress in the cantonments mentioned above. The principal new works proposed are.—

	Expenditure to be incurred in 1910-11	
	Lakhs. Rs	Equivalent in £
(1) Accommodation for 2 additional companies of British Infantry at Kirkee Arsenal . . .	2 00	13,300
(2) Piped water supply on the Ridge at Jubbulpore . . .	1 00	6,700
(3) Officers' quarters, mess house and hospital accommodation for British troops in the Nowshera Cavalry Cantonment . . .	1.50	10,000
(4) Accommodation for 4 signal companies to be raised in 1910-11 . . .	1.00	6,700
(5) Special storage accommodation for cordite in several arsenals . . .	1.20	8,000
(6) Payments to meet the cost of adapting the railway bridges over the Beas and Sutlej rivers for use as roads for military traffic . .	1 72	11,500
(7) Improvement of the water-supply at Bangalore, Bannu and Cawnpore . . .	1 05	7,000

A further provision of Rs 5.00 lakhs is also made for continuing the improvement of the Indian Infantry lines.

201. The net expenditure proposed in 1910-11 is thus Rs 2.94 lakhs (£19,500) above the Budget figure for 1909-10, the increase being shared in effect, as already stated, between Ordinary and Special Demands.

47A SPECIAL DEFENCES.

		Accounts, 1906-1907.	Accounts, 1907-1908.	Accounts, 1908-1909.	1909-1910		1910-1911, Budget.
					Budget.	Revised.	
EXPENDITURE.							
India	R	14,11,302	14,31,376	25,52,30	1,79,000	1,76,000	22,000
Equivalent in Sterling	£	94,087	95,425	17,015	11,900	11,700	1,500
England	£	44,271	20,862	12,029	16,000	25,000	
TOTAL	£	138,358	116,287	29,044	27,900	36,700	1,500

202. The Revised shows a trifling decrease of £200 under Indian expenditure, and an increase of £9,000 under Home expenditure due to the Secretary of State's anticipation of increased payments in England for coast defence armaments.

The original programme of Special Defences is rapidly approaching completion and the only provision made in 1910-11 is that of R 22 lakh (£1,500) for expenditure in India, no outlay being anticipated at Home.

The entire charges are treated as appertaining to the Schedule.

203. On a comparison of the estimates for Military Services as a whole with the Budget for 1909-1910, the Revised shows a decrease of £419,900, and the Budget for 1910-1911 an increase of £53,500, in net expenditure. These results cannot be correctly attributed to a few selected items alone; but the classes of charges enumerated below have exercised a marked influence, and on other grounds require special prominence. The portion of the saving in the Revised for which they do not account is mainly due to miscellaneous lapses under other heads of the Home estimates. As regards the Budget, the close approximation between the net increase exhibited under these special items to the net increase shown by the Budget as a whole is to some extent illusory, as other reductions are anticipated in the Home estimates which will be counterbalanced by miscellaneous increases and fluctuations in the Indian figures. The selected items are as follows:—

	Budget 1909-10.	Revised 1909-10, more (+) less (-) than Budget 1909-10	Budget 1910-11, more (+) less (-) than Budget 1909-10.
	£	£	£
All food charges	1,951,700	-98,300	-144,700
Conveyance charges	299,000	+19,300	+116,100
Home stores	639,700	-218,900	-124,100
Indian Ordnance charges	702,100	-18,900	-37,600
Arms Traffic operations	...	+44,900	+173,500
Schedule, recurring expenditure, 1910-11.	+57,100
TOTAL	3,592,500	-271,900	+40,300
All Military Heads—Net	19,653,000	-419,900	+53,500

204. The improvement under food charges is mainly due, as already stated, to a fall in prices, but stricter administration of the compensation charges has also contributed to the final result. As the following figures will show, there is still room for a considerable further fall :—

Years.	Compensation charges.	Other food charges.	Total.
	£	£	£
Average for four years 1901-02 to 1904-05	214,800	982,900	1,197,700
1905-06	279,100	1,117,500	1,396,600
1906-07	342,600	1,259,700	1,602,300
1907-08	420,700	1,239,200	1,659,900
1908-09	574,000	1,473,100	2,047,100
1909-10 (Revised)	422,900	1,430,600	1,853,500
1910-11 (Budget)	400,000	1,407,100	1,807,100

205. The recent course of the conveyance charges is also of interest. The following figures relate to railway charges only :—

	£
1906-07	333,900
1907-08	294,300
1908-09	261,100
1909-10 (Revised)	259,300
1910-11 (Budget)	354,500

The fall in 1907-08 is partly attributable to the new vehicle and maundage rates temporarily introduced on the 1st January 1908. These were in full force throughout 1908-09 and 1909-10. As already explained, it has been necessary to make tentative provision for the higher rates now demanded by the railway companies with effect from the 1st January 1910, i.e., the provision for 1910-11 covers arrear payments as well as a higher scale throughout the coming year.

206. As regards Home stores, the Revised, as already explained, shows a reduction of £218,900. The lower figure is being maintained in the coming year apart from the special expenditure on rifles, and in addition to the diminution in the miscellaneous demands for Ordnance stores, to which the reductions at Home are mainly due, there has also been, as the foregoing table shows, a considerable decline in the Indian factory and arsenal charges.

207. The combined Indian and Home provision made for expenditure on the arms traffic operations in the Persian Gulf amounts to £44,900 in 1909-10, and £173,500 in 1910-11, all under the Army head. But for this Special Service charge, the Budget for the coming year would have shown a reduction on that of 1909-10 amounting to £120,000.

208. The Schedule provision for the current year was stated in March last to be £474,900. This, however, took account of some recurring expenditure already attained, the Schedule following in this respect, though with some modification, the system in force since 1904-05. As explained in paragraph 179 above, the Schedule will in future only show new expenditure to be incurred in any year. Reducing the Budget figure for 1909-10 to this basis, the Schedules of the two years compare as follows :—

	India		Home		Total
	Initial	Recurring	Initial	Recurring	
	£	£	£	£	£
Budget, 1909-10	277,800	18,700	73,100	2,300	371,900
Revised, do	258,900	13,700	51,800	2,200	326,600
Budget, 1910-11	334,300	54,300	91,300	2,800	482,700

Though the Schedule proposed for 1910-11 is thus higher than that of the current year, it still remains much below the standard accepted in the years 1904-05 to 1908-09, when the system of a Special Grant was in force and the annual provision for new Schedule expenditure never fell below £1,000,000.

CAPITAL EXPENDITURE ON RAILWAYS AND IRRIGATION WORKS NOT CHARGED TO REVENUE.

RAILWAY CONSTRUCTION.

209. The expenditure on Railway Construction for which the Government of India undertakes financial responsibility or gives any direct guarantee is now estimated at Rs 13,85.35 in 1909-1910, against a Budget grant of Rs 15,00 lakhs. There is a lapse of Rs 127.92 lakhs in the grants allotted for expenditure in England; and the bulk of this occurs in the case of purchased lines worked by Companies whose Home outlay is finally adjusted in the Indian section of the accounts. It has been possible to utilise only a very small portion of this saving for increased expenditure in India.

210. For 1910-1911, the programme of Capital outlay on Railway Construction has been placed at Rs 16,30,00,000.

211. The distribution of the total expenditure on Railway Construction between State and Companies' agency in each of the three years from 1908-1909 to 1910-1911 is as follows:—

		Accounts, 1908-1909	1909-1910.		1910-1911, Budget.
			Budget.	Revised.	
1. Outlay on State lines :					
(a) India	. { R	9,23,78,720	8,00,67,000	7,14,34,000	9,93,15,000
	. { £	6,158,581	5,337,800	4,762,300	6,621,000
(b) England	. . £	3,329,587	2,256,300	2,165,000	1,897,600
TOTAL	. . £	9,488,168	7,594,100	6,927,300	8,518,600
2. Outlay of Companies .					
(a) India	. { R	—99,37,878	1,48,16,000	1,33,86,000	1,44,45,000
	. { £	—662,526	987,800	892,400	963,000
(b) England	. . £	1,219,429	1,418,100	1,400,000	1,385,100
TOTAL	. . £	556,903	2,405,900	2,308,400	2,348,100
Total of Programme	. . £	10,045,071	10,000,000	9,235,700	10,866,700

In 1908-1909 advances by Government aggregating 205 lakhs were transferred from the Burma Railway Company's capital account to the head Outlay on State lines. This accounts mainly for the minus entry under Outlay of Companies—India. The following amounts of outlay in England on account of purchased lines worked by Companies are included in the Indian figures under Outlay on State lines:—

3,354,081 3,095,300 2,335,900 2,896,300

212. The details of the Budget grant for 1910-1911 are shown below :—

	270'03	72'18	10'00

* Includes 17 for a short branch line under construction.

† Includes 23 for a short branch line under construction.

213. As in previous years, a greater portion of the grant in 1910-1911, both in the case of State and Companies' lines, has been allotted for open line works and rolling-stock; this is also in accordance with the recommendation of the Indian Railway Finance Committee that the equipment of existing lines should take precedence of the construction of new lines.

In making allotments for new lines, the needs of the several provinces have been very carefully considered. The Southern Shan States line is one of considerable administrative importance and will open up and develop the fertile valleys and plateaux of these States, the progress of which has hitherto been much retarded for want of communications. The Rangia-Tangla branch of the Dhubri-Gauhati extension of the Eastern Bengal State Railway will be of considerable service to the tea industry, and to the general public in the Mangaldai Subdivision in Assam which is very poorly provided with communications. The Kalabagh-Bannu line will tap the valuable Makerwal coal-fields and will assist in developing a backward portion of the Frontier Province. The Samastipur-Rosera line in Bengal is required to provide railway connection in a district which is badly provided with roads. The Balaghat-Katangi branch of the Bengal Nagpur railway, which is the only new line to be constructed from the capital of Companies, will serve the manganese industry in the Central Provinces, and will carry the supply of this mineral which will be used in the manufacture of steel at the Tata works at Kalimati.

214. The figures in the table in paragraph 211 do not include the expenditure on Protective Railways met from the Famine Insurance grant, nor of Branch Line Companies not in receipt of a direct guarantee. Including this expenditure, and also some small expenditure from Provincial Revenues, the total outlay on Railway Construction in the three years is as follows :—

	Accounts, 1908-1909	Revised Estimate, 1909 1910	Budget Estimate, 1910 1911
	R	R	R
Total as in preceding table	15,06,76,066	13,85,35,000	16,30,00,000
Famine Protective Lines	1,048	2,22,000	5,00,000
Branch Lines not on firm guarantee	87,964	11,73,000	18,04,000
Provincial State Line	6,235	23,000	4,000
Grand total in Rupees	15,07,71,313	13,99,53,000	16,53,08,000
Grand total in £ sterling at R15 to the £	10,051,421	9,330,200	11,020,500

CONSTRUCTION OF PRODUCTIVE IRRIGATION WORKS.

215. The figures are—

	Accounts, 1908-1909.	Budget, 1909-1910.	Revised, 1909-1910.	Budget, 1910-1911.
Total in Rupees . . .	1,47,52,336	1,50,00,000	1,60,00,000	1,70,00,000
Equivalent in Sterling . .	983,489	1,000,000	1,066,700	1,133,300

216 The Budget grant of 150 lakhs has been raised to 160 lakhs in the Revised, and it is expected that the latter figure will be fully spent during the current year. The grant in next year's Budget has been fixed at 170 lakhs as it appears probable from the progress of expenditure that the increased allotment will be usefully employed. The following table shows the projects included in the programme of 1909-1910 as now revised and in that of 1910-1911, and the amount to be spent on each—

Name of project	Expenditure in	
	1909-1910.	1910-1911.
	R	R
Canals in operation—		
Mandalay Canal	1,47,000	4,000
Shwebo "	3,22,000	2,03,000
Ganges Canal, including Mat and Hathras branches	3,13,000	6,98,000
Lower Ganges Canal	1,72,000	1,37,000
Fatehpur Branch, Lower Ganges Canal	41,000	9,000
Agra Canal	1,36,000	1,49,000
Eastern Jumna Canal	43,000	32,000
Western " "	14,000	20,000
Upper Bari Doab "	1,96,000	2,00,000
Sirhind Canal	47,000	2,00,000
Lower Chenab Canal	1,53,000	3,00,000
Lower Jhelum "	1,08,000	3,00,000
Indus Inundation Canals	1,05,000	3,20,000
Godavari Delta	37,000	44,000
Kistna "	1,70,000	65,000
Cauvery "	1,00,000	1,07,000

Jamrao Canal	—74,000	—1,55,000
Canals under construction—		
Mon Canals	7,21,000	6,25,000
Ye-u Canal	83,000	6,68,000
Upper Chenab Canal	41,29,000	36,00,000
Upper Jhelum "	39,68,000	40,00,000
Lower Bari Doab Canal	24,85,000	22,50,000
Upper Swat River Canal	16,24,000	20,15,000
Nagavalli River Project	1,54,000	2,12,000
Divi Island Project	90,000	1,22,000
Other Projects	5,82,000	7,33,000
TOTAL R	1,60,00,000	1,70,00,000
Equivalent in Sterling £	1,066,700	1,133,300

A greater portion of the grant will be again applied to push on work in connection with the Triple Canal project in the Punjab and with the Upper Swat River Canal in the Frontier Province.

WAYS AND MEANS.

HOME TREASURY.

217. The bulk of the payments made in England on account of the Government of India consists of expenditure chargeable to the Indian revenues, and if this represented the only charges, the Ways and Means programme would be a simple arrangement, as the whole of the expenditure would ordinarily be met by remittance of funds from India. The capital outlay on the construction of railways and irrigation works, however, necessitates heavy borrowing, and a greater portion of the money required is usually raised in England, either direct or through the agency of Companies. A further complication is introduced by the practice under which all payments made in England to Railway Companies working purchased lines, for purchase of stores and other capital purposes, as well as all moneys raised by them and paid into the Home Treasury, are brought to account under the appropriate heads in this country and are treated in the Home Accounts and Estimates as remittances to or from India respectively. The transactions connected with the Gold Standard Reserve, and with the replacement of one particular form or item of direct or indirect debt by another, also largely swell the receipts and charges of the Home Treasury without affecting the general Ways and Means programme.

218. The following are the details of the transactions appearing in the Budget and Revised Estimates of the Home Treasury for 1909-1910 and in the Budget Estimate of 1910-1911.

Closing Balance	3,328,689	12,758,615	6,619,115

* The heads marked with an asterisk appear on both the receipt and payment sides. As the receipt and disbursement under each of them are generally equal, they do not affect the Ways and Means of the year to any material extent.

† These entries arise in connection with the purchase of the Indian Midland Railway, and do not otherwise affect the Ways and Means of the year.

Revised, 1909-1910.
General

219. The net disbursements in 1909-1910 are now taken at £20,894,700 or £2,498,300 less than the Budget. The transactions relating to the Gold Standard Reserve described in paragraph 229 below have resulted in a net addition of £1,594,300 to the balances of the Home Treasury. The balance of the drop in the net disbursements, amounting to £904,000, is mainly due to smaller advances (to the extent of £756,800) to Companies working purchased railways and to a reduction (£263,700) in the expenditure chargeable to revenue, the greater portion of which occurs under purchase of military stores. These decreases have been in part counterbalanced by the payment of sterling bills (£156,000) drawn in India in September 1909 with the object of steadying exchange.

220. As a result of the revival in the export trade, the total drawings of the Secretary of State in the current year are expected to amount to £23,630,000. Of this £6,630,000 will be appropriated in repaying to the Gold Standard Reserve the balance of the gold withdrawn from it in 1908-1909 in support of exchange, and the remaining £17,000,000 will be available to meet the disbursements of the Home Treasury, against a Budget estimate of £16,200,000. The amount received during the year in the Treasury in respect of sterling loans will also exceed the Budget by £5,375,900 owing to the reasons explained in paragraph 223 below. The total of these various improvements amounts to £8,674,200 and the result will be that the balances of the Treasury will be increased during the year by £4,304,900 instead of being drawn upon to the extent of £4,369,300.

1910 Capital
raised and deposited
by Railway
Companies

221. The details of the transactions in respect of capital raised and deposited by Railway Companies are as follows :—

		RECEIPTS	
		Subscribed Capital	
		Budget, 1909-1910	Revised, 1909-1910
To discharge Debentures—		£	£
Assam-Bengal Railway	• • • • •	620,000	...

		ISSUES	
		£	£
For discharge of Debentures	• • • • •	3,491,400	205,200
For Capital outlay, i.e., Stores, Establishment Charges, etc	• • • • •	1,419,400	1,418,100
	TOTAL	4,910,800	1,623,300

The Madras and Southern Mahratta Railway was the only line which was able to raise any fresh capital to replace debentures which had matured. Debentures to the extent of £3,311,400 were renewed at a discount of £25,000 and those for another £30,000 were discharged.

222. The following are the details of the Railway remittance transactions. As already explained, they occur almost wholly in connection with the capital account of the purchased lines worked by Companies.

		Budget, 1909-1910.	Revised, 1909-1910.

Rohilkund and Kumaon Railway Company	• • • • •	•	•
Interest on Debenture Stock allocated to State works	• • • • •	•	1,800
	TOTAL ISSUES	3,130,000	2,373,200

The East Indian Railway Company was able to raise Debenture stock of the face value of £2,550,000, realising the amount shown above.

223. Of the sum of £8,199,600 shown against Permanent Debt in the table in paragraph 218, £2,699,600 represent receipts in respect of the loan of £7½ million issued in February 1909. A new 3½ per cent. sterling loan of £7½ million was issued in January 1910 at the fixed price of £96¼. As in the case of the loan issued in the previous year, credit will be taken in the accounts only for the actual money received, and a sinking fund created for the redemption of liabilities incurred in excess of this sum. Of the net amount receivable, £5,500,000 will be received in the current year and the balance of £1,637,600 in 1910-1911.

224. The whole of the £6 million India Bills which fell due during the year were renewed for 12 months, the average prices of issue being as shown below.

- (i) £1 million (which fell due on 11th April, 1909) at £97-16-0 32
- (ii) £2½ " (" " " " 16th June, 1909) at £96-18-0 57
- (iii) £2½ " (" " " " 1st December, 1909) at £96-16-1 71.

225. The Budget Estimates provide for a net disbursement of £24,277,100 including a payment of £817,900 for the discharge of Railway debentures which mature during the year. The increase of £884,100 over the net disbursement in the current year's Budget is the net result of the following variations.—

	Worse	Better.
Net expenditure on Revenue account, <i>more</i>	333,500	
Deposits, Advances and miscellaneous Remittance transactions, net	699,800	
Permanent Debt discharged, <i>more</i>	638,500	
Net payments to Railway Companies, <i>less</i>		426,700*
Outlay on State Railways, <i>less</i>		358,700
Outlay on Irrigation Works, <i>less</i>		2,300

226. The principal difference under Deposit, Advance and miscellaneous Remittance transactions in the two years consists of a special net payment of £741,100 in 1910-1911 on account of the Gold Standard Reserve, in connection with the investment of part of the liquid balances of the fund held at the end of the current year in the Home Treasury.

227. Of the net disbursement of £24,277,100, it is proposed to meet £16,500,000 by Council Bills supplemented by the sum of £1,637,600 to be received next year on account of the balance of the 7½ million sterling loan of the current year. The difference between the sum of these two items and the amount of net disbursement will be met by drawing on the Secretary of State's cash balances, which are estimated to stand on 31st March 1911 at £6,619,115, inclusive of £1,323,018, held as cash at short notice on behalf of the Gold Standard Reserve.

228. The estimates also provide for the repayment at par of £2,250,000 capital stock of the Indian Midland Railway on the 31st December 1910, when the present contract with the Company will terminate, as well as for the assumption by the Secretary of State of the liability of that Company for debentures amounting to £3,654,100. It is proposed to provide the funds required to meet the repayment of the Capital Stock by the issue of temporary debt. The whole of the India Bills, amounting to £6 millions, which fall due in 1910-1911 will, also be renewed.

	—	—	—

232. The programme herein announced of the probable drawings on India, and of the transactions in connection with the Government Sterling Debt and the borrowings of Railway Companies, represents the present intentions of the Secretary of State. But in view of the varying conditions of Indian finance and of the London money market, no assurance can be given that this programme will be adhered to either in amount or in form. The Secretary of State reserves to himself the right to vary the programme to any extent that may be considered necessary during the course of the year. The estimate of Council drawings is for the amount necessary to provide for the Secretary of State's requirements, but additional Bills will as usual be sold if needed to meet the demands of trade

* Exclusive of £6,630,000 appropriated for the Gold Standard Reserve.

INDIA.

233. The following is a summary of the Estimates of Ways and Means in India during 1909-1910 and 1910-1911 :—

* The figures under heads 2 and 13 (a) balance each other.

† Head 11 represents expenditure defrayed by reduction of Provincial balances.

‡ The figures shown under head 14 differ from those given in the Home Treasury Ways and Means statement, as Bills drawn by the Secretary of State towards the end of one year are paid in India in the next. The figures of the present statement represent payments in India.

234. In the Budget Estimate of 1909-1910, the cash balance in Indian Treasuries on 1st April 1909 was taken at 15.35 lakhs. It was estimated (1) that the net Imperial revenue in India would amount to 28.42 lakhs, (2) that the net deposits in Savings Banks and Provident Institutions would increase during the year by 128 lakhs, (3) that a sum of 44 lakhs would be available from the

Famine Insurance grant for the avoidance of debt, (4) that the remittance transactions of Railway Companies would result in a net credit in India of 469 lakhs, (5) that repayments of loans granted to cultivators, municipalities, etc., in previous years would exceed the net amount of such loans to be issued during the year by 42 lakhs, and (6) that miscellaneous deposit and remittance transactions would yield a net receipt of 92 lakhs. On the other hand, provision was made (1) for a net expenditure of 30 lakhs from Provincial balances, (2) for capital expenditure in India on railways (inclusive of outlay by companies) and canals to the extent of 11,04 lakhs, (3) for the discharge of 19 lakhs of the permanent debt, and (4) for the payment of Council Bills to the extent of 24,10 lakhs. The total receipts amounting to 36,17 lakhs were sufficient to meet the total payment of 35,63 lakhs. But as the cash balances at the end of the year would have stood at the inconveniently low figure of 15,89 lakhs, it was proposed to replenish it by a loan of $2\frac{1}{2}$ crores.

235. The results according to the Revised Estimates show considerable variations from this forecast. The year opened with a balance which was nearly the same as the Budget forecast, and the full amount of the contemplated rupee loan of $2\frac{1}{2}$ crores was raised in July. The revenue returns in the earlier months of the year, however, proved disappointing, while the Secretary of State's drawings were brisker than was anticipated. By the end of October the balances had fallen to 10 crores, and as they did not materially improve by the end of November, a sum of 3 crores had to be borrowed temporarily from the Gold Standard Reserve in the following month to meet the demands of the Home Treasury. The large amounts of opium revenue which have been coming in since November and the improvement in the Railway receipts have, however, wholly altered the situation. The whole of the temporary loan taken from the Gold Standard Reserve will be repaid by payment of Council Bills the proceeds of which are being appropriated by the Secretary of State for permanent or temporary investment on behalf of the Reserve in England, and we now expect to remit to the Secretary of State in aid of the Home Treasury £800,000 more than we budgeted, and still to close the year with a balance of 18,75 lakhs. Taking India as a whole, there will be an improvement of 99 lakhs over the Budget in the combined revenue account of the Imperial and Provincial Governments; though as a result of the large assignments from Imperial to Provincial described in paragraph 59, this would appear in the accounts as a gain of 133 lakhs in the Provincial balances and a loss of 34 lakhs in the net Imperial revenue. A sum of 10 lakhs has been received from Native States towards the cost of construction of State railways, and one of 23 lakhs by the sale of sterling bills on London in September 1909, with a view to steady exchange. The amount available from the Famine Insurance grant for the avoidance of debt will exceed the Budget by 21 lakhs and the net receipts in connection with *takavi* and other loans will be more by 88 lakhs. There will also be an increase of 18 lakhs in the net receipts from miscellaneous deposit and remittance transactions; while a large saving of 90 lakhs will take place in the Budget provision for capital expenditure on railways (inclusive of outlay by companies) and on canals. The total improvement from all these sources amounts to 349 lakhs. But on the other hand the net credits from remittances of Railway Companies will fall short of the Budget Estimate by 114 lakhs, there will be an increase of 195 lakhs in the payment of Council Bills from treasury balances, and there will be a small increase of 4 lakhs in the amount of permanent debt discharged. The closing balances on 31st March 1910 will thus be 36 lakhs more than the Budget Estimate of 18,39 lakhs.

236. In paragraph 206 of the last Financial Statement it was announced, subject to the usual reservations, that a new $3\frac{1}{2}$ per cent rupee loan of $2\frac{1}{2}$ crores would be raised in 1909-1910. Tenders for this loan were opened on the 28th July, and the result was as follows —

Total amount tendered.	Amount accepted.	Average rate of accepted tenders	Minimum rate accepted
R	R	R a p.	R a p.
6,85,22,300	2,30,00,000	93 15 0 07	93 12 0

237. In 1910-1911 the net Imperial revenue in India is estimated at 28,94 lakhs, Savings Banks and similar deposits are expected to yield a net receipt of 168 lakhs, a sum of 75 lakhs will be available from the Famine Insurance grant for the avoidance of debt, the remittance and capital transactions of Railway

Companies are likely to result in a net credit in India of 458 lakhs; repayment of loans granted to cultivators, municipalities, etc., in previous years will exceed the net amount of such loans to be issued during the year by 20 lakhs; and deposits and miscellaneous remittance transactions are expected to show a net receipt of 70 lakhs. On the other hand provision has been made (1) for an expenditure of 95 lakhs from Provincial balances, and of 19 lakhs in connection with the redemption of permanent debt, (2) for capital expenditure of 13,21 lakhs in India on Railways and Canals, and (3) for payment of Council Bills to the extent of 24,15 lakhs. The total amount of funds required by the Government of India next year therefore aggregates 38,50 lakhs, while the receipts at its disposal amount to only 36,85 lakhs.

238. It will not be possible to provide any considerable portion of the additional funds required from the cash balances which are expected to stand at the beginning of the year at 18,75 lakhs. It is accordingly intended to raise a new rupee loan of 1½ crores in 1910-1911. With a loan of this amount it will be possible to close the year, according to the present estimate, with a balance of about 18,60 lakhs. The announcement now made regarding the rupee loan is in accordance with present intentions, but full liberty is reserved, as usual, to vary the programme now announced to any extent that may be considered desirable.

239. The following table gives details of the transactions of Savings Banks and Provident funds during a series of years, and the estimated transactions for 1909-1910 and 1910-1911 —

YEAR				Net additions to deposits, cash	Interest.	Total addition.
				R	R	R
1899-1900	.	.	.	1,40,000	33,48,000	34,88,000
1900-1901	.	.	.	19,44,000	34,80,000	54,24,000
1901-1902	.	.	.	31,04,000	36,87,000	67,91,000
1902-1903	.	.	.	52,40,000	39,00,000	91,40,000
1903-1904	.	.	.	66,99,000	42,15,000	1,09,14,000
1904-1905	.	.	.	78,94,000	45,87,000	1,24,81,000
1905-1906	.	.	.	31,49,000	46,80,000	78,29,000

1907-1908	.	.	.	14,86,000	53,50,000	68,36,000
1908-1909	.	.	.	—26,22,000	54,63,000	28,41,000
1909-1910 (Revised).	.	.	.	60,78,000	57,09,000	1,17,87,000
1910-1911 (Budget)	.	.	.	94,85,000	61,72,000	1,56,57,000

240 The Budget estimate of 25 lakhs for net deposits in Postal Savings Banks in the current year will be almost wholly realised. For next year the estimate of deposits in these Banks is taken at 40 lakhs and the deposits in the new General Provident Fund for Government servants are expected to grow by 44 lakhs.

J. S. MESTON.

The 25th February 1910.

GOVERNMENT OF INDIA,
DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 24th February 1910, based on the Indian Daily Weather Reports of the period.

Weather was unsettled in the extreme south of the Peninsula, especially during the first half of the week, and local rainfall occurred there on two days. A depression appeared over the east of the central parts of the country on the 18th and travelled eastward into Burma where it disappeared on the 21st. During its passage eastward it gave local rain in northeast India and nearly general rain in Upper Burma and on the Arakan coast. On the 23rd a fresh disturbance entered northwest India from Persia but the associated precipitation has been confined chiefly to the west Himalayas where it has been general. Temperature was in defect over a large part of northern India and the central part of the country during the greater part of the week, but the disturbance which entered northwest India on the 23rd was preceded by a warm wave which had reached the eastern districts of the United Provinces by the 24th, and in Rajputana temperature was about 10° in excess.

Burma.—Nearly general rain fell in Upper Burma and on the Arakan coast and local rain in Tenasserim. Skies were more or less cloudy during the greater part of the week and night temperature was in consequence in excess, day temperature was generally normal.

Northeast India, including Orissa—There was general rain in the upper Brahmaputra valley and local rain in the rest of the division excluding Orissa, the falls varying from light to moderately heavy. Skies were moderately to thickly clouded during the first part of the week but they had cleared by the 21st. Maximum temperature was low during the period of cloudy weather but with the clearing of the skies it quickly recovered and the minimum fell, the latter being in defect on the 22nd and 23rd.

The United Provinces, Central India and the Central Provinces—Skies were clear or lightly clouded and weather was cooler than usual from the 19th to the 22nd but by the 24th temperature was normal or in excess throughout the division.

Northwest India—Precipitation was general in the hills of the Punjab and the North-West Frontier Province and probably in Kashmir also, while a few falls of rain occurred in the submontane districts. Skies were overcast in the extreme north during the greater part of the week and were clear or lightly clouded elsewhere. Minimum temperature was normal or in defect up to the 21st but with the approach of the disturbance from Persia temperature rose rapidly, and in Baluchistan it was in large excess until the 24th when it again fell: in Rajputana it was much higher than usual at the close of the week.

The Peninsula.—Rainfall, varying from light to heavy, fell locally in the extreme south. Skies were cloudy in the eastern and southern districts and were generally clear elsewhere. Weather was cooler than usual at night on the Konkan coast, in the Bombay Deccan and Hyderabad, and warmer in Mysore and southeast Madras.

The following summarises the chief rainfall amounts as reported at 8 hrs. each day:—

- February 18th. Negapatam 1.37".
- " 19th. Shillong 1.50", Cherra Poonjee 1.40", Mymensingh 1.35", Bogra 0.84", Dinajpur 0.85", Calcutta 0.44", Hazaribagh 0.48", Gaya 0.55", Cuddalore 0.96", Trichinopoly 1.00" and Kodaikanal 0.77".
- " 20th. Pamban 2.05", Salem 0.66" and Ootacamund 1.21".
- " 21st. Mergui 0.82", Kyaukpyu 0.62", Minbu 0.50", Bhamo 0.70", Myitkyina 0.70" and Tezpur 0.59".
- " 23rd. Minimarg 1.00".
- " 24th. Sonemarg 1.22".

The rainfall for the week was in large excess in Burma, Bihar, Kashmir and southeast Madras, and in slight excess in Eastern Bengal and Assam, but it was in large defect in Bengal, Orissa, the west of the United Provinces, the east and north Punjab and Baluchistan, areas in which the normal rainfall for the week is appreciable. The rainfall for the period from the 3rd December is more than 20 per cent in defect in Assam, Bihar, the east of the United Provinces, Baluchistan, the east of Central India and the greater part of the Peninsula.

J. PATTERSON,
for Director-General of ObservatoriesR. W. CARLYLE,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 19th February 1910.

Burma.—Heavy showers fell in Merguibut elsewhere the rainfall was limited to light showers in a few districts. Threshing and winnowing of winter rice crops are nearly completed. Cultivation of spring rice and island crops is progressing favourably and standing crops are looking well. Reaping of island crops is commencing. Prices of paddy are normal in most districts and are practically stationary.

Eastern Bengal and Assam — The weather was seasonable. Light showers have fallen throughout the Province and have done much good to standing crops. More rain is needed. Transplantation of spring rice, harvesting of sugarcane and pruning and hoeing of tea are in progress. Gathering of mustard still continues. Fields are being ploughed for jute and summer rice. Prospects of spring rice, tobacco, sugarcane, tea, mustard, linseed and flax are good. The average price of common rice has risen by about one per cent. Cattle disease prevails in five districts.

Bengal — Rain fell in most districts of Bengal Proper, Bihar and Chota Nagpur. In Orissa there was no rain except in Puri. The fall was moderate in Bhagalpur, the Sonthal Parganas and Puri and light elsewhere. Pressing of sugarcane and preparation of lands for the next season's crops continue. Harvesting of oilseeds and pulses is going on. Planting of sugarcane has commenced in Howrah, Gaya, Saran and Palamau. The recent rainfall has greatly benefited the spring crops in Bhagalpur. Poppy and other spring crops have been damaged to some extent by hailstone in parts of Gaya. Prospects of spring crops are on the whole good. The price of common rice has risen in Murshidabad, Jessore, Patna, Balasore, Hazaribagh, Ranchi and Palamau and has fallen in Howrah, Khulna, Champaran, Bhagalpur, the Sonthal Parganas and Puri. Cattle disease is reported from nine districts. Fodder is sufficient in all districts except in parts of the Sonthal Parganas. The water-supply is sufficient throughout the Province.

United Provinces. — Good rain was received in the hills and smaller amounts varying from 12 to 37 cents in seven Western and Submontane districts. Standing crops are flourishing. Poppy is flowering and promises well. Gram, peas and other forward spring crops are being harvested in places. Slight damage to mustard from insects is again reported. The condition of agricultural stock is good though disease still continues in parts of 10 districts. Fodder and supplies are ample. Prices are falling in 3 districts but generally continue stationary.

Punjab — Good to mod rate rain was received in parts of Rohtak, Delhi, Ambala, Lahore, Sialkot, Shahpur, Rawalpindi and Multan. Rain is wanted in Mianwali. Pressing of sugarcane continues in some districts and the outturn is good to average. *Toria* is still being harvested in Shahpur and its outturn is good. Standing crops are generally in good condition. Extra spring crops are being sown in Delhi, Ambala, Sialkot and Multan. Rats are damaging crops in Rohtak. Prices have fallen slightly in some districts. Cattle are generally in good condition. Fodder is sufficient except in Jullundur and parts of Shahpur and Mianwali. Water for cattle is scarce in the Khushab tahsil of the Shahpur district.

North-West Frontier Province — Slight showers fell during the week in Hazara and Peshawar. The condition of standing crops is generally good throughout the Province. Pressing of sugarcane still continues in parts of the Peshawar and Bannu districts. Planting of sugarcane is in progress in the Bannu district. Sowings of extra spring crops are being made. The water supply and fodder are sufficient except in the Shigga circle of the Marwat tahsil of the Bannu district. Cattle are generally in good condition except in one village of the Nowshera tahsil of the Peshawar district and in one village of the Tank tahsil of the Dera Ismail Khan district. The public health is generally good. Prices of food grains show a slight tendency to fall. Prices — Wheat 11½ to 14½, gram 16½ to 24; maize 18 to 23½, bajra 16½ to 19 and barley 20½ seers per rupee.

Jammu. — The rain during the week was fair. Prices are fluctuating. Wheat sells from 11 to 20 and maize from 16 to 32 seers per rupee. The condition of standing crops is fair. Cattle disease of mild type prevails in the Basohli and Ramban tahsils. Fodder is sufficient.

Kashmir. — There was one slight fall of snow during the week which did good to spring crops. The condition of spring crops is good. Ploughing for autumn crops is going on. There is no disease among cattle. Fodder is average except in flooded villages. Prices are unchanged.

Rajputana — Showers fell at places. Spring crops are progressing. Standing crops and cattle are in good condition. Fodder is sufficient. Prices are rising in Bikaner, Marwar, Jaipur, Kishangarh and Karauli and are steady or falling elsewhere.

Central India — Rainfall nil. Threshing of autumn and irrigation of spring crops continue. Crops have been damaged slightly in Gwalior, Indore, Bundelkhand and Bhopawar. Agricultural stock are good except for some disease in Baghelkhand, Bundelkhand and Bhopawar. Prices are fluctuating in Indore; have risen slightly in Malwa and are high and steady elsewhere. Watering and weeding of poppy continue.

Central Provinces.—The weather was clear and cool. Only Bilaspur had a spring of rain during the week. Harvesting of spring crops is in progress everywhere. Portions of the Seoni tahsil of Hoshangabad wheat suffered from attacks of white ant, but the damage is not reported to be serious; otherwise the condition of standing crops is generally good in all districts especially in Narsinghpur where such good autumn and spring crops have not been reaped within living memory and the estimated outturn there will probably not be less than 150 in American notation. Ploughing of land for sowing of next autumn crops continues in Nimar and Berar. Fodder and water are sufficient. Agricultural stock are in good condition. Prices:—*Juar* in Nimar, gram in Chhindwara, Raipur, Saugor and Dimoh and rice in Bilaspur became cheaper by 1 to 2 seers per rupee. Elsewhere prices remained stationary or fluctuated slightly exhibiting a tendency to fall.

Feudatory States—Cutting of spring crops continues and prospects are generally good. The supply of fodder and water is adequate. Prices—*Kodon* rose in Khairagarh and rice in Kanker and wheat and gram in Korea fell by 1 seer per rupee.

Bombay—Standing crops are suffering from insufficient moisture in parts of Poona and Sholapur, have been damaged slightly by insects in parts of Karachi and Hyderabad; by rats in West Khandesh, by frost in Karachi and the Upper Sind Frontier, by unfavourable wind in Dharwar and are generally good elsewhere. Threshing of autumn crops continues in parts of the Konkan, Khandesh, Nasik, Ahmednagar, Poona and Palanpur. Harvesting of spring crops is in progress in parts of Hyderabad, Gujarat, Kanara, the Deccan, the Karnatak, Kathiawar, Baroda, Cutch and Kolhapur. Cotton picking is progressing in parts of Gujarat, West Khandesh, Bijapur, Belgaum, Kathiawar, Baroda and Cutch. The fodder supply is generally adequate. Agricultural stock are sufficient, except in parts of the Deccan, and generally in good condition. Drinking water is generally sufficient. Irrigation water is deficient in parts of Nasik, Poona and Belgaum. Grain stocks are sufficient. Prices have fallen in Larkana and Hyderabad; have risen in Surat, Bijapur and Belgaum and are stationary elsewhere. The quantity purchasable per rupee is in Sind 20 to 41, in Gujarat 3 to 29, in the Konkan 2 to 38, in the Deccan 10 to 32 and in the Karnatak 26 to 36 per cent less than the normal.

Hyderabad—No rain fell during the week. The spring harvest is still in progress and the crop is generally fair to good but poor in parts of the Warangal, Nalgonda and Karimnagar districts. The crop is still being damaged to some extent by rats in Khuldaabad in the Aurangabad district. Harvesting of the castor seed crop is almost over and its outturn is estimated at from 2 to 8 annas. Late rice sowings continue in a very few parts. The crop is being irrigated and weeded and is generally fair but the area is limited owing to insufficiency of water in tanks. Water scarcity is reported in parts of the Linsugur taluka in the Raichur district, Jenwada in the Bidar district, Ashti in the Bir district and Sultanabad in the Karimnagar district. The water-supply is decreasing in Pallam in the Parbhani district, Udgir in the Bidar district, Paloncha in the Warangal district, Devarkonda and Miryalguda in the Nalgonda district, Chinnur in the Adilabad district, Alampur, Gangawati, Kushtagi and Manvi in the Raichur district and the Karimnagar Mahadeopur, Jagtial and Sultanabad talukas in the Karimnagar district. Cattle disease prevails in six talukas and fodder scarcity in sixteen. Prices—wheat 7½, coarse rice 7 and *juar* 14½ seers per rupee. White and yellow *juar* are selling in Hyderabad City at 13 and 15 seers per rupee respectively. The highest price in districts is ten seers in the Jagtial, Jamikunta and Karimnagar talukas of the Karimnagar district and the lowest 22 seers in Nilanga, Rajura and Udgir in the Bidar district.

Mysore—Prices of food grains are generally steady. Markets are well supplied. Standing crops are in good condition. Cattle are generally healthy. Water and fodder are available.

Coorg—Picking of coffee and harvesting of rice continues. Prices of food grain are stationary. The public health is fair. Water and fodder for cattle are sufficient.

Madras—The rainfall during the week was light to fair in Malabar, Salem, Coimbatore, the Nilgiris, Chingleput, North Arcot, Tinnevely, Madura, South Arcot, Trichinopoly and Tanjore and nil elsewhere. Irrigation supplies are sufficient in Ganjam, Vizagapatam, North Arcot, Malabar and the Nilgiris and insufficient in parts of other districts. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are generally fair but some in parts of Guntur, Cuddapah, the Carnatic, Central and South, have withered or are withering or require more rain. Harvests continue with outturn poor to normal and bumper. Pasture is sufficient except in parts of the Circars, the Deccan, Nellore, Chingleput, North Arcot, Coimbatore, Tinnevely and South Canara. Fodder is scanty in parts of Guntur and Nellore. The condition of cattle is generally good. The price of rice is stationary in twelve districts, has fallen in six and has risen in five. The prices of millets have fluctuated as follows—*Ragi* is stationary in nine districts; has fallen in six and has risen in six. *Cholam* is stationary in six districts; has fallen in five and has risen in three. *Cumbu* is stationary in five districts and has fallen and risen in four. The public health is generally good. Prospects are generally fair though more rain is required in South Arcot and Salem. The condition of the labouring classes is everywhere satisfactory and employment is readily available. Grain stocks are generally sufficient.

GOVERNMENT OF INDIA
DEPARTMENT OF COMMERCE AND INDUSTRY

IMPORTS (in hundredweights) of COTTON (raw), WHEAT, RICE (including paddy), GRAM and PULSE, LINSEED, RAPE and MUSTARD SEED, JUTE, and TEA, into certain ports in December 1909, and from 1st January to 31st December 1909 and in the corresponding period of 1908

The following papers are published for general information in continuation of Notification dated the 22nd January, 1910.

S. H. BUTLER,
*Secretary to the Government of India,
Foreign Department.*

Letters to His Excellency Lord Minto from certain Ruling Chiefs.

1. Letter from His Highness the Raja of Dhar, dated the 15th January, 1910.
2. Letter from His Highness the Maharaja of Jaipur, dated the 6th February, 1910.
3. Letter from His Highness the Maharaja of Alwar, dated the — February, 1910.

(1)

Dated the 15th January, 1910.

From—His Highness the Raja of Dhar,

To—His Excellency the Viceroy and Governor-General of India.

After compliments.—I am very much honoured by Your Excellency's Kharita, dated the 6th August, 1909, in respect to the concerting of measures against our common enemy the seditious party, who under various garbs have been disseminating seditious ideas in the minds of the people not only against the British Administration but all constituted authority and order of society in British India, and who are even trying to get a footing in some of the Native States in India as well. It is a matter of deep regret to me that a Kharita containing a subject of such vital moment involving the common interest of us all should have been delayed so long owing to various unavoidable circumstances, and now with Your Excellency's permission I may be allowed to send the following reply:—

I fully agree with Your Excellency in thinking that the time has come when the Native Princes of India should no longer remain satisfied in attempting to eradicate this dire disease from their own territories, but should also co-operate with the Paramount Power in concerting measures for the eradication of the disease altogether wherever it is found in India, so that the territories they rule over should also be free from import of germs of the same from outside.

In this connection the Native Chiefs in India have a two-fold task before them—

- (i) The prevention of any probable growth of such disease within their States, and to keep them free from it, without unnecessarily altering the internal arrangements.
- (ii) The combating against the import of sedition from outside, and thus prevent the propagation of the same amongst their own subjects.

To achieve the first end in a generally law-abiding people, who have every reverence for their Ruler, is easier than the second, which, with the spread of civilisation and easy means of communication of ideas to others, is much more difficult.

Although a few years ago some signs of sedition were visible in Dhar generally amongst students, yet prompt and severe steps taken by the Darbar not only enabled me to put down the same in its very beginning but made the condition such that any growth of the same would not be congenial for the future.

In spite of the numerous difficulties that beset our path in the performance of the task before us, I am glad to inform Your Excellency that since then I have been able to keep my State free from the pest, by adoption of the following measures:—

(1) I have arranged to keep very strict and secret watch over my people that they may not indulge in any seditious topics and thus prepare a soil for the growth of the evil in future.

(2) No public meeting to discuss political subjects is permitted to be held within my territories; and no public meeting of any kind can be held without the permission of the Darbar, such permission being but rarely given and then only for deserving objects. When such meetings are held the proceedings are always watched by the State Police.

(3) There are only two printing presses in Dhar; one of them belongs to the State. Both of them usually print forms and circulars, etc., used in the various States. Every precaution is taken by the Police that no objectionable publication may emanate from them.

(4) As the seeds of sedition are generally and easily sown in the young and unformed minds, my Darbar have taken especial care in their education.

Not only are objectionable teachings of every kind strictly prohibited but as a further safeguard the Darbar, before the appointment of teachers, causes careful enquiry into the antecedents of applicants, so that no teacher with seditious or morbid ideas can be employed.

(5) All public institutions are prohibited from subscribing to objectionable newspapers

(6) A diary of every foreigner coming into the towns is kept by the State Police, and information of all suspected characters is given to the proper authorities

(7) Even Sadhus and Fakirs are not allowed to stop more than three days in any particular town within the State. By making this a general rule and by watching the movements of the new comers much mischief is avoided without unnecessarily exciting the indignation of or wounding the religious feelings of people which are generally respected.

(8) Moreover information of all suspicious characters coming into the State is beforehand given to us by the British Police through the Thagi and Dakaiti Department for which my thanks are due, as by obtaining such information in time my Darbar become forewarned and forearmed.

(9) Above all, to avoid the dangers which may likely arise in spite of our care and vigilance from the hands of cowardly and unscrupulous wretches, the Explosive Act has been passed

Measures such as these for the prevention of any probable growth of the evil in my State or import of the same from outside could only be effected by the loyal co-operation of my people with my Darbar and the confidence of the political authorities in the action taken by us and timely advice and help given by them, for which my especial thanks are due, that I have been able to combat against this evil, and my complete success will rest on the detail and effective operation of these measures

I am sure all my brother Chiefs have adopted similar measures, suited to their own local conditions and people, yet to facilitate matters more and for the quick adaptation of means to gain our common end I may be allowed by Your Excellency to mention the following proposals.—

- (i) That communication between the State Police of different Native States may be made more frequent and free than it is at present.
- (ii) That as this is a cause in which all of us are equally concerned, mutual discussions might be allowed to be held amongst the brother Chiefs and the Political Officials at the seat of the Local Government when they meet there to discuss other important questions concerning their welfare.
- (iii) As civilisation is spreading under the ægis of the British Raj, we in the Native States are trying to keep pace with the times and our attention turned more towards the education of the masses, thus making our people to face a new danger—the danger of imbibing unhealthy ideas through objectionable newspapers, whose unhealthy tone unless very much improved will frustrate our efforts
- (iv) That the training to be given to the masses may be based on religious principles and ideals and inculcation of good morals in the minds of the younger generation should be insisted upon for the foundation of their character, in order to make them loyal subjects and responsible citizens. All public schools should be graded according to the number of such men turned out rather than the high percentage of passed out bread-winners.
- (v) Lastly as the success of our undertaking depends on the co-operation of the people, they must be impressed with the good intention of any step we take in the matter and of our unalloyed sympathy towards them; and the persons entrusted to carry out these measures should not only do their duty faithfully and loyally, but without unnecessarily creating that alarm in their minds which is a great obstacle in the path of success.

In conclusion, my Lord, it will not be out of place to assure Your Excellency that I with all the resources of my State and people will ever be ready for any service that may be required of me by the Paramount Power, and I am ever ready to render any assistance to achieve that which is necessary for safeguarding our common interest.

(2)

Dated the 6th February, 1910.

From—His Highness the Maharaja of Jaipur,

To—His Excellency the Viceroy and Governor-General of India

After compliments.—I beg to acknowledge the receipt of Your Excellency's Kharita, dated the 6th August, 1909, on the subject of concerted action to check the dissemination of seditious propaganda in different parts of India. Owing to circumstances over which I had no control I was unable at once to reply to Your Excellency's Kharita. But of this I may be permitted to assure Your Excellency that the delay was not due to any lack of interest in the subject or of readiness to offer my co-operation. Far from it, the matter has all along been prominently before me.

2. I have viewed with great anxiety the endeavours that have been made to spread sedition in certain Native States and it will, I think, be a matter of the greatest regret if these mischievous and pernicious efforts are allowed to go any further and if States hitherto unpolluted by the foul poison should come to be affected by it.

3. Therefore, I welcome most heartily Your Excellency's gracious invitation to co-operate with the Government of India; I realise that the interests of the Government and of the Rulers of Native States are identical in this matter; I cannot doubt that the spread of this agitation must strike at the very foundations of the priceless boon of peace and good and settled Government that India has so long enjoyed under the wise and just rule of the British Raj; and I assure Your Excellency in the strongest terms I can command, that I am at all times unreservedly willing to associate myself with, and assist in, the carrying out of whatever line of policy Your Excellency may think it best to adopt in meeting the situation.

4. I have indeed both in my public speeches and in the manifestos I have issued to my people, already declared myself to this effect in the plainest possible language.

5. But though I have done this in view of the general situation and for the purposes of protecting my people from what I feel is a danger to which they are like others constantly exposed, yet it is a matter of no little satisfaction to me to know that my State is so far free from sedition and its mischievous influence. And I am confident that by the deterrent measures adopted by my Darbar, as published in the above-mentioned manifestos, we shall be able, if not to exclude entirely the seditious agitator from my territories, at all events, to render his preachings and machinations comparatively innocuous and to make his position an eminently precarious one for himself.

6. I note with much satisfaction that Your Excellency's views with regard to concerted measures to meet the situation will not involve interference with the internal administration of the Native States. The Jaipur Darbar, as I have said above, have already taken a good many precautions. They have also, whenever necessary, been co-operating with the Government of India, with regard to giving information about such suspicious characters as have visited Jaipur. The Darbar are also prepared loyally to render any further assistance that may be required in this direction. But at the same time, I deem it advisable so far as local conditions are concerned not to bring sedition too prominently to the notice of my people, to whom it is fortunately wholly unknown as yet. Nevertheless, I greatly appreciate Your Excellency's kindness in consulting me on this important subject and I desire to thank Your Excellency cordially for the wise and liberal policy pursued by Your Excellency's Government, which has resulted in the appointment of Indian gentlemen as members of the Council of the Secretary of State and of the

Executive Council of His Excellency the Viceroy and Governor-General of India. In fact, the Reform Scheme, which places the people of India under a deep and ever-lasting debt of gratitude to Your Excellency is a sure sign of Your Excellency's kind and sympathetic feelings towards them. Indeed after all that has been done, I find it difficult to suggest for British India anything else that could help to eradicate the serious evils of sedition and anarchy that prevail, but in deference to Your Excellency's wishes I will offer such further suggestions as occur to me.

- (a) No doubt the measures already taken to suppress the publication of seditious matter in newspapers have done much to lessen the present evil, but I am constrained to say that much still remains to be done. The persistent murderous acts perpetrated in various parts of the country, indicate that a spirit of lawlessness is still abroad and the question is what steps should be taken to stamp it out. The seed, no doubt, was sown by seditious newspapers but the remedy lies not in the total suppression of newspapers, but in guiding them along right channels. The Anglo-Indian papers have but a small circulation and they do not reach the entire mass of literate people. I, therefore, ask cannot a select few of the existing Vernacular papers be encouraged to point out the evils of sedition and the disasters it has brought in its train? I believe, if Vernacular papers are rightly conducted they have the power to do good and not harm. Can the influential moneyed and right-thinking portion of the people not be induced to support papers and periodicals of their own, whose main object will be to expose the pernicious teaching and perverted information contained in the Gutter Press, to discuss Government measures in a loyal spirit and to circulate the correct view of the measures and actions of Government. If informal meetings between editors and high-placed Government officials could be arranged, it would give excellent opportunities for the exchange of ideas on important public questions. The editors who discharge their responsible duties conscientiously should be encouraged in every way, while those that are indiscreet should be promptly sent for and their mistakes pointed out to them. Should this not have the desired effect, stronger measures must of course be resorted to and the Government will be well-advised to arm themselves with the power to take such measures. I have sanguine hopes that this policy will provide an efficacious check on the printing of seditious articles and that the tone of the Vernacular Press will soon improve. The seditious movement has so far been able to influence only a small percentage of the population and I earnestly hope that with the advent and wide circulation of rightly conducted papers the great mass of the people will always remain staunchly loyal to the Suzerain power in India.
- (b) When a new daily paper or periodical is started in British India the management of the paper should be made to deposit a certain sum of money as a guarantee for the paper being conducted on right lines and this deposit would be forfeited should the paper begin preaching seditious doctrines. I am sure the fear of losing their money would act as an effective check upon the tone the editors adopt.
- (c) It should be impressed upon the leaders of the different communities that it is their bounden duty to bestir themselves to help and deliver their deluded young men if the country is not to go to wreck and ruin. If organisations were formed in every important town all over the country of the best men the lovers of order and good Government, and if they be induced to expose the hidden machinations of sedition-mongers, their baneful influence will be successfully counteracted. Being composed of the members of the same community such organisations by virtue of the inherent

knowledge they possess of the special conditions, habits and customs of the people, will be better able to cope with the situation than would the most capable detective agency. Perhaps these organisations may on occasion be able to bring to the timely notice of the authorities the intention to disturb the peace or commit acts of violence.

- (d) My next point has reference to the neglect there seems to be of religious education, a point to which I drew Your Excellency's attention at the State Banquet at Jaipur on the 29th October 1909. I must say I have great faith in a system of education in which secular and religious instruction is harmoniously combined, as the formation of character entirely depends upon a base-work of religion, the noble ideals which our sacred books will put before the younger generation will, I fervently hope, make them loyal and dutiful citizens of the Empire. In the Shastras the monarch is the embodiment of all that is Great and Good and he is considered a Divine leader of men. Such teachings must inevitably have their effect on impressionable young men, and it is perhaps due to such ideals that sedition and anarchy have so small a footing in the Native States as a whole. In the Chiefs College Conference held at the Mayo College in 1904, I impressed upon my colleagues the necessity of religious education for the sons of the Chiefs and Nobles of Rajputana. It should be one of the principal objects in all schools for the teachers, the Pandits and the Moulvies to instil in the minds of their pupils correct notions as to the duty they owe to the community they belong to and to their Sovereign.

7. In conclusion, I would again wish to thank Your Excellency for taking up this important subject and for so kindly consulting me about it. As I have said before, I believe that only a small fraction of the population of India has been contaminated by the seditious germ. But that fraction has, it seems, been carefully organised by able, rich, and unscrupulous men. The vast majority of Indians are loyal, and in their quiet undemonstrative way warmly appreciate the blessings of peace, personal and religious liberty and security. It is the bounden duty, therefore, of all responsible for the well-being of these law-abiding millions to see that the poison of sedition does not reach them. This Your Excellency means to do and such assistance, as it lies in my power to give, I offer most cordially. An organised and concerted campaign, offensive and defensive, against the common enemy is what is wanted. At the head of this combination, stands the Government of India and with it the Ruling Chiefs of Native States, whose interests are identical with those of the Government, and who, if I may venture to say so, are looked up to as the natural leaders of Indian society. There are also the leaders of the different communities referred to in paragraph 6 (c) above, all these forces standing and working together will be able to show so strong a front that this wretched spectre of sedition that has come among us will soon be crushed and banished from the land, and we shall return once more to the unclouded happiness and prosperity we have always enjoyed under the great, wise and beneficent rule of His Majesty the King, Emperor of Great Britain and India.

(3)

Dated the —February, 1910

From—His Highness the Maharaja of Alwar,

To—His Excellency the Viceroy and Governor-General of India.

After compliments.—I have much pleasure in acknowledging the receipt of Your Excellency's Kharita of 6th August, 1909, regarding sedition and would ask you to accept my grateful thanks for the kind assurances given therein as well as for the desire Your Excellency has expressed to consult me in this important subject.

This new and most objectionable movement of sedition has come into evidence more or less of recent years, and Your Excellency is well aware with what feelings of disgust and disapproval it has all along been viewed by the well-wishers of India and specially by the Indian Chiefs.

Your Excellency's remark is very true that the time has come when common and concerted action is necessary in order to suppress this movement.

The pernicious effects of this movement and the means that have been utilized for spreading it abroad have already engaged Your Excellency's attention, and the Acts that have been passed and other political measures that have been adopted by Your Excellency's Government have no doubt been responsible for suppressing sedition a good deal. With the due exercise of legitimate force, judicious treatment and prompt justice, the last of which is most necessary in order to have the desired effect it should not be difficult to control this movement in the future.

In order, however, to deal with the subject thoroughly it is equally necessary in my mind to keep in view the causes from which this movement has originated and to devise means to remove them where it should be advisable, practicable and possible.

With the light of modern education and travel shining ahead the people of this country no doubt are awakening to wider aspirations. And with the enjoyment of absolute peace and the spread of communications their thoughts seem to be rising towards greater political ambitions, while the struggle of competition is drawing to their minds the ideas of mutual comparison, liberty and prosperity.

All these forces of nature are steadily gaining ground in the minds of a rapidly growing majority of people, though in however small a minority these may be considered to be at present.

The spread of these new ideas in a country like India where until some time back they have been so foreign or at any rate so scarce cannot in every case at least for some time be expected to find favourable soil.

In order, therefore, that they may be properly assimilated so as to bear good fruit, it seems to me that the ground on which they are to be cast must be simultaneously prepared with sound education based on teaching religion and building character.

I had the pleasure of referring this subject to Your Excellency's kind notice when I had the good fortune of entertaining you recently in Alwar, and I was much encouraged with Your Excellency's remarks in reply.

I have no doubt that the Indian States should be and will be the first to take the initiative in this matter, but my idea is that it is not the Indian States where these new ideas are capable of such rapid development.

Though the Government of India have all along very wisely refrained from interference in religious ideas, I still believe that they can do a great deal directly and indirectly to help in the encouragement of greater moral teachings in schools, etc.

There are not wanting loyal bodies in British India, I believe, who would not welcome such encouragement, and even if the Government abstained from taking any direct steps, I have no doubt a great deal could be done by indirect means.

This question, however, has by no means escaped Your Excellency's attention as can be judged from so many public utterances you have made on the subject when you have expressed your intimate knowledge of the mischief that is already caused in the absence of such education.

These new aspirations and ambitions will require sympathetic guidance and firm control in the future and where such ambition will be incapable of fulfilment they are likely—as they have already done in the past—to lead to discontent.

In order to keep pace with the times the Government of India has already taken the initial step by introducing reforms in the political machinery of the Government which has helped in no small a degree in allaying discontent.

In cases of some more ambitious minds it may not be possible to satisfy their aspirations, but in no case must such discontent be allowed to lead to sedition or to take the form of violence. On the occasion of any such movement prompt justice and vigorous action will be necessary in order to bear the desired results.

While Your Excellency has already been doing so much for British India a great deal has already been done in the Indian States, and where anarchy or sedition has shown any tendency of infection it has met as you are aware with exemplary treatment.

My opinion is that in future too such cases will receive the same kind of treatment. So long as the movement of outsiders entering the States with doubtful motives is carefully watched and prompt measures are taken when it becomes necessary, I venture to hope that there will not be much danger to fear from this movement gaining ground in our States.

I feel grateful to Providence that Rajputana has so far proved the strongest barrier against this movement and my own State, I am happy to say my people seem well contented and free from any such infection. I have every trust in their loyalty and allegiance and feel certain they will not abuse my confidence.

Regarding Your Excellency's allusion to common action being taken on the part of the British Government and the Indian States, I can assure Your Excellency on my behalf that I shall be willingly prepared to co-operate in any such action as you suggest of circulating information and watching and communicating about suspicious characters whenever it may be necessary.

In conclusion I would ask you to accept my cordial thanks for your kind assurances of your policy of non-interference in the internal administration of our States and for your very kind offer of assistance should such be desired. These sentiments we not only very warmly appreciate, but they make us all the more prepared to do what lies in our power to help in the cause of the Empire.

NOTIFICATIONS.

EXPLOSIVES.

Calcutta, the 3rd March 1910.

No. 1686-3.—In accordance with the provisions of section 18 of the Indian Explosives Act, 1884 (IV of 1884), and of the Notification of the Government of India in the Home Department, No. 1964, dated the 2nd September 1887, the Governor General in Council is pleased to publish for general information the following amendments which His Excellency in Council, in exercise of the powers conferred by section 5 of the said Act, proposes to make in the rules regulating (1) the manufacture, possession and sale of explosives, and (2) the transport and importation of explosives, published with the Notifications in this Department Nos. 9045-8 (Explosives) and 4555-4 (Explosives), dated the 29th November 1906 and the 31st May 1907, respectively.

The draft will be taken into consideration by the Governor General in Council on the expiration of two months from the date of publication of this Notification in the *Gazette of India*.

DRAFT AMENDMENTS

I. Rules for the manufacture, possession and sale of explosives, issued with this Department Notification No. 9045-8, dated the 29th November 1906

At the end of clause (2) of rule 1, the word "or" shall be inserted, and after that clause the following shall be added, namely —

"(3) the manufacture, possession or sale of toy fireworks, such as paper caps for toy pistols, under such conditions and in such quantities as the Local Government, on the recommendation of the Chief Inspector of Explosives, may from time to time determine."

II Rules to regulate the transport and importation of explosives, issued with this Department Notification No. 4551-4, dated the 31st May 1907

For the third paragraph of the preamble the following shall be substituted, namely —

"Nothing in these rules shall apply to the packing, transport or importation of—

- (i) capped safety cartridge cases, if otherwise empty, when packed, transported or imported in the same consignment with arms covered by a license granted under the Indian Arms Act, 1878 (XI of 1878), or
- (ii) toy fireworks, such as paper caps for toy pistols, under such conditions and in such quantities as the Local Government, on the recommendation of the Chief Inspector of Explosives, may from time to time determine."

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 25th October 1909.

From the 13th November next till further notice, the complete *Gazette of India* will be published at Calcutta. After the 6th November all notifications and other matter intended for publication in the *Gazette* should be addressed to the Publisher, 8, Hastings Street, Calcutta.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India.

No. 168 of 1909.—John McGlashan, refinery manager, of the Cawnpore Sugar Works, Limited, in Cawnpore, British India. *A process for the manufacture of sugar from jaggeries (raw sugar derived from cane) or from cane juices.* (Specification filed 18 February 1910.)

No. 319 of 1909.—Linotype and Machinery Limited, linotype and printing machinery manufacturers, of 188 and 189 Fleet street, London, England. *Improvements in typographical composing and casting machines.* (Specification filed 18 February 1910.)

No. 331 of 1909.—Charles Didelon, of No. 3 Rue Laugier, Paris, France, and Albert Braut, of No. 59 Rue de L'Aqueduc, Paris, France. *Improvements in apparatus for rendering soluble and nitrifying sewage and other waste solid and liquid matters* (Specification filed 22 February 1910.)

No. 332 of 1909.—George Harrison Sheffield, civil engineer, of 38 Victoria street, Westminster, in the county of London, England, and James Denis Twinberrow, civil engineer, of 1 Woodside, Hexham, in the county of Northumberland, England. *Improvements in and connected with bogies for rolling stock.* (Specification filed 22 February 1910.)

No. 334 of 1909.—Frederick Hardman, dyer and bleacher, of Hollinbank Dye Works, Sion street, Radcliffe, in the county of Lancaster, England, and Frank Edmondson, gentleman, of 19 Oxford road, Birkdale, in the said county. *Improvements in bleaching cotton and other vegetable fibres in the raw state or in the form of yarns or fabrics.* (Specification filed 22 February 1910.)

No. 335 of 1909.—John Isaac Solomon, engineer, of 51 West 81st street, New York city, United States of America, at present of Colombo, Ceylon. *A process for extracting pearls from pearl-boring mussels, oysters and the like* (Specification filed 22 February 1910.)

No. 459 of 1909.—Alexander Muirhead, telegraph engineer, of "The Lodge," Shortlands, in the county of Kent, England. *Improvements in electric telegraphy* (Specification filed 17 November 1909.)

No. 495 of 1909.—Wesley Castles, contractor, of No 133 Stanmore road, Stanmore, near Sydney, in the state of New South Wales, and Commonwealth of Australia. *An improved machine for excavating, raising, and dumping earth, sand, silt or gravel.* (Specification filed 12 February 1910.)

No. 595 of 1909.—Harichand Mancharam & Sons, lock and safe manufacturers, Gullalwadi, Bombay. *Improvements in fire and thief-proof safes* (Specification filed 12 February 1910.)

No. 618 of 1909.—Fred Whalley, manager, Desi Cotton Mill, 42 Garden Reach, near Calcutta. *Improvements in and connected with the catch-taking-up-motions of looms* (Specification filed 19 February 1910.)

No. 640 of 1909.—George Gilbert Bell, electrical engineer, of 14 Addison Court Gardens, Kensington, in the county of London, England, and John St. Vincent Pletts, electrical engineer, of 43 Clarence road, Teddington, in the county of Middlesex, England. *A new or improved method of producing hot water by means of electricity and apparatus therefor.* (Specification filed 12 February 1910.)

- No. 669 of 1909.—Sidney George Brown, electrical engineer, of 4 Great Winchester street, in the city and county of London, England *Improvements in or relating to telephony or telegraphy.* (Specification filed 12 February 1910)
- No. 673 of 1909 —George Owen Donovan, electrical engineer, of 12 Barwick street, Birmingham, in the county of Warwick, England. *Improvements in or relating to electric starting and regulating switches* (Specification filed 21 February 1910.)
- No. 677 of 1909.—Charles Francis Jenkins, mechanical engineer, of 312 Ouray Building, Washington, D C., in the United States of America. *Improvements in or relating to machines for use in closing the ends of receptacles or containers.* (Specification filed 1 February 1910)
- No. 694 of 1909.—Cecil Watson, Assoc.M Inst C E of Roslin, Grove Park, London, S E. *Improvements in draw and buffing gear for railways and the like* (Specification filed 16 February 1910.)
- No. 9 of 1910.—David Roberts and John William Young, engineers, both of Spittlegate Iron Works, Grantham, Lincolnshire, England *Improvements in or connected with vaporisers for internal combustion engines* (Specification filed 16 February 1910)
- No. 14 of 1910 —Charles Francis Jenkins, mechanical engineer, of 312 Ouray Building, Washington, D C., in the United States of America. *Improvements in and relating to spirally wound paper and like receptacles.* (Specification filed 23 February 1910)

No. 1219 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

- No. 442 of 1897.—Albertus Kapteyn *Improvements in triple valves for pneumatic railway brakes* (From 16 July 1910 to 16 July 1911)
- No. 364 of 1898 —Fred Lobnitz *Improvements in apparatus for breaking up or cutting rocks, boulders, stones, or earth, under water or on dry land* (From 14 April 1910 to 14 April 1911)
- No. 492 of 1901 —Hugh Lowther Roberts. *Improvements in boxes for presses.* (From 11 March 1910 to 11 March 1911.)
- No. 153 of 1902 —Louis Bernhard Baron *Improvements in apparatus for manufacturing cigarettes.* (From 29 May 1910 to 29 May 1911)
- No. 102 of 1903.—George Harry Hayes. *Improvements in pneumatic drills and like machines.* (From 17 August 1910 to 17 August 1911.)
- No. 58 of 1904 —George Mills *Improvements in automatic fire extinguishing sprinklers* (From 31 August 1910 to 31 August 1911)
- No. 291 of 1904 —Charles Jacob McPherson *Improvements in or relating to cotton gins* (From 3 February 1910 to 3 February 1911.)
- No. 328 of 1904.—John Edward Cooper. *An improved construction in connection with the anti-friction mechanism of the axle shafts of railway carriages and other vehicles* (From 25 February 1910 to 25 February 1911)
- No. 39 of 1905.—Josef Kudlicz, Adolf Carl Friedrich Von Andre and Hans Rudolph Otto Friederici *Improvements in or relating to mechanical stokers* (From 25 August 1910 to 25 August 1911.)
- No. 103 of 1905 —The Westinghouse Brake Company, Limited *Improvements in vacuum brake apparatus for railway and like vehicles.* (From 5 July 1910 to 5 July 1911)
- No. 127 of 1905.—The Westinghouse Brake Company, Limited *Improvements in vacuum brakes for railway and like vehicles.* (From 5 July 1910 to 5 July 1911.)
- No. 148 of 1905.—The Westinghouse Brake Company, Limited *Improvements in or relating to automatic vacuum brakes for railway and like vehicles.* (From 5 July 1910 to 5 July 1911.)
- No. 149 of 1905.—The Westinghouse Brake Company, Limited. *Improvements relating to vacuum brakes for railway and like vehicles.* (From 5 July 1910 to 5 July 1911.)

- No. 170 of 1905.—Alessandro Artom. *Improvements in and relating to the transmission of electric energy through space for the purpose of wireless telegraphy and the like.* (From 30 June 1910 to 30 June 1911.)
- No. 178 of 1905.—Albert De Dion and Georges Bouton. *Improvements in or relating to plate clutches.* (From 2 March 1910 to 2 March 1911.)
- No. 379 of 1905.—Stuard Thomas Henry Lane and John Lancelot Staunton. *Improvements in bulkers for tea and the like.* (From 7 March 1910 to 7 March 1911.)
- No. 400 of 1905.—Sir W. G. Armstrong Whitworth and Company, Limited. *Improvements in means for operating small arms as machine guns.* (From 7 April 1910 to 7 April 1911.)
- No. 471 of 1905.—William Owen Travis. *Improvements in the purification of sewage and other foul or impure waters and in apparatus therefor.* (From 5 May 1910 to 5 May 1911.)
- No. 159 of 1906.—Dr. Hans Kuzel. *Improvements relating to the manufacture of light emitting bodies for electric incandescent lamps.* (From 7 September 1910 to 7 September 1911.)
- No. 160 of 1906.—Dr. Hans Kuzel. *Improvements in the process of making a metallic connection between the light emitting bodies and the supply conductors of electric glow lamps.* (From 7 September 1910 to 7 September 1911.)
- No. 161 of 1906.—Dr. Hans Kuzel. *Improvements in the process of manufacturing light emitting bodies for electric glow lamps and of connecting them with the supply conductors.* (From 7 September 1910 to 7 September 1911.)
- No. 162 of 1906.—Dr. Hans Kuzel. *Improvements in the process of electrically connecting the filaments of electric glow lamps with their supply wires.* (From 7 September 1910 to 7 September 1911.)
- No. 201 of 1906.—Dr. Hans Kuzel. *A process for increasing the electric resistance of metals, especially of incandescence bodies formed of difficultly fusible metals for electric incandescence lamps.* (From 14 November 1910 to 14 November 1911.)
- No. 227 of 1906.—Alessandro Artom. *Improvements in and relating to wireless telegraphy receiving apparatus.* (From 10 August 1910 to 10 August 1911.)

No. 1220 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling and using the said inventions in British India, and of authorizing others so to do, has ceased—

- No. 248 of 1904.—John Taylor Peddie. *Improvements in connection with sights and fittings for use therewith for small arms.* (Specification filed 21 November 1905.)
- No. 216 of 1905.—Darling's Patent Automatic Coupling Limited. *Improvements in and connected with automatically coupling and uncoupling railway carriages, wagons and other vehicles.* (Specification filed 23 November 1905.)
- No. 229 of 1905.—Leon Ernest Lachat. *Improvements in trucks or trolleys with sliding steering wheels.* (Specification filed 24 November 1905.)
- No. 242 of 1905.—Walter Frederic Perman. *An improved plucking machine for separating fine and coarse fresh green tea or other leaves.* (Specification filed 24 November 1905.)
- No. 359 of 1905.—Charles Ogilvie Halliday. *Improvements in letter and other clips.* (Specification filed 25 November 1905.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for each of the above inventions.

- No. 237 of 1904.—Kalkhushroo Sorabjee Irani. *Improvements in water lifts.* (Specification filed 25 November 1904.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (b) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of Rs 50 for the above invention.

NOTICES.

THE PATENT OFFICE.

2, BANKSHALL STREET, CALCUTTA.

Public room open, 11 A.M. to 4 P.M., Saturdays 11 A.M. to 1 P.M.

1 *All communications* relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act (V of 1888), or in continuation of such applications should be addressed to the Patents Secretary 2, Bankshall Street, Calcutta. Directions for inventors and others are given in the Act Manual (Price Rs 1 or 1s 6d).

2 *Fees* payable under the fourth and sixth Schedules must be received in full and in cash at the office within the time allowed by the Act. The office cannot be responsible for any delay attending the collection of cash on cheques. Cheques not payable at Calcutta are subject to commission. Preferably fees should be sent by money order payable at Calcutta to the Patents Secretary.

3 *Trade marks* are not registered and *medicines* are not patented under the Inventions and Designs Act.

4 *Applications* made under the Act are placed for inspection in the public room for 10 days from the date of the *Gazette of India* in which their filing has been notified.

5 *Specifications* of inventions which have been notified as filed in the *Gazette of India* may be inspected on payment of a fee of one rupee at —

Calcutta—Patent Office, 2, Bankshall Street.

Madras—General Record Department, Fort St George.

Bombay—Record Office.

Rangoon—Record Room of the Revenue Secretary to the Government.

Lucknow—Office of the Director of the Department of Land Records and Agriculture.

SULPHATE OF QUININE AND SULPHATE OF CINCHONIDINE.

Manufactured at the Bengal Government Cinchona Plantation

These articles are guaranteed to be free from wilful admixture with other Cinchona Alkaloids. Quinine can be purchased by Government officers, District and Local Boards. It can also be purchased by Missionaries for *bona fide* public purposes. Otherwise it is not sold to private persons or firms. Cinchonidine is for sale to Government officers and to dealers. Both Quinine and Cinchonidine are for sale for cash only and may be obtained from the Superintendent, Royal Botanic Garden, Sibpur, near Calcutta.

The rates for both drugs from 1st April 1909 are as follows:—

For original sealed cases containing not less in one delivery than the undernoted quantities or for any larger quantities Rs 10 per lb. Carriage extra.

Quinine—	{	In 4 lb. tins	50 lbs.
		" 1 " "	30 "
		" 1 " "	30 "
		" 1 oz. "	60 "
		" 1 " "	60 "
Cinchonidine—	{	In 1 lb. tins	50 lbs.
		" 1 " "	30 "
		" 1 " "	30 "

For any less quantity in one delivery than the above Rs 15 per lb. By post 6 annas for every lb. and 4 annas for every half or quarter lb. extra.

CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased for cash only by Government officers and the general public from the Superintendent, Royal Botanic Garden, Calcutta.

The rates for Government officers are —

Rates for Government Officers are —										Post-free.

Head Commissioner of Paper Currency.

DEPARTMENT OF EXPLOSIVES.

NOTIFICATION.

Dated Calcutta, the 3rd March 1910.

No. 385.—With reference to Notification No 4555—4, dated the 31st May 1907, of the Government of India, Department of Commerce and Industry, publishing rules to regulate the transport and importation of explosives, the following list of "authorized explosives" referred to in rule 9 (1) of the above rules is published for general information :—

LIST OF AUTHORIZED EXPLOSIVES.

The following explosives are at present authorized for importation into British India, for general sale .—

Class 1.—GUNPOWDER.

GUNPOWDER.

Class 2.—NITRATE MIXTURE.

AMMONAL.

CHILWORTH SPECIAL POWDER.

Class 3 —NITRO-COMPOUND.

Every explosive in this class and every explosive ingredient thereof shall be so thoroughly purified and otherwise of such character as to satisfy a test known as the heat test, and specified in the rule for testing explosives, published with Notification, No. 4555—4, dated the 31st May 1907, referred to above.

Division 1.

BALLISTITE.

BLASTING GELATINE.

CARBONITE.

CELTITE.

CORDITE.

CORDITE, M. D.

DYNAMITE.

GELATINE DYNAMITE, NO. 1.

GELATINE DYNAMITE NO. 2 OR GELIGNITE.

MONOBEL POWDER.

PHENIX POWDER.

Provided that every explosive in this division shall be of such character and consistency as not to be liable to liquefaction or exudation.

Division 2.

AMBERITE, NO. 2.

E. C. SPORTING POWDER.

EMPIRE POWDER.

GUNCOTTON.

IMPERIAL SCHULTZE GUNPOWDER.

NEGRO POWDER.

PICRIC ACID.

PICRIC POWDER.
ROBURITE.
SMOKELESS DIAMOND
TONITE OR COTTON POWDER.

Class 4 —CHLORATE MIXTURE.

Nil

Class 5 —FULMINATE.

Nil.

Class 6 —AMMUNITION.

Division 1.

PERCUSSION CAPS
RAILWAY FOG SIGNALS.
SAFETY CARTRIDGES.
SAFETY FUZES FOR BLASTING.
SAFETY ELECTRIC FUZES.

Division 2

CARTRIDGES FOR CANNON, SHELLS, MINES, BLASTING OR OTHER LIKE PURPOSES.

R. O. LEES,
Director, Traffic Branch,

**THE HONOURABLE THE AGENT TO THE GOVERNOR GENERAL IN
BALUCHISTAN.**

NOTIFICATIONS.

Sibi, the 18th February 1910.

No. 420-S. In exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), the Hon'ble the Agent to the Governor General in Baluchistan proposes to make the following addition to rule 5, Chapter III, Part II of the petroleum rules published in his Notification No. 2306, dated the 29th April 1909:—

“Provided also that in case of installations or storage sheds intended for the storage of petroleum which has a flashing point above 150° Fahrenheit, the license may contain, in lieu of the conditions endorsed on the form prescribed for it by these rules, such conditions as may in each case be approved by the licensing authority on the recommendation of the Chief Inspector of Explosives”

This draft is published under the provisions of section 24 of the Indian Petroleum Act, 1899, for the information of persons likely to be affected thereby, and it is hereby notified that the draft will be taken into consideration on or after the 15th April 1910.

Any objection or suggestion which may be received from any person with respect to the said draft amendment before the date aforesaid will receive consideration.

By order,

A. L. JACOB, Major,
First Assistant

The 26th February 1910.

No. 550-S.—In exercise of the powers conferred upon him by section 93, sub-section (1) of the Baluchistan Agency Civil Justice Law, 1896, the Honourable the Agent to the Governor General is pleased to invest the Assistant Political Agent of Quetta for the time being with all the powers of a Political Agent and to declare that the said powers shall be exercised within the local area of the Quetta District and with respect to civil cases generally, subject to such distribution of work as may from time to time be ordered in writing by the Judicial Commissioner in Baluchistan under sub-section (3) of section 93 of the said Act.

By order,

H. A. K. GOUGH, Major,
Assistant to the Agent, Governor General.

**THE HON'BLE THE CHIEF COMMISSIONER OF BRITISH
BALUCHISTAN.**

NOTIFICATIONS.

Sibi, the 18th February 1910.

No. 421-S.—In exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), the Hon'ble the Chief Commissioner of British Baluchistan proposes to make the following addition at the end of rule 5, Chapter III, Part II of the petroleum rules published in his Notification No. 2308, dated the 29th April 1909:—

“Provided also that in the case of installations or storage sheds intended for storage of petroleum which has a flashing point above 150° Fahrenheit, the license may contain, in lieu of the conditions endorsed on the form prescribed for it by these rules, such conditions as may in each case be approved by the licensing authority on the recommendation of the Chief Inspector of Explosives.”

This draft is published under the provisions of section 24 of the Indian Petroleum Act, 1899, for the information of persons likely to be affected thereby, and it is hereby notified that the draft will be taken into consideration on or after the 15th April 1910.

Any objection or suggestion which may be received from any person with respect to the said draft amendment before the date aforesaid will receive consideration.

By order,

A. L. JACOB, Major,
Secretary.

The 26th February 1910.

No. 551-S.—In exercise of the powers conferred upon him by section 93, sub-section (1), of the British Baluchistan Civil Justice Regulation, 1896, the Honourable the Chief Commissioner is pleased to invest the Assistant Commissioner of Pishin for the time being with all the powers of a Deputy Commissioner, and to declare that the said powers shall be exercised within the local area of the Pishin District, and in respect of civil cases generally, subject to such distribution of work as may from time to time be ordered in writing by the Judicial Commissioner in Baluchistan under sub-section (3) of section 93 of the said Regulation.

By order,

H. GOUGH, Major,
Secretary to the Chief Commissioner of British Baluchistan.

in Central India.

ORDERS BY THE HONOURABLE THE CHIEF COMMISSIONER OF AJMER-MERWARA.

NOTIFICATIONS

A. G. G.'s Camp, Rajputana, the 25th February 1910.

No. 342-C.—In exercise of the powers conferred by section 145 (1) (e) of the Ajmer Municipalities Regulation, V of 1886, the Hon'ble the Chief Commissioner is pleased to make the following rules for the assessment and collection of a dog tax within the limits of the Beawar Municipality and they are published for the information of the public under section 150 (2) of the Regulation.

1 (a) Except as provided by rule 8 no one shall keep a dog within the limits of the Municipality of Beawar without procuring a license for the same.

(b) Any person possessing a dog shall at once apply to the Chairman of the Municipality Committee for a license.

2 A tax of one rupee shall be levied on each dog for one year from the date of the imposition of the tax and of eight annas per annum or higher tax not exceeding Re. 1 should the Municipal Committee deem it expedient to raise the tax for subsequent years, payable in advance.

3 A license shall not be granted for a period of less than one year.

4 A license-holder shall, at least one month before the expiry of the period of the license, take steps to have it renewed.

5 A person keeping a dog without a license or after the expiry of the period of a license without having applied for a license or its renewal shall be liable to a fine which may extend to five rupees and shall forthwith apply for a license or its renewal.

6 (a) In addition to obtaining a license, a license-holder shall procure a dog collar which shall be supplied free by the Municipality once during the first year of the imposition of the tax and thereafter on payment.

(b) The amount of the license which is entered in a register to be maintained for this purpose by the Municipality and M. B. (Municipality of Beawar) shall be impressed on the collar before its issue to the license-holder.

7. (a) All dogs found straying without such collar shall be seized by any authority appointed for that purpose by the Assistant Commissioner, Merwar, and impounded in the dogs' Dharamshala.

(b) A licensed dog seized under the foregoing rule, shall at once be released on application being made to the Agent, Dharmada Committee, forwarding the license and on payment of annas two, as a penalty. The Agent of the Dharmada Committee will be responsible that the dog released agrees with the description of the dog as entered in the license.

8. The following dogs shall be exempted from the operation of this tax and these rules, and shall not be arrested provided they are not allowed to stray —

(a) Dogs of agriculturists residing outside the city walls but within the Municipal limits.

(b) Dogs of *bond fide* travellers provided they accompany their masters.

(c) Dogs, impounded in the dogs' Dharamshala maintained by the Panchayat Committee.

(d) The puppies of the licensed dogs provided they are not more than six months old.

The 1st March 1910.

No. 370-C.—In supersession of the notification from this office No. 220, dated the 5th August 1908, the Hon'ble the Chief Commissioner of Ajmer-Merwara is pleased, under the terms of proviso (b) of section 18 of the Ajmer Municipalities Regulation (V of 1886), to appoint Mr C. W. Waddington, C.I.E., to be Chauhan of the Ajmer Municipal Committee pending further orders.

By order,

H. WILKINSON,

First Assistant to the Agent to the
Governor-General, Rajputana, and
Chief Commissioner, Ajmer-Merwara.

C. STEWART-WILSON,

Director-General of the Post Office of India.

THE HON'BLE THE AGENT TO THE GOVERNOR GENERAL AND CHIEF COMMISSIONER, NORTH-WEST FRONTIER PROVINCE.

NOTIFICATIONS.

Peshawar, the 23rd February 1910.

No. 11.—In exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), the Hon'ble the Chief Commissioner proposes to add the following proviso to rule 5, Chapter III, Part II, of the new Petroleum rules published in Notification No. 62, dated the 17th April 1909.—

“Provided also that in the case of installations or storage sheds intended for the storage of petroleum which has a flashing point above 150° F, the license may contain, in lieu of the conditions endorsed on the form prescribed for it by these rules, such conditions as may in each case be approved by the licensing authority on the recommendation of the Chief Inspector of Explosives.”

This draft is published under the provisions of section 24 of the Indian Petroleum Act, 1899 (VIII of 1899), for the information of persons likely to be affected thereby, and it is hereby notified that the draft will be taken into consideration on or after the 1st April 1910.

Any objection or suggestion which may be received from any person with respect to the said draft proviso before the date aforesaid will receive consideration.

By order, etc.,

S. E. PEARS,

Assistant Secretary to the Chief Commissioner,
North-West Frontier Province.

The 23rd February 1910.

No. 12.—On return from the leave granted to him in the North-West Frontier Province Notification No. 2, dated the 13th January 1910, Bhai Rup Singh, Extra Assistant Commissioner, resumed charge of the duties of Treasury Officer, Dera Ismail Khan, on the forenoon of the 15th February 1910, relieving M. Muhammad Khan.

No. 13.—S. Siraj-ud-din, Tahsildar, and an accepted candidate for the post of Extra Assistant Commissioner, is appointed to act temporarily as an Extra Assistant Commissioner and is attached to the Bannu district, with effect from the forenoon of the 19th January 1910.

No. 14.—Khan Hamidullah Khan, Extra Assistant Commissioner and Revenue Assistant, Bannu, is granted privilege leave of absence for two and a half months, under the provisions of Article 260 of the Civil Service Regulations, with effect from the afternoon of the 29th January 1910.

No. 15.—S. Siraj-ud-din, Extra Assistant Commissioner, attached to the Bannu District, is posted as Revenue Assistant, Bannu, with effect from the afternoon of the 29th January 1910.

The 24th February 1910.

No. 16.—Captain W. H. Leonard, I.M.S., assumed charge of the Civil Medical duties of Malakand on the afternoon of the 13th February 1910, relieving Captain Hay Thorburn, I.M.S.

The 25th February 1910.

No. 17.—The next half-yearly examination in the Pashtu language by the Higher Standard will be held at Peshawar, Dera Ismail Khan, Gilgit, Chitral and Lahore Cantonment on Monday, the 4th April 1910, and following day.

The examination for Tahsildars, Naib Tahsildars and subordinate officers of the Police and Irrigation Departments will be held at Peshawar on the 6th April 1910.

No. 18. Errata.—In this Administration Notification No. 93, dated the 7th May 1904, prescribing the rules for the regulation and control of stage carriages plying for hire on roads outside Municipal and Cantonment limits in the five districts of the North-West Frontier Province add to paragraphs 7 and 10 (3) of Schedule I the following sentence:—

Each European and each Native soldier travelling with equipments shall be considered to weigh 2 maunds.

And to note to Schedule II add the following:—

Each European and each Native soldier travelling with equipment shall be considered to weigh 2 maunds—the necessary reduction being made in the number of passengers allowed by column 2 so as not to exceed the total weight allowed by column 3.

The 1st March 1910.

No. 19.—Khan Habibullah Khan, Extra Assistant Commissioner and Treasury Officer, Hazara, is granted privilege leave of absence for 2 months and 1 day under the provisions of Article 260 of the Civil Service Regulations, with effect from the afternoon of the 18th February 1910.

No. 20.—M. Muhammad Khan, Officiating Extra Assistant Commissioner, is posted as Treasury Officer, Hazara, with effect from the afternoon of the 18th February 1910.

The 26th February 1910.

Whereas it appears to the Chief Commissioner and Agent to the Governor General, North-West Frontier Province, that a newspaper or pamphlet entitled *Ca Ira* published by Edward Holton James at 22, Rue St. Dominique, Paris, contains words which are likely to excite disaffection towards His Majesty and the Government established by law in British India.

In exercise of the powers conferred by section 12 (1) of the Indian Press Act, 1 of 1910, the Chief Commissioner and Agent to the Governor General, North-West Frontier Province, hereby declares all copies of the aforesaid newspaper or pamphlet which may be found in the North-West Frontier Province to be forfeited to His Majesty.

F. W. JOHNSTON,
Secretary to the Chief Commissioner,
N.-W. F. Province.

G. W. P. DENNY, Lieut.-Col., I.M.S.,
Administrative Medical Officer, North-West Frontier Province.

PESHAWAR:
Dated the 24th February 1910.

NORTH-WEST FRONTIER PROVINCE—MEDICAL DEPARTMENT.

MORTUARY RETURN FOR THE MONTH OF JANUARY 1910.

Deaths registered from different causes in each district of the North-West Frontier Province during the month of January 1910.

[illegible]

Remarks by the Administrative Medical Officer, North-West Frontier Province.

Six thousand seven hundred and eighty-five births were registered in the Province during the month of January 1910, giving a birth-rate of 42 per mille of population. Of the total number of births, 3,814 were boys and 2,971 girls. The total number of deaths registered from all causes in the corresponding month of the past year, giving an annual death-rate of 34.34 per mille of population per annum, respectively.

There was not a single death registered under the head of cholera.

I have not a single comment to make on any of these. From small-pox 71 deaths were registered against 104 in the previous month and 21 in the corresponding month of the past year.

There was not a single death registered from plague.

I have now a single column registered from piglets. From seven 4,350 deaths were registered against 4,319 in the previous month and 5,185 in the corresponding month of the last year, dysentery and diarrhoea 17 against 41, respiratory disease 145 against 142, accidents 24 against 20, scalds 28 against 24, snake-bite 24 against 24, and from all other causes 903 against 863 in the past month as in 1958 in the corresponding month of the last year.

FRESHAWAR :

G. W. P. DENNYS, Lieut.-Col., I.M.S.,

Administrative Medical Officer, North-West Frontier Province

The 24th February 1910.

C O SLACKE,
Assistant Comptroller, Post Office

OFFICE OF THE COMPTROLLER, POST OFFICE,
Calcutta, the 28th January 1910

GEOLOGICAL SURVEY OF INDIA.

NOTIFICATION.

Calcutta, the 4th March 1910

Mr. E Vredenburg, Officiating Superintendent and Palæontologist, Geological Survey of India, is granted privilege leave for three months under Articles 245 and 260 of the Civil Service Regulations, with effect from the 14th March 1910, or such subsequent date as he may avail himself of the same.

T. H. D. LATOUCHE,
Offg. Director, Geological Survey of India.

THE HON'BLE THE RESIDENT IN MYSORE.

NOTIFICATIONS.

KOLAR GOLD FIELDS RIFLE VOLUNTEERS.

LEAVE.

Bangalore, the 24th February 1910

No 13.—Captain Frederic James Tregay is granted leave out of India for nine months, with effect from the 19th February 1910, or date of departure.

The 25th February 1910

No. 17—The Resident is pleased to direct that the following amendments be made in the rules issued with his Notification No 55, dated the 11th July 1908, as subsequently amended by the Notifications specified in the margin, for the grant of licenses for the sale of spirits, fermented liquors and intoxicating drugs in the Civil and Military Station of Bangalore —

For the existing rules 6 (vi) (2) and (3), substitute the following :—

- (2) Persons whom a vendor knows, or has reason to believe, to be camp followers, i.e., all classes of followers (other than private servants) whether on or off duty, who have a right to be in Cantonments.
- (3) Policemen, Excise officers and Railway servants, when on duty.

At the end of rule 6 (vi), add the words " The restriction contained in (1) and (2) above do not apply to native soldiers, their families and followers when they are absent on leave from their regiments. "

The 26th February 1910.

No. 18.—The Hon'ble the Resident in Mysore is pleased to direct that, with effect from the 25th February 1910, the words "three annas" shall be substituted for the words "two annas" in rule 18 of the rules framed under section 9 (d), (e) and (f) of the Excise Act, 1896 (XII of 1896), as applied to the Civil and Military Station of Bangalore, and issued under Notification No. 67, dated the 13th November 1907, as amended by Notification No. 1, dated the 3rd January 1908.

The 28th February 1910.

No. 19.—The list of text-books approved by the Resident in Mysore for use in aided schools in the Civil and Military Station of Bangalore is the same as that for the Madras Presidency published in Part I-B, of the Fort St. George Gazette, dated the 21st December 1909

All text-books prescribed by the University of Madras for the Matriculation Examination will be regarded as text-books approved for use in aided schools

Books not authorised by the Resident must not be used in any aided school

By order,

W. G. GREY, Major,
First Assistant Resident.

* Agents for sale of the Legislative Department publications.

NOTICE.—Books and Acts required for private use only can be purchased. Applications should be
accompanied by a remittance, unless it is wished that the books should be sent by value-payable post, in
which case, besides the ordinary postage, an additional charge is made for registration and commission.

Books and Acts required for the public service should be obtained through the Local Government to
whom the applicant is subordinate.

Application for Government publications which are no longer in print should be made to the Agent
to the particular Government under whose orders they were originally issued.

[The amounts within parentheses are for packing and postage.]

and for every additional Rs 10,000 or part thereof in excess of Rs 30,000.					9 0 0	4 8 0	3 0 0

(iii) For Article No 27 the following shall be substituted, namely —

" 27. **DEBENTURE** (whether a mortgage debenture or not), being a marketable security transferable—

(a) endorsement or by a separate instrument of transfer,

(b) by delivery

The same duty as Bond (No. 15) for the same amount.

The same duty as a conveyance (No 23) for a consideration equal to the face amount of the debenture.

Explanation.—The term 'Debenture' includes any interest coupons attached thereto, but the amount of such coupons shall not be included in estimating the duty.

Exemption.

A debenture issued by an incorporated company or other body corporate in terms of a registered mortgage-deed, duly stamped in respect of the full amount of debentures to be issued thereunder, whereby the company or body borrowing makes over, in whole or in part, their property to trustees for the benefit of the debenture-holders: provided that the debentures so issued are expressed to be issued in terms of the said mortgage-deed.

See also BOND (No 15) and Sections 8 and 55."

(iv) For Article No 43 the following shall be substituted, namely :—

" 43. **NOTE OR MEMORANDUM** sent by a Broker or Agent to his principal intimating the purchase or sale on account of such principal—

(a) of any goods exceeding in value twenty rupees,

Two annas.

(b) of any stock or marketable security exceeding in value twenty rupees

Subject to a maximum of ten rupees, one anna for every Rs 10,000 or part thereof of the value of the stock or security "

(v) In Article No. 59, in the second column, for the words "Three-quarters of" the words "One and a half times", and in the *EXEMPTIONS*, for the word "three-quarters" each time it occurs the words "one and a half" shall be substituted.

(vi) In Article No. 62, in the second column, for the word "One-quarter", where it occurs opposite clauses (a) and (b), the word "One-half" shall be substituted.

LEGISLATIVE DEPARTMENT.

We, the undersigned, Members of the Select Committee to which the Bill further to amend the Indian Stamp Act, 1899, was referred, have considered the Bill, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto

2. *Clause 3* (i) has been altered so as to discriminate between stock exchange transactions and the class of transactions carried through by bill and exchange brokers. For the former a graduated scale of duty has been maintained, but the rates have been reduced, as the Committee consider that the rates originally proposed might hamper the free circulation of securities. For the latter class of transactions a fixed duty of two annas is proposed, as the operations are frequently conducted on a narrow margin.

3. *Clause 3* (ii) has been altered so as to retain the existing rates of duty for bills or notes of which the amount does not exceed Rs 600. Small *hundis* and similar petty transactions will thus be exempted from the enhancement in duty.

4. *Clause 3* (iii) has been altered so as to distinguish between debentures which are transferable by delivery, and those which require an endorsement or separate deed of transfer. The latter are left at their present rate of duty, as they will be amenable, whenever they change hands, to the increased transfer duty under article 62. Debentures payable to bearer, however, will be subject to the higher rate originally proposed, as they escape transfer duty. This is on the analogy of the enhanced rate now proposed on securities issued under section 8 of the Act.

4. A new clause 3 (iv) has been introduced, so as to bring the duty on brokers' notes ("bought and sold" notes) into line with the enhanced duties on agreements to sell (article 5). Some doubt has been expressed whether certain classes of transactions which it was intended to tax under article 5 could not be passed under article 43, and it is desirable to prevent possible evasion of the new duties.

5. The Bill has been published in the Gazette of India of the 26th February 1910.

6. We think that the Bill has not been so altered as to require re-publication, and we recommend that it be passed as now amended.

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 4th March, 1910, and is hereby promulgated for general information :—

ACT NO. VII OF 1910.

An Act Further to amend the Court-fees Act, 1870.

WHEREAS it is expedient further to amend the Court-fees Act, 1870; It is hereby enacted as follows :—

1. This Act may be called the Court-fees (Amendment) Act, 1910.

2. In Schedule I to the Court-fees Act, 1870, as amended by the Amendment of Act II, 1870, Schedule I, 1889, the following amendments shall be made, namely :—

(i) in article 11, for the entries in the second and third columns, the following shall be substituted, namely :—

When the amount or value of the property in respect of which the grant of probate or letters is made exceeds one thousand rupees, but does not exceed ten thousand rupees.	Two per centum on such amount or value.
--	---

When such amount or value exceeds ten thousand rupees, but does not exceed fifty thousand rupees.

Two and one-half per centum on such amount or value

When such amount or value exceeds fifty thousand rupees.

Three per centum on such amount or value.

Provided that when, after the grant of a certificate under the Succession Certificate Act, 1889, or under the Regulation of the Bombay Code No. VIII of 1827, in respect of any property included in an estate, a grant of probate or letters of administration is made in respect of the same estate, the fee payable in respect of the latter grant shall be reduced by the amount of the fee paid in respect of the former grant.

(ii) in article 12A, for the entries in the second and third columns, the following shall be substituted, namely :—

(1) As regards debts and securities.

The same fee as would be payable in respect of a certificate under the Succession Certificate Act, 1889, or in respect of an extension of such a certificate, as the case may be.

(2) As regards other property in respect of which the certificate is granted—		When such amount or value exceeds fifty thousand rupees,	Three per centum on such amount or value.
When the amount or value of such property exceeds one thousand rupees, but does not exceed ten thousand rupees	Two per centum on such amount or value		
When such amount or value exceeds ten thousand rupees, but does not exceed fifty thousand rupees.	Two and one-half per centum on such amount or value.	3. Nothing in this Act shall apply to any probate, letters of administration or certificate in respect of which the fee payable under the law for the time being in force has been paid prior to the commencement of this Act, but which have not been issued	

LEGISLATIVE DEPARTMENT.

WE, the undersigned, Members of the Select Committee to which the Bill further to amend the Court-fees Act, 1870, was referred, have considered the Bill, and have now the honour to submit this our Report.

2. The Bill has been published in the Gazette of India of the 26th February 1910

3 We have no alterations to suggest and we recommend that the Bill as introduced be passed

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 4th March, 1910, and is hereby promulgated for general information:—

ACT No. VIII OF 1910.

An Act further to amend the Indian Tariff Act, 1894.

WHEREAS it is expedient further to amend the Indian Tariff Act, 1894, It is hereby enacted as follows:—

1. (1) This Act may be called the Indian Tariff (Amendment) Act, 1910, and
Short title and com- (Amendment) Act, 1910, and
mencement.

(2) It shall be deemed to have come into force on the 25th day of February 1910.

2. For Schedule III to the Indian Tariff Act, 1894, as amended by the Schedule for Schedule Indian Tariff Act (1894) III, Act VIII, 1894. Amendment Act, 1895, the Indian Tariff (Amendment) Act, 1906, and the Indian Tariff (Amendment) Act, 1908, the Schedule appended to this Act shall be substituted.

3 In Schedule IV to the Indian Tariff Act, Amendment of 1894, as amended by the Schedule IV, Act Indian Tariff Act (1894) VIII, 1894. Amendment Act, 1896, the following amendments shall be made, namely:—

(i) In No. 11, the entries—

"Tobacco, unmanu- factured.	Free.
Tobacco, manufac- tured.	..	ad valorem	Five per cent.

shall be omitted.

(ii) In No. 15, the entries—

"Silver bullion or coin, except current coin of Government of India, which is free	.	ad valorem	Five per cent."
---	---	------------	-----------------

shall be omitted.

(iii) In No. 16, in the fifth column, opposite the entry "Petroleum", for the words "One anna" the words "One anna and six pies" shall be substituted.

4. The Indian Tariff (Amendment) Act, 1906, and the Indian Tariff (Amendment) Act, 1908, are hereby repealed.

SCHEDULE III.—(IMPORT TARIFF.)

LIQUORS, OPIUM, SALT, SALTED FISH, TOBACCO AND SILVER

C. W. N. GRAHAM.

The 3rd March 1910.

WE regret we are unable to sign the Report of the Committee, because we are not satisfied that the condition of the finances of the country is such as to necessitate the imposition of fresh taxation. We fear the need for such taxation has arisen owing to the fact that the revenue under several heads has been under-estimated. Notably has this been, we think, the case with opium revenue. The Hon'ble Finance Member estimates that the average price per chest for the next financial year will be Rs. 1,750. Those, however, who are well acquainted with the conditions of opium trade, are strongly of opinion that, having regard to the circumstances of the Chinese market, Rs. 2,000 per chest will be a safe estimate. The latter figure means an increase of over 90 lakhs in the estimated revenue from opium.

In any case we are unable to agree to the proposed enhancement of the duty on silver, as also on petroleum. The increased duty on petroleum will obviously fall on the poorer classes of the country. The increased duty on silver—nearly 17 per cent. in place of the present 5 per cent—will, by lowering the price of silver, seriously disorganise our trade with China, and will impose an additional burden on the mill industry of the country, which is just now passing through a time of great difficulty. The question of the future of silver in this country is a most important question which we think ought to be considered in all its aspects by a Commission of competent men before any action is taken in regard to it. The present proposal, moreover, comes at a most inopportune moment, because it really means a blow to the first great industry of the country after agriculture at a time when it is least able to bear it, and an advantage conferred on its foreign rivals which they will not be slow to use. We are of opinion that, if additional money is necessary, it will be a far less objectionable plan to put an extra import-duty on sugar, as also an export-duty on jute, of which we have a monopoly in the world. A countervailing excise may be levied on jute if it is imperative to safeguard the interests of free trade.

PART V.

Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council, and Bills published under Rule 23.

The following Report of the Select Committee on the Bill to amend the law relating to the supply and use of electrical energy was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 4th March 1910:—

GOVERNMENT OF INDIA. LEGISLATIVE DEPARTMENT.

WE, the undersigned, Members of the Select Committee to which the Bill to amend

From Chief Commissioner, Coorg, No. 1583, dated 20th August 1909; from High Court, Calcutta, No. 3112, dated 23rd August 1909. [Papers No. 1]

From H. W. Everett, Esq, Professor of Electrical and Mechanical Engineering, Sibpur Engineering College, dated 10th September 1909. [Paper No. 2.]

From Government, Madras, No. 1056-W, dated 28th September 1909, and enclosure; from Agent to Governor General and Chief Commissioner, Baluchistan, No. 4712, dated 1st October 1909, from Government, Eastern Bengal and Assam, No. 3615-J, dated 30th September 1909, from Government, Burma, No. 2074—361-G, dated 27th September 1909, from Government, United Provinces, No. 1196—312 R, dated 28th September 1909; from Chief Commissioner, Central Provinces, No. 1582—VII 7-20, dated 25th September 1909, from Chief Commissioner, Ajmer-Merwara, No. 1255, dated 14th September 1909, from Agent to Governor General and Chief Commissioner, North-West Frontier Province, No. 1150 N, dated 19th September 1909. [Paper No. 3.]

From Major-General Beresford Lovett, Secretary in India to United Provinces Power Association, dated 11th October 1909. [Papers No. 4.]

Endorsement by Public Works Department, No. 1900, dated 4th November 1909, and enclosures. [Papers No. 5.]

From Government, Punjab, No. 612 (Commerce and Industry), dated 10th November 1909, and enclosures. [Papers No. 6.]

From Government, United Provinces, No. 1336—312, dated 16th November 1909, and enclosures. [Papers No. 7.]

the law relating to the supply and use of electrical energy was referred, ~~have considered~~ the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the

Office Memoranda by Public Works Department, No. 1747, dated 25th October 1909, and No 1938 Elec., dated 15th November 1909, and enclosures. [Papers No. 8.]

From Government, Bengal, No 264—T M P. I., dated 4th November 1909, No. 750 M. P. I., dated 9th November 1909, and enclosures; and No. 816 M. P. I., dated 20th November 1909, and enclosures. [Papers No. 9.]

Endorsement by Public Works Department, No. 2014 Elec., dated 2nd December 1909, and enclosures. [Papers No. 10.]

From Government, Bombay, No C. W. 2760, dated 25th November 1909, and enclosure. [Papers No. 11.]

From Government, Madras, No. 1450 W., dated 18th December 1909, and enclosure. [Papers No. 12.]

Bill as amended by us
annexed thereto.

2 *Clause 2*—We have redrafted the definition of "energy" so as to make it include the substance of the definition of "purpose", which we have omitted. We have added a definition of "public lamp."

3 *Clause 3*.—In sub-clause (2) (a) (ii) we have substituted "the General Officer Commanding the Division" for "the Commander-in-Chief in India", as the Army Department can ensure all important cases being referred to higher authority if necessary. We have omitted sub-clause (3) of the Bill as introduced as the unrestricted nature of the power to grant licenses which is now conferred appears to us to make any such saving unnecessary.

4. *Clause 4*.—We have deleted the words "not being a local authority" in sub-clause (1), sub-heads (c) and (e), as we see no reason for differentiating between local authorities and companies in the matter of revocation of licenses.

5. *Clause 5*.—We have transposed sub-clauses (d) and (e) of the Bill as introduced and have added words to shew more clearly the position of a mortgagee at the time when an undertaking is purchased.

In sub-clause (f) we have added words to bring the provision into line with the corresponding provision in clause 8. We have also slightly altered the proviso so as to make it clear that the power of removal conferred on the Local Government is limited to works in any street.

6 *Clause 6*—We have made similar alterations to those last described in this clause.

7. *Clause 7*.—We have altered the maximum period, after which an undertaking may be compulsorily expropriated, from 42 years to 50 years, and the subsequent recurring period from 10 to 20 years. It appears to us that during so short a period as ten years the licensee would not have sufficient incentive to extend his works and add to his capital liabilities. We have also set out the terms of purchase, heretofore incorporated by reference to clause 5, and we have provided for an addition not exceeding 20 per cent. being paid over and above the market value of the lands, buildings and plant as determined by the arbitrator. Although the Government has always been able to vary the purchase terms under clause 10 it appears to us desirable to show on the face of the new Act that some addition will generally be given to compensate the licensee for the compulsory acquisition of his undertaking.

8 *Clause 10*.—In view of the changes we have made in clause 7 we have reverted to the wording of the Act of 1903 by substituting "with the previous sanction" for "subject to the control" of the Governor General in Council in this clause which empowers the Local Government to vary the purchase terms when granting licenses.

9 *Clause 12*—We have omitted the new proviso to sub-clause (1) proposed by the Bill as introduced, as we consider that the local authority is sufficiently safeguarded by the provisions of clause 16. In sub-clause (2) which forbids the placing of electric supply lines or works on private property subject to the exceptions in the proviso, we have slightly enlarged the scope of the proviso in the interests of licensees. The rights of the owners of property are, we consider, fully safeguarded by the second proviso, by the new sub-clause (3), and by sub-clause (4).

10. *Clause 22*—We have inserted a new proviso, based on the recently enacted Electric Lighting Act, 1909, in place of that in the Bill as introduced, as we believe it will be more acceptable both to licensees and the public.

11. *Clause 23*—In sub-clause (1), we have omitted the last two lines of the Bill referring to rebates, and the provision now agrees with the corresponding one in the English law. The liberty of granting rebates should, we think, be left entirely to the licensee, subject to the provision that no undue preference is shown. We have omitted sub-clause (3) of the Bill as introduced as we consider that any disputes which arise as to undue preference can only be settled satisfactorily by a court of law.

12. *Clause 24*.—We have widened the scope of the proviso to this clause so as to render it illegal for a licensee to cut off a consumer for non-payment of charges while any *bona fide* dispute is under consideration by an Electric Inspector.

13. *Clause 26*.—On further consideration we have omitted this clause of the Bill as introduced. The clause, which is in the schedule of the Act of 1903, was objected to at the time that enactment was under discussion and is still held to be unduly restrictive. Government, on the other hand, has sufficient power under the rules and under clause

24. sub-clause (2) of the Bill as amended, to forbid the use of dangerous or defective works.

14. *Clause 26 (formerly 27).*—We have transposed the 6th and 7th sub-clauses of the Bill and have somewhat extended the former—now sub-clause (7)—for the protection of the consumer in cases where, as in Bombay, special systems of charging for electricity, involving special apparatus beyond the primary meter referred to in sub-clause (1), are in force. In sub-clause (6), (formerly (7).) we have reinserted provision for persons other than Electric Inspectors deciding disputes and have made other minor changes to render the intention of the clause clearer. The explanation has been extended so as to cover the alterations referred to.

15. *Clause 27 (formerly 28).*—We have inserted words to enable conditions to be imposed where sanction is given under this clause to the supply by a licensee of energy outside his authorized area, and we have added a new proviso to protect other licensees from unfair competition, as has been done in the Electric Lighting Act, 1909.

16. *Clause 28 (formerly 29).*—In the Bill as introduced the distinction between Part II and Part III was between the supply of energy on the one hand and the use of energy on the other, so that clause 29 of that Bill, dealing with supply by non-licensees, was inserted in the former Part. We have, now on further consideration transferred the clause to Part III with a new heading. We have also recast the clause so as to prohibit the unauthorized supply of energy instead of the unauthorized breaking up of streets. A person desiring to engage in the business of supplying energy without a license will require the sanction of the Local Government. We have also added a proviso to protect licensees' undertakings from unreasonable competition with unlicensed undertakings.

17. *Clause 29.*—Clause 29 is new and provides for the conferment on non-licensees of statutory powers in connection with the breaking up of streets. It has been pointed out that in the absence of express statutory authority neither the local authority nor the Local Government can authorise the breaking up of streets which may be necessary for carrying on electrical works under Part III. Nor can a local authority (not being a licensee) break up the streets under its own control, for the purpose of public electric lighting, in the absence of special power in its Municipal Act, a case which is provided for by sub-clause (2). Sub-clause (4) subjects every order under the clause to revision by the Local Government.

18. *Clause 33.*—In sub-clause (2), we have widened the scope of sub-head (b) by substituting the words "any person" for the words "the public", so as to safeguard employees.

19. *Clause 34.*—In addition to some verbal changes we have struck out the latter part of sub-clause 2 (b) and in place of it have inserted a new sub-head (c), following closely the English law. The provision omitted was, we consider, too wide.

20. *Clause 36.*—We have recast both the sub-clauses of the Bill as introduced and have added a new sub-clause (3) providing for an appeal to Government from any decision of an Electric Inspector not expressly declared to be final.

21. *Clause 39.*—Licensees having been unable to obtain convictions under section 39 (1) of the Indian Electricity Act, 1903, even where the circumstantial evidence has been strong, we have added words to this clause to make the existence of artificial means for the abstraction of energy *prima facie* evidence of dishonest abstraction.

22. *Clause 41.*—The slight change made in this clause is consequential to the alteration we have suggested in clause 28 (formerly 29).

23. *Clause 44.*—In sub-heads (a) and (c) we have also made certain consequential alterations and in sub-head (c) we have extended the scope of the provisions relating to interference with meters. We have further amplified the latter part of the clause in order to give greater protection to licensees by declaring that certain acts shall be *prima facie* evidence of an offence having been committed.

24. *Clause 45.*—We have provided for the punishment of imprisonment for breaches of this provision. We are advised that it is by no means difficult to extinguish the public lamps over a large area, and we think that a severer penalty than a fine should be provided for such cases.

25. *Clause 55.*—In view of the new sub-clause (3), which we have added to clause 36, we have omitted the latter part of this clause.

26. *Clause 58.*—In sub-clause (1) we have added words providing that applications for licenses, which may be pending under the Act of 1903, shall be deemed to have been made under this Act. In sub-clause (2) we have extended the saving so as to cover all licenses and agreements in existence at the commencement of the new Act. It will be open to any person holding such a license, or being a party to such an agreement, who desires to have the benefit of this Act, to have his existing powers revoked by agreement and simultaneously to take out a new license under this Act. Otherwise the provisions of the Schedule to the existing Act will remain in force as regards such licenses.

27. *The Schedule.*—In clause II we have added a sub-clause (e) allowing the Local Government to accept the report of a licensee's auditor. In clause IV we have reinserted the corresponding words of the existing Act in place of the latter part of the clause in the Bill as introduced. In clause VI we have made some changes to make it clear that the provisos are conditions on which a licensee gives and continues to give a supply of energy. Clause VII of the Bill as introduced was somewhat obscure, and we have therefore altered its provisions considerably in order to make its meaning clearer. The other changes in the Schedule do not call for specific remark.

28. The publication ordered by the Council has been made as follows :—

*The Indian Electricity Bill.**Part I.—Preliminary.**(Part II.—Supply of Energy.)*

No. II.

[The bracketed marginal references relate to sections of the Indian Electricity Act, 1903, unless otherwise specified.]

The italicised portions indicate fresh matter or alterations as compared with the Act of 1903.

The portions printed in antique type denote the alterations proposed by the Select Committee.]

BILL

TO

Amend the law relating to the supply and use of electrical energy.

WHEREAS it is expedient to amend the law relating to the supply and use of electrical energy; It is hereby enacted as follows—

PART I.

PRELIMINARY.

1. (1) This Act may be called the Indian Electricity Act, 1910.
Short title, extent and commencement

(2) It extends to the whole of British India, inclusive of British Baluchistan and the Santhal Parganas; and

(3) It shall come into force on such date as the Governor General in Council may, by notification in the Gazette of India, direct in this behalf.

2. In this Act, expressions defined in the Indian Telegraph Act, 1885, have the meanings assigned to them in that Act, and, unless there is anything repugnant in the subject or context,—

(a) "aerial line" means any electric supply-line which is placed above ground and in the open air

(b) "area of supply" means the area within which alone a licensee is for the time being authorized by his license to supply energy.

(c) "consumer" means any person who is supplied with energy by a licensee, or whose premises are for the time being connected for the purposes of a supply of energy with the works of a licensee:

(d) "daily fine" means a fine for each day on which an offence is continued after conviction therefor:

(e) "distributing main" means the portion of any main with which a service line is, or is intended to be, immediately connected:

(f) "electric supply-line" means a wire, conductor or other means used for conveying, transmitting or distributing energy together with any casing, coating, covering, tube, pipe or insulator enclosing surrounding or supporting the same or any part thereof or any apparatus, connected therewith for the purpose of so conveying, transmitting or distributing such energy:

(g) "energy" means electrical energy when generated, transmitted, supplied, or used for any purpose except the transmission of a message.

(h) "licensee" means any person licensed under Part II to supply energy:

(i) "main" means any electric supply-line through which energy is, or is intended to be, supplied by a licensee to the public.

(j) "prescribed" means prescribed by rules made under the Act:

(k) "public lamp" means an electric lamp used for the lighting of any street:

(l) "service line" means any electric supply-line through which energy is, or is intended to be, supplied by a licensee to a consumer either from a distributing main or immediately from the licensee's premises:

(m) "street" includes any way, road, lane, square, court, alley, passage or open space, whether a thoroughfare or not, over which the public have a right of way, and also the roadway and footway over any public bridge or causeway and

(n) "works" includes electric supply-lines and any buildings, machinery or apparatus required to supply energy and to carry into effect the objects of a license granted under Part II.

PART II.

SUPPLY OF ENERGY.

Licenses

3. (1) The Local Government may, on application made in the prescribed form and on payment of the prescribed fee (if any), grant to any person a license to supply energy in any specified area, and also to lay down or place electric supply-lines for the conveyance and transmission of energy,

(a) where the energy to be supplied is to be generated outside such area, from a generating station situated outside such area to the

The Indian Electricity Bill.
(Part II.—Supply of Energy.)

boundary of such area, or

- (b) where energy is to be conveyed or transmitted from any place in such area to any other place therein, across an intervening area not included therein, across such area.

(2) In respect of every such license and the grant thereof the following provisions shall have effect, namely —

- (a) any person applying for a license under this Part shall publish a notice of his application in the prescribed manner and with the prescribed particulars, and the license shall not be granted

- (i) until all objections received by the Local Government with reference thereto have been considered by it

Provided that no objection shall be so considered unless it is received before the expiration of three months from the date of the first publication of such notice as aforesaid, and

- (ii) until, in the case of an application for a license for an area including the whole or any part of any cantonment, fortress, arsenal, dockyard or camp or of any building or place in the occupation of the Government for naval or military purposes, the Local Government has ascertained that there is no objection to the grant of the license on the part of the General Officer Commanding the Division.

- (b) where an objection is received from any local authority concerned, the Local Government shall, if in its opinion the objection is insufficient, record in writing and communicate to such local authority its reasons for such opinion,

- (c) no application for a license under this Part shall be made by any local authority except in pursuance of a resolution passed at a meeting of such authority held after one month's previous notice of the same and of the purpose thereof has been given in the manner in which notices of meetings of such local authority are usually given,

- (d) a license under this Part may prescribe such terms as to the limits within which, and the conditions under which, the supply of energy is to be compulsory or permissive, and as to the limits of price to be charged in respect of the supply of energy, and generally as to such matters as the Local Government may think fit,

- (e) the grant of a license under this Part for any purpose shall not in any way hinder or restrict the grant of a license to another person within the same area of supply for a like purpose,

- (f) the provisions contained in the Schedule shall be deemed to be incorporated with, and to form part of, every license granted under this Part, save in so far as they are expressly added to, varied or excepted by the license, and shall, subject to any such additions, variations or exceptions which the Local Government is hereby empowered to make, apply to the undertaking authorized by the license:

Provided that, where a license is granted, in accordance with the provisions of clause IX of the Schedule for the supply of energy to other licensees for distribution by them, then, in so far as such license relates to such supply, the provisions of clauses IV, V, VI, VII, VIII and XII of the Schedule shall not be deemed to be incorporated with the license.

- (3) The exercise of the powers conferred on the Local Government by this section shall be subject to the control of the Governor General in Council

4. (1) The Local Government may, if in its opinion the public interest so requires, revoke a license in any of the following cases, namely:—

- (a) where the licensee, in the opinion of the Local Government, makes wilful and unreasonably prolonged default in doing anything required of him by or under this Act,

- (b) where the licensee breaks any of the terms or conditions of his license the breach of which is expressly declared by such license to render it liable to revocation;

- (c) where the licensee fails, within the period fixed in this behalf by his license or any longer period which the Local Government may substitute therefor by order under sub-section (3), clause (b), and before exercising any of the powers conferred on him thereby in relation to the execution of works,—

- (i) to show, to the satisfaction of the Local Government, that he is in

The Indian Electricity Bill.
(Part II.—Supply of Energy.)

a position fully and efficiently to discharge the duties and obligations imposed on him by his license, or

(ii) to make the deposit or furnish the security required by his license;

(d) where the licensee is, in the opinion of the Local Government, unable, by reason of his insolvency, fully and efficiently to discharge the duties and obligations imposed on him by his license.

(2) Where the Local Government might, under sub-section (1), revoke a license, it may, instead of revoking the license, permit it to remain in force subject to such further terms and conditions as it thinks fit to impose, and any further terms or conditions so imposed shall be binding upon, and be observed by the licensee, and shall be of like force and effect as if they were contained in the license.

(3) Where in its opinion the public interest so permits, the Local Government may, on the application or with the consent of the licensee, and, if the licensee is not a local authority, after consulting the local authority (if any) concerned,—

(a) revoke a license as to the whole or any part of the area of supply upon such terms and conditions as it thinks fit, or

(b) make such alterations or amendments in the terms and conditions of a license including the provisions specified in section 3, sub-section (2), clause (f), as it thinks fit.

5. Where the Local Government revokes' *under section 4, sub-section (1), the license of a licensee, not being a local authority, the following provisions shall have effect, namely:—*

Provisions where license of licensee, not being a local authority, is revoked.

(a) the Local Government shall serve a notice of the revocation upon the licensee, and, where the whole of the area of supply is included in the area for which a single local authority is constituted, upon that local authority also, and shall in the notice fix a date on which the revocation shall take effect; and on and with effect from that date all the powers and liabilities of the licensee under this Act shall absolutely cease and determine;

(b) where a notice has been served on a local authority under clause (a), the local authority may, within three months after the service of the notice

with the written consent of the Local Government, by notice in writing, require the licensee to sell, and thereupon the licensee shall sell, the undertaking to the local authority on payment of the value of all lands, buildings, works, materials and plant of the licensee suitable to, and used by him for, the purpose of the undertaking, such value to be, in case of difference or dispute, determined by arbitration:

Provided that the value of such lands, buildings, works, materials and plant shall be deemed to be their fair market-value at the time of purchase, due regard being had to the nature and condition for the time being of such lands, buildings, works, materials and plant, and to the state of repair thereof, and to the circumstance that they are in such a position as to be ready for immediate working, and to the suitability of the same for the purposes of the undertaking, but without any addition in respect of compulsory purchase or of goodwill or of any profits which may be or might have been made from the undertaking, or of any similar considerations,

(c) where no purchase has been effected by the local authority under clause (b), and any other person is willing to purchase the undertaking, the Local Government may, if it thinks fit, with the consent of the licensee, or without the consent of the licensee in case the price is not less than that for which the local authority might have purchased the same, require the licensee to sell, and thereupon the licensee shall sell, the undertaking to such other person,

(d) where no purchase has been effected under clause (b) or clause (c) within such time as the Local Government may consider reasonable, or where the whole of the area of supply is not included in the area for which a single local authority is constituted, the Local Government shall have the option of purchasing the undertaking, and, if the Local Government elects to purchase, the licensee shall sell the undertaking to the Local Government upon terms and conditions similar to those set forth in clause (b);

*The Indian Electricity Bill.**(Part II.—Supply of Energy.)*

(e) where a purchase has been effected under any of the preceding clauses,

(i) the undertaking shall vest in the purchaser free from any debts, mortgages or similar obligations of the licensee or attaching to the undertaking.

Provided that any such debts, mortgages or similar obligations shall attach to the purchase-money in substitution for the undertaking, and

(ii) the revocation of the license shall extend only to the revocation of the rights, powers, authorities, duties and obligations of the licensee from whom the undertaking is purchased, and, save as aforesaid, the license shall remain in full force, and the purchaser shall be deemed to be the licensee.

Provided that where the Local Government elects to purchase under clause (d), the license shall, after purchase, in so far as the Local Government is concerned, cease to have any further operation,

(f) where no purchase has been effected under any of the foregoing clauses, the licensee shall have the option of disposing of all lands, buildings, works, materials and plant belonging to the undertaking in such manner as he may think fit.

Provided that if the licensee does not exercise such option within a period of six months from the date on which the same became exercisable, the Local Government may forthwith cause the works of the licensee in, under, over, along or across any street to be removed and every such street to be reinstated, and recover the cost of such removal and reinstatement from the licensee,

(g) if the licensee has been required to sell the undertaking, and if the sale has not been completed by the date fixed in the notice issued under clause (a), the purchaser may, with the previous sanction of the Local Government, work the undertaking pending the completion of the sale.

6. (1) Where the Local Government revokes the license of a local authority under section 4, sub-section (1), and any person is willing to purchase the undertaking the Local Government may, if it thinks fit, require the local authority to sell, and thereupon the local authority shall sell, the undertaking to such person on such terms as the Local Government thinks just.

(2) Where no purchase has been effected under sub-section (1), the licensee shall have the option of disposing of all lands, buildings, works, materials and plant belonging to the undertaking in such manner as he may think fit.

Provided that, if the licensee does not exercise such option within a period of six months from the date on which the same became exercisable, the Local Government may forthwith cause the works of the licensee in, under, over, along or across any street to be removed and every such street to be reinstated, and recover the cost of such removal and reinstatement from the licensee.

7. (1) Where a license has been granted to any person not being a local authority, and the whole of the area of supply is included in the area for which a single local authority is constituted, the local authority shall, on the expiration of such period, not exceeding fifty years, and of every such subsequent period not exceeding twenty years, as shall be specified in this behalf in the license, have the option of purchasing the undertaking, and, if the local authority, with the previous sanction of the Local Government, elects to purchase, the licensee shall sell the undertaking to the local authority on payment of the value of all lands, buildings, works, materials and plant of the licensee suitable to, and used by him for, the purposes of the undertaking, such value to be, in case of difference or dispute, determined by arbitration.

Provided that the value of such lands, buildings, works, materials and plant shall be deemed to be their fair market-value at the time of purchase, due regard being had to the nature and condition for the time being of such lands, buildings, works, materials and plant, and to the state of repair thereof, and to the circumstance that they are in such a position as to be ready for immediate working, and to the suitability of the same for the purposes of the undertaking:

Provided also that there shall be added to such value as aforesaid such percentage, if any, not exceeding twenty per centum on that value as may be specified in the license, on account of compulsory purchase.

The Indian Electricity Bill.
(Part II.—Supply of Energy.)

(3) *Where—*

- (a) the local authority does not elect to purchase under sub-section (1), or
- (b) the whole of the area of supply is not included in the area for which a single local authority is constituted, or
- (c) a licensee supplies energy from the same generating station to two or more areas of supply, each controlled by its own local authority, and has been granted a license in respect of each area of supply,

the Local Government shall have the like option upon the like terms and conditions.

(3) Where a purchase has been effected under sub-section (1) or sub-section (2),

- (a) the undertaking shall vest in the purchasers, free from any debts, mortgages or similar obligations of the licensee or attaching to the undertaking:

Provided that any such debts, mortgages or similar obligations shall attach to the purchase-money in substitution for the undertaking; and,

- (b) save as aforesaid, the license shall remain in full force, and the purchaser shall be deemed to be the licensee:

Provided that where the Local Government elects to purchase under sub-section (2), the license shall, after purchase, in so far as the Local Government is concerned, cease to have any further operation.

(4) Not less than *two years'* notice in writing of any election to purchase under this section shall be served upon the licensee by the local authority or the Local Government, as the case may be.

(5) Notwithstanding anything hereinbefore contained, a local authority may, with the previous sanction of the Local Government, waive its option to purchase and enter into an agreement with the licensee for the working by him of the undertaking until the expiration of the next subsequent period referred to in sub-section (1), upon such terms and conditions as may be stated in such agreement.

- 8. Where, on the expiration of any of the periods referred to in section 7, sub-section (1), neither a local authority nor the Local Government purchases the undertaking

Provisions where no purchase and license revoked with consent of licensee.

and the license is, on the application or with the consent of the licensee, revoked, the licensee shall have the option of disposing of all lands, buildings, works, materials and plant belonging to the undertaking in such manner as he may think fit:

Provided that, if the licensee does not exercise such option within a period of six months the Local Government may proceed to take action as provided in section 5, clause (f) proviso.

9. (1) The licensee shall not, at any time without the previous consent in writing of the Local Government, acquire, by purchase or otherwise, the license or the undertaking of, or associate himself so far as the business of supplying energy is concerned with, any person supplying, or intending to supply, energy under any other license, and, before applying for such consent, the licensee shall give not less than one month's notice of the application to every local authority, both in the licensee's area of supply, and also in the area or district in which such other person supplies, or intends to supply, energy:

Provided that nothing in this sub-section shall be construed to require the consent of the Local Government for the supply of energy by one licensee to another in accordance with the provisions of clause IX of the Schedule

(2) The licensee shall not at any time assign his license or transfer his undertaking, or any part thereof, by sale, mortgage, lease, exchange or otherwise without the previous consent in writing of the Local Government.

(3) Any agreement relating to any transaction of the nature described in sub-section (1) or sub-section (2), unless made with, or subject to, such consent as aforesaid, shall be void.

10 Notwithstanding anything in sections 5, 7 and 8, the Local Government may, with the previous sanction of the Governor General in Council, in any license to be granted under this Act,—

General power for Government to vary terms of purchase.

- (a) vary the terms and conditions upon which and the periods on the expiration of which the licensee shall be bound to sell his undertaking, or

- (b) direct that, subject to such conditions and restrictions (if any) as it may think fit to impose, the provisions of the said sections or any of them shall not apply.

11 (1) Every licensee shall, unless expressly exempted from the liability by his license, or by order in writing of the Local Government, prepare and send to the Local Government or to such authority as the Local Government may appoint in this behalf, on or before the prescribed date in each year, an annual statement of accounts of his undertaking made up to such date, in such form, and containing such particulars as may be prescribed in this behalf.

Annual accounts of licensee.

(2) The licensee shall keep copies of such annual statement at his office and sell the same to any applicant at a price not exceeding five rupees per copy.

The Indian Electricity Bill.
(Part II.—Supply of Energy.)

Works.

12. (1) Any licensee may, from time to time but subject always to the provisions as to the opening and breaking up of streets, railways and tramways. *Provisions as to the opening and breaking up of streets, railways and tramways.* terms and conditions of his license, *within the area of supply, or, when permitted by the terms of his license to lay down or place electric supply-lines without the area of supply, without that area—*

- (a) open and break up the soil and pavement of any street, railway or tramway ;
- (b) open and break up any sewer, drain or tunnel in or under any street, railway or tramway ;
- (c) lay down and place electric supply-lines and other works ;
- (d) repair, alter or remove the same ; and
- (e) do all other acts necessary for the due supply of energy

(2) Nothing contained in sub-section (1) shall be deemed to authorize or empower a licensee, without the consent of the local authority or of the owner and occupier concerned, as the case may be, to lay down or place any electric supply-line or other work in, through or against any building, or on, over or under any land not dedicated to public use whereon, whereover or whereunder any electric supply-line or work has not already been lawfully laid down or placed by such licensee.

Provided that any support of an aerial line or any stay or strut required for the sole purpose of securing in position any support of an aerial line may be fixed on any building or land or, having been so fixed, may be altered, notwithstanding the objection of the owner or occupier of such building or land, if the District Magistrate or, in a Presidency-town or Rangoon, the Commissioner of Police by order in writing so directs

Provided, also, that, if at any time the owner or occupier of any building or land on which any such support, stay or strut has been fixed shows sufficient cause, the District Magistrate or, in a Presidency-town or Rangoon, the Commissioner of Police may by order in writing direct any such support, stay or strut to be removed or altered.

(3) When making an order under sub-section (2) the District Magistrate or the Commissioner of Police, as the case may be, shall fix the amount of compensation or of annual rent, or of both, which should in his opinion be paid by the licensee to the owner or occupier.

(4) Every order made by a District Magistrate or a Commissioner of Police under sub-section (2) shall be subject to revision by the Local Government

(5) Nothing contained in sub-section (1) shall be deemed to authorize or empower any licensee to open or break up any street not repairable by the Government or a local authority, or any railway or tramway, *except such streets, railways or tramways (if any), or such parts thereof, as he is specially authorised to break up by his license,* without the written consent of the person by whom the street is repairable or of the person

for the time being entitled to work the railway or tramway, unless with the written consent of the Local Government :

Provided that the Local Government shall not give any such consent as aforesaid, until the licensee has given notice, by advertisement or otherwise as the Local Government may direct, and within such period as the Local Government may fix in this behalf, to the person above referred to, and until all representations or objections received in accordance with the notice have been considered by the Local Government.

13. (1) Where the exercise of any of the powers of a licensee in relation to the execution of any works involves the placing of any works in, under, over, along or across any street, part of a street, railway, tramway, canal or waterway, the following provisions shall have effect, namely :—

- (a) not less than one month before commencing the execution of the works (not being a service line immediately attached, or intended to be immediately attached, to a distributing main, or the repair, renewal or amendment of existing works of which the character or position is not to be altered), the licensee shall serve upon the person responsible for the repair of the street or part of a street (hereinafter in this section referred to as "the repairing authority") or upon the person for the time being entitled to work the railway, tramway, canal or waterway (hereinafter in this section referred to as "the owner"), as the case may be, a notice in writing describing the proposed works, together with a section and plan thereof on a scale sufficiently large to show clearly the details of the proposed works, and not in any case smaller than one inch to eight feet vertically and sixteen inches to the mile horizontally, and intimating the manner in which, and the time at which, it is proposed to interfere with or alter any existing works, and shall, upon being required to do so by the repairing authority or owner, as the case may be, from time to time give such further information in relation thereto as may be desired ;

- (b) if the repairing authority intimates to the licensee that it disapproves of such works, section or plan, or approves thereof subject to amendment, the licensee may, within one week of receiving such intimation, appeal to the Local Government, whose decision, after considering the reasons given by the repairing authority for its action, shall be final ;

- (c) if the repairing authority fails to give notice in writing of its approval or

The Indian Electricity Bill.
(Part II.—Supply of Energy.)

disapproval to the licensee within one month, it shall be deemed to have approved of the works, *section* and plan, and the licensee, after giving not less than forty-eight hours' notice in writing to the repairing authority, may proceed to carry out the works in accordance with the notice and the *section* and plan served under clause (a) ;

(d) if the owner disapproves of such works, *section* or plan, or approves thereof subject to amendment, he may, within three weeks after the service of the notice under clause (a), serve a requisition upon the licensee demanding that any question in relation to the works or to compensation, or to the obligations of the owner to others in respect thereof, shall be determined by arbitration, and thereupon the matter shall, unless settled by agreement, be determined by arbitration ;

(e) where no requisition has been served by the owner upon the licensee under clause (d), within the time named, the owner shall be deemed to have approved of the works, *section* and plan, and in that case, or where after a requisition for arbitration the matter has been determined by arbitration, the works may, upon payment or securing of compensation, be executed according to the notice and the *section* and plan, subject to such modifications as may have been determined by arbitration or agreed upon between the parties ;

(f) where the works to be executed consist of the laying of any underground service line immediately attached, or intended to be immediately attached, to a distributing main, the licensee shall give to the repairing authority or the owner, as the case may be, not less than forty-eight hours' notice in writing of his intention to execute such works ;

(g) where the works to be executed consist of the repair, renewal or amendment of existing works of which the character or position is not to be altered, the licensee shall, except in cases of emergency, give to the repairing authority, or to the owner, as the case may be, not less than forty-eight hours' notice in writing of his intention to execute such works, and, on the expiry of such notice, such works shall be commenced forthwith and shall be carried on with all reasonable despatch, and, if possible, both by day and by night until completed.

(h) Where the licensee makes default in complying with any of these provisions, he shall make full compensation for any loss or damage incurred by reason thereof, and, where any difference or dispute arises as to the amount of such

compensation, the matter shall be determined by arbitration.

(3) Notwithstanding anything in this section, the licensee may, in case of emergency due to the breakdown of an underground electric supply-line, after giving notice in writing to the repairing authority or the owner, as the case may be, of his intention to do so, place an aerial line without complying with the provisions of sub-section (1) ;

Provided that such aerial line shall be used only until the defect in the underground electric supply-line can be made good, and in no case (unless with the written consent of the Local Government) for a period exceeding six weeks, and shall be removed as soon as may be after such defect is removed.

14. (1) Any licensee may alter the position of [s. 14.]

Alteration of pipes or any pipe (not forming, in wires a case where the licensee is not a local authority, part of a local authority's main sewer), or of any wire under or over any place which he is authorized to open or break up, if such pipe or wire is likely to interfere with the exercise of his powers under this Act ; and any person may alter the position of any electric supply-lines or works of a licensee under or over any such place as aforesaid, if such electric supply lines or works are likely to interfere with the lawful exercise of any powers vested in him

(2) In any such case as aforesaid the following provisions shall, in the absence of an agreement to the contrary between the parties concerned, apply, namely —

(a) not less than one month before commencing any alteration, the licensee or other person desiring to make the same (hereinafter in this section referred to as "the operator") shall serve upon the person for the time being entitled to the pipe, wire, electric supply-lines or works, as the case may be (hereinafter in this section referred to as "the owner"), a notice in writing, describing the proposed alteration, together with a *section* and plan thereof on a scale sufficiently large to show clearly the details of the proposed works, and not in any case smaller than one inch to eight feet vertically and sixteen inches to the mile horizontally and intimating the time when it is to be commenced, and shall subsequently give such further information in relation thereto as the owner may desire ;

(b) within fourteen days after the service of the notice, *section* and plan upon the owner, the owner may serve upon the operator a requisition to the effect that any question arising upon the notice, *section* or plan shall be determined by arbitration, and thereupon the matter shall, unless settled by agreement, be determined by arbitration ;

(c) every arbitrator to whom a reference is made under clause (b) shall have regard to any duties or obligations

*(The Indian Electricity Bill.
(Part II.—Supply of Energy.)*

which the owner is under, and may require the operator to execute any temporary or other works so as to avoid as far as possible interference therewith,

- (d) where no requisition is served upon the operator under clause (b) within the time named, or where such a requisition has been served and the matter has been settled by agreement or determined by arbitration, the alteration may, upon payment or securing of any compensation accepted or determined by arbitration, be executed in accordance with the notice, section and plan and subject to such modifications as may have been determined by arbitration or agreed upon between the parties;
- (e) the owner may, at any time before the operator is entitled to commence the alteration, serve upon the operator a statement in writing to the effect that he desires to execute the alteration himself and requires the operator to give such security for the repayment of any expenses as may be agreed upon or, in default of agreement, determined by arbitration;
- (f) where a statement is served upon the operator under clause (e), he shall, not less than forty-eight hours before the execution of the alteration is required to be commenced, furnish such security and serve upon the owner a notice in writing intimating the time when the alteration is required to be commenced, and the manner in which it is required to be made, and thereupon the owner may proceed to execute the alteration as required by the operator;
- (g) where the owner declines to comply, or does not, within the time and in the manner prescribed by a notice served upon him under clause (f), comply with the notice the operator may himself execute the alteration;
- (h) all expenses properly incurred by the owner in complying with a notice served upon him by the operator under clause (f) may be recovered by him from the operator.

(3) Where the licensee or other person desiring to make the alteration makes default in complying with any of these provisions, he shall make full compensation for any loss or damage incurred by reason thereof, and, where any difference or dispute arises as to the amount of such compensation, the matter shall be determined by arbitration.

Laying of electric supply-lines or other works near sewers, pipes or other electric supply-lines or works

15 (1) Where—

- (a) the licensee requires to dig or sink any trench for laying down any new electric supply-lines or other works, near to which any sewer, drain, water-course or work under the

control of the Local Government or of any local authority, or any pipe, syphon, electric supply-line or other work belonging to any duly authorized person, has been lawfully placed, or

- (b) any duly authorized person requires to dig or sink any trench for laying down or constructing any new pipes or other works, near to which any electric supply-lines or works of a licensee have been lawfully placed, the licensee or such duly authorized person, as the case may be (hereinafter in this section referred to as "the operator"), shall, unless it is otherwise agreed upon between the parties interested or in case of sudden emergency, give to the Local Government or local authority, or to such duly authorized person, or to the licensee, as the case may be (hereinafter in this section referred to as "the owner"), not less than forty-eight hours' notice in writing before commencing to dig or sink the trench, and the owner shall have the right to be present during the execution of the work, which shall be executed to the reasonable satisfaction of the owner.

(2) Where the operator finds it necessary to undermine, but not to alter, the position of any pipe, electric supply-line or work, he shall support it in position during the execution of the work, and before completion shall provide a suitable and proper foundation for it where so undermined.

(3) Where the operator (being the licensee) lays any electric supply-line across, or so as to be liable to touch, any pipes, lines or service-pipes or service-lines belonging to any duly authorized person or to any person supplying, transmitting or using energy under this Act, he shall not, except with the written consent of such person and in accordance with section 34, sub-section (1), lay his electric supply-lines so as to come into contact with any such pipes, lines or service-pipes or service lines.

(4) Where the operator makes default in complying with any of the provisions of this section, he shall make full compensation for any loss or damage incurred by reason thereof.

(5) Where any difference or dispute arises under this section, the matter shall be determined by arbitration.

(6) Where the licensee is a local authority, the references in this section to the local authority and to sewers, drains, water-courses or works under its control shall not apply.

16. (1) Where any person, in exercise of any of the powers conferred by or under this Act, opens or breaks up the soil or pavement of any street, railway or tramway, or any sewer, drain or tunnel, he shall—

- (a) immediately cause the part opened or broken up to be fenced and guarded;
- (b) before sunset cause a light or lights, sufficient for the warning of passengers, to be set up and maintained until sunrise against or near the part opened or broken up;

*The Indian Electricity Bill.**(Part II.—Supply of Energy.)*

(c) with all reasonable speed fill in the ground and reinstate and make good the soil or pavement, or the sewer, drain or tunnel, opened or broken up, and carry away the rubbish occasioned by such opening or breaking up; and,

(d) after reinstating and making good the soil or pavement, or the sewer, drain or tunnel, broken or opened up, keep the same in good repair for three months and for any further period, not exceeding nine months, during which subsidence continues.

(2) Where any person fails to comply with any of the provisions of sub-section (1), the person having the control or management of the street, railway, tramway, sewer, drain or tunnel in respect of which the default has occurred, may cause to be executed the work which the defaulter has delayed or omitted to execute, and may recover from him the expenses incurred in such execution.

(3) Where any difference or dispute arises as to the amount of the expenses incurred under sub-section (2), the matter shall be determined by arbitration.

17. (1) A licensee shall, before laying down or placing, within ten yards of any part of any telegraph-line, any electric-supply line or other works (not being service-lines immediately attached or intended to be immediately attached to a distributing main, or electric supply-lines for the repair, renewal or amendment of existing works of which the character or position is not to be altered), give not less than ten days' notice in writing to the telegraph-authority, specifying—

(a) the course of the works or alterations proposed,

(b) the manner in which the works are to be utilized,

(c) the amount and nature of the energy to be transmitted, and

(d) the extent to, and manner in, which (if at all) earth returns are to be used;

and the licensee shall conform with such reasonable requirements, either general or special, as may be laid down by the telegraph-authority within that period for preventing any telegraph-line from being injuriously affected by such works or alterations:

Provided that, in case of emergency (which shall be stated by the licensee in writing to the telegraph-authority) arising from defects in any of the electric supply-lines or other works of the licensee, the licensee shall be required to give only such notice as may be possible after the necessity for the proposed new works or alterations has arisen.

(2) Where the works to be executed consist of the laying of any underground service-line immediately attached, or intended to be immediately attached, to a distributing main,

the licensee shall, not less than forty-eight hours before commencing the work, serve upon the telegraph-authority a notice in writing of his intention to execute such works

18. (1) Save as provided in section 13, sub-section (3), nothing in this Part shall be deemed

Aerial lines.

to authorize or empower a licensee to place any aerial line along or across any street, railway, tramway, canal or waterway unless and until the Local Government has communicated to him a general approval in writing of the methods of construction which he proposes to adopt:

Provided that the communication of such approval shall in no way relieve the licensee of his obligations with respect to any other consent required by or under this Act.

(2) Where any aerial line has been placed or maintained by a licensee in breach of the provisions of sub-section (1), the Local Government may require the licensee forthwith to remove the same, or may cause the same to be removed and recover from the licensee the expenses incurred in such removal.

(3) Where any tree standing or lying near an aerial line, interrupts or interferes with, or is likely to interrupt or interfere with, the conveyance or transmission of energy, a Magistrate of the first class or, in a Presidency town or Rangoon, the Commissioner of Police, may, on the application of the licensee, cause the tree to be removed or otherwise dealt with as he thinks fit.

(4) When disposing of an application under sub-section (3), the Magistrate or Commissioner of Police, as the case may be, shall, in the case of any tree in existence before the placing of the aerial line, award to the person interested in the tree such compensation as he thinks reasonable, and such person may recover the same from the licensee

19 (1) A licensee shall, in exercise of the powers conferred by or under this Act, cause as little damage, detriment and inconvenience as may be, and shall make full compensation for any damage, detriment or inconvenience caused by him or by any one employed by him.

(2) Save in the case provided for in section 12, sub-section (3), where any difference or dispute arises as to the amount or the application of such compensation, the matter shall be determined by arbitration.

Supply.

20. (1) A licensee or any person duly authorized by a licensee may, at any reasonable time, and on informing the occupier of his intention, enter any premises to which energy is or has been supplied by him, for the purpose of—

(a) inspecting and testing the electric supply lines, meters, fittings, works and apparatus for the supply of energy belonging to the licensee; or

The Indian Electricity Bill.
(Part II.—Supply of Energy.)

(b) ascertaining the amount of energy supplied, or the electrical quantity contained in the supply, or

(c) removing, where a supply of energy is no longer required, or where the licensee is authorized to take away and cut off such supply, any electric supply-lines, fittings, works or apparatus belonging to the licensee.

(2) A licensee or any person authorized as aforesaid may also, in pursuance of a special order in this behalf made by the District Magistrate or, in a Presidency-town or Rangoon, by the Commissioner of Police, and after giving not less than twenty-four hours' notice in writing to the occupier, enter any premises to which energy is or has been supplied, or is to be supplied, by him, for the purpose of examining and testing the electric wires, fittings, works and apparatus for the use of energy belonging to the consumer.

21. (1) A licensee shall not be entitled to prescribe any special form of appliance for utilizing energy supplied by him, or, save as provided by section 23, sub-section (2), or by section 26, sub-section (7), in any way to control or interfere with the use of such energy

Provided that no person may adopt any form of appliance, or use the energy supplied to him, so as unduly or improperly to interfere with the supply by the licensee of energy to any other person.

(2) Where any difference or dispute arises as to whether a licensee has prescribed any appliance or controlled or interfered with the use of energy in contravention of sub-section (1), the matter shall be either referred to an Electric Inspector and decided by him or, if the licensee or consumer so desires, determined by arbitration.

22. Where energy is supplied by a licensee every person within the area of supply shall, except in so far as is otherwise provided by the terms and conditions of the license, be entitled, on application, to a supply on the same terms as those on which any other person in the same area is entitled in similar circumstances to a corresponding supply.

Provided that no person shall be entitled to demand, or to continue to receive, from a licensee a supply of energy for any premises having a separate supply unless he has agreed with the licensee to pay to him such minimum annual sum as will give him a reasonable return on the capital expenditure and will cover other standing charges incurred by him in order to meet the possible maximum demand for those premises, the sum payable to be determined in case of difference or dispute by arbitration.

23. (1) A licensee shall not, in making any agreement for the supply of energy, show undue preference to any person, but may, save as aforesaid, make such charges for the supply of energy as may be agreed upon, not exceeding the limits imposed by his license.

(2) No consumer shall, except with the consent in writing of the licensee, use energy supplied to him under one method of charging in a manner for which a higher method of charging is in force.

24. Where any person neglects to pay any charge for energy or any other sum due from him to a licensee in respect of the supply of energy to him, the licensee may, after giving not less than seven clear days' notice in writing to such person and without prejudice to his right to recover such charge or other sum by suit, cut off the supply and for that purpose cut or disconnect any electric supply-line or other works, being the property of the licensee, through which energy may be supplied, and may discontinue the supply until such charge or other sum, together with any expenses incurred by him in cutting off and re-connecting the supply, are paid, but no longer.

Provided that where any difference or dispute has been referred under this Act to an Electric Inspector before notice as aforesaid has been given by the licensee, the licensee shall not exercise the powers conferred by this section until the Inspector has given his decision.

25. Where any electric supply-lines, meters, fittings, works or apparatus belonging to a licensee are placed in or upon any premises, not being in the possession of the licensee, for the purpose of supplying energy, such electric supply-lines, meters, fittings, works and apparatus shall not be liable to be taken in execution under any process of any Civil Court or in any proceedings in insolvency against the person in whose possession the same may be.

26. (1) In the absence of an agreement to the contrary, the amount of energy supplied to a consumer or the electrical quantity contained in the supply shall be ascertained by means of a correct meter, and the licensee shall, if required by the consumer, cause the consumer to be supplied with such a meter:

Provided that the licensee may require the consumer to give him security for the price of a meter and enter into an agreement for the hire thereof, unless the consumer elects to purchase a meter.

*The Indian Electricity Bill.**(Part II.—Supply of Energy. Part III.—Transmission and Use of Energy)*

(2) Where the consumer so enters into an agreement for the hire of a meter, the licensee shall keep the meter *correct*, and, in default of his doing so, the consumer shall, for so long as the default continues, cease to be liable to pay for the hire of the meter.

(3) Where the meter is the property of the consumer, he shall keep the meter *correct*, and, in default of his doing so, the licensee may, after giving him seven days' notice, for so long as the default continues, cease to supply energy through the meter.

(4) The licensee or any person duly authorized by the licensee shall, at any reasonable time and on informing the consumer of his intention, have access to, and be at liberty to *inspect and test, and for that purpose, if he thinks fit, take off and remove*, any meter referred to in sub-section (1); and, except where the meter is so hired as aforesaid, all reasonable expenses of, and incidental to, such *inspecting, testing, taking off and removing* shall, if the meter is found to be otherwise than *correct*, be recovered from the consumer, and, where any difference or dispute arises as to the amount of such reasonable expenses, the matter shall be *referred to an Electric Inspector, and the decision of such Inspector shall be final*;

Provided that the licensee shall not be at liberty to take off or remove any such meter if any difference or dispute of the nature described in sub-section (6) has arisen until the matter has been determined as therein provided.

(5) A consumer shall not connect any meter referred to in sub-section (1) with any electric supply-line through which energy is supplied by a licensee, or disconnect the same from any such electric supply-line, without giving to the licensee not less than forty-eight hours' notice in writing of his intention.

(6) Where any difference or dispute arises as to whether any meter referred to in sub-section (1) is or is not *correct*, the matter shall be *decided*, upon the application of either party, by an Electric Inspector, or by a competent person specially appointed by the Local Government in this behalf; and, where the meter has, in the opinion of such Inspector, or person ceased to be *correct* such Inspector or person shall estimate the *amount of the energy supplied to the consumer or the electrical quantity contained in the supply*, during such time as the meter shall not, in the opinion of such Inspector or person, have been *correct*, on the basis of the previous supply, and where the matter has been decided by any person other than the Electric Inspector an appeal shall lie to the Inspector, whose decision shall in every case be final but, save as aforesaid, the register of the meter shall, in the absence of fraud, be conclusive proof of such *amount or quantity*.

(7) In addition to any meter which may be placed upon the premises of a consumer in pursuance of the provisions of sub-section (1), the licensee may place upon such premises such meter, maximum demand indicator or other apparatus as he may think fit for the purpose of ascertaining or regulating either the amount of energy supplied to the consumer, or the number of hours during which the supply is given, or the *rate per unit of time at which energy is supplied* to the consumer, or any other quantity or time connected with the supply;

Provided that the meter, indicator or apparatus shall not, in the absence of an agreement to the contrary, be placed otherwise than between the *distributing mains* of the licensee and any meter referred to in sub-section (1).

Provided, also, that, where the charges for the supply of energy depend wholly or partly upon the reading or indication of any such meter, indicator, or apparatus as aforesaid, the licensee shall, in the absence of an agreement to the contrary, keep the meter, indicator or apparatus *correct*; and the provision of sub-sections (4), (5) and (6) shall in that case apply as though the meter, indicator or apparatus were a meter referred to in sub-section (1).

Explanation.—A meter shall be deemed to be "*correct*" if it registers the amount of energy supplied, or the electrical quantity contained in the supply, within the prescribed limits of error, and a maximum demand indicator or other apparatus referred to in sub-section (7) shall be deemed to be "*correct*" if it complies with such conditions as may be prescribed in the case of any such indicator or other apparatus.

27 Notwithstanding anything in this Act, the Local Government may, by order in writing, and subject to such conditions and restrictions, if any, as it thinks fit to impose, authorize any licensee to supply energy to any person outside the area of supply, and to lay down or place electric supply-lines for that purpose.

Provided, first, that no such authority shall be conferred on the licensee within the area of supply of another licensee without that licensee's consent, unless the Local Government considers that his consent has been unreasonably withheld:

Provided, secondly, that such authority shall not be conferred unless the person to whom the supply is to be given has entered into a specific agreement with the licensee for the taking of such supply.

Provided, thirdly, that a licensee on whom such authority has been conferred shall not be deemed to be empowered outside the area of supply to open or break up any street, or any sewer, drain or tunnel in or under any street, railway or tramway, or to interfere with any telegraph-line, without the written consent of the local authority or person by whom such street, sewer, drain or tunnel is repairable, or of the telegraph-authority, as the case may be.

Provided, fourthly, that, save as aforesaid, the provisions of this Act shall apply in the case of any supply authorized under this section as if the said supply were made within the area of supply.

PART III.

SUPPLY, TRANSMISSION AND USE OF ENERGY BY NON-LICENSEES.

28. (1) No person, other than a licensee, shall engage in the business of supplying energy except with the previous sanction of the Local

Sanction required by non-licensees in certain cases.

*The Indian Electricity Bill.**(Part III.—Transmission and Use of Energy. Part IV.—General.)*

Government and in accordance with such conditions as the Local Government may fix in this behalf, and any agreement to the contrary shall be void :

Provided that such sanction shall not be given in any case unless the Local Government considers that, having regard to the extent of the proposed supply and the other circumstances of the case, the obtaining of a license under Part II would be attended with undue expense or delay.

Provided also that such sanction shall not be given within the area for which a local authority is constituted, without that local authority's consent, or within the area of supply of any licensee, without that licensee's consent, unless the Local Government considers that consent has been unreasonably withheld.

(2) Where any difference or dispute arises as to whether any person is or is not engaging, or about to engage, in the business of supplying energy within the meaning of sub-section (1), the matter shall be referred to the Local Government, and the decision of the Local Government thereon shall be final.

29 (1) The local authority may, by order Power for non- in writing, confer and licences to break up impose upon any person, streets, who has obtained the sanction of the Local Government under section 28 to engage in the business of supplying energy, all or any of the powers and liabilities of a licensee under sections 12 to 19, both inclusive, and the provisions of the said sections shall thereupon apply as if such person were a licensee under Part II.

(2) A local authority, not being a licensee, shall, for the purpose of lighting any street, have the powers and be subject to the liabilities respectively conferred and imposed by sections 12 to 19, both inclusive, so far as applicable, as if it were a licensee under Part II.

(3) Save in cases for which provision is made by sub-section (1), the District Magistrate or, in a Presidency-town or Rangoon, the Commissioner of Police may, by order in writing, after giving notice to the local authority and hearing any objections which such authority may put forward, confer and impose upon any person other than the local authority, who proposes to transmit energy in any street, all or any of the powers and liabilities of a licensee under sections 12 to 19, both inclusive, and thereupon the provisions of the said sections shall apply to such person as if he were a licensee under Part II.

(4) Every order under sub-section (1) or sub-section (3) shall be subject to revision by the Local Government.

30. (1) No person, other than a licensee duly authorized under the terms of his license shall transmit or use energy at a rate exceeding two hundred and fifty watts,—

(a) in any street, or

(b) in any place,

- (i) in which one hundred or more persons are likely ordinarily to be assembled, or
- (ii) which is a factory within the meaning of the Indian Factories Act, 1881, or
- (iii) which is a mine within the meaning of the Indian Mines Act, 1901,

without giving not less than seven clear days' notice in writing of his intention to the District Magistrate or, in a Presidency-town or Rangoon, to the Commissioner of Police, and complying with such of the provisions of Part IV, and of the rules made thereunder, as may be applicable :

Provided that nothing in this section shall apply to energy used for the public carriage of passengers, animals or goods on, or for the lighting or ventilation of the rolling-stock of, any railway or tramway subject to the provisions of the Indian Railways Act, 1890 :

Provided, also, that the Local Government may, by general or special order and subject to such conditions and restrictions as may be specified therein, exempt from the application of this section or of any such provision or rule as aforesaid any person or class of persons using energy on premises upon or in connection with which it is generated, or using energy supplied under Part II in any place specified in clause (b).

(2) Where any difference or dispute arises as to whether a place is or is not one in which one hundred or more persons are likely ordinarily to be assembled, the matter shall be referred to the Local Government, and the decision of the Local Government thereon shall be final.

(3) The provisions of this section shall be binding on the Crown.

PART IV.**GENERAL.***Protective Clauses.*

31 No person shall, in the generation, transmission, supply or use of energy, in any way injure any railway, tramway, canal or waterway or any dock, wharf or pier vested in or controlled by a local authority or obstruct or interfere with the traffic on any railway, tramway, canal or waterway.

32. (1) Every person generating, transmitting, supplying or using energy (hereinafter in this section referred to as the "operator")

shall take all reasonable precautions in constructing, laying down and placing his electric supply-lines and other works and in working his system, so as not injuriously to affect, whether by induction or otherwise, the working of any wire or line used for the purpose of telegraphic, telephonic or electric-signalling communication, or the currents in such wire or line.

(2) Where any difference or dispute arises between the operator and the telegraph-authority as to whether the operator has constructed, laid down or placed his electric supply-lines or other works, or worked his system, in contravention of sub-section (1), or as to whether the working of any wire, line or current is or is

*The Indian Electricity Bill.**(Part IV.—General.)*

not injuriously affected thereby, the matter shall be referred to the Governor General in Council, and the Governor General in Council, unless he is of opinion that the wire or line has been placed in unreasonable proximity to the electric supply-lines or works of the operator after the construction of such lines or works, may direct the operator to make such alterations in, or additions to, his system as may be necessary in order to comply with the provisions of this section, and the operator shall make such alterations or additions accordingly.

Provided that nothing in this sub-section shall apply to the repair, renewal or amendment of any electric supply-line so long as the course of the electric supply-line and the amount and nature of the energy transmitted thereby are not altered.

- 1.] (3) Where the operator makes default in complying with the requirements of this section, he shall make full compensation for any loss or damage incurred by reason thereof, and, where any difference or dispute arises as to the amount of such compensation, the matter shall be determined by arbitration.

Explanation. For the purposes of this section, a telegraph-line shall be deemed to be injuriously affected if telegraphic, telephonic or electric signalling communication by means of such line is, whether through induction or otherwise, prejudicially interfered with by an electric supply-line or work or by any use made thereof.

- 1.] 33 (1) Every person shall, within twenty-four hours of the occurrence, send to the Electric Inspector, and also to the District Magistrate or, in a Presidency-town or Rangoon, to the Commissioner of Police, notice, in writing of any accident in connection with the generation, transmission, supply or use of energy resulting or likely to have resulted in loss of life or personal injury in any part of such person's works or electric supply-lines, or in connection with the same, and also notice of any loss of life or personal injury actually occasioned by any such accident.

(2) The Local Government may, if it thinks fit, require any Electric Inspector, or any other competent person appointed by it in this behalf, to inquire and report—

(a) as to the cause of any accident affecting the safety of the public, which may have been occasioned by or in connection with the generation, transmission, supply or use of energy, or

(b) as to the manner in, and extent to, which the provisions of this Act or of any license or rules thereunder, so far as those provisions affect the safety of any person, have been complied with.

- 1.] 34 (1) No person shall, in the generation, transmission, supply or use of energy permit any part of his electric supply-lines to be connected with earth except so far as may be prescribed in this behalf or may be specially sanctioned by the Governor General in Council.

not injuriously affected thereby, the matter shall be referred to the Governor General in Council, and the Governor General in Council, unless he is of opinion that the wire or line has been placed in unreasonable proximity to the electric supply-lines or works of the operator after the construction of such lines or works, may direct the operator to make such alterations in, or additions to, his system as may be necessary in order to comply with the provisions of this section, and the operator shall make such alterations or additions accordingly.

(2) If at any time it is established to the satisfaction of the Local Government—

- (a) that any part of an electric supply-line is connected with earth contrary to the provisions of sub-section (1), or
(b) that any electric supply-lines or other works for the generation, transmission, supply or use of energy are attended with danger to the public safety or to human life or injuriously affect any telegraph-line, or
(c) that any electric supply-lines or other works are defective so as not to be in accordance with the provisions of this Act or of any rule thereunder,

the Local Government may, by order in writing, specify the matter complained of and require the owner or user of such electric supply-lines or other works to remedy it in such manner as shall be specified in the order, and may also in like manner forbid the use of any electric supply-line or works until the order is complied with or for such time as is specified in the order.

Administration and rules

35 (1) The Governor General in Council may, for the whole or any part of British India, and each Local Government may, for the whole or any part of the province, by notification in the Gazette of India or the local official Gazette, as the case may be, constitute an Advisory Board.

(2) Every such Board shall consist of a chairman and not less than two other members.

(3) The chairman and, where there are more than two other members, two of the other members, or, where there are only two other members, one of the other members, shall be nominated by the Governor General in Council or the Local Government, as the case may be, and the remaining members shall be nominated by such local authorities, Chambers of Commerce or other Associations as the Governor General in Council or the Local Government, as the case may be, may direct.

(4) The Governor General in Council or the Local Government, as the case may be, may, by general or special order,—

- (a) define the duties and regulate the procedure of any such Board,
(b) determine the tenure of office of the members of any such Board, and
(c) give directions as to the payment of fees to, and the travelling expenses incurred by, any member of any such Board in the performance of his duty.

36. (1) The Governor General in Council may, by notification in the Gazette of India, appoint duly qualified persons to be Electric Inspectors, and every Electric Inspector so appointed shall exercise the

*The Indian Electricity Bill.**(Part IV.—General.)*

powers and perform the functions of an Electric Inspector under this Act within such areas and subject to such restrictions as the Governor General in Council may direct

(2) The Local Government may, by notification in the local official Gazette, appoint duly qualified persons to be Electric Inspectors within such areas as may be assigned to them respectively, and every Inspector so appointed shall exercise the powers and perform the functions of an Electric Inspector under this Act subject to such restrictions as the Local Government may direct

(3) In the absence of express provision to the contrary in this Act or any rule thereunder an appeal shall lie from the decision of an Electric Inspector to the Governor General in Council or the Local Government, as the case may be

37. (1) The Governor General in Council may make rules, for the whole or any part of British India, to regulate the generation, transmission, supply and use of energy, and, generally, to carry out the purposes and objects of this Act

(2) In particular and without prejudice to the generality of the foregoing power, such rules may—

- (a) prescribe the form of applications for licenses and the payments to be made in respect thereof,
- (b) regulate the publication of notices,
- (c) prescribe the manner in which objections with reference to any application under Part II are to be made,
- (d) provide for the preparation and submission of accounts by licensees in a specified form,
- (e) provide for the securing of a regular, constant and sufficient supply of energy by licensees to consumers and for the testing at various parts of the system of the regularity and sufficiency of such supply, and for the examination of the records of such tests by consumers,
- (f) provide for the protection of persons and property from injury by reason of contact with, or the proximity of, or by reason of the defective or dangerous condition of, any appliance or apparatus used in the generation, transmission, supply or use of energy,
- (g) for the purposes of electric traction regulate the employment of insulated returns, or of uninsulated metallic returns of low resistance, in order to prevent fusion or injurious electrolytic action of or on metallic pipes, structures or substances, and to minimise, as far as is reasonably practicable, injurious interference with the electric wires, supply-lines and apparatus of parties other than the owners of the electric traction system, or with the currents therein, whether the earth is used as a return or not,

(h) provide for preventing telegraph-lines and magnetic observatories or laboratories from being injuriously affected by the generation, transmission, supply or use of energy;

(i) prescribe the qualifications to be required of Electric Inspectors,

(j) authorize any Electric Inspector or other officer of a specified rank and class to enter, inspect and examine any place, carriage or vessel in which he has reason to believe any appliance or apparatus used in the generation, transmission, supply or use of energy to be, and to carry out tests therein, and to prescribe the facilities to be given to such Inspectors or officers for the purposes of such examinations and tests, and

(k) authorize and regulate the levy of fees for any such testing or inspection and, generally, for the services of Electric Inspectors under this Act.

(3) In making any rule under this Act, the Governor General in Council may direct that every breach thereof shall be punishable with fine which may extend to three hundred rupees, and, in the case of a continuing breach, with a further daily fine which may extend to fifty rupees

38 (1) The power to make rules under [Further provisions section 37 shall be subject respecting rules to the condition of the rules being made after previous publication

(2) The date to be specified in accordance with clause (3) of section 23 of the General Clauses Act, 1897, as that after which a draft of rules proposed to be made under section 37 will be taken into consideration shall not be less than three months from the date on which the draft of the proposed rules was published for general information

(3) Any rule to be made under this Act shall, before it is published for criticism under subsection (2), be referred to the Advisory Board (if any) constituted for the whole of British India, or if no such Board has been constituted, then to such Board or Boards (if any) as the Governor General in Council may direct, and the rule shall not be so published until such Board or Boards (if any) has or have reported as to the expediency of making the proposed rule and as to the suitability of its provisions

(4) All rules made under section 37 shall be published in the Gazette of India and on such publication shall have effect as if enacted in this Act.

Criminal Offences and Procedure.

39. Whoever dishonestly abstracts, consumes or uses any energy shall be deemed to have committed theft within the meaning of the Indian Penal Code; and the existence of artificial means for such abstraction shall be prima facie evidence of such dishonest abstraction.

*The Indian Electricity Bill.**(Part IV.—General)***40. Whoever maliciously causes energy to be**

Penalty for maliciously wasting energy or injuring works wasted or diverted, or, with intent to cut off the supply of energy, cuts or injures, or attempts to cut or injure, any electric supply-line or works, shall be punishable with imprisonment for a term which may extend to two years, or with fine which may extend to one thousand rupees, or with both

41. Whoever, in contravention of the provisions of section 28, en-

Penalty for unauthorized supply of energy by non-licensees gages in the business of supplying energy shall be punishable with fine which may extend to three thousand rupees, and, in the case of a continuing contravention, with a daily fine which may extend to three hundred rupees.

Penalty for illegal or defective supply or for non-compliance with order.

42. Whoever—

(a) being a licensee, save as permitted under section 27 or section 51 or by his license, supplies energy or lays down or places any electric supply-line or works outside the area of supply, or,

(b) being a licensee, in contravention of the provisions of this Act or of the rules thereunder or in breach of the conditions of his license and without reasonable excuse, the burden of proving which shall lie on him, discontinues the supply of energy or fails to supply energy, or

(c) makes default in complying with any order issued to him under section 34, sub-section (2),

shall be punishable with fine which may extend to one thousand rupees, and, in the case of a continuing offence or default, with a daily fine which may extend to one hundred rupees

43. Whoever, in contravention of the provisions of section 30, trans-

Penalty for illegal transmission or use of energy mits or uses energy without giving the notice required thereby, shall be punishable with fine which may extend to five hundred rupees, and, in the case of a continuing offence, with a daily fine which may extend to fifty rupees

Penalty for interference with meters or licensee's works and for improper use of energy

44. Whoever—

(a) connects any meter referred to in section 26, sub-section (1), or any meter, indicator or apparatus referred to in section 26, sub-section (7), with any electric supply-line through which energy is supplied by a licensee, or disconnects the same from any such electric supply-line, without

giving to the licensee forty-eight hours' notice in writing of his intention; or

(b) lays, or causes to be laid, or connects up any works for the purpose of communicating with any other works belonging to a licensee, without such licensee's consent; or

(c) maliciously injures any meter referred to in section 26, sub-section (1) or any meter, indicator or apparatus referred to in section 26, sub-section (7), or wilfully or fraudulently alters the index of any such meter, indicator or apparatus, or prevents any such meter, indicator or apparatus from duly registering, or

(d) improperly uses the energy of a licensee,

shall be punishable with fine which may extend to three hundred rupees, and, in the case of a continuing offence, with a daily fine which may extend to thirty rupees, and the existence of artificial means for making such connection as is referred to in clause (a) or such communication as is referred to in clause (b) or for causing such alteration or prevention as is referred to in clause (c) or for facilitating such improper use as is referred to in clause (d) shall, where the meter, indicator or apparatus is under the custody or control of the consumer, whether it is his property or not, be prima facie evidence that such connection, communication, alteration, prevention or improper use, as the case may be, has been knowingly and wilfully caused by such consumer.

45. Whoever maliciously extinguishes any

Penalty for extinguishing public lamp public lamp shall be punishable with imprisonment for a term which may extend to six months or with fine which may extend to three hundred rupees or with both

46. Whoever negligently causes energy to

Penalty for negligently wasting energy or injuring works be wasted or diverted, or negligently breaks, throws down or damages any electric supply-line, post, pole or lamp or other apparatus connected with the supply of energy, shall be punishable with fine which may extend to two hundred rupees

47. Whoever, in any case not already pro-

Penalty for offence not otherwise provided for vided for by sections 39 to 46 (both inclusive), makes default in complying with any of the provisions of this Act, or with any order issued under it, or, in the case of a licensee, with any of the conditions of his license, shall be punishable with fine which may extend to one hundred rupees, and, in the case of a continuing default, with a daily fine which may extend to twenty rupees

Provided that, where a person has made default in complying with any of the provisions of

*The Indian Electricity Bill.**(Part IV.—General.)*

sections 13, 14, 15, 17 and 32, as the case may be, he shall not be so punishable if the Court is of opinion that the case was one of emergency and that the offender complied with the said provisions as far as was reasonable in the circumstances

48 The penalties imposed by sections 39 to 47 (both inclusive) shall be in addition to, and not in derogation of, any liability in respect of the payment of compensation or, in the case of a licensee, the revocation of his license, which the offender may have incurred

49. The provisions of sections 39, 40, 44, 45 and 46 shall, so far as they are applicable, be deemed to apply also when the acts made punishable thereunder are committed in the case of energy supplied by or of works belonging to the Government

50 No prosecution shall be instituted against any person for any offence against this Act or any rule, license or order thereunder, except at the instance of the Government or an Electric Inspector, or of a person aggrieved by the same

Supplementary

51. Notwithstanding anything in sections 12 to 16 (both inclusive) and sections 18 and 19 the Governor General in Council may, by order in writing, for the placing of appliances and apparatus for the transmission of energy confer upon any public officer or licensee, subject to such conditions and restrictions (if any) as the Governor-General in Council may think fit to impose, and to the provisions of the Indian Telegraph Act, 1885, any of the powers which the telegraph authority possesses under that Act, with respect to the placing of telegraph-lines and posts for the purposes of a telegraph established or maintained by the Government or to be so established or maintained

52. Where any matter is, by or under this Act, directed to be determined by arbitration, the matter shall, unless it is otherwise expressly provided in the license of a licensee, be determined by such person or persons as the Local Government may nominate in that behalf on the application of either party, but in all other respects the arbitration shall be subject to the provisions of the Indian Arbitration Act, 1899

53 (1) Every notice, order or document by or under this Act required or authorized to be addressed to any person may be served by post or left,—

(a) where the Government is the addressee at the office of the Secretary in the Public Works Department,

(b) where a local authority is the addressee, at the office of the local authority,

(c) where a company is the addressee, at the registered office of the company or, in the event of the registered office of the Company not being in India, at the head office of the Company in India;

(d) where any other person is the addressee, at the usual or last known place of abode or business of the person

(2) Every notice, order or document by or under this Act required or authorized to be addressed to the owner or occupier of any premises shall be deemed to be properly addressed if addressed by the description of the "owner" or "occupier" of the premises (naming the premises), and may be served by delivering it, or a true copy thereof, to some person on the premises, or, if there is no person on the premises to whom the same can with reasonable diligence be delivered, by affixing it on some conspicuous part of the premises.

54. Every sum declared to be recoverable by section 5, clause (f), section 6, sub-section (2), section 14, sub-section (2), clause (h), section 16, sub-section (2), section 18, sub-section (2) or sub-section (4), or section 26, sub-section (4), and every fee leviable under this Act, may be recovered, on application to a Magistrate having jurisdiction where the person liable to pay the same is for the time being resident, by the distress and sale of any moveable property belonging to such person

55. (1) The Local Government may, by general or special order, authorize the discharge of any of its functions under section 13 or section 18, or clause V, sub-clause (2), or clause VIII of the Schedule by an Electric Inspector

56 No suit, prosecution or other proceeding shall lie against any public officer, or any servant of a local authority, for anything done, or in good faith purporting to be done, under this Act

57 (1) In section 40, sub-section (1), clause (b), and section 41, sub-section (5), of the Land Acquisition Act, 1894, the term "work" shall be deemed to include electrical energy supplied, or to be supplied, by means of the work to be constructed

(2) The Local Government may, if it thinks fit, on the application of any person, not being

The Indian Electricity Bill

(The Schedule—Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II, so far as not added to, varied or excepted by the license.)

^a company, desirous of obtaining any land for the purposes of his undertaking direct that he may acquire such land under the provisions of the Land Acquisition Act, 1894, in the same manner and on the same conditions as it might be acquired if the person were a company

58 (1) The Indian Electricity Act, 1910, is hereby repealed.

Repeals and savings

Provided that every application for a license made and every license granted under the said Act shall be deemed to have been made and granted under this Act

(2) Nothing in this Act shall be deemed to affect the terms of any license which was granted, or of any agreement which was made, by or with the sanction of the Government for the supply or use of electricity before the commencement of this Act

THE SCHEDULE.

PROVISIONS TO BE DEEMED TO BE INCORPORATED WITH, AND TO FORM PART OF, EVERY LICENSE GRANTED UNDER PART II, SO FAR AS NOT ADDED TO, VARIED OR EXCEPTED BY THE LICENSE

[See section 3, sub-section (2), clause (f).]

Security and accounts

I Where the licensee is not a local authority, the following provisions as to giving security shall apply, namely—

Security for execution of works of licensee not being local authority.

(a) The licensee shall, within the period fixed in that behalf by his license, or any longer period which the Local Government may substitute therefor by order under section 4, sub-section (3) clause (b) of the Indian Electricity Act, 1910, and before exercising any of the powers by the license conferred on him in relation to the execution of works, show, to the satisfaction of the Local Government, that he is in a position fully and efficiently to discharge the duties and obligations imposed upon him by the license throughout the area of supply.

(b) The licensee shall also, within the period fixed in that behalf by his license, or any longer period which the Local Government may substitute therefor by order under section 4, sub-section (3) clause (b) of the Indian Electricity Act, 1910, and before exercising any of the powers conferred on him in relation to the execution of works, deposit or secure to the satisfaction of the Local Government, such sum (if any) as may be fixed by the license or, if not so fixed, by the Local Government

(c) The said sum deposited or secured by the licensee under the provisions of this clause shall be repaid or released

to him on the completion of the works or at such earlier date or dates and by such instalments, as may be approved by the Local Government.

II. Where the licensee is not a local authority, the following provisions as to the audit of accounts shall apply, namely—

Audit of accounts of licensee not being local authority

(a) The annual statement of accounts of the undertaking shall, before being rendered under section 11 of the Indian Electricity Act, 1910, be examined and audited by such person as the Local Government may appoint or approve in this behalf, and the remuneration of the auditor shall be such as the Local Government may direct, and his remuneration and all expenses incurred by him in or about the execution of his duties, to such an amount as the Local Government shall approve, shall be paid by the licensee on demand

(b) The licensee shall afford to the auditor, his clerks and assistants, access to all such books and documents relating to the undertaking as are necessary for the purposes of the audit, and shall, when required, furnish to him and them all vouchers and information requisite for that purpose, and afford to him and them all facilities for the proper execution of his and their duty

(c) The audit shall be made and conducted in such manner as the Local Government may direct

(d) Any report made by the auditor, or such portion thereof as the Local Government may direct, shall be appended to the annual statement of accounts of the licensee, and shall thenceforth form part thereof

(e) Notwithstanding the foregoing provisions of this clause the Local Government may, if it thinks fit, accept the examination and audit of an auditor appointed by the licensee.

III The licensee shall, unless the Local Government otherwise directs, at all times keep the accounts of the capital employed for the purposes of the undertaking distinct from the accounts kept by him of any other undertaking or business

Compulsory works and supply

IV. The licensee shall, within a period of three years after the commencement of the license, execute to the satisfaction of the Local Government all such works as may be specified in the license in this behalf or, if not so specified, as the Local Government may, by order in writing issued within six months of the date of the commencement of the license, direct.

Execution of work after commencement of license.

The Indian Electricity Bill.

(The Schedule.—Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II, so far as not added to, varied or excepted by the license)

V. (1) Where, after the expiration of *two years and six months* from the commencement of the license, a requisition is made by six or more owners or occupiers of premises in or upon any street or part of a street within the area of supply or by the Local Government or a local authority charged with the public lighting thereof, requiring the licensee to provide distributing mains throughout such street or part thereof, the licensee shall comply within six months with the requisition, unless,—

Provisions as to laying down of further distributing mains

(a) where it is made by such owners or occupiers as aforesaid, the owners or occupiers making it do not, within fourteen clear days after the service on them by the licensee of a notice in writing in this behalf, tender to the licensee a written contract duly executed and with sufficient security binding themselves to take, or guaranteeing that there shall be taken, a supply of energy for not less than *two years* to such amount as will in the aggregate produce annually, at the current rates charged by the licensee, a reasonable return to the licensee, or,

(b) where it is made by the Local Government or a local authority, the Local Government or local authority, as the case may be, does not, within the like period, tender a like contract binding itself to take a supply of energy for not less than *seven years* for the public lamps in such street or part thereof

(2) Where any difference or dispute arises between the licensee and such owners or occupiers as to the sufficiency of the security offered under this clause, or as to the amount of energy to be taken or guaranteed as aforesaid, the matter shall be referred to the Local Government and either decided by it or, if it so directs, determined by arbitration.

(3) Every requisition under this clause shall be signed by the maker or makers thereof and shall be served on the licensee

(4) Every requisition under this clause shall be in a form to be prescribed by rules under the Indian Electricity Act, 1910, and copies of the form shall be kept at the office of the licensee and supplied free of charge to any applicant

VI (1) Where a requisition is made by the owner or occupier of any premises situate within one hundred yards from any distributing main requiring the licensee to supply energy for such premises, the licensee shall, *within one month from the making of the requisition*, supply, and, save in so far as he is prevented from doing so by cyclones, floods, storms or other occurrences beyond his control, continue to supply, energy in accordance with the requisition:

Provided, first, that the licensee shall not be bound to comply with any such requisition unless and until the person making it—

(a) within fourteen days after the service on him by the licensee of a notice in writing in this behalf, tenders to the licensee a written contract, in a form approved by the Local Government, duly executed and with sufficient security, binding himself to take a supply of energy for not less than two years to such amount as will produce, at current rates charged by the licensee a reasonable return to the licensee, and

(b) if required by the licensee so to do, pays to the licensee the cost of so much of any *service line* as may be laid down or placed for the purposes of the supply upon the property in respect of which the requisition is made, and of so much of any *service line* as it may be necessary for the said purposes to lay down or place beyond one hundred feet from the licensee's distributing main, although not on that property

Provided, secondly, that the licensee shall be entitled to discontinue such supply—

(a) if the owner or occupier of the property to which the supply is made has not already given security, or if any security given by him has become invalid or insufficient, and such owner or occupier fails to furnish security or to make up the original security to a sufficient amount, as the case may be, within seven days after the service upon him of notice from the licensee requiring him so to do, or

(b) if the owner or occupier of the property to which the supply is made adopts any *appliance*, or uses the energy supplied to him by the licensee for any purposes, or deals with it in any manner, so as unduly or improperly to interfere with the efficient supply of energy to any other person by the licensee, or

(c) if the electric wires, fittings, works, and apparatus in such property are not in good order and condition, and are consequently likely to affect injuriously the use of energy by the licensee, or by other persons, or

(d) if the owner or occupier makes any alterations of, or additions to, any electric wires, fittings, works or apparatus within such property as aforesaid, and does not notify the same to the licensee before the same are connected to the source of supply, with a view to their being examined and tested

Provided, thirdly, that the maximum rate per unit of time at which the owner or occupier shall be entitled to be supplied with energy shall not exceed what is necessary for the maximum consumption on his premises, and, where the owner or occupier has required a licensee to supply him at a specified maximum rate he shall not be entitled to alter that amount.

The Indian Electricity Bill.

(The Schedule.—Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II, so far as not added to, varied or excepted by the license.)

num, except after one month's notice in writing to the licensee, and the licensee may recover from the owner or occupier any expenses incurred by him by reason of such alteration in respect of the service-lines by which energy is supplied to the property beyond one hundred feet from the licensee's distributing main, or in respect of any fittings or apparatus of the licensee upon that property and

Provided, fourthly, that, in the event of any requisition being made for a supply of energy from any distributing main of which the licensee can prove, to the satisfaction of an *Electric Inspector*,—

(a) that it is already loaded up to its full current-carrying capacity, or

(b) that, in case of a larger amount of current being transmitted by it, the loss of pressure will seriously affect the efficiency of the supply to other consumers in the vicinity,

the licensee may refuse to accede to the requisition for such reasonable period, not exceeding six months, as such *Inspector* may think sufficient for the purpose of amending the distributing main or laying down or placing a further distributing main

(2) Any service line laid for the purpose of supply in pursuance of a requisition under sub-clause (1) shall, notwithstanding that a portion of it may have been paid for by the person making the requisition, be maintained by the licensee.

(3) Where any difference or dispute arises as to the amount of energy to be taken or guaranteed as aforesaid, or as to the cost of any service-line or as to the sufficiency of the security offered by any owner or occupier, or as to the improper use of energy, or as to any alleged defect in any wires, fittings, works or apparatus, or as to the amount of the expenses incurred under the third proviso to sub-clause (1), the matter shall be referred to an *Electric Inspector* and decided by him.

(4) Every requisition under this clause shall be signed by the maker or makers thereof and shall be served on the licensee

(5) Every requisition under this clause shall be in a form to be prescribed by rules under the Indian Electricity Act, 1910, and copies of the form shall be kept at the office of the licensee and supplied free of charge to any applicant.

VII. (1) Where an application is made

Provisions as to laying by any person for electric supply-lines under the supply of energy special agreement within the area of supply, for any premises not situate within one hundred yards from any distributing main, or in any street in which distributing mains have not already been laid down or placed, and where a special agreement has been entered into to give and receive such supply, the licensee shall, before commencing to lay down or place in any such street any electric supply-line, serve upon the local authority (if any) and

upon the owner or occupier of all premises abutting on so much of the street as lies between the points of origin and termination of the electric supply-line so to be laid down or placed a notice stating that the licensee intends to lay down or place the electric supply-line, and intimating that, if within the said period the local authority or any two or more of such owners or occupiers require in accordance with the provisions of the license that a supply shall be given for any public lamps or to their premises, as the case may be, the necessary distributing main will be laid down or placed by the licensee at the same time as the electric supply-line intended for the particular person

(2) Where any such special agreement as is referred to in sub-clause (1) has been entered into between the licensee and any person, the licensee shall supply, and, save in so far as he is prevented from doing so by cyclones, floods, storms or other occurrences beyond his control, continue to supply energy in such quantities as may have been agreed upon, and the provisions contained in the first, second, third and fourth provisos to sub-clause (1) and in sub-clauses (2) and (3) of clause VI shall, so far as may be, apply to every case in which energy is supplied under this clause as if such person had made a requisition under clause VI.

VIII. (1) Where a requisition is made by the Supply for public Local Government or by lamps a local authority requiring the licensee to supply for a period of not less than seven years energy for any public lamps within the distance of one hundred yards from any distributing main, the licensee shall supply, and save in so far as he is prevented from doing so by cyclones, floods, storms or other occurrences beyond his control, continue to supply energy for such lamps in such quantities as the Local Government or the local authority, as the case may be, may require

(2) The provisions of sub-clause (b) of the first proviso, of sub-clauses (c) and (d) of the second proviso, and of the third and fourth provisos to sub-clause (1) and the provisions of sub-clauses (2) and (3) of clause VI shall, so far as may be, apply to every case in which a requisition for the supply of energy is made under this clause as if the Local Government or local authority were an owner or occupier within the meaning of those provisions.

Supply by bulk-licensees.

IX (1) Where, and in so far as, the licensee Special provisions (hereinafter in this clause applying to supply by referred to as "the bulk-bulk-licensees licensee") is authorized by his license to supply energy to other licensees for distribution by them (hereinafter in this clause referred to as "distributing licensees"), the following provisions shall apply, namely.—

(a) any distributing licensees within the bulk-licensee's area of supply may make a requisition on the bulk-

The Indian Electricity Bill.

(The Schedule.—Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II, so far as not added to, varied or excepted by the license.)

licensee, requiring him to give a supply of energy and specifying the point, and the maximum rate per unit of time, at which such supply is required, and the date upon which the supply is to commence, such date being fixed after the date of receipt of the requisition so as to allow an interval that is reasonable with regard to the locality and to the length of the electric supply-line and the amount of the plant required.

(b) such distributing-licensee shall, if required by the bulk-licensee so to do, enter into a written agreement to receive and pay for a supply of energy for a period of not less than seven years of such an amount that the payment to be made for the same at the rate of charge for the time being charged for such supply shall not be less than such an amount as will produce a reasonable return to the bulk-licensee on the outlay (excluding expenditure on generating plant then existing and any electric supply-line then laid down or placed) incurred by him in making provision for such supply,

(c) the maximum rate per unit of time at which a distributing-licensee shall be entitled to be supplied with energy shall not exceed what is necessary for the purposes for which the supply is required by him, and need not be increased except upon a fresh requisition made in accordance with the foregoing provisions,

(d) if any difference or dispute arises under this clause, it shall be determined by arbitration, and, in the event of such arbitration, the arbitrator shall have regard to the following amongst other considerations, namely:—

- (i) the period for which the distributing-licensee is prepared to bind himself to take energy;
- (ii) the amount of energy required and the hours during which the bulk-licensee is to supply it;
- (iii) the capital expenditure incurred or to be incurred by the bulk-licensee in connection with the aforesaid supply of energy; and
- (iv) the extent to which the capital expended or to be expended by the bulk-licensee in connection with such supply may become unproductive upon the discontinuance thereof.

(2) Notwithstanding anything in sub-clause (1), the bulk-licensee shall give a supply of

energy to any distributing-licensee within his area of supply applying therefor, even although the distributing-licensee desires to be supplied with only a portion of the energy required for distribution by him:

Provided that the distributing-licensee shall, if so required by the bulk-licensee, enter into an agreement to take such energy upon special terms (including a minimum annual sum to be paid to the bulk-licensee) to be determined, if necessary, by arbitration in the manner laid down in sub-clause (1) (d)

(3) The maximum price fixed by a license for energy supplied to a distributing-licensee shall not apply to any partial supply given under sub-clause (2).

(4) Every distributing-licensee, who is supplied with energy by a bulk-licensee and intends to discontinue to receive such supply, shall give not less than twelve months' notice in writing of such intention to the bulk-licensee

Provided that, where the distributing-licensee has entered into a written agreement with the bulk-licensee to receive and pay for a supply of energy for a certain period, such notice shall be given so as not to expire before the end of that period

Charges.

X. In the absence of an agreement to the [S] contrary, the licensee may charge for energy supplied by him to any consumer—

- (a) by the actual amount of energy so supplied, or
- (b) by the electrical quantity contained in the supply, or
- (c) by such other method as may be approved by the Local Government:

Provided, first, that, where the licensee charges by any method so approved by the Local Government, any consumer who objects to that method may, by not less than one month's notice in writing, require the licensee to charge him, at the licensee's option, either by the actual amount of energy supplied to him or by the electrical quantity contained in the supply, and thereafter the licensee shall not, except with the consent of the consumer, charge him by another method:

Provided, secondly, that, before commencing to supply energy through any distributing main, the licensee shall give notice, by public advertisement, of the method by which he proposes to charge for energy so supplied; and, where the licensee has given such notice, he shall not be entitled to change that method of charging without giving not less than one month's notice in writing of such change to the Local Government, to the local authority (if any) concerned, and to every consumer of energy who is supplied by him from such distributing main:

The Indian Electricity Bill.

(The Schedule.—Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II, so far as not added to, varied or excepted by the license.)

Provided, thirdly, that, if the consumer is provided with a meter in pursuance of the provisions of section 26, sub-section (1), of the Indian Electricity Act, 1910, and the licensee changes the method of charging for the energy supplied by him from the distributing main, the licensee shall bear the expense of providing a new meter, or such other apparatus as may be necessary by reason of the new method of charging.

XI. *Save as provided by clause IV, sub-clause (2), the prices charged by the licensee for energy supplied by him shall not exceed the maxima fixed by his license, or, in the case of a method of charge approved by the Local Government, such maxima as the Local Government shall fix on approving the method.*

Provided that, if, at any time after the expiration of seven years from the commencement of the license, the Local Government considers or is satisfied that the maxima so fixed or approved as aforesaid should be altered, it may, after such inquiry (if any) as it thinks fit, make an order accordingly, which shall have effect from such date as may be mentioned therein.

Provided, also, that, where an order in pursuance of the foregoing proviso has been made, no further order altering the maxima fixed thereby shall be made until the expiration of another period of five years.

XII. The price to be charged by the licensee for supply and to be paid to him for energy supplied for the public lamps, and the mode in which those charges are to be ascertained, shall be settled by agreement between the licensee and the Local Government or the local authority, as the case may be, and, where any difference or dispute arises, the matter shall be determined by arbitration.

Testing and inspection.

XIII. The licensee shall establish at his own cost and keep in proper condition such number of testing stations, situated at such places within reasonable distance from any distributing main, as the Local Government may direct for the purpose of testing the pressure or periodicity of the supply of energy in the distributing main, and shall supply and keep in proper condition thereat, and on all premises from which he supplies energy, such instruments for testing as an Electric Inspector may approve, and shall supply energy to each testing station for the purpose of testing.

XIV. The licensee shall afford all facilities for inspection and testing of his works and for the reading, testing and inspection of his instruments, and may, on each occasion of the testing of his works or the reading, testing or inspection of any instruments, be represented by an agent, who may be present, but shall not interfere with the reading, testing or inspection.

XV. On the occasion of the testing of any works of the licensee by an Electric Inspector reasonable notice thereof shall be given to the licensee; and the testing shall be carried out at such suitable hours as, in the opinion of the Electric Inspector, will least interfere with the supply of energy by the licensee, and in such manner as the Electric Inspector may think fit; but, except under the provisions of an order made in each case in that behalf by the Local Government, the Electric Inspector shall not be entitled to have access to, or interfere with, the works of the licensee at any points other than those at which the licensee himself has access to the same.

Provided that the licensee shall not be held responsible for any interruption or irregularity in the supply of energy which may be occasioned by, or required by the Electric Inspector for the purpose of, any such testing as aforesaid.

Provided, also, that the testing shall not be made in regard to any particular portion of the works oftener than once in any three months, unless in pursuance of an order made in each case in that behalf by the Local Government.

Plans

XVI. (1) The licensee shall, after commencing to supply energy, forthwith cause a plan to be made of the area of supply, and shall cause to be marked thereon the alignment and the approximate height above or depth below the surface of all his then existing electric supply-lines, street distributing boxes and other works, and shall once in every year cause that plan to be duly corrected so as to show the electric supply-lines, street distributing boxes and other works for the time being in position. The licensee shall also, if so required by an Electric Inspector, cause to be made sections showing the approximate level of all his existing underground works other than service-lines.

(2) Every such plan shall be drawn to a scale which shall not be smaller than sixteen inches to the mile.

(3) Every such section shall be drawn to a horizontal scale which shall not be smaller than sixteen inches to the mile and to a vertical scale which shall not be smaller than one inch to eight feet.

(4) Every plan and section so made or corrected, or a copy thereof, marked with the date when it was so made or corrected, shall be kept by the licensee at his principal office or place of business within the area of supply, and shall at all reasonable times be open to the inspection of all applicants, and copies thereof shall be supplied on such terms and conditions as may be prescribed by rules under the Indian Electricity Act, 1910.

(5) The licensee shall, if required by an Electric Inspector and where the licensee is

64

The Indian Electricity Bill.

Schedule — Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II, so far as not added to, varied or excepted by the license)

not a local authority, by the local authority (if any) concerned, supply *free of charge* to such *Electric Inspector* or local authority, a copy of every such plan or section duly corrected so as to agree with the original kept at the principal office or place of business of the licensee.

Additional notice of certain works.

XVII On the day next preceding the commencement of any such works as are referred to in section 13 of the Indian

Notice to Electric Inspector

Electricity Act, 1910, the licensee shall, in addition to any other notices which he may be required to give, serve upon the Electric Inspector, or such officer as the Local Government may appoint in this behalf for the area of supply, a notice in writing stating that he is about to commence the works, and the nature and position of the same.

J M MACPHERSON,

Secretary to the Government of India.

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to consolidate and amend the law relating to the Indian Museum was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 4th March 1910.—

We, the undersigned, Members of the Select Committee to which the Bill to consolidate and amend the law relating to the Indian Museum was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

2 We have made certain verbal alterations in clauses 9, 10 and 12 of the Bill. We have no other alterations to suggest.

3 The publication ordered by the Council has been made as follows :—

<i>Gazette</i>	<i>In English</i>	<i>Date</i>
Gazette of India		11th September 1909
Calcutta Gazette		22nd September 1909

4. We think that the Bill has not been so altered as to require re-publication, and we recommend that it be passed as now amended.

No II

A Bill to consolidate and amend the law relating to the Indian Museum

WHEREAS it is expedient to consolidate and amend the law relating to the Indian Museum, It is hereby enacted as follows :—

Preliminary

1. (1) This Act may be called the Indian Museum Act, 1910

(2) It shall come into force on such date as the Governor General in Council, by notification in the Gazette of India, may direct

Incorporation of the Trustees.

2 (1) The Trustees of the Indian Museum (hereinafter called the Trustees) shall be—

(a) the six persons for the time being performing the duties of the following offices, namely—

- (i) the Accountant General of Bengal,
- (ii) the Principal, Government School of Art, Calcutta,
- (iii) the Director, Geological Survey of India,
- (iv) the Superintendent of the Zoological and Anthropological Section of the Museum,
- (v) the Director General of Archaeology, and
- (vi) the Officer in charge of the Industrial Section of the Museum,

(b) one other person to be nominated by the Governor General in Council,

(c) three other persons to be nominated by the Lieutenant-Governor of Bengal,

(d) one other person to be nominated by the Council of the Asiatic Society of Bengal,

(e) one other person to be nominated by the Bengal Chamber of Commerce,

(f) one other person to be nominated by the British Indian Association, Calcutta

(g) one other person to be nominated by the Syndicate of the Calcutta University, and

(h) three other persons to be nominated by the Trustees.

(2) The Trustees shall be a body corporate, by the name of "The Trustees of the Indian Museum," with perpetual succession and a common seal, and in that name shall sue and be sued, and shall have power to acquire and hold property, to enter into contracts, and to do all acts necessary for and consistent with the purposes of this Act.

(3) The nominated Trustees shall, save as herein otherwise provided, hold office for a period of three years

Provided that the authority nominating a Trustee may extend his term of office for one or more like periods.

3 (1) The powers of the said body corporate may only be exercised so long and so often as there are nine members thereof

(2) The quorum necessary for the transaction of business at a meeting of the Trustees shall not be less than six

Power to appoint new Trustees. 4 If a nominated Trustee—

(a) dies, or

(b) is absent from the meetings of the Trustees for more than twelve consecutive months, or

(c) desires to be discharged, or

(d) refuses or becomes incapable to act, or

(e) is appointed to perform the duties of any office specified in section 2, clause (a),

the authority which nominated the Trustee may nominate a new Trustee in his place.

5 From the commencement of this Act the term of office of all persons appointed to be Trustees under the Indian Museum Act, 1876, shall cease

Property and powers of the Trustees.

6 (1) All the property, whether moveable or immovable, which at the commencement of this Act is held by the Trustees of the Indian Museum constituted by the Indian Museum Act, 1876, on trust for the purposes of the said Museum shall, together with any such property which may hereinafter be given, bequeathed, transferred or acquired for the said purposes, vest in the Trustees of the Indian Museum constituted by this Act on trust for the purposes of the said Museum

Provided that the Trustees may expend the capital of any portion of such property which may consist of money on the maintenance, improvement and enlargement of the collections deposited in, presented to or purchased for the said Museum or otherwise for the purposes of the same as they may think fit.

(2) The Trustees shall have the exclusive possession, occupation and control, for the purposes of such trust, of the land specified in the schedule, including any buildings which may have been, or may hereafter be, erected thereon, other than those portions thereof which have been set apart by the Trustees for the records and offices of the Geological Survey of India

7. Subject to the provisions of any bye-laws made in this behalf, the Trustees may, from time to time,—

(a) deliver, by way of loan, to any person the whole or any portion of, or any article contained in, any collection vested in them under this Act;

(d) exchange or sell duplicates of articles contained in any such collection and take or purchase, in the place of such duplicates, such articles as may in their opinion be worthy of preservation in the Museum,

(c) present duplicates of articles contained in any such collection to other Museums in British India, and

(d) remove and destroy any article contained in any such collection

8. (1) The Trustees may from time to time, with the previous sanction of the Governor General in Council make bye-laws consistent with this Act for any purpose necessary for the execution of their trust.

(2) In particular, and without prejudice to the generality of the foregoing power, such rules may provide for—

(a) the summoning, holding and adjournment of general and special meetings of the Trustees,

(b) the securing of the attendance of Trustees at such meetings,

(c) the provision and keeping of minute-books and account-books,

(d) the compiling of catalogues,

(e) the lending of articles contained in the collections vested in the Trustees,

(f) the exchange and sale, and the presentation to other Museums in British India, of duplicates of articles contained in such collections,

(g) the removal and destruction of articles contained in such collections, and

(h) the general management of the Museum

9. Subject to such regulations and conditions as may be prescribed by them in this behalf the Trustees shall appoint such officers and servants as may be necessary or proper for the care or management of the trust-property, and may assign to such officers and servants such pay as they may think fit

Provided that—

(a) no officer shall be appointed—

(i) if such officer is, at the date of his appointment, in India, without the approval of the Governor General in Council, or

(ii) if such officer is not then in India, without the approval of the Secretary of State for India in Council, and

(b) no new office shall be created, and no salaries of officers shall be altered, without the previous sanction of the Governor General in Council

Duties of the Trustees.

10. (1) The Trustees shall furnish on or before the first day of December in each year—
Trustees to furnish annual reports and accounts

(a) to the Government of India a report of their several proceedings for the previous financial year, and

(b) to such auditor as the Governor General in Council appoints in this behalf, accounts of all moneys expended by the Trustees during the past twelve months, supported by the necessary vouchers.

(2) The Trustees shall cause such report and accounts to be published annually for general information

11. (1) The Trustees shall cause every collection of articles in the collections of the Asiatic Society to be in the said Indian Museum formerly belonging to the Asiatic Society of Bengal and all additions that may hereafter be made thereto otherwise than by purchase under section 6, to be marked and numbered and (subject to the provisions contained in sections 7 and 16) to be kept and preserved in the said Museum with such marks and numbers

(2) An inventory of such additions shall be made by the said Society, one copy whereof shall be signed by the Trustees and delivered to the said Society, and another copy shall be signed by the Council of the said Society and delivered to the Trustees, and shall be kept by them along with the inventory delivered to the predecessors in office of the Trustees when the said collections were deposited in the said Museum

12. All objects taken in exchange and articles purchased under section 7 and all moneys realised from sales made in accordance with the terms of the same section shall be held on trust and subject to powers and declarations corresponding as nearly as may be with the trusts, powers and declarations by this Act limited and declared.

Supplemental Provisions

13. All officers and servants appointed under this Act shall be deemed public servants and subject to the Indian Penal Code, and, so far as regards their salaries, allowances and pensions and their leave of absence from duty, they shall be subject to the rules which under the Civil Service Regulations for the time being in force would be applicable if their service was service under Government

14. Notwithstanding anything hereinbefore contained, the Trustees may, if they think fit, keep collections not belonging to them with the previous sanction of the Governor General in Council and

subject in each case to such conditions as he may approve and to such rules as he may prescribe, assume the custody and administration of collections which are not the property of the Trustees for the purposes of their trust under this Act and keep and preserve such collections either in the Indian Museum or elsewhere

Provided that if the trust constituted by this Act is at any time determined, any such collection shall not by reason of their then being in the Indian Museum become the property of His Majesty

15 The Trustees may, with the previous sanction of the Governor General in Council, and subject to such conditions as he may approve, deliver possession of the whole or any part of the property described in the schedule to such person as the Lieutenant-Governor of Bengal may appoint in that behalf.

16 If the trust constituted by this Act is at any time determined,—

(a) the collections and additions mentioned in section 11 shall become the property of the said Asiatic Society or their assigns, and

(b) all the other collections then in the said Indian Museum shall, save as otherwise provided by section 14, become the property of His Majesty

17. The Indian Museum Act, 1876, and the Indian Museum Act 1887, are hereby repealed

THE SCHEDULE.

(See sections 6 and 15.)

Land bounded—

on the north side by the premises No. 2, Sadder Street, and by Sadder Street,

on the west side by Chowringhee Road and by the premises No. 29, Chowringhee Road (occupied by the Bengal United Service Club),

on the south side by the premises No. 2, Chowringhee Road, by Kyd Street, and by the premises No. 4, Chowringhee Lane, and

on the east side by the premises No. 15, Kyd Street, and the premises Nos. 4, 3, 2 and 1, Chowringhee Lane,

together with all buildings, roads and tanks existing or erected thereon, and all easements appertaining thereto

J M MACPHERSON,

Secretary to the Government of India.

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the Central Provinces Courts Act, 1904, was presented to the Council of the Governor General of India for the purpose of making Laws and Regulation on the 4th March, 1910 —

WE, the undersigned, Members of the Select Committee to which the Bill to amend the Central Provinces Courts Act, 1904 was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

2. *Clause 2*—It has been represented, with reference to the new section 6A which this clause proposes to insert in the Central Provinces Courts Act, 1904, that in the only cases which are likely to fall under clause (b) (ii) of the section it is not necessary to require a reference to a Full Bench. We have accordingly amended the clause so as to provide that such cases should be referred to another Judge instead of to a Full Bench.

3. We agree in the view expressed by the Chief Commissioner and the Judicial Commissioner that the Local Government should be empowered to invest Munsifs with the jurisdiction of a Court of Small Causes up to a value not exceeding Rs. 100. We have for this purpose inserted a new clause 4 re-naming with the necessary amendments section 14 of the present Act.

4. The publication ordered by the Council has been made as follows :—

In English

<i>Gazette</i>	<i>Date</i>
Gazette of India	23rd October 1909.
Central Provinces Gazette	30th October 1909.

We think that the Bill has not been so altered as to require re-publication, and we recommend that it be passed as now amended.

The 2nd March 1910

[The portions printed in italics denote the alterations proposed by the Select Committee]

NO II

A Bill to amend the Central Provinces Courts Act, 1904.

WHEREAS it is expedient to amend the Central Provinces Courts Act, 1904, It is hereby enacted as follows:

- 1 This Act may be called the Central Provinces Courts (Amendment) Act, 1910.
- 2 For Chapter II of the Central Provinces Substitution of new Courts Act, 1904, the Chapter I of Chapter II following shall be substituted, namely:—

CHAPTER II

"THE COURT OF THE JUDICIAL COMMISSIONER.

"3 The Court of the Judicial Commissioner of the Central Provinces of Judicial Commission shall be the highest Civil Court of Appeal, and, except in reference to proceedings against European British subjects and persons jointly charged with European British subjects, the highest Court of Criminal Appeal and Revision in and for the territories to which this Act extends.

"4 (1) The Court of the Judicial Commissioner shall consist of three or more Judges, one of whom shall be the Judicial Commissioner of the Central Provinces in Council, and the others Additional Judicial Commissioners who shall be appointed by the Local Government with the previous sanction of the Governor General in Council.

(2) Every person appointed under this section shall hold his office during the pleasure of the Governor General in Council.

"4A. (1) The Judicial Commissioner, whether permanent or officiating, shall have rank and precedence before the other Judges of his Court.

(2) The Additional Judicial Commissioners shall have rank and precedence among themselves according to the seniority of their appointment as such Additional Judicial Commissioners.

Provided that an Additional Judicial Commissioner permanently appointed shall be deemed to be senior to and to have rank and precedence before an officiating Judge.

(3) In this Act the expression 'the senior Judge' shall mean the Judge for the time being entitled to the first place in rank and precedence.

"5 (1) Except as otherwise provided by this Act or by any other enactment for the time being in force, and subject to any rules made under this Act, the jurisdiction of the Court of the Judicial Commissioner may be exercised by a single Judge of the Court.

(2) The Court of the Judicial Commissioner may, with the sanction of the Local Government, make rules to provide, in such manner as it thinks fit, for the exercise of any of its powers by a bench of two or more Judges of the Court.

"5A. (1) The Court of the Judicial Commissioner may make rules declaring what number of Judges, not being less than three, shall constitute a full bench of the Court of the Judicial Commissioner, and may, by such rules prescribe the mode of determining which Judge shall sit as a full bench when a full bench sitting becomes necessary.

(2) Subject to the provisions of sub-section (1), the Judicial Commissioner may determine which Judge in each case or class of cases shall sit alone and which Judges shall constitute any bench.

"5B The Judicial Commissioner may transfer any case, whether the hearing has or has not commenced, from the file of any Judge sitting alone to his own file or to that of any other Judge of the Court.

"5C Any single Judge of the Court of the Judicial Commissioner, and any bench of Judges, thereof not being a full bench, may refer for the decision of a bench of two Judges or of a full bench any question of law or custom having the force of law, or of the construction of any document or of the admissibility of any evidence arising in any case before the Judge or bench, and shall dispose of the case in accordance with the decision of the bench to which the question has been referred.

"6 A Judge of the Court of the Judicial Commissioner shall when sitting in a bench of three or more Judges of that Court, but not otherwise, be competent to try any appeal from a decree, order or sentence passed by himself, whether in a civil or criminal matter and to adjudicate upon any proceeding connected with or arising out of such decree, order or sentence notwithstanding anything contained in section 556 of the Code of Criminal Procedure, 1898.

6A. Except as otherwise provided by any enactment for the time being in force,—

(a) where there is a difference of opinion among the Judges composing any bench of the Court of the Judicial Commissioner, the decision shall be in accordance with the opinion of the majority of those Judges;

(b) if there is no such majority, then,—

(i) if the bench is a full bench, the decision shall be in accordance with the opinion of the senior Judge of the bench;

(ii) in other cases, the bench before which the difference has arisen shall refer it to another Judge of the Court and shall dispose of the case in accordance with the decision of such Judge.

7. (1) The Registrar of the Court of the Registrar and Judicial Commissioner shall be appointed by the Local Government.

(a) The ministerial officers of the said Court shall be appointed by the Judicial Commissioner.

8. (1) In addition to any other powers to make rules expressly or by implication conferred on the Court of the Judicial Commissioner, with the previous sanction of the Local Government, may, from time to time, by notification in the local official Gazette, make rules consistent with this Act and any other enactment for the time being in force,—

(a) declaring what persons shall be permitted to practise as petition-writers in the Courts, regulating the conduct of the business of persons so practising and determining the authority by which breaches of rules under this clause shall be tried;

(b) providing for the translation of any papers filed or produced in the Court of the Judicial Commissioner, and for the payment of the expenses thereby incurred;

(c) regulating the procedure in cases where any person applies to inspect a record of any Court or to obtain a copy of the same, and prescribing the fees payable by such persons for searches and copies;

(d) prescribing the travelling and other expenses to be allowed to witnesses in civil cases, and the fees to be allowed to Commissioners appointed by Civil Courts;

(e) conferring and imposing on the ministerial officers of the Court of the Judicial Commissioner and of the Courts subordinate thereto such powers and duties of a non-judicial or quasi-judicial nature as it thinks fit, and regulating the mode in which powers and duties so conferred and imposed shall be exercised and performed;

(f) prescribing forms to be used in the subordinate Courts for such proceedings, books, entries, statistics and accounts as it thinks necessary;

(g) providing for the visitation and inspection of the subordinate Courts, and the supervision of the working thereof; and

(h) regulating all such matters as it may think fit, with a view to promoting the efficiency of the judicial and ministerial officers of the Court of the Judicial Commissioner and of the subordinate Courts and maintaining proper discipline among those officers.

(a) Whoever commits a breach of any rule made under sub-section (1), clause (a), shall be punishable with fine which may extend to fifty rupees.

9. The Court of the Judicial Commissioner shall keep such registers, books and accounts, returns, books and accounts as may be necessary for the transaction of the business of the Court, and shall comply, in such form and manner as the Local Government may deem proper, with any requisitions which the Local Government may make for records of, or papers belonging to, the Court of the Judicial Commissioner or any Civil Court subordinate thereto, or for certified copies of, or extracts from, such records or papers, or for returns, statements or reports.

3 In section 13, sub-section (1), of the said Amendment of Act, the following alterations shall be made, namely:—

(i) in sub-clause (a), for the words "five hundred" the words "one thousand" shall be substituted, and

(ii) in sub-clause (b), for the word "five" the word "ten" shall be substituted.

4. For section 14 of the said Act the following substitution of new section shall be substituted, namely:—

"14. The Local Government may, by notification in the local official Gazette, invest any District Court or any Court of a Subordinate Judge or

of a Munsif with the powers of a Court of Small Causes under the Provincial Small Causes Courts Act, 1887, up to such value not exceeding five hundred rupees in the case of a District Court or of the Court of a Subordinate Judge or one hundred rupees in the case of the Court of a Munsif as it thinks fit, to be exercised in cases arising within the limits of the Court's jurisdiction or in any specified area within such limits, and may withdraw any powers so conferred"

5. For section 15, clause (b), of the said Amendment of Act II, 1904, section 15, be substituted, namely.—

"(b) an appeal from the decree or order of the Court of a Subordinate Judge shall lie—

(i) where the value of the suit in such Court does not exceed one thousand rupees, to the District Court;

(ii) where the value of such suit exceeds one thousand rupees but does not exceed five thousand rupees, to the Divisional Court, and

(iii) where the value of such suit exceeds five thousand rupees, to the Court of the Judicial Commissioner."

6. In section 17 of the said Act, the following shall be inserted as sub-section (2), the present sub-section (2) being re-numbered as sub-section

(3), namely —

"(2) The Judicial Commissioner or an Additional Judicial Commissioner appointed by him shall from time to time visit, and inspect the proceedings of, the Civil Courts subordinate to the Court of the Judicial Commissioner, and shall give such directions on matters not provided for by law as may be necessary to secure the due administration of justice."

7. In section 22, sub-section (2), and section 26, sub-section (1), of the said Act, for the words "the Judicial Commissioner" the words "the Court of the Judicial Commissioner" shall be substituted.

J. M. MACPHERSON,

Secretary to the Government of India.

SUPPLEMENT TO
The Gazette of India

No. 10.]

CALCUTTA, SATURDAY, MARCH 5, 1910.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the Gazette may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the holder of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 3rd March 1910, based on the Indian Daily Weather Reports of the period.

The depression which was passing eastward across northern India at the close of last week reached Assam on the 26th where it gave local rainfall; as it moved eastward it caused westerly or northwesterly winds in its rear, and in consequence the air was very much drier and cooler than usual. A second depression appeared over Persia on the 27th and as it advanced rapidly eastward it produced light precipitation in Baluchistan, but on entering India like its predecessor it gave snow or rain only in west Himalayas; on the 3rd it was approaching northeast India where weather was becoming unsettled. Temperature, which had been low, rose as the depression approached and became normal, but it fell in the rear and at the close of the week was in moderate to large defect in northwest India.

Burma.—Mergui reported a fall of rain on the 26th. Skies were clear or lightly clouded, and temperature was normal or in slight defect.

Northeast India, including Orissa.—Rain fell locally in Assam at the beginning of the week and a few light falls of rain occurred in the division on the 2nd. Skies were

cloudy in Eastern Bengal and Assam on the 25th and 26th and over the greater part of the division on the 3rd. Weather was cooler than usual for a few days about the middle of the week.

The United Provinces, Central India and the Central Provinces.—Precipitation occurred in the hills in the northwest of the United Provinces. Skies were generally clear except on the last day of the week when they were cloudy in the United Provinces. Temperature was normal or in defect.

Northwest India.—There was fairly widespread precipitation in the Punjab hills, Kashmir and northeast Baluchistan. Skies were overcast on several days in the area of precipitation and over almost the whole division on the 28th. Temperature was in defect during the greater part of the week, and on some days the deficiency amounted to over 10° at many observatories.

The Peninsula.—Skies were generally clear and temperature normal.

The following summarises the principal rainfall amounts as reported at 8 hrs. each day.—

February 25th.	Chakrata 1'36" and Simla 0'40".
„ 26th.	Dibrugarh 0'45", Silchar 1'21" and Cherra Poonjee 0'88".
„ 28th.	Quetta 0'40".
March 1st.	Sonemarg 1'80" and Minimarg 0'67".
„ 2nd.	Sonemarg 0'90".

Precipitation for the week was in large excess in Kashmir, but rainfall was in very large defect in the rest of northern India, and the seasonal rainfall from the 3rd December is more than 20 per cent. below normal in Assam, Bihar, the east of the United Provinces, Baluchistan and the greater part of the Peninsula,

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 26th February 1910.

Burma.—Mergui received heavy rain and light to moderate showers fell in several districts including the Shan States. Threshing and winnowing of the winter rice crops are completed in most districts. Cultivation of spring rice and island crops continues and prospects of standing crops are satisfactory. The price of unhusked rice has risen at the ports of Rangoon, Bassein and Moulmein and is normal or slightly above normal in most districts.

Eastern Bengal and Assam.—The weather was seasonable. There was no rain except light showers in the Surma Valley and the Assam Valley divisions. More rain is needed for tea and spring crops. Transplantation of spring rice is finished. Harvesting of mustard and sugarcane continues. Jhum cutting in the hills and preparatory cultivation of the soil for winter rice and autumn crops in the plains are progressing. Prospects of spring rice, sugarcane, tea, linseed and *til* are good and of wheat and tobacco fair. The average price of common rice is almost stationary. Cattle disease prevails in 4 districts.

Benal.—There was no rain during the week. Sugarcane pressing still continues. Harvesting of pulses and oilseeds and preparation of land for the next season's crops are going on. Planting of sugarcane has commenced in some districts. The standing spring crops are doing well. Some damage has been done to poppy by hailstorm in Monghyr. Prospects are on the whole good. The price of common rice has risen in Hooghly, Murshidabad, Jessore, Bhagalpur and the Sonthal Parganas, has fallen in Bankura, Howrah, Angul, Palamau and Cooch Behar, and is stationary in the remaining districts. Cattle disease is reported from 10 districts. The fodder and water-supply is sufficient throughout the Province.

United Provinces.—Two Himalayan districts report useful rain. The condition of standing crops continues excellent. Poppy is flourishing and extraction of opium has begun. Harvesting of wheat, barley, gram, peas and potatoes is in progress in places. High west winds have caused slight damage in the Upper Doab. Slight injury to mustard from insects is again reported in a few districts. Cattle disease is reported in twelve districts but the general condition of agricultural stock is good. Fodder and supplies are ample. Prices generally continue stationary.

Punjab.—Light to moderate rain is reported from Ambala, Rawalpindi and parts of the Delhi and Mianwali districts. Hail fell in parts of Mianwali where more rain is wanted. Pressing of sugarcane continues in some districts and the outturn is good to average. Standing crops are generally in good condition. Extra spring crops are being sown in Ambala, Lahore, Amritsar, Sialkot, Shahpur and Multan. Damage has been done to crops by rats in Rohtak and Sialkot. *Taramira* has been damaged by insects in parts of Ferozepur. Prices are generally unchanged. The condition of cattle is generally good. Fodder is sufficient. Water for cattle is scarce in parts of Shahpur.

North-West Frontier Province.—Good showers fell during the week all over the Province and were beneficial for standing crops and for extra spring sowings. Standing crops are generally in good condition except that in the Dera Ismail Khan district they are reported to be damaged slightly by high winds. Pressing of sugarcane still continues in parts of the Peshawar and Bannu districts. Sugarcane planting is in progress in the Bannu district. Extra spring sowings are being made. Slight hailstorm fell in the Swabi tahsil of the Peshawar district but did no damage to crops. The water supply and fodder are scarce in the Shigga circle of the Marwat tahsil of the Bannu district and sufficient elsewhere. The condition of cattle is generally good except in one village of the Nowshera tahsil of the Peshawar district. The public health is generally good. Prices, except those of maize and barley, show a slight tendency to fall. Prices:—wheat 11½ to 14½; gram 17½ to 24; maize 18 to 23½; bajra 19½ to 19 and barley 20½ seers per rupee.

Jammu.—Slight rain fell during the week. Prices are fluctuating. Wheat sells from 11 to 17 and maize from 16 to 20 seers per rupee. The condition of standing crops is fair. Cattle disease of mild type is reported in the Basohli, Ramban and Kathua tahsils. Fodder is sufficient.

Kashmir.—Slight snow and rain fell during the week. Spring crops are in good condition. Ploughing for autumn crops is in progress. There is no disease among men or cattle. Fodder is average except in flooded villages. Prices are unchanged.

Rajputana.—Spring crops are progressing. Slight damage to crops by wind is reported in places in Marwar and Bharatpur. Cattle are in good condition. Fodder is sufficient. Prices are rising in Jaisalmer, Tonk and Jaipur and are steady or falling elsewhere.

Central India.—Rainfall nil. Threshing of autumn and irrigation of spring crops continue. Crops have been damaged slightly in Gwalior, Indore, Bundelkhand, Malwa and Bhopawar. Agricultural stock are good except for some disease in Bundelkhand and Bhopawar. Prices are fluctuating in Indore and are high and steady elsewhere. Watering and weeding of poppy continue.

Central Provinces —The weather continues to be clear. The nights and mornings are cool and the days are becoming warm. Cutting of spring crops is proceeding all over the Provinces. In Narsinghpur where an unparalleled bumper harvest was anticipated wheat in light soil and in unembanked fields has been attacked by disease and the damage is estimated at five to ten per cent over the whole crop. With this exception prospects are generally favourable everywhere. Pressing and sowing of sugarcane are in progress in Betul and Chhindwara. Field embankments are being constructed in Bhandara and Bilaspur. In Nimar and Berar land is being prepared for sowing of the ensuing season's crops. The supply of fodder and water is adequate and cattle are doing well. Prices:—The price of wheat in Seoni, Betul and Chhindwara and *juar* in Wardha, Chhindwara and Amraoti fell by 1 to 1½ seers per rupee. In Nimar *juar* became dearer by 1 seer. Gram sells cheaper in eight districts by 1 to 3 seers. Variations are unimportant elsewhere.

Feudatory States —Only Sirguja had a sprinkling of rain during the week. Harvesting of spring crops is in progress and prospects are generally good. Fodder and water are sufficient everywhere. Prices:—Wheat in Kawardha, Nandgaon and Sarangarh became cheaper by 1 seer per rupee.

Bombay.—Standing crops are suffering from insufficient moisture in parts of Poona and Sholapore, they have been damaged slightly by insects in parts of Hyderabad; by rats in West Khandesh, by frost in the Upper Sind Frontier and are generally good elsewhere. Threshing of autumn crops continues in parts of the Konkan, Khandesh, Poona and Palanpur. Harvesting of spring crops is generally in progress in the Presidency Proper. Cotton picking is progressing in parts of Gujarat, West Khandesh, Bijapur, Belgaum, Kathiawar, Baroda, Cutch and Rewa Kantha. Lands are being prepared for the next season in parts of Kanara, the Deccan and Belgaum. The fodder supply is generally adequate. Agricultural stock are sufficient except in parts of the Deccan and are generally in good condition. Drinking water is generally sufficient. Irrigation water is deficient in parts of Nasik, Poona and Belgaum. Grain stocks are sufficient. Prices have fallen in Poona, Satara and Belgaum, have risen in Karachi, Surat and Dharwar and are stationary elsewhere. The quantity purchasable per rupee is in Sind 20 to 41 per cent. In Gujarat 3 to 29 per cent. In the Konkan 2 to 38 per cent. In the Deccan 10 to 32 per cent and in the Karnatak 26 to 33 per cent less than the normal.

Hyderabad —No rain fell during the week. The spring harvest continues and the crop is generally fair to good but poor in parts of the Warangal, Nalgonda and Karimnagar districts. Harvesting of the castor seed crop is almost over and its outturn is estimated at from 2 to 8 annas. Late rice sowings still continue in a very few parts and the crop is being irrigated and weeded in many places. The crop is generally fine but the area is limited owing to insufficiency of water in tanks. Water scarcity is reported in parts of Lingsugur in the Raichur district, Udgir and Janwada in the Bidar district, Ashti in the Bir district; Pallam in the Parbhani district and Sultanabad and Mahadeopur in the Karimnagar district. The water supply is decreasing in Palonchain, the Warangal district, in Deverkonda and Miryalguda in the Nalgonda district, Nizamabad in the Nizamabad district, Parenda in the Osmanabad district, Alpur, Gangawati, Kushtagi and Manvi in the Raichur district and Karimnagar and Jagtiyal in the Karimnagar district. Cattle disease prevails in 6 talukas and fodder scarcity in 17. Prices:—Wheat 8; coarse rice 8½ and *juar* 14½ seers per rupee. White and yellow *juar* are selling in Hyderabad City at 13 and 15 seers per rupee respectively. The highest price in districts is 10 seers in Madhura in the Warangal district and in Jagtiyal and Jamikunta in the Karimnagar district and the lowest 23 seers in Rajura and Udgir in the Bidar district.

Mysore.—Prices of food grains have fallen slightly in Shimoga; are fluctuating in Bangalore, Mysore and Kadur and are steady elsewhere. Markets are well supplied. Standing crops are in good condition. Cattle are generally healthy. Water and fodder are available.

Coorg.— Rainfall 41 cents. Picking of coffee and harvesting of rice continue. Price of food grains are stationary. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—The rainfall was good in the Nilgiris; light to fair in South Malabar and the Circars, except the Vizagapatam Agency, Guntur and North Arcot and *nil* elsewhere. Irrigation supplies are sufficient in Ganjam, Vizagapatam, North Arcot, Malabar and the Nilgiris and insufficient in parts of other districts. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are generally fair but some in parts of Guntur, Cuddapah, the Carnatic, Central and South, have withered or are withering or require more rain. Harvests continue with outturn poor to normal and bumper. Pasture is sufficient except in parts of the Circars, the Deccan, Nellore, Chingleput, North Arcot, Tinnevely and South Canara. Fodder is scanty in parts of Guntur and Nellore. The condition of cattle is generally good. The price of rice is stationary in fourteen districts, has fallen in six and has risen in three. The prices of millets have fluctuated as follows.—*Ragi* is stationary in eleven districts; has fallen in six and has risen in four. *Cholam* is stationary in three districts, has fallen in three and has risen in eight. *Cumbu* is stationary in four districts; has fallen in two and has risen in nine. The public health is generally good. Prospects are generally fair though more rain is required in Nellore and Salem. The condition of the labouring classes is satisfactory everywhere and employment is readily available. Grain stocks are generally sufficient.

R. W. CARLYLE,
Secretary to the Government of India.

No. 1605—1626-81.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

GENERAL

ROYAL WARRANT INSTITUTING AND CREATING A NEW MEDAL, ENTITLED
EDWARD MEDAL, TO BE AWARDED FOR HEROIC ACTS BY MINERS AND
QUARRYMEN.

RESOLUTION.

Dated Calcutta, the 3rd March 1910.

THE following Royal Warrant is published for general information in continuation of the Royal Warrant published with the Resolution in this Department, No. 10724—10740-246, dated the 18th December 1907 :—

Whitehall, December 2, 1909.

THE KING has been pleased to issue a Warrant under His Majesty's Royal Sign Manual to the following effect :—

Edward, R. & I.

EDWARD THE SEVENTH, by the Grace of God, of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, King, Defender of the Faith, Emperor of India, to all to whom these Presents shall come,

Greeting !

WHEREAS We, by a Warrant under Our Royal Sign Manual, bearing date the thirteenth day of July, one thousand nine hundred and seven, in the seventh year of Our Reign, did institute and create a new Medal to be entitled the Edward Medal, to be awarded for heroic acts performed by Miners and Quarrymen and others, who endanger their own lives in saving or endeavouring to save the lives of others from perils in Mines and Quarries within Our Dominions, and Territories under Our protection and jurisdiction:

AND whereas We are desirous of extending the scope of this decoration :

It is ordained that the Edward Medal of the First Class and the Edward Medal of the Second Class shall be awarded to those of Our faithful subjects who in course of Industrial Employment endanger their own lives in saving or endeavouring to save the lives of others from perils incurred in connection with such Industrial Employment in these Our Dominions, and in Territories under Our protection or jurisdiction, and such awards shall be made only on a recommendation to us by Our Principal Secretary of State for the Home Department.

WHERE the said Medal is granted otherwise than for acts performed in Mines, the Medal shall bear Our effigy on the obverse, and on the reverse a suitable design, with the words "For Courage".

GIVEN at Our Court at Sandringham, the first day of December, one thousand nine hundred and nine, in the ninth year of Our Reign.

By His Majesty's Command,

H. J. GLADSTONE.

ORDERED that the paper be published in the Supplement to the *Gazette of India*, and that copies be forwarded to the Local Governments and Administrations noted in the margin, and to the Finance, Foreign and Railway Departments, for information, in continuation of the communication from this Department, No. 10724—10740-246, dated the 18th December 1907.

ORDERED also that the paper together with a copy of the Resolution of the 18th December 1907, with which the Warrant instituting the decoration was published, be communicated to the other Departments of the Government of India, for information.

B ROBERTSON,

Secretary to the Government of India.

The Secretary to the Government of Madras, Revenue Department.

PART VI.

Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA,
LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA,
ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS,
UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS,
1861 TO 1909 (24 & 25 VICT., C. 67, 55 & 56 VICT., C. 14,
AND 9 EDW. VII, C. 4).

The Council met at Government House on Friday, the 25th February 1910.

PRESENT :

His Excellency THE EARL OF MINTO, P.C., G.C.M.G., G.M.S.I., G.M.I.E., Viceroy
and Governor General of India, *presiding*,

and 59 Members, of whom 54 were Additional Members.

QUESTIONS AND ANSWERS.

The Hon'ble MR. MAHOMED ALI JINNAH asked the following questions :—

"Are the Government aware that there is a strong feeling prevailing amongst the Muhammadans against the present state of the *wakf* law as expounded by the recent decisions of the Privy Council affecting in particular the system of 'wakf aala'd awalad' ?

"Does the Government propose to take steps to bring the law on the subject into conformity with the texts and the wishes of the Muhammadans ?

"If so, how soon ?"

The Hon'ble SIR HARVEY ADAMSON replied :—

"The Government are aware that objections are entertained to the exposition of the law on the subject of *wakf* contained in various decisions of the Judicial Committee of the Privy Council.

"As at present advised the Government are not prepared to undertake legislation with the express object of upsetting judicial decisions to which exception is taken. They are, however, ready at any time to accord their fullest consideration to any specific proposals for legislation directed to the object of securing family settlements of a limited nature, provided that such proposals are generally approved by the Muhammadan community."

The Hon'ble MR. DADABHOY asked :—

"Is it true that owing to flood, disease, slaughter, poisoning and other reasons, there has been a depletion during the last twenty years of the stock of cattle in the country ?

"Have prices of cattle gone up? If so, will the Government be pleased to state what steps are being taken for the replenishment of the stock?"

The Hon'ble Mr. MILLER replied :—

"Such statistics as are available do not bear out the general idea that there has been a depletion of the stock of cattle during the last twenty years, but the earlier statistics are undoubtedly unreliable, and it is quite possible that the increase shown by later figures is due to more accurate enumeration

"Where there has been a serious depletion of stock in any period, it has been due to drought and famine and their results, rather than to the causes mentioned by the Hon'ble Member. Thus in the United Provinces, where careful censuses have been made, we know that an increase between 1899 and 1904 was followed by a considerable decrease between 1904 and 1909, and this was undoubtedly due to the scarcity of 1905-1906, and the famine of 1907-1908, and to heavy mortality from disease among cattle which had deteriorated owing to privation. The Government has made every effort to provide against losses of this description, and the Hon'ble Member is no doubt aware of the special concessions made during recent famines to facilitate transport of fodder as well as of the arrangements made to allow grazing in forests.

"It is true that there has been a rise, and in many places a very large rise, in prices.

"The replenishment of stock where it has been depleted is a matter which must be left mainly to the people, but Government assists them liberally with loans at favourable rates of interest for the purchase of cattle, and large sums have been disbursed free by Famine Relief Committees from charitable subscriptions. Action has also been taken by Government for the establishment of cattle farms which are to be found in Bengal, Bombay, the Central Provinces and Punjab, and arrangements have been made especially in the Punjab and the United Provinces, for the maintenance of stud bulls by Government and the District Boards. The Government fully realises the importance of the question to the great agricultural industry of the country; and much has already been done by the Civil Veterinary Department, which has been expanded as rapidly as funds permit, to reduce mortality, and to train up a staff of skilled assistants to advise the people as to the best means both of avoiding loss, and of improving the arrangements for breeding."

The Hon'ble MR. DADABHOY asked :—

"Will the Government be pleased to state in tabular form the number of accidents and the incidental casualties year by year on each Indian railway during the last five years ?

"Have any special measures been taken on the railways during the same period for the prevention of accidents?"

The Hon'ble Sir T. R. WYNNE replied :—

" A statement in tabular form of the number of accidents and incidental casualties is published for each year in the Railway Board's annual Administration Report on the railways in India which can be purchased at booksellers in Calcutta, Bombay, Madras, Rangoon and Lahore.

" In the Report for 1908 the information asked for is contained in Appendix 30, pages 122 and 123.

" With reference to the inquiry whether any special measures have been taken on the railways for the prevention of accidents, the answer is, that every accident is the subject of special inquiry, under the supervision and personal attention of a Government Inspector of Railways, to elucidate its cause, and to provide a remedy for its recurrence if necessary.

" The result of each inquiry, its ' finding ' as to the cause of the accident, and its recommendations as to any action that should be taken, is submitted by each Railway Administration to the Government Inspector, who forwards it to the Railway Board with his remarks.

" The cause leading to every accident and the steps that have been taken to prevent a recurrence of a similar accident then comes therefore before the Railway Board, who carefully consider if the proposals made are adequate or not and issue orders accordingly.

" It may be pointed out that railway accidents cannot be entirely prevented, and this applies to every country in the world. Mistakes will occur, but the public may feel assured that every effort is made to minimize them."

The Hon'ble MR. DADABHOY asked :—

" Are female ticket collectors employed at all checking stations on Indian railways? If not, for the greater protection and convenience of female passengers, will orders in that behalf be issued by Government?"

The Hon'ble SIR T. R. WYNNE replied :—

" Female ticket collectors are employed at checking stations on most of the Indian railways and have been employed for some time past.

" Railway administrations are fully alive to the necessity of providing for the convenience of female passengers."

The Hon'ble MR. DADABHOY asked :—

" Is latrine accommodation provided in all trains on Indian railways for third class passengers? If not, will Government be pleased to insist upon the Railway Companies providing such accommodation forthwith, especially on trains running at night?"

The Hon'ble SIR T. R. WYNNE replied :—

" Under the Railway Act, section 64, Railway Administrations are only bound to provide latrine accommodation to one compartment reserved for females when the train, of which it is a part, runs for a distance exceeding fifty miles.

" The Railway Act imposes no other liability to provide latrines in railway carriages, and this liability has been fully complied with and much more has been done than the law actually requires.

" In response to the request of Government, made some seven years ago, railways have been steadily providing latrine accommodation for the use of males to all carriages running on trains travelling long distances, and this accommodation is being steadily added to.

" For instance, up to date the Great Indian Peninsula Railway have 419 third class carriages so fitted. The East Indian Railway provide such accommodation in all their intermediate and third class carriages running on their mail and passenger trains. Up to the end of 1908 the total number of carriages on Indian Railways of the intermediate and third class which had been fitted with latrines was 5,364.

" The returns for the year 1909 have not yet been made up.

" Information on this matter is given annually in the Railway Board's Administration Report."

FINANCIAL STATEMENT.

The Hon'ble SIR G. FLEETWOOD WILSON presented the Financial Statement for 1910-1911. He said:—

" On this occasion, when the first Financial Statement under the new rules is presented to our greatly enlarged Council, I may be permitted to indulge in a brief retrospect. In February, 1860, just fifty years ago, my predecessor and namesake, the Right Honourable James Wilson, in an elaborate speech, laid the earliest of India's annual financial statements before the Legislative Council of those days. His speech, as I have said, was elaborate; it covered the whole ground of the financial and economic position of India. But the accounts which it introduced were set forth in a single short table, printed on a sheet no bigger than the proverbial sheet of note paper. To this were appended a few statistics of debt, trade and cash balances; the whole thing barely occupied ten octavo pages. There was of course no discussion. The revenues for the coming year were estimated at £38 millions and the expenditure at £42 millions. The total external trade, imports and exports combined, was valued at only £60 millions (it is now over £200 millions) and the total debt of India was £98 millions (it is now over £250 millions). We have gone a long way in these fifty years, and our conditions are widely different from what they were in 1860; but there is a curious parallelism between parts of Mr. Wilson's speech and some of the things which I shall have to say to-day. He had to deal with a deficit; he had to convey a grave warning (which was long unheeded) of the precarious nature of our opium revenue; and he had—as alas! is my fate also—to suggest additional taxation.

" It is not, however, the matter, but rather the form and the treatment, of our financial statements that I set out to review. The full expository speeches and the brief figured tables were continued by Mr. Wilson's successors for thirteen years: though about 1866 we find the abstract of revenue and expenditure developed and classified into major heads—a far shorter list than we now have, but numbered and arranged much in the present style. In 1873 and for the three following years, there were no Budget meetings, the old law of 1861 did not permit the Council to meet for other than legislative business, and the finances of those years involved no legislation. The statement in those circumstances took the shape of a formal minute published in the *Gazette*. In 1877, however, with a great famine overshadowing the finances, a Budget meeting had again to be convoked, and the statement was presented by Sir John Strachey in a speech of portentous length. It occupied 40 pages of printed foolscap, and was supplemented by another 34 pages of a minute in which the Finance Member examined the figures in fresh detail. In 1881, Major Baring (now Lord Cromer) restored comparative brevity; but in 1882 he reverted to a speech which occupies 52 printed pages, explaining that there was no other means of describing the figures with accuracy, and that his attempt at condensation in the previous year had been misunderstood. After that, came a series of annual minutes, with a wealth of detail, but a decided tendency to technicality. During this period the form in which our figured statements are now shown was worked out under Lord Cromer's orders; and in 1890, Sir David Barbour split up the explanatory speech or minute into two parts. His intention evidently was that the first part should be mainly a discussion of policy and the second an examination of results. It was some time before this ideal was reached, and Part I in the course of years got more and more overloaded with figures, technical and difficult. But in 1900, Sir Clinton Dawkins got back to the original idea. Part II, prepared by the Financial Secretary, became a detailed exposition of the figures, adapted to the student or the specialist; while Part I was the vehicle used by the Finance Member for a broader review of the position and for his declarations of financial policy.

" Of the nature of the discussions on the past Financial Statements I need say little, as they were described in a picturesque passage of the speech with which Sir Edward Baker summed up the Budget debate of two years ago. Prior to 1892 no discussion at all was permissible. In the following year the rules under the Indian Councils Act, 1892, had come into force, and members were at liberty to offer any observations they might wish on the Statement, but not to put any motion or divide the Council. The observations allowed by the rules became in time lengthy and comprehensive: non-official members ranged over the whole field of Indian administration, and official members were drawn into the defence of the acts and policy of their

departments. There was no other recognised occasion during the legislative session, either for the former to criticize or for the latter to expound.

" So much for the old order which is now passing. Let me turn to the new. What I submit to the Council to-day is the result of direct evolution from the system that has been worked out during the last fifty years. The Financial Statement which the new rules prescribe will be found in the set of tabulated figures displaying, in their logical and time-honoured classification, the closed accounts of last year, our latest estimates of revenue and expenditure for the current year, and our preliminary forecast for the ensuing year. The explanatory memorandum which the rules require is the old Part II of previous years. It is prepared, however, in greater detail than before, yet with less repetition; and an attempt is made in it to explain succinctly the movements of the figures under each important head of account, as well as to give a conspectus of our Ways and Means operations. But, in order to summarise the lessons of the figures and to review the general position, I propose to retain, in the remarks which I shall now offer to the Council, our old Part I in a slightly different and less technical garb.

" As regards the discussion, a still greater change will mark the new procedure. To-day the rules do not permit discussion. It would in any case be manifestly unreasonable to expect members to speak, almost on the spur of the moment, upon the large and complicated questions which emerge from the Financial Statement. But on a later date, which I believe Your Lordship intends to fix for next Friday, the Council will proceed to what roughly corresponds with the Committee stage of the estimates in the House of Commons. We shall take up first the consideration of our proposals for fresh taxation, for a new loan, and for additional grants to Local Governments. Then, after a short interval, the Council will again assemble in what I may term Committee of the whole House; and each 'major head' in the accounts which is open to discussion will be explained in turn by an official member who has special knowledge of the branch of the administration concerned. At both of these stages it will be open to any member, by way of resolution after due notice given, and subject to a few reservations, to call attention to any matter which is directly relevant to the figures under consideration, to criticise the necessity for any entry, or to ask for further information regarding it. All such resolutions, if in order, may be duly debated. In this way ample opportunity will be afforded for a genuine scrutiny of the estimates by the Council, and for a criticism which is based on precise facts. We believe that the result will be helpful to the Government, and will foster the growth of an informed public opinion upon the vital problems of our public finance. Having, during a public service which covers a period not far removed from half a century, attended nearly every financial debate in the Mother of Parliaments, I hope that I shall not be considered presumptuous if I venture, in passing, to impress upon Members of Council that it is rather by the painstaking examination of specific items of expenditure than by the framing of abstract resolutions on organic changes in financial policy that economy can best be attained. Also that advantageous services can be more readily provided for by means of savings effected, than by appeals for additional funds which the finances of India cannot produce without casting additional burdens upon her people.

" Towards the end of March—the 23rd being the date fixed for this year—I shall present the Budget in its final form, after embodying in it all corrections that may result from the detailed discussions and any other changes which the passage of time may necessitate. On that occasion there will be no further debate. At an adjourned meeting, however—fixed for the 29th March—members will be at liberty to make observations on the Budget, without moving resolutions or asking the Council to divide. In addition to the new and more intimate discussion on the detailed figures, we thus retain the old liberty of general criticism. But I trust that the closing debate will be materially shortened after the comprehensive examination to which the estimates will have been subjected at their earlier stages. I may also venture on a hope that questions of wide general policy will not, so far as possible, be tacked on to these proceedings. Other opportunities are now given for raising debates on matters of general interest; and it will be more convenient to us all, and more economical of time, if these opportunities are taken, instead of loading the Budget with disquisitions on side issues. There are, it is true, very few aspects of our administration which are not reflected in our Budget; but after all the Budget is primarily a provision for the public services of the

coming year. It is a business document, and it will be to our credit as a Council if we handle it in a business-like manner.

" Revised Estimate of 1909-1910.

" When I introduced the Budget for the current year, I entered a plea for caution and economy. On almost every side there were auguries of better harvests and reviving trade. But recovery was likely to be slower than it had been in times of the country's convalescence from previous famines, because the trade conditions of the world remained dull and unsettled. A year ago, prices were still high; the country was still feeling the effects of over-speculation and a glut of imports; and the loss of our opium revenue was a standing menace. That caution has been justified; but we have also been justified in our resolution to face the difficulties of the year without extra taxation, and we now believe that the year will close with a surplus remarkably close to, and slightly in excess of, the small margin of revenue for which we budgeted.

" From the agricultural point of view, the year has been a good one, and the country may be said to have shaken off the effects of the drought of 1907. At the beginning of last April, it is true, there were still over 100,000 persons in receipt of State relief, but distress during the hot weather was nowhere very severe. It was confined for the most part to limited areas in Bihar and the United Provinces, and by July all relief operations were closed. Except in Bengal and parts of the United Provinces, which suffered from a shortage in the winter rains, the outturn of the spring harvest was not unsatisfactory. Later, the improvement became more definitely marked; for the monsoon broke early and the rainfall was unusually abundant and well distributed in nearly every part of the country. Famine and scarcity were at last at an end. The autumn and winter harvests were everywhere good, and in many places excellent. Bumper rice crops have been reaped in Bengal and Eastern Bengal, while the autumn harvest in the Punjab is estimated to be 21 per cent in excess of the average for the previous five years. The only complaints we have heard — and they are not serious — come from some of the Madras districts which are suffering from the failure of the north-east monsoon in October. In them however the excellent rainfall of the previous months replenished the various sources of irrigation, and no serious anxiety is felt, though the yield of the cold weather crops cannot be a full one. In all other parts of the country the accounts of the spring crops are very satisfactory though more rain would be useful in some places. If no untoward event occurs in the next month, an excellent harvest should usher in the ensuing year.

" It was natural therefore and proper that, when the end of the regular monsoon showed the agricultural position to be assured, a general air of hopefulness should pervade the country. I am afraid however that it did not penetrate the Finance Department, where the state of the public exchequer was felt to be by no means free of anxiety. On making our usual preliminary revision of the estimates in November, we found falling prices, easy money, and a tangible rise in the purchasing power of the people. Trade however was still slack; and the recovery seemed likely to be slow, irregular and hesitating. The land revenue, including large amounts of famine arrears had been coming in well; but in nearly every other important respect our receipts were below expectations. The most disappointing section was our Railway earnings, which reflected the slowness of the general improvement, being almost a crore short of what we had counted on realizing by the end of October. Backward Customs returns, particularly from piece-goods and silver, indicated how seriously the import markets had been glutted; and a marked shortage in the Post Office receipts bore testimony to the dullness of general business. Our revenue from Forests, from Salt, from Excise, was also behindhand; while on the other side of the account, our budgeted expenditure seemed likely to be fully required. We were therefore compelled in ordinary prudence to explain the situation to our big spending Departments and to Local Governments, and to call upon them to exercise all possible economy in view of our diminished resources. The appeal was loyally responded to, and the savings in expenditure which were thus secured have played a considerable part in the improvement of the financial position that has taken place since November.

" To that change there have been other contributory factors:—the good harvest of cotton and oilseeds, with their effect both on railway traffic and on the spending power of the peasantry; the increasing activity of the import market; and the big rice movements which are beginning in Burma, with the accompanying rise in export duties. But the most dramatic feature in the situation has been the sudden and

unexpected development of our Opium revenue. I must diverge for a moment to explain this movement and the events which led up to it.

"As I mentioned last March, we intended to sell 42,300 chests of Bengal opium during the current financial year; and in view of the fluctuating mood of the China market, we based our estimate of receipts on the cautious average of Rs 1,350 a chest. In Malwa we had apparently reached a curious *impasse*. The Bombay godowns were full, and duty had been paid in advance upon a very large quantity of opium which still lay in Malwa and which the recently imposed restrictions would not allow to be shipped until 1910. In the circumstances, though it was impossible to foresee how the trade might move, we assumed that further payments of duty against the 1911 shipments might be expected, and we budgeted cautiously for the receipt of duty upon something between 8,000 and 9,000 chests. Up to October, our moderation seemed justified. The China market was dull, with a slightly rising tendency. The prices fetched by our Bengal opium varied between Rs 1,150 and Rs 1,450; and the clearances from Malwa were not more than would ordinarily be required for home consumption. In October however a sharp rise in the China prices took place. I need not discuss the complicated factors in the remarkable speculative movement which was thus established, and over which, so far as the China market is concerned, we had of course absolutely no control. The first result of the movement was another rush to pay duty in advance. The trade had got wind of our proposal—to which I shall allude hereafter—to give Malwa a larger share of the 1910 exports; and although we had guaranteed no priority of shipment after 1910, the exporters were prepared to take their chance and, so to speak, to register their claims. During the first half of November, duty was paid on 17,000 chests, when the Indore authorities very properly stopped the rush and refused to receive any more payments. We were at the time in correspondence with the Secretary of State regarding the distribution, as between Bombay and Calcutta, of our reduced exports; and as soon as that matter was settled, we decided how to deal with our unexpected windfall of revenue. The decision was to retain the duty paid in respect of chests which under our revised programme could be shipped in 1911; to grant priority of shipment to those chests in the order in which duty had been received; and to refund all payments that had been made in respect of chests which could not be either used for home consumption or exported to China in 1911, thus leaving us a free hand regarding the 1912 exports. This closed the episode for the time being, so far as concerns the Malwa revenue. But the excitement in the China market had an immediate and startling effect upon our Calcutta prices also. From Rs 1,439 a chest in October, the selling price suddenly bounded up to Rs 1,800 in November, and even this price, unprecedented for nearly half a century, was outstripped in January, when the average ran up to Rs 2,044, only to be again and still more strikingly exceeded by the figure of Rs 2,397 which was obtained at the sale in the current month.

"The net result of this great appreciation in the value of Indian opium in China is that our revenues in the current year, after deducting the refunds to which I referred above, will gain about £1,000,000 beyond what we budgeted for. So far as possible, the windfall has been utilized on the sound principle of meeting non-recurring liabilities, which would otherwise have hampered our finances in future years. We have in this way been enabled to restore the depleted balances of Bengal, Eastern Bengal and Assam, and the Central Provinces; to complete our promised grant to the Rangoon river training scheme; and in various other directions to fulfil obligations which will lighten the burden on the general revenues hereafter.

"Such being the main features in this eventful and difficult year, I proceed to show how far our original estimates of revenue and expenditure have been supported or modified by the results as we can now forecast them with the actual figures of ten months in our possession. I shall do so in round figures and on general lines, neglecting minor variations.

" Revenue.

"The total revenue which we expected, when our Budget for the year was framed, was £73,750,900. The revenue we now hope to realize is £74,303,700, being an improvement of £552,800. The Provincial section will be better by £798,700, the bulk of which comes from the improvement in land revenue and from the additional grants that we are making to three Local Governments. The Imperial section, on the other hand, shows a deterioration of £245,900: and it is to the explanation of this figure that I invite the Council's attention.

"Land Revenue is the first head under which our estimate has been materially varied. The fine harvests have enabled the current revenue to be collected promptly,

as well as an unexpectedly large slice of the arrears which lay over since the late famine. The total increase over our Budget figure will be £393,000. The Imperial portion of this would be roughly one-half: but instead of sharing in the increase, the Imperial Government is actually credited with an amount of Land Revenue which is worse than our original estimate by £494,000. The apparent anomaly has already been explained; for it is by transferring the necessary amounts from our own share of the receipts under this head to the Local Governments concerned that we give effect to the grants made to the two Bengals and the Central Provinces in aid of their diminished balances. Apart from this, all the other gains and losses to the Imperial revenues are true gains and losses, and not mere transfers to Provincial exchequers. The largest of the gains is the £1,106,000 (gross) by which we benefit from Opium: and the heaviest of the losses is £644,000 by which our total net Railway earnings are expected to fall short of our Budget Estimate. Of the latter, about £73,000 is due to small excesses in the working expenses on certain railways where the charges for repairs, renewals and coal had been under-estimated. The balance represents a shortage in the traffic returns, due to the slow recovery in business, the tardy movement of crops, and the depression in the coal trade. Lines serving the Gangetic plain and its adjoining country are most prominent among the losers: the Great Indian Peninsula Railway, with its big cotton connection, and the lines which traverse Southern India have done very much better; but the losses outweigh the gains.

"I would now ask the Council for a moment to balance these three divergencies from our original figures. On the one hand we have the windfall of £1,106,000 from Opium. This is a departure from our estimates which is due to the vagaries of a market influenced by wholly abnormal causes and entirely outside our control. Upon the other hand, we have, first, the reduction of £494,000 in the Imperial receipts from Land Revenue. As I have explained, this is more than accounted for by the grants made out of our opium receipts to Local Governments and to local bodies in order to fulfil obligations that we should otherwise have had to defer. Secondly, we have the drop of £644,000 in our net Railway receipts. You see how closely these three variations balance; and now, if you exclude them, you will find that the aggregate discrepancy between the Budget estimate and that which I now present, taking all our other sources of Imperial revenue, is the comparatively small shortage of £213,000. In this total there are no individual fluctuations of any importance; and I venture to say that the result is not an unsatisfactory proof of the care with which our original estimates were framed, and that it reflects very great credit on the officers of the Finance Department.

"The most prominent of the minor differences appear under Customs, Excise and Interest. The Customs revenue will probably fall about £157,000 below our Budget figure. The imports of petroleum, metals and manufactured articles generally have been dull, and the lateness of this year's rice exports has helped to pull down our estimate, in spite of the higher yield from silver and from Java sugar. Excise will yield us about £246,000 less than we had budgeted, and half of this loss will fall on Imperial revenues. The steady progress of reform (including the curtailment of outstill areas) and the continuous rise in our excise duties have gone far to check the rapid expansion of the revenue from intoxicants which took place during the recent cycle of prosperity; and in some parts of India these influences appear to have been supplemented by very welcome movements in favour of temperance. The variation under Interest is in the opposite direction from those I have just mentioned. It shows an improvement of £159,000 over the Budget figure, due partly to increased receipts from interest on overdrafts of railway capital by companies in India, and partly to the successful employment by the Secretary of State of his spare balances in short loans to the London money-market

"Expenditure.

"I turn now to the expenditure of the year which is coming to its close. We had budgeted to spend £73,720,500: our latest figures indicate that we shall need only £73,350,700, and that the Imperial share of the saving will be £284,500. To this very satisfactory result the chief contributor has been the Army. The total reduction on our budgeted provision for Military Services will be about £391,000, effected partly in generous response to our call for economy last November, and partly by shorter purchases of ordnance and other stores in England. I shall return to this subject in more detail a little later. The other chief economies occur under the salaries and contingencies of the various Civil Departments, where we expect a saving of £122,000, and under the charges on account of Civil Works, which will be £113,000.

less than we provided in the Budget. We have thus been able, not without some real sacrifices, to secure a genuine curtailment of expenditure amounting, under these few prominent heads, to no less than £626,000; and there are a number of minor reductions which I do not stop to specify. Against these, there are outstanding excesses over the Budget grants under three heads: but it is gratifying to observe that in two of these cases there has been only a nominal, and not a real, increase of expenditure. The first of these is Refunds, where we shall require an addition of £128,000 to our original figure; this being almost wholly due to our decision, as I have already explained, to return the duty paid on Malwa opium which cannot be sent to China before 1912. The second case of nominal over-spending appears under the Famine Relief and Insurance grant. By the peculiar constitution of that grant, any lapse in the budget allotments either for famine expenditure (whether Imperial or Provincial) or for protective works, in a year when the total grant does not exceed the prescribed million, is not added to our revenue surplus but goes automatically to swell that portion of the grant which is used for the reduction or avoidance of debt. In other words, it is cast into our general balances with a view to capital expenditure, and must thus be debited against revenue. The result in the current year is that the Imperial share of the Famine grant will be raised by £91,000, being the amount by which the grants taken by Local Governments for the cost of direct famine relief have happily proved to be unnecessary. The third chief excess over budget provision appears in our Interest charges, which we expect to be £126,000 higher than the original estimate. This is partly due to a smaller share in the total having been charged to the Railway and Irrigation accounts; partly to a change in the average rate, which is recalculated on the latest data every year; and partly to the higher discount which the Secretary of State had to pay on his India bills in England.

"I may now briefly summarize the finances of the year, so far as the Imperial section of the accounts is concerned. We budgeted for a surplus of £230,900: we now hope to realize a surplus of £269,500. Our revenue has declined by £245,900 but our charges have been reduced by £284,500, the balance of £38,600 representing the improvement in our surplus. Considering the difficulties of the year, I regard this result as distinctly satisfactory. It is possible that some further changes may be necessary before we finally dispose of these estimates at the end of March, for the Council will fully realize that the present statement is—technically at least—a preliminary draft: but I do not anticipate any substantial alterations.

" Budget Estimate for 1910-1911.

"It is with some reluctance that I leave the narrative of a chequered but not unsuccessful year, to take up a less agreeable task. The new financial year which will begin five weeks hence, gives promise of opening under favourable auspices, with good harvests, active markets, expanding trade. The heavy remittances of capital from abroad, both in gold and in Council drafts, testify to the prosperity which is expected in the private finances of the country. Do we anticipate an equal buoyancy in its public finances? In many respects I do. We believe that, if the monsoon rains are adequate, the land revenue will be punctually collected, that our customs receipts will rise, our railways do well, and most of our other heads of revenue show an improvement. But unfortunately I cannot expect a surplus, without the help of additional taxation, which, accordingly it will be my unenviable duty to propose. For this state of affairs there are two plain and adequate reasons. In the first place, the reduction of our exports of opium to China will cause a serious fall in our opium revenue. In the second place, we are obliged to abandon to Eastern Bengal and Assam a much larger share of its land revenue than it has hitherto retained; for the present resources of the Local Government have proved quite insufficient for the needs of the new province. These two factors dominate the position for 1910-11. Apart from them we should have been able to meet the normal growth of our expenditure from our growing revenues. Though I view with grave anxiety the steady growth of our expenditure, yet I realise that, without a general re-casting of our scale of public charges, we cannot extend indefinitely those retrenchments of a temporary and emergent character which have been forced upon us in the last two years. I should have been prepared therefore to budget for a moderate addition to the current year's charges and to look to the natural improvement of our resources to cover that addition without asking for any extra taxation. But the loss under Opium and the needs of Eastern Bengal have made equilibrium impossible, and a permanent strengthening of our resources is inevitable. The best way in which I can explain the

situation will be to take the Council through the allotments which we wish to make for expenditure in 1910-11 ; to examine how far our revenue, in normal conditions and with the existing scale of taxation, would have been sufficient for our charges ; to show where, and by how much, it will fall short , and finally to describe the special measures which we consider necessary to equate our resources with our requirements.

" Expenditure.

" The total expenditure which we have to provide for in 1910-11 is £75,652,500. This is £2,301,800 in excess of our total estimated expenditure in the current year ; but £1,101,000 of the difference is due to increased charges which will be met from Provincial resources, so that the Imperial increase which I have to justify is roughly £1,200,000. The Council may take it that out of this sum, £500,000 is required by the commercial departments of Government , and £700,000 by those ordinary administrative services from which we receive no direct monetary return. A further analysis indicates that it will be sufficient to consider the excess as falling under five groups of heads —Interest, Posts and Telegraphs, Salaries and Expenses of Civil departments, ordinary Civil Works, and Military services. The five groups of services which I have just named are going to cost us almost exactly £1,200,000 more than they have done in 1909-10 ; the minor variations may safely be neglected.

" The Interest charges, which form the first of my five groups, are shown under various heads, but in the aggregate they come to nearly £408,000 more than in the current year. The interest on ordinary debt, as I will explain immediately, will hardly be raised at all in India, but there will be an increase of about £270,000 in England. On the small loan which we propose to take in India, our total discount charges (apart from all question of the rate) should be easier than they were this year , and we ought not to have interest to pay on advances to our treasury from the silver branch of the Gold Standard Reserve, as was the case for a few months in 1909-1910 . so that on the whole our next rupee loan should not cause a net addition to our interest liabilities in the coming year. But in England the case is different. A full year's interest has to be paid on the Sterling loan of 7½ millions which the Secretary of State raised last month, and increased payments have to be made to the sinking funds which are now established for meeting the discount on our English loans. I still have to explain £138,000 of the total increased expenditure under Interest. By far the greater part of this is a consequence of the fresh capital which certain of the Companies working State lines will raise and deposit at the India Office until they require it. About half of the balance represents debits against us in India in certain complicated transactions with the Bengal-Nagpur Railway Company, which I need not describe in detail , the remainder stands for our increasing interest liabilities on savings bank deposits, on the new general provident fund, and the like. Practically the whole of the increased charges which I have been describing under this head are a compulsory and inevitable result of the extension of our Capital expenditure on productive works.

" The second category of increased expenditure is our Post Office and Telegraph charges, where we expect a growth of about £81,000. In the case of the Post Office the growth is small (£24,000) and of normal character . and it is more than covered by increased receipts. The third and fourth categories comprise the additional provision in next year's estimates for ordinary Public Works (roads, buildings, etc.) and for the salaries and expenses of what are known as the Civil Departments. The great bulk of this outlay is met by Local Governments from their own provincial resources : but certain charges, both in England and in India, are exclusively Imperial, and show an increase of about £155,000. For that part of the decennial census operations which will take place next year, we have provided five lakhs, which is £32,000 more than in the current year. The other individual variations are of comparatively small importance, and the total excess allotted under Civil Departments is £97,000. On ordinary Public Works the increased expenditure will be £58,000 ; this much being considered necessary in order to allow of the progress of a number of works which had to be postponed in the current year. The fifth category is the Military charges, to which I shall return later and in more detail. The expenditure here is taken at £536,000 more than in the current year. Out of this excess £128,000 goes in the combined naval and military operations which have had to be undertaken to check gun-running in the Persian Gulf ; and £408,000 are for the general purposes of military efficiency. As I have said, I shall take up this subject again but I wish to emphasize that what we are providing for military expenditure next year is in reality (apart from the Persian Gulf expenditure) considerably less than we provided in the current year's budget. His Excellency the Commander-in-

Chief, however, gave me his cordial co-operation—for which I take this opportunity of thanking him—in reducing expenditure at a time when the outlook was causing us serious anxiety: the result being, as I have said above, a very welcome reduction in the 1909-1910 allotments. To compare next year's grants with what has actually been spent in the current year is thus deceptive; the temporary curtailment of expenditure now in force could not be a permanent reduction.

Revenue.

"I next proceed to consider our probable income, and its adequacy to meet our budget of expenditure. Our Imperial requirements for 1910-1911, as I have briefly described them, demand a provision of £50,257,800. During the year which is now closing, we expect our Imperial revenue to be £49,326,500. To maintain bare equilibrium therefore, we must be able to count on improving the revenue by close on a million sterling while we shall have to get considerably more if we are to budget for a reasonable surplus or working balance, such as every prudent Government must insist on. In order to see whether this is practicable, I will now ask the Council to go very briefly through the chief heads of revenue with me and ascertain what increases they will yield. In this examination, we had better leave Land Revenue and Opium to the end, as they will require somewhat careful examination. •

"From Railways, at the outset, it is apparent that we cannot expect much assistance. The gross receipts of State lines show a remarkable improvement of nearly £1,130,000: but the increase in current expenses is almost equally great. The Railway Board, who are the responsible advisers of the Government in the matter, urge that the economies which we are now enforcing must, in the interest of our railway development, be at least temporarily relaxed, and that advantage should be taken of our increased earnings to push on the more essential renewals and repairs which on several lines have recently been deferred. I have been obliged to accept that view, and I have budgeted for a net improvement of only £38,000 from our railway revenues as a whole. Most of our other main heads however promise better. From Customs, on the existing tariff, we should expect an improvement of £183,000. There is a steady upward movement in imports, which ought to continue, and give us a moderate increase, particularly from liquors, petroleum, piece-goods, metals and manufactured articles generally; while in view of the big crops in Burma and Bengal, the rice export may reasonably be taken at a figure somewhat higher than was realised in the last good year, 1905-1906. A substantial increase in Excise seems equally certain even if there were no further enhancement in duties. There is invariably a rise after a year of good harvests, and illicit practices are being steadily worn down by the strengthening of the preventive forces in the different provinces. We estimate therefore that our share of the revenue from this source will be, on the present rates of duty, some £109,000 better than in the current year. The Posts and Telegraphs, under the stimulus of the revival in trade, should give an increase of £96,000. A group of other heads, which are all more or less sensitive to the general condition of the people,—Salt, Stamps, Income-tax and Mint—will yield, as we estimate, an improvement of about £165,000. Irrigation receipts will be diminished by the plentiful rainfall, and Interest is taken at a reduced figure as the Secretary of State's loanable balances may not be so high as in the current year. But against these we are able to set a number of minor increases under Forests and a variety of other heads which I need not enumerate. The chief of these is the military receipts, from which we hope for an improvement of £63,000, owing to the new arrangements for clothing, larger sales of dairy produce, and other causes.

"The net result for all the heads with which I have thus briefly dealt is an anticipated increase of £638,000 in next year's receipts. I come now to our Land Revenue estimate, which is affected by the absence of famine arrears and works out to about 23 lakhs below what we count upon realizing in 1909-1910. The Imperial share of this decrease would, in natural course, be about £105,000; but *per contra* we should have to set the large improvement that has its origin in the peculiar circumstances of the current year. I refer to the subsidies which our recent Opium receipts have enabled us to make to certain provinces and local bodies, and which aggregate about £633,000. These grants being non-recurring, their absence from next year's accounts would have absorbed the decrease in arrear collections and raised the Imperial share of the Land Revenue by £528,000 net. Add this to the increase of £638,000 under the other improving heads of revenue, and it is apparent that we should have almost fully covered the increase of £1,200,000 in expenditure. At the risk then of some repetition, I trust I have made it abundantly clear that we have not allowed any increase of

expenditure which could not have been met from the normal and moderate expansion of our ordinary revenues.

"We thus return to the special causes which interfere with that expansion. The first is the necessity for a revision of the provincial settlement with Eastern Bengal and Assam. How the necessity arose, I will discuss later: for the present all I need mention is the result, *viz.*, that we have agreed, with the Secretary of State's approval, to increase the Local Government's share of the revenues which it collects by £255,000, involving an equivalent recurring loss to Imperial finances. The second and by far the greater of our difficulties is the loss in Opium revenue, which we estimate (net, after certain adjustments) at £872,000 as compared with the present year.

"When the agreement into which His Majesty's Government entered with China on our behalf was announced, it was at once apparent how seriously the Indian revenues were bound to be affected. The effects of the curtailment of our opium exports have hitherto been somewhat obscured by the events which I have already described both a year ago and to-day. But they are now coming into operation, and their operation is all the more vigorous because it has been deferred. In the calendar year 1910 we shall, as required by the agreement, export 5,100 chests less than in the calendar year 1909. Translating this arrangement into terms of the financial year, we can sell only 37,560 chests of Bengal opium in 1910-1911 against the 42,300 chests sanctioned in 1909-1910. In the current year we take the average selling price at Rs. 1,610 a chest for next year, owing to the continued high prices in China, we believe that Rs. 1,750 a chest is a reasonably safe assumption. The result is that, on Bengal opium by itself, we hope to restrict our loss to £160,000. But for Malwa opium, a comparison of the actual exports of the two years affords no guide to the financial position. As I have explained before, the whole of the duty payable to us on the exports permissible up to the end of December 1911 has already passed into our treasury; and for this good and sufficient reason we do not budget for receiving any further dues on Malwa opium during the financial year 1910-1911. The consequence is that, as compared with the receipts during the current year, we must prepare for a loss of £718,000.

"I have now explained our requirements. I have given an estimate of what our revenues would be under normal conditions. I have shown where the conditions are other than normal, and I have described the gap that actually intervenes between our requirements and our resources,—a gap which may roughly be measured by the shortage of £1,127,000 due to opium and the new settlement with Eastern Bengal and Assam. To fill that gap, the Government of India are compelled to impose extra taxation which is estimated to yield £1,133,000.

"Fresh Taxation.

"The taxation which we propose falls under three main heads. The bulk of what we require will be raised by increasing the existing Customs duties on liquors, on tobaccos, on silver and on petroleum. In this way we hope to obtain an additional revenue of £967,000. Certain consequential alterations in the excise duties upon beer and so called 'foreign' liquor made in India will bring in a further £33,000. The balance, or £133,000, we propose to take by enhancing the Stamp duties on certain instruments which I shall enumerate later. The Government of India have not come to this decision without the most anxious consideration. There was no avoiding the deficit. there was no temporary palliative for it. The profits from our railways will no doubt improve, and the elasticity of most of our other heads of revenue is happily assured. But we cannot in prudence treat the decline in our Opium receipts as other than permanent, and in the present uncertainty as to China's achievements, we must keep in view the possibility of its being continuous. Nor can we, apart altogether from the Opium question, shut our eyes to the heavy demands upon the Indian exchequer which lie ahead of us, in the cause of education, to name only one pressing requirement. It has become our clear duty to strengthen the basis of our revenues, and we have endeavoured to do so in the way which will be least burdensome to the country. A variety of other schemes for increased taxation, several of which will readily occur to the minds of my Honourable friends, were fully considered, but the balance of advantage seemed to rest with the combination which I have described, and this has the full approval of the Secretary of State.

"So far as our Customs proposals are concerned, we have held fast by the general principle that our tariff is a revenue, and not a protective, tariff. But substantial duties on wine, beer, spirits and tobacco are in no way inconsistent with that principle, while

they constitute one of the most legitimate forms of taxation in every civilized country. Our proposals regarding liquors are intended to simplify the existing rates, and to raise them by from 30 to 50 per cent. Upon tobacco the present taxation—5 per cent. *ad valorem* on manufactured, and nothing at all on unmanufactured tobacco—is ludicrously inadequate. In 1907-1908 over 6 million pounds of tobacco were imported into India, and all that it paid to Government was £25,000; in England it would have paid forty times as much. What we now propose is a set of rates which, in the case of cigarettes, is represented by Rs 2 a lb. They may diminish import for a time, but incidentally they may check the rapid growth of the cigarette habit, which is not without its danger to the rising generation in India. On petroleum we simply propose to raise the present rate from 1 anna to 1½ annas per gallon. On silver we intend to take a fixed duty of 4 annas an ounce instead of the 5 per cent. *ad valorem* which it now pays. The enormous import of those two commodities marks them out as fitting objects for an increased contribution to the exchequer, and we prefer to take the extra taxation which we require by substantial duties upon a few articles of comparative luxury rather than by interfering with the all-round uniform rate upon a variety of less important articles, many of which may be described as necessities.

“I hope I shall not be charged with framing a swadeshi budget. In the sense which may be seen indicated on Bryant and May's match-boxes (‘Support Home Industries’) I think swadeshi is good, and if the outcome of the changes I have laid before Council result in some encouragement of Indian industries, I for one shall not regret it; but I would emphasise the fact that the enhanced customs duties are attributable solely to the imperative necessity of raising additional revenue. There is not the slightest inclination towards a protective customs tariff. Even in free-trade England we have always imposed considerable customs dues, not to protect industries but to raise revenue. That is all we are doing in India; and I cannot but think that in countries which depend mainly on agriculture, where the population is poor and there are no large and profitable manufactures, it will be long before you can dispense with customs receipts as a part of the revenue essential for the administration of the country.

“The increase which we propose in Stamp duties will touch only a limited class of documents. We do not interfere with the charges on bonds, conveyances, leases, mortgages, cheques or receipts. But we intend to raise the duty on bills of exchange, on the issue and transfers of shares and debentures, and on agreements for the sale of those securities. Full details of the new rates are given in the Bills which will be presented to the Council to-day to give effect to the changes.

“With the aid of these new taxes, we hope to secure an Imperial revenue of £50,503,700 in the ensuing year. I have already stated our expenditure requirements at £50,257,800: so that we budget for a surplus of £245,900. It is a very, very small margin for a year in which many surprises may await us, and any shortage in the monsoon would sweep it clean away. But our estimates throughout are studiously cautious; we were anxious to avoid the levy of a single superfluous rupee of extra taxation: and with reasonable good fortune I trust that a modest surplus will carry us through, as it has done in the current year. I invite the Council to contrast our situation with the present difficulties which beset the Chancellor of the Exchequer in England, or the £8,000,000 of extra taxation in France; or the loan of £4,600,000 with which Prussia hopes to cover its deficit next year; or the still heavier loans that have been forced upon Germany for the current needs of its administration in these two years.

“Military Expenditure.

“I deal now in more detail than was possible in the foregoing remarks with some of the bigger Departments. I begin with the Military services, the expenditure upon which under their various heads for five years is as follows—

	Gross					Net.
	Army.	Navy.	Military Works.	Special Defences	Total	All Military heads.
1906-1907	£ 19,657,845	£ 662,368	£ 1,127,515	£ 138,358	£ 21,586,086	£ 20,169,343
1907-1908	18,647,533	485,024	1,166,943	116,287	20,415,787	19,248,254
1908-1909	19,177,266	476,957	967,362	29,044	20,650,629	19,602,988
1909-1910 (Budget)	19,350,900	473,800	855,600	27,900	20,708,200	19,653,000
1909-1910 (Revised)	18,948,000	479,100	853,800	36,700	20,317,600	19,233,100
1910-1911 (Budget)	19,488,500	484,300	879,600	1,500	20,853,900	19,706,500

"I mentioned last year that it had been decided to abolish the grant for special expenditure and to revert to the system which was in force prior to 1904-05. Provision is now made for this purpose to the extent warranted by the state of our finances. During the five years ending with 1903-04 a sum of about £6 millions in all was allotted. Then followed Lord Kitchener's reorganisation and re-distribution schemes. In prosecuting these schemes and carrying on the work already begun and meeting ordinary new requirements which presented themselves from time to time we spent about £7 millions between the years 1904-05 and 1908-09.

"In March last entirely new conditions presented themselves. The general financial position was not satisfactory and, as regards military expenditure, we were faced with the obligation to provide for nearly £ $\frac{1}{2}$ million for the increased payments to the War Office on account of the British Army in India and for the pay concessions to the Indian Army. The rates for food supplies too were still rising. To meet these new charges, all of them practically unavoidable, without throwing an additional burden upon general revenues we had to economise in many directions, and as our political relations had improved it was decided to proceed more deliberately with schemes of reorganisation. After restricting the provision to the lowest limit the Budget figure for 1909-10 was placed at about £85,000 less than that of the previous year.

"Considering the extent to which this year's Budget had to be cut down and the extraordinary demands which I have alluded to above, our latest estimates of the probable actual of the year disclose a very satisfactory state of affairs. The net military expenditure for 1909-10 is expected to be £370,000 less than that of 1908-09, the reduction being due in the main to a substantial decrease in food charges in India and in expenditure on stores in England. The position has enabled us to take in hand at once the improvement of the accommodation for the Indian Army, a measure of importance and urgency to which the Commander-in-Chief called our attention soon after his arrival. It has become obvious that, with the persistent rise in prices and wages, comfortable and durable buildings can no longer be constructed at the cost which was previously regarded as sufficient. In the lines which are now being built we are adopting a sound type of construction and are entrusting the operations to the Military Works Services instead of to regimental agency.

"The other principal measures involving special expenditure which we have undertaken are referred to in the Memorandum explaining the Financial Statement. I will merely mention that we have established in the current year a Cavalry School of instruction, the organisation of the new artillery ammunition columns has been practically completed; progress has been made with the provision of accommodation for additional troops at Quetta, Jubbulpore, Ahmednagar and Nowshera; and there has been an advance in the output of quick-firing guns and short rifles from the Gun and Rifle Factories. We have also improved the arrangements for financial control by extending to all British troops and the Supply and Transport Corps the new system under which accounting and audit duties are undertaken in separate offices and by moving out two more Audit Offices to Divisional Head Quarters. Finally we have had to provide for the expenditure on the arms traffic operations in the Persian Gulf. Of the total sum which we have allotted for this purpose, *viz.*, £218,000, a sum of £45,000 will fall into the accounts of the present year.

"For the coming year, apart from the special provision for the arms traffic operations in the Persian Gulf, we propose to allot £120,000 less than the amount provided in the current year's Budget. We have been able to provide for a somewhat larger expenditure on special measures than in this year and to restore some of the temporary reductions made in March last. Among the more important measures with which we propose to proceed in 1910-11 are the improvement of accommodation for the Indian Army, and the building operations referred to above; the organisation of military companies for maintaining communications in the field, a requirement which is now universally recognised as essential; the purchase of horses to commence the re-constitution of an artillery reserve, and the supply of intrenching tools to the field army and of a uniform pattern of rifle carrying equipment to the Indian Cavalry.

"We anticipate a further increase in the output of guns and rifles from our factories, but it is necessary to supplement the local production of rifles by purchase from Home, and we have accordingly provided funds for this purpose. The Royal Garrison Artillery in India is being reorganised, and we expect a considerable saving from this measure. We are also remodelling the system of Ordnance Factory accounts on the advice of the Home experts.

"For the expenditure in 1910-11 on the arms traffic operations we have provided £173,000. On the other hand we have been able to maintain a large part of the reduction in our store demands which has been effected during the current year; we anticipate a further substantial improvement in regard to the food charges, and we hope to obtain a considerable saving by using the R.I.M.S. *Dufferin* in the Home trooping service for two voyages and dispensing to that extent with the employment of hired transports

"We have also been able to provide for a possible increase in the railway rates for military traffic, consequent on the desire of the Railway Companies to modify the tentative arrangements made two years ago for the adoption of a vehicle mileage rate for military traffic, which, though administratively advantageous, is thought to involve an undue loss to the railways.

Railways.

"It has become customary to bring together in this part of the Financial Statement the figures of capital expenditure on railways during the last five years and the similar estimate for 1910-1911. I accordingly present the table as usual, it includes all capital outlay, whether incurred by the State or through the agency of guaranteed or assisted companies.

	1905-1906	1906-1907.	1907-1908	1908-1909	1909-1910 (Revised)	1910-1911 (Budget)
	£	£	£	£	£	£
Open lines including rolling stock	5,121,300	5,948,067	7,328,000	8,532,741	7,663,400	7,875,800
Lines under construction—						
(a) Started in previous years	3,663,073	3,526,666	3,006,800	1,366,200	1,170,200	2,424,200
(b) Started in current year	215,057	176,667	..	146,130	400,100	566,700
	8,999,430	9,650,800	10,334,800	10,045,071	9,235,700	10,866,760

"On the 31st March 1909, the total length of open lines was 30,808 71 miles, classified according to gauge as follows :—

5' 6" gauge	16,001 95
Metre	13,083 49
Special gauges (2' 6" and 2')	1,723 27
TOTAL	30,808 71

"During the current year we have added to these approximately the following mileage :—

5' 6" gauge	456 90
Metre	317 43
Special gauges (2' 6" and 2')	77 63
TOTAL	851 96

During the ensuing year it is intended to increase this length by 520 55 miles.

"In the current year the return on the capital at charge amounts to 4 48 per cent., as compared with 3 6 in 1908-1909, 4 75 per cent. in 1907-1908 and 5 38 per cent. in 1906-1907. The rate of interest which we have taken for the year on the debt chargeable to railways is 3 384 per cent.

"The position has greatly improved since last year, although the traffic returns have not come up to expectations. The improvement is largely due to the acceptance by the railway administrations of the reasonable and indeed inevitable limitations imposed by budget provision. The grants for working expenses, etc., are unlikely to be exceeded by more than the comparatively unimportant sum of £85,000; and this excess may be taken

as due to unprecedented floods on the North-Western Railway and the cyclone which worked serious havoc on the Eastern Bengal State Railway. If we take the railway revenue account as a whole, and set the interest charges, the annuities and sinking fund payments, and the minor debits (cost of land, etc.), against the net earnings, we find a surplus of £828,500 which accrues to general revenues. Last year there was a net loss to the State, for the first time since 1898-99.

"Our anticipated results for the ensuing year have already been alluded to. The gross earnings are expected to respond to the trade revival, but the larger grants which we have been advised to provide for improvements in the permanent-way, rolling stock, and general equipment, as well as the increasing charges on railway debt, will depress the net surplus. It is estimated at only £486,200. We should have been glad of a greater measure of assistance from our railways in a year of considerable difficulty; but we accept the situation in the confident hope that our sacrifices now will result in a substantial and permanent increase of our net railway profits in the future.

"Irrigation.

"The financial position of our great Irrigation undertakings may be gathered at a glance from the following table, which carries on and brings up to date the information that it has been customary to give in previous Financial Statements.

	1906-1907	1907-1908.*	1908-1909	1909-1910, Revised.	1910-1911, Budget.
<i>Productive Works.</i>	£	£	£	£	£
Capital outlay to end of year	25,745,780	26,978,016	28,002,898	29,081,500	30,225,800
Direct receipts	2,307,959	2,160,389	2,213,644	2,251,400	2,190,300
Land Revenue due to Irrigation	999,989	1,035,088	1,084,773	1,120,700	1,122,300
TOTAL	3,307,948	3,195,477	3,298,417	3,372,100	3,312,300
Working Expenses	926,310	981,804	1,011,140	1,061,600	1,062,700
Interest	870,962	905,887	930,708	965,900	1,002,400
TOTAL	1,797,272	1,887,691	1,941,848	2,027,500	2,065,100
NET PROFIT	1,510,676	1,307,786	1,356,569	1,344,600	1,247,200

Cheyeru anicut system	2,30,767	15,390
Poiney anicut system	14,89,605	99,310
Lower Coleroon anicut system		
TOTAL	31,26,593	341,800

"At the end of 1908-1909, 55,140 miles of main and branch canals and distributaries had been constructed, commanding 47 million acres of culturable land; the area actually irrigated in the year was 22,187,430 acres. The productive works during that year yielded a net return of 8·17 per cent. on the capital outlay of £28 millions, after paying all charges exclusive of interest. The net profit to the State was £1,356,000.

"The revised estimate for 1909-1910 shows a net profit of £1,345,000 on productive works and a net return on capital outlay of 7·94 per cent. At the end of the

current year we expect to have 55,601 miles of main and branch canals and distributaries constructed to command 47,396,402 acres of culturable land; and we hope actually to have irrigated about 21½ million acres during the year. In addition to the canals in operation, there are altogether 44 projects which are either under construction or awaiting sanction or being examined by the professional advisers of the Government; of these 14 are productive and 25 protective. They are designed to irrigate 3·24 million acres and 3·61 million acres, respectively, at a total capital cost of nearly £11½ millions and £19½ millions, respectively. The former are expected to yield a net return of 7·40 per cent. on the outlay.

"The most important works which received sanction during the year are the Tendula project in the Central Provinces and the Hathras Branch of the Upper Ganges canal in the United Provinces. A reference to the former project was made in paragraph 62 of the last year's Financial Statement. It is one of the most promising schemes of the class of protective irrigation works, as it will protect a large tract of country which has suffered severely from drought in recent years. The estimated return on its capital outlay is 3·9 per cent., and work will be started as soon as we are in a position to allot funds from our current revenues. The Hathras Branch canal is designed to serve portions of the Aligarh, Etah and Agra districts of the United Provinces where it will irrigate an area of 109,500 acres annually. It is a work of the productive category, the return on the capital outlay being estimated at 14·31 per cent. Satisfactory progress continues to be made in the construction of the three canals comprised in the Triple canal project in the Punjab, but it is feared that the original estimate of cost will be largely exceeded. It has been decided to adopt a level crossing instead of a syphon to carry the water from the Upper Chenab across the Ravi river for the supply of the Lower Bari Doab canal.

"The important Sind project for the construction of a barrage at Sukkur, and for the system of five canals to take out above it, has been under preparation; the design for the barrage is now under the consideration of the Government of India. The Sarda-Ganges-Jumna Feeder scheme has also been under investigation during the year. Mention was made of these projects in paragraphs 63 and 64 of my last Financial Statement.

"Opium.

"I fear the Council must be weary of my references to Opium: but I must revert to the subject again for a few minutes. It is a question of grave importance to our revenues and to various interests both in British India and in Malwa, especially to many humble people for whom the poppy cultivation is their daily bread. As far as our arrangements with China are concerned, our position is the same as when I described it last year, though we shall probably continue our progressive reduction of exports into 1911 while we await unequivocal evidence as to the success or otherwise of China's efforts to put down cultivation and consumption. But in one important respect, we have made a change in our domestic arrangements. We have decided to alter the distribution of our exports, so as to allow the Malwa States a larger share in them during the next three years. The intention is in this way to allow the large stocks of Malwa Opium to be cleared, and the capital locked up in them to be released, and to afford the Durbars and cultivators more time to adapt themselves to the inevitable decline in poppy cultivation. We are enabled to make this change by the greater readiness of the Bengal growers to take to other crops. It may be convenient that I should take the opportunity of announcing the figures of export that will be permitted in the next three calendar years, on the assumption that the curtailment of our exports to China will continue. They are as follows —

YEAR.	NUMBER OF CHESTS		
	Bengal	Malwa.	Total
1911	31,440	15,160	46,600
1912	26,520	14,980	41,500
1913	21,540	14,860	36,400

"Meanwhile, the policy of reducing and concentrating cultivation in Bengal is being steadily pursued; and, subject to the Secretary of State's approval, an important step will be taken in that direction next year by the amalgamation of the two Agencies.

"In my last Financial Statement, I made little more than a passing allusion to the International Opium Commission which met at Shanghai in February 1909. Its proceedings had not then reached us, and the bearing of its recommendations on India was uncertain. Since then, however, we have had an opportunity of examining the Commission's conclusions, and the Council will naturally expect some indication of the attitude of the Government of India towards the policy which the Commission advised. I cannot enter into any detail because we are still consulting the Local Governments concerned, and corresponding with the Secretary of State on a number of the questions involved. But the Commission was a thoroughly representative body; its conclusions were unanimous; and there is nothing in its findings to deter us from expressing our acceptance of the general principles which it laid down. We accept them all the more readily that the interests of India were amply and skilfully pressed on the Commission by our representative, Mr. J. B. Brunyate. Aided by his knowledge of the subject, the Commission was enabled to appreciate the importance and complexity of the opium problem in this country.

"Out of the nine Resolutions in which the Commission formulated its advice, only four have a direct bearing on India. Resolution No. 2 recommends measures for the gradual suppression of opium-smoking. I need not remind the Council how near we are in India to the legal prohibition of this particular form of the opium habit. Absolute prohibition is virtually our ideal, and we are prepared to take every reasonable step towards enforcing it, as our action in the past has clearly shown. In Burma we have had to deal with special difficulties, and our experience warns us to tread warily but even in that province absolute prohibition for foreigners, as well as for Burmans, will be taken into serious consideration. The difficulties will be great but they may not prove insuperable, and we are ready to give the whole question our best attention. The Commission's third Resolution suggests that we should re-examine our regulations for the use of opium in the light of the experience gained by other countries. This we are prepared to do. We retain full liberty to protect the legitimate household and medicinal use of opium, but increasing stringency against its use as a luxury or an intoxicant, higher rates of duty and more vigorous preventive action command our entire approval. Resolution No. 4 advises the adoption of reasonable measures for prohibiting the export of opium and its preparations to any country which forbids their entry. The exact mechanism for giving effect to this advice will require examination; but the principle involved is equitable and we fully accept it. The fifth Resolution—the last with which we are immediately concerned—urges on each Government the control in its own territories of the manufacture, sale and distribution of morphine or any similar opium derivative. We gladly welcome the recommendation. The morphia habit and the cocaine habit are becoming serious dangers in India; the enforcing of prohibition through the control of imports and of consumption is a matter of extreme difficulty; and it is only by the proper regulation of the supply of these drugs at its source that we can hope to hold them in check. It will thus be seen, I trust, that the Government of India are in full accord with the views expressed by the Commission and will take any practicable means of making them effective.

"Provincial Finance.

"I must now say a word about the finance of the provinces—a subject which has recently caused no small embarrassment to the Government of India. For all the provinces taken together, we have the following results —

	Actuals, 1908-1909.	Revised, 1909-1910.	Budget, 1910-1911.
	£.	£	£
Revenue	24,171,904	24,977,200	24,760,900
Expenditure	24,839,247	24,293,700	25,394,700
Surplus	667,343	683,500	633,800
Deficit	

"The surplus in the current year is in reality fortuitous, being due partly to abnormally heavy collections of Land Revenue and partly to the special subsidies with which the Imperial Government helped three of the provinces in the peculiar circumstances which I have already described. The revenue collections exceeded those of the previous year by about £700,000 (Provincial share), the greater part of which may be regarded as famine arrears. The grants-in-aid of Provincial balances which we have paid through the current year's accounts come to a total of £496,000. On the other hand, the deficit for next year includes a special draft of £133,000 upon their balances by the Madras Government. Making these allowances, we are driven to the conclusion that the provinces in the aggregate are steadily over-spending their income by about half a million a year. The position is thus one which compels most serious reflection. It differs considerably in different provinces. Madras, for example, keeps well within its means and has a large credit balance for special or non-recurring expenditure. The United Provinces, with its new settlement and a respite from famine, will no doubt be able to avoid deficits in normal conditions, and to build up a strong balance against emergencies. Eastern Bengal and Assam enters next year upon its new settlement, which I shall shortly describe, and ought in future to be able to confine its expenditure within the limits of its resources. The Central Provinces finances have been severely tried by the recent famine, which was administered with a care for the interests of the general taxpayer which the Government of India cordially appreciate. The ordinary services of the province have suffered accordingly, and until the leeway is made up, there may be some excess of expenditure over the normal revenue, though we hope it will be neither large nor prolonged.

"In the other four large provinces, I am afraid that the situation is less assuring. Bombay, it is true, has substantial balances, but they are being somewhat rapidly diminished, and care will have to be exercised to prevent the scale of recurring expenditure from settling into permanent excess over the normal revenues. From Burma and the Punjab we have recently had special appeals for assistance. To accept these appeals would have been virtually to admit that the provincial settlements of these provinces are inadequate; and we cannot make any such admission. Burma has undoubtedly suffered from a set-back, which I hope may be merely temporary, in its Forest receipts, but we do not consider that in either province there is a case for revising and amplifying the standing arrangements. It will be the duty—disagreeable and unpopular, but inevitable—of the Local Governments to overhaul their expenditure and to adapt it to their normal resources. That duty has already been undertaken in Bengal by our colleague, the present Lieutenant-Governor, and I am glad to have this opportunity of expressing my acknowledgment of the courage and thoroughness with which Sir Edward Baker has enforced economy in that province.

"We have now framed a semi-permanent settlement with Eastern Bengal and Assam, the last province where the settlement was on a temporary and provisional basis. This closes our long list of re-settlements, and I can hold out no hope of any general revision of these arrangements. They were made, before I came to India, with scrupulous care, and were intended to foster provincial independence, economy and foresight. Nor do I see any near prospect of our being able to undertake a further share of the recurring expenditure of Local Governments. Our own necessities will not improbably force systematic retrenchment upon us, which will affect Imperial and Provincial services alike; and in the meantime Local Governments can best co-operate with us, and best mitigate future difficulties, by examining the causes of the insidious growth of expenditure, and by sharply checking them.

"The special grants which we have given in the current year to the more impecunious provinces were meant partly to restore their normal scale of expenditure on civil works and partly to enable them to close 1910-1911 with the prescribed minimum balances*. For the next year the only additional grants which we intend to give are £255,000 to Eastern Bengal and Assam under its new settlement; £21,000 to Bengal for police reforms; and £21,000, distributed among five provinces, in aid of University and Collegiate education. The police grant is one of the last that is claimable for the reforms which were sanctioned on the advice of the Police Commission. The need for pressing on the reforms is most prominent in Bengal, and our general position puts it out of our power to accord similar treatment in 1910-1911 to the other provinces whose grants have not yet been paid in full. The University grants are a renewal and continuation of what we have been allotting since 1904.

*I do not allude to grants which are passed through Provincial accounts as subsidies to local authorities.

"As I have more than once referred to it, I shall describe very briefly the new settlement with Eastern Bengal and Assam. The existing settlement was made in 1906, and was to run for three years, in order to allow us to gain experience of the needs of the province. It was known that the Eastern Bengal districts required development, but the cost of the operation was largely guess-work. The temporary settlement, as we had believed probable, turned out inadequate; but at the end of its three-years' term, the Imperial finances were not in a state to justify a revision which was clearly going to involve a large transfer of Imperial funds to the Local Government. The consequence was that the province had to continue working with a deficit, and getting deeper into debt to Imperial revenues. We have now, in consultation with the Lieutenant-Governor and his officers, given our most careful consideration to the special difficulties of the province and arranged, with the Secretary of State's approval, to provide it with such a moderate addition to its resources as the efficiency of administration seems to demand. The result is that our fixed subsidy, to balance the standard figures of revenue and expenditure, has had to be raised by £255,000 a year. We have also, out of our high opium receipts in the current year, cancelled the province's overdraft and raised its balance to the prescribed minimum of 12 lakhs: this has cost us £246,000, which of course is non-recurring. I trust that with this liberal assistance the new province will now advance along the paths of financial stability.

"I conclude this portion of my remarks by explaining certain contributions from Provincial to Imperial revenues which will appear as new recurring assignments in the estimates of the eight major provinces for 1910-1911. Our measures for obtaining extra taxation will mean, as we estimate, an increased revenue of £166,000 under Excise and Stamps, but, as these are 'divided' heads and we require the whole of the extra revenue for Imperial purposes, we have appropriated the Provincial share of it, or £83,000, by taking contributions from the Local Governments concerned. The amount which we thus take from each province is based on a rough estimate of what the province is likely to collect on account of the higher duties.

"Ways and Means.

"Hitherto we have been considering almost exclusively the current revenue and expenditure of India. I must turn to the operations upon our cash balances, both in India and in the Secretary of State's custody in London. As the Government of India is its own banker, it is into our general cash balances that all our current revenue is paid, and from them that all our current expenditure is drawn. They are also the reservoir for the proceeds of all sterling and rupee loans, whether raised by Government or by railway companies which work our State lines, for the whole of our unfunded debt, and for all the miscellaneous deposits which are not earmarked for separate custody. All the provincial balances merge in them, and in them are absorbed all the repayments and interest of State loans or advances to local bodies and private individuals. Similarly, it is out of our cash balances that we take all our capital expenditure on railways and irrigation, all the advances which Government makes to local authorities and private persons; and all the money used in the discharge of our permanent, temporary or unfunded debt, or in the repayment of deposits. Finally, it is through our cash balances, owing to their being located partly in England and partly in India, that Council Bills are usually drawn and the greater part of Government's remittances between England and India effected. It is with our cash balances therefore that our estimate of Ways and Means are concerned.

"For 1910-11 we count on opening with £12,503,227 in our balances in India, and £12,758,615 in England the latter figure including £2,064,118 on account of the Gold Standard Reserve, and being further swelled by part of the proceeds of the £7½ million loan which the Secretary of State floated last month. Our chief requirements during the year will be our capital expenditure of £12,000,000 on railways and irrigation, and £946,300 for the discharge of permanent debt, to which may be added a net debit of £741,100 for transactions on account of the Gold Standard Reserve; the total of these liabilities coming to £13,687,400. To meet these, we shall have our revenue surplus of £245,900 and a further £500,000 from the Famine Grant. The Secretary of State has still to realize £1,637,600 out of his January loan; and certain Railway Companies are expected to raise fresh capital amounting to £2,597,500. Our unfunded debt receipts are estimated at £1,119,200 and the net result of our advance and remittance accounts, etc., will be a credit of £348,600. From the aggregate of these resources we shall thus obtain £6,448,800: and our high opening balances will

be reduced during the course of the year by £6,238,600, thus bringing our available means up to £12,687,400. This leaves us still short by £1,000,000, and we intend to borrow that amount (1½ crores of rupees) in India. We estimate our closing balances on the 31st March 1910 at £12,404,127 in India and £6,619,115 in England, £1,323,018 of the latter being held on account of the Gold Standard Reserve.

"Besides the transactions which I have thus described, the year will be marked by the purchase of the Indian Midland Railway. This liability will be met partly by taking over Debentures and partly from the proceeds of temporary loans which the Secretary of State will raise in England.

"The announcement regarding borrowings is made subject to the usual reservation, and the Government of India retain full discretion to vary the programme, as now declared, in any way and to any extent that may be thought advisable.

"The present intention of the Secretary of State is to draw bills on India for £16,500,000, but this also is subject to a similar reservation. The figure represents a forecast of the Secretary of State's requirements; but additional bills will be sold, so far as may be, if needed to meet the demands of trade.

"Exchange and Currency.

"I propose now to pick up the narrative of our currency affairs and to continue it from the point up to which I was able to carry it in the Budget discussions last March. During the year 1908-09, the Government of India fought a strenuous campaign against the fall in exchange—the first that had been forced upon them since the adoption of the gold standard. When the year closed, the movements of trade were rapidly becoming more normal, and exchange was firm at 1s. 3½d. with a tendency to rise. But though the battle had gone in our favour, its losses remained with us in the attenuated condition of our gold resources. In spite of the marked recovery which began in September 1908, the gold holding, in securities and cash, of our gold standard reserve was under 8 millions on the 31st of last March, and the reserve in India was laden, besides its standing silver nucleus of 6 crores, with the large sum of 9·88 crores in rupees, which we had withdrawn from circulation in exchange for the issue of gold in London. The gold in our currency chest at the Bank of England had fallen to 1½ millions, and the amount of sovereigns in our hands in India was practically negligible—about £92,000. Our gold resources at the beginning of the current financial year were thus represented by a total figure of 9½ millions sterling. A year earlier, on the 1st April 1908, they had been as high as 21 millions, and before the American financial crisis of October 1907, they had reached the substantial figure of 24½ millions. It was with this contrast in my mind that I have considered it my duty to represent the urgency and importance of building up our gold resources again by every means in our power.

"It is on the volume and direction of India's trade with the outside world that we must primarily depend for the strengthening of our gold position. We may husband our gold when we have it, we may cause it to fructify, we may even in emergency take exceptional means to supplement it. But it is the relation between our imports and our exports which, in the last resort, decides whether we are to keep our gold or to lose it. When I took stock of the position a year ago, our external trade, after the dislocation caused by the famine in Northern India and by the general depression in the world's markets, was beginning to resume its normal proportions. The very heavy imports of piece-goods, metals and silver which had helped to upset the balance in 1908 were at last easing off, the value of private merchandise and treasure which came into India by sea during the last three months of 1908-09 having been less by the enormous sum of 10½ crores than in the corresponding quarter of the previous year. Along with this there was a substantial quickening in the export trade; big shipments of opium left Bombay in January, a good average cotton crop began to move; and the market for yarns in China revived after some temporary dullness. There was thus a considerable demand for currency, emphasised by the sharp reduction which our 1908 operations had effected in the stock of rupees available for circulation. The Secretary of State was able to sell very heavy drafts during the two busiest months of the year, and before the end of March he had found it possible to restore to the gold standard reserve about two millions of the gold which it had parted with. Such was the state of affairs when we last discussed the subject in this Council.

"When the current year began, the improvement in the outlook had become unmistakable. Northern India was safe with a fine spring harvest; and the foreign

market for our yarns, cotton and oilseeds continued active, while the imports of bar-silver fell very substantially from the high figure they had reached in the previous year. In May began large exports of wheat, which were abnormally heavy while they lasted. They ceased abruptly in August, and brought to a close the first phase of the year's trade movement. During the five months from April to August the net exports on private account amounted to close on 20 crores, as against $16\frac{1}{2}$ crores in the same period of 1906, $16\frac{1}{2}$ crores in 1907 and an actual (though small) net excess of imports in the five corresponding months of the anxious year 1908. Up till August then everything was wholly favourable to the improvement of our position. In September there came a slight check. Wheat had worked itself out for the time being, and there was a sharp drop in cotton and seeds. Simultaneously with this, imports bounded up again, the new crop of Java sugar was coming into the market, and large consignments reached India of piece-goods and precious metals. On the month's account the net result was a balance of net imports to the extent of about 1 crore. In this, I need hardly say, there was nothing unseasonable, and I should not have referred to the point had it not been for the immediate effect on exchange to which I shall allude below. Clearly, however, the reversal of the balance in September was a merely transitory incident. By October the autumn harvests were safe, and a bounteous monsoon offered the best of prospects for the following spring. Trade soon flowed back into its normal channels, and since then the balance has been steadily in our favour, thanks mainly to the heavy exports of cotton, tea and jute, both raw and manufactured. During the third quarter of the year (last October to December) the exports as a whole exceeded the imports by 2 crores in value, against $1\frac{1}{2}$ crores in 1908 and 2 crores in 1907; but the excess would have been very much greater if it had not been for the large arrivals of gold (about $5\frac{3}{4}$ crores) in December.

"It is instructive to watch how closely the fluctuations in exchange followed the broad movements of trade which I have outlined above. Beginning April at $1s\ 3\frac{3}{4}d$ the rate stiffened to $1s\ 4d$ by the end of the month, thus returning to parity for the first time since Christmas 1907. It slipped back a point or two after the middle of May, but the Secretary of State met with no checks in his sale of bills until well into August. With the abrupt stoppage of the wheat exports, a shade of weakness came over the market. The reduced supply of export bills, combined with easy money (Bank rates of 3 per cent. in both Calcutta and Bombay), forced down the rate once more below gold point. I immediately put into force what may now be regarded as the regular and stereotyped procedure for checking a slump, and on the 2nd of September, and again on the 9th, the Comptroller General offered to sell bills on London at $1s\ 3\frac{3}{4}d$. up to £500,000 worth in each week. The bills actually taken during the fortnight amounted only to £156,000, the Secretary of State at his end cut down his offers of remittances; and the market was almost immediately restored to confidence, exchange rising by rapid stages back to parity on the 23rd of September. From October onwards there has been no further sign of trouble; Council bills have been sold in very large quantities, at prices ranging from par to $\frac{1}{2}$ pnds above, with $\frac{1}{2}$ pnds for telegraphic transfers, and gold has begun once more to come freely into the country.

"In currency affairs, effects sometimes follow causes with gratifying rapidity. As the result of the heavy demand for remittances to finance our revived export trade, the Secretary of State expects, in addition to satisfying all the requirements of his home treasury, to be able to raise the gold standard reserve by the end of March to over £14½ millions, that is, to repay to it the whole of the gold which had to be withdrawn in 1908 in support of exchange. Our currency reserve in London stands at $1\frac{1}{2}$ millions; but the sovereign is once more visible in India, the stock of gold held by us in this country having risen to over 5½ millions at the end of January, when it was still rapidly increasing. Within two years after the first breaches had been made in our position, our walls have been rebuilt and we are engaged in the further strengthening and extension of our defences.

"I should be lacking in candour if I allowed the Council to think that we are yet satisfied with the sufficiency of our defences. We have come successfully through one financial crisis and one famine. But there have been blacker times in the financial world than the crisis of October 1907, and there have been longer and more widespread famines in India than the one which is now happily at an end. My desire is to see our gold resources strong enough to carry us over not one, but two, years of short exports; and to keep exchange stable through at least twice the period during which we supported it in 1908. I do not say that even then we should regard our position as absolutely clear; but what I have indicated seems as much as we need aim at for the present. I

should now like to add a caution on the other side. I wish to dissociate the Government from the notion that a reduction in our gold holdings is an evil *per se*, and I trust that nothing which I have said above will be taken as indicating sympathy with that idea. There would be nothing more fallacious than to conceive of our gold reserves as being something that we put away in safety and strive to protect at all hazards. They exist to be used; and they are efficient only in so far as they are capable of being freely used for the purpose for which they were created. To hoard our gold when there is a clear case for employing it, would be fatal to our currency policy: and it may, and usually will, be just as much our duty to disperse our reserves when the balance of trade is against India, as it is our duty to build them up when the balance is in our favour. The increasing delicacy of the exchange standard and the more frequent manifestations of nervousness in the market—I use the term in no offensive sense—may require us to open our gold reserves more often than has hitherto been necessary, but we shall not hesitate to do so whenever exchange clearly needs support.

“It is therefore with genuine satisfaction that I am able to announce two recent decisions which ought to increase the efficiency of our gold reserves. The Council will remember that, in August 1907, upon the advice of the Indian Railway Finance Committee, it was determined to employ one-half of the profits on our rupee coinage in capital expenditure upon railways. The sum of £1,123,604 was actually diverted in this manner. But for the future, as has now been decided, the whole of our coinage profits without reservation will be paid into the gold standard reserve until such time as the gold held by us, in that Reserve and in the Paper Currency Department combined, reaches the figure of £25 millions sterling. The second important change concerns the form in which the gold standard reserve is held in England. For the future, instead of tying up the whole amount in investments, the Secretary of State has consented to keep 1 million sterling uninvested, letting out this sum in short loans or putting it into bank deposits. Of the balance, he will hold a considerable portion in high-class securities with a near date of redemption, and the remainder in Consols or other approved stock. When we are next obliged to sell sterling bills on London, the Secretary of State will thus be able to meet them in the first instance from cash which is virtually at call. When this is exhausted, he can draw on his short-dated securities, upon which cash can always be obtained by sale or loan if it is impossible to wait for their maturity. If the crisis still continues, it will become necessary to realize—and to realize gradually and carefully—the more permanent securities. It will be for the Secretary of State in Council to carry out this operation, and he accepts the responsibility for doing so if occasion arises. I trust that the Council, as well as the large and important community who are vitally interested in such matters, will find in these arrangements and in the actions of Government during the last two years, no uncertain proof of the determination of those who are responsible for the Government of India to uphold the gold value of the rupee.

Conclusion.

“In introducing the Budget last year I used the perhaps infelicitous expression ‘a gamble in rain.’ So far the gamble has resulted in a win, but I think every one will agree that, although the monsoon must always remain a dominating factor in forecasting the revenue and expenditure of India, it would be neither prudent nor right to approach the compilation of a budget from a gambling standpoint. Broadly speaking, it should be possible by the experience of past years, tempered by a careful review of possibly changed circumstances, to form a fairly close estimate of revenue and expenditure. The monsoon will, however, always be a factor in regard to which hope must of necessity take the place of calculation, and that in itself renders budgeting in this country a matter of abnormal difficulty. All we can do is to calculate upon a reasonably good harvest, and in the literal and best sense put our trust in Providence.

“To the best of my ability I have estimated our assets and liabilities for the ensuing year. The outcome necessitates some additional taxation. I can understand a certain malicious satisfaction in extracting revenue out of multi-millionaires. But this is not a rich country. A large proportion of its people are poor, an appreciable proportion are very poor. No right-minded man can impose additional taxation on India with a light heart. To me it is a very genuine sorrow to be obliged to do so. I did not sow the storm, but I am reaping the whirlwind.

“I am confident that I may count on your sympathy.

“I believe I shall have your support.”

INDIAN STAMP (AMENDMENT) BILL.

The Hon'ble MR. MESTON moved for leave to introduce a Bill further to amend the Indian Stamp Act, 1899. He said:—“This particular motion does not appear on the List of Business which Hon'ble Members have in their hands,

and, with Your Lordship's permission, it will be followed by several other motions which also do not find a place in the agenda, but they are essential and integral parts of the Budget proposals explained in the speech to which we have just listened. The Hon'ble Finance Member has told the Council that, in order to make our revenue and our expenditure balance, it will be necessary to raise next year further taxation which will yield roughly 170 lakhs of rupees, and it is proposed to get this taxation from three separate sources—from increased duties on customs, from raising certain of the stamp-duties upon documents, and from enlarged rates of excise under the orders of Provincial Governments. The third of these proposals will be for Local Governments to deal with. They will take measures at once to enforce the increased excise-duties, either by notification or by such other legal processes as may be necessary. The processes which are required to obtain the extra revenue on customs and on stamps are matters for the Imperial Legislature and it is proposed at once to introduce the necessary Bills. We must do this without delay in order to prevent evasion of taxation. This legislation will take the form of three amending Acts, an Act dealing with the tariff law, the other two Acts dealing with the stamp law. The last two might possibly have been amalgamated in one, but it was found convenient to take each of the Acts which lays down the substantive law and to amend them separately.

"What I have to ask the Council to consider first is a Bill to amend the Indian Stamp Act Schedule in certain respects. The intention of the Bill is to take the extra revenue which we require from the smallest number of items with the least possible inconvenience to trade and the least possible hardship to the general public. Now the Indian Stamp Act deals with a very large number of documents. We require only about 20 lakhs of extra revenue. The consequence is that we endeavour as far as possible to avoid any interference with the general business of the community. We do not propose, for example, to interfere with the rates on bonds and mortgages, conveyances and leases, on receipts or cheques, or practically on any other of the ordinary incidents of every-day life. When these are eliminated from the schedule, we find ourselves left with the instruments of credit, *viz.*, bills of exchange and promissory notes, and with the instruments which affect business or the operations of the Stock Exchange. It is on these, accordingly, Sir, that we propose to ask for the extra taxation which we require. The precise items which we propose to touch concern the issue of debentures which at present pay a duty of $1\frac{1}{2}$ per cent., share warrants to bearer which at present pay $\frac{3}{4}$ per cent., and all documents affecting the transfer of shares and debentures which at present pay $\frac{1}{4}$ per cent. The rates in force in England are exactly double of these rates, and the proposal which this Bill contains is that we should assimilate our rates to the English rates; that we should double the rates on debentures, on share warrants and on documents of transfer.

"There remains only one other somewhat important transaction which I do not think will be affected, yet which is referred to by the present Chancellor of the Exchequer in words which I may very suitably quote. Mr. Lloyd George said: 'A block of shares may be sold and re-sold several times in the course of passing from one permanent holder to another, and the whole of these transactions may be covered by a single transfer from the first seller to the final purchaser. In such cases the intermediate transactions escape taxation altogether, except for the stamp-duty which is chargeable upon the broker's contract note.' That, I take it, is practically the law in India, and the duty for these intermediate purchases and sales and transfers is only one anna, whatever may be the value of the consideration involved. We propose to amend this by taking the rate up into a graduated scale and enforcing one anna for every Rs. 500 or part of Rs. 500 of the value of the security of the share or the amount of the bill which changes hands. As regards bills of exchange and promissory notes, we propose a moderate addition of roughly 50 per cent. That, Sir, closes the list of the enhanced duties which we propose in this Bill; it is not a heavy or burdensome list, and I accordingly beg for leave to introduce it."

The motion was put and agreed to.

The Hon'ble MR. MESTON introduced the Bill.

The Hon'ble MR. MESTON moved that the Rules of Business be suspended to admit of the Bill being referred to a Select Committee.

THE PRESIDENT declared the Rules suspended.

The Hon'ble MR. MESTON moved that the Bill be referred to a Select Committee consisting of the Hon'ble Sir Guy Fleetwood Wilson, the Hon'ble Mr. S. P. Sinha, the Hon'ble Mr. Brunyate, the Hon'ble Mr. Kesteven, the Hon'ble Babu Bhupendra Nath Basu, the Hon'ble Sardar Partab Singh, the Hon'ble Maung Bah Too, the Hon'ble Mr. Mazharul Haque, and the mover, with instructions to report on Friday, the 4th March.

The motion was put and agreed to.

COURT-FEES (AMENDMENT) BILL.

The Hon'ble MR. MESTON moved for leave to introduce a Bill further to amend the Court-fees Act, 1870. He said:—"This is the second of the small measures to which I referred in my previous remarks. It is necessary to make a special piece of legislation of this, but all that we propose to do is to raise the present rates on probate. There is at present in India nothing at all corresponding to the large revenue which the English Government receive from death-duties, succession-duties and estate-duties. The nearest approach to it is the very small duty which we receive from probates, and these rates, these duties, may very reasonably be somewhat extended. The present duty in India, Sir, is 2 per cent. all round, whatever may be the value of the property in respect of which probate is granted or letters of administration taken out. In England, before probate-duties were absorbed by the present estate-duties, the probate rate used to be 2 per cent. for estates of the value of £500 or less, it was 2½ per cent. for estates valued at from £500 to £1,000, and it was 3 per cent. for estates to the value of £1,000 and upwards. We propose, however roughly, to assimilate our Indian rates to those, and in this Bill the suggestion is that the rate should be raised to 2½ per cent. on estates which are valued at Rs. 10,000 and over and to 3 per cent. on estates valued at Rs. 50,000 and over. We believe that in this way we shall increase our revenue by the moderate amount of 5 lakhs. I beg leave to introduce the Bill."

The Hon'ble BABU BHUPENDRA NATH BASU —"Is the Hon'ble Member aware that in applications for probate and letters of administration, the duty is paid at the time that application is made, and that probate or letters of administration are issued long after? The Hon'ble Member must be aware that in the present day, in many estates, the orders have been made for the issue of probate and letters of administration after the duty has been paid. Will he make these estates liable to pay the enhanced duty, or will they pay the old duty?"

The Hon'ble MR. MESTON :—My Lord, I would suggest that the Hon'ble Member's suggestion be taken into consideration in Select Committee."

The motion was put and agreed to.

The Hon'ble MR. MESTON introduced the Bill.

The Hon'ble MR. MESTON moved that the Rules of Business be suspended to admit of the Bill being referred to a Select Committee.

THE PRESIDENT declared the Rules suspended.

The Hon'ble MR. MESTON moved that the Bill be referred to a Select Committee consisting of the Hon'ble Sir Guy Fleetwood Wilson, the Hon'ble Mr. S. P. Sinha, the Hon'ble Mr. Brunyate, the Hon'ble Mr. Kesteven, the Hon'ble Babu Bhupendra Nath Basu, the Hon'ble Sardar Partab Singh,

the Hon'ble Maung Bah Too, the Hon'ble Mr. Mazharul Haque, and the mover, with instructions to report on Friday, the 4th March.

The motion was put and agreed to.

INDIAN TARIFF (AMENDMENT) BILL.

The Hon'ble MR. MESTON moved for leave to introduce a Bill further to amend the Indian Tariff Act, 1894. He said —“It is from this measure that we expect to get the greater part of the extra revenue which we require. As the Hon'ble Finance Member has explained, we aim at getting an additional revenue of one crore from the customs tariff, and we hope to get this amount by means of fresh taxation on liquors, tobacco, silver and petroleum.

“This does not mean tariff reform. Our schedule is not a particularly good one. In many respects it is out of date. It is full of anomalies, as I suppose most schedules are. But it is also studded with obsolete concessions and with favoured rates which the present state of Indian industries no longer justifies. There is thus a very strong temptation to take the schedule up, go into it scientifically and overhaul it.

“That temptation however we have resisted. The work must wait for another occasion. Our present proposals aim at getting the maximum amount of revenue out of the smallest number of commodities with the least inconvenience to trade and the least hardship to the consumer. If you take our tariff schedule for, say, the last year and look down the list of items, you will at once see how easy it is to single out a few important articles which yield the chief slices of revenue. They are liquors, which last year gave us about a crore, petroleum which gave us half a crore, silver which gave us half a crore, sugar and piece-goods. For our new proposals we have selected the first three of these categories. If we had selected more than these three, we should probably have got more revenue than we should absolutely require; and next to the mistake of insufficient taxation, there is no greater blunder than taking more than the Government really requires. But we have also selected tobacco, and you will not find tobacco in the list of articles which yield substantial revenues to our exchequer. There is probably no civilised country in the world where tobacco is so inadequately taxed as it is in India, and it is now time to remedy that omission.

“These then are our proposals. On liquors the present standard rate is Rs. 7 per proof gallon. We propose to raise this to Rs. 9-6, which not only gives us a substantial enhancement but has the great administrative advantage of being based on the easily calculated rate of one and half annas per gallon of proof. This we believe will be a very great convenience to our customs houses and to the trade. Convenience however is not by any means our chief reason for the new duty. We want a substantial enhancement and we want it for various reasons. I need not repeat that we want it for revenue reasons; we also want it in pursuance of our regular excise policy which, as Sir Edward Baker once put it, makes the duty on imported spirits the high water mark for our taxation of country spirit. It has always been our practice when, in the course of the steady and deliberate enhancement of excise rates, they have risen to the neighbourhood of the tariff rate,—it has been our practice to increase the tariff rate in its turn and to set up the new duty as the goal at which our excise rates ought to end. It is in this way that we are steadily increasing our taxation upon intoxicants of all kinds. There are now in nearly every, if not every, province considerable areas where the excise-duty on spirits exceeds Rs. 7 a gallon, and the Rs. 7 which we take on imported spirits has thus got notice to move. But there is one further reason—and a very powerful reason—for increasing the duties on our imported liquors. It has been pressed upon Government by a recent committee which sat in Bombay to investigate the import of foreign spirits and their effect. That committee was a thoroughly representative body, comprising officials and non-officials, revenue enthusiasts and temperance enthusiasts (though I do not mean to imply that the two forms of enthusiasm are necessarily hostile). That

committee has pointed out how serious is the growth of the imports into India of cheap potato and similar spirits; how skillfully such spirits are doctored and decorated to catch the public taste; and how insidiously they are operating in promoting the tippling habit. The committee recommended that we should take over closer control of this class of spirits by influencing the retail price through the means of higher license fees. This proposal will receive full consideration; but in the meantime it is not too much to hope that we shall get at the same result by increasing the tariff rate. The other increases which the Bill proposes are more or less proportioned to the rise in the standard rate on ordinary spirit. It is proposed to tax liqueurs and perfumed spirits with a variety of their congeners at Rs. 13 a gallon without reference to the proof strength. This will avoid interference with consignments by opening them for the purpose of testing their strength; and it is based on the assumption that the average strength of such spirit is roughly 40 over proof.

"Denatured spirit, commonly called methylated spirit, will remain at the present rate of 5 per cent. *ad valorem*. There is no intention of increasing it. Spirit used in drugs or medical preparations is at present subject to two rates according to the proportion of spirit contained; this division is difficult to work and it dates from a time when the tariff rate was low and freights were heavy, so that the 5 per cent. *ad valorem* rate was not disproportionate to the higher rate which the stronger spirit paid. We now propose to tax them all at their spirit strength, provided always of course that the strength is so great as to take the preparation outside the category of drugs pure and simple; but the actual rate which we propose is to be less than the rate on intoxicants, it will be Rs. 7-13 a gallon or the equivalent of $1\frac{1}{4}$ annas per degree of proof.

"I turn now to beer and wines. The duty on beer is only two annas a gallon or one-third of an anna on a quart bottle. This is considerably below the duty enforced in the United Kingdom and it is a mere bagatelle compared with the duty on imported beer in all the chief colonies. We propose to raise it to 3 annas with a corresponding enhancement of the excise on beer made in this country. This will bring it up to half an anna a quart, which will surely not be regarded as an extravagant contribution to the revenues. The duties on wine will also be raised by 50 per cent. They are extremely low at present and they have not been altered since 1875. There is no necessity to defend what we now propose to take, namely, Rs. 3-12 a gallon on champagne and sparkling wines, and Rs. 1-8 a gallon on still wines.

"Our next chief object for extra taxation is tobacco, and in regard to it I am afraid that our proposals will be considered as somewhat drastic. At present the taxation is absolutely negligible. Leaf tobacco pays nothing at all; other tobaccos pay only 5 per cent. on their invoice value, and I have no doubt that their invoice value is kept at the most modest figure. The result is an enormous growth in the imports of cheap tobacco, particularly of American cigarettes and raw tobacco which comes in from America and through the United Kingdom for the manufacture of the so-called Swadeshi cigarettes to compete with their American rivals. 12,000 lbs. of leaf tobacco were imported in this way last year, and over 3 million pounds of cigarettes. Some of us may be more familiar with the so-called Egyptian cigarettes than with other brands; but I have made a rough calculation which shows that out of every 100 cigarettes imported into India 2 are described as Egyptian and 98 come from other and less aristocratic sources. The flood of cheap cigarettes and cigarette tobacco which are pouring into India is bound to have its effect in time upon the public health of the people and more particularly upon the health of the young. It is having its effect now. These packets of 10 cigarettes which are hawked about our towns and cities and railway stations are sold as low as $1\frac{1}{4}$ pice per packet. You can get a better quality for $2\frac{1}{4}$ pice, and the aristocrats of the market can be had for 3 pice, that is, 3 farthings for a packet which I understand sells for to $2\frac{1}{4}$ or $3d.$ in England. This must lead—of course we know it does lead—to detrimental use. We propose to put a duty of Rs. 2 a lb. on all cigarettes. This will be equivalent to about 8 annas a hundred and will increase the price of the ordinary

packet of 10 to something between $1\frac{1}{2}$ to 2 annas. For this we think there is every justification. The other tobacco rates are made as far as possible proportionate to the cigarette rate. On our raw tobacco, which is at present free, we propose to put Rs. 1-8 a lb., Rs. 1-10 a lb. on pipe tobacco and Rs. 2-8 per lb. on cigars. If any Hon'ble Member thinks that these rates are likely to fall somewhat severely on a harmless luxury, I would invite him to compare them with the rates which are now being paid in England. Mr. Lloyd George's budget proposed 7s a lb. on cigars, 5s. 8d. on cigarettes and corresponding rates on the less expensive articles.

"I come now to petroleum, which at present pays one anna a gallon. It is an article of which the consumption is very rapidly increasing in India and from which, it is understood, very large profits are realised. Something like 84 million gallons were imported last year, and we believe that the small additional duty could be collected without any trouble.

"There remains only silver, and I approach it with some trepidation, because there is no more burning question among currency experts than the propriety of a heavy tax on silver in our present circumstances. The controversy has broken out in Bombay quite recently, and Government has been very strongly urged by one school of thinkers to take up the question again, in order, as some of our critics would put it, to prevent the competition of silver with Council Bills or, as others would prefer, to raise the rupee from its present bullion value to something more akin to its token value. In the widely divergent views which this question elicits there is much that requires careful study, and the Government of India may find some later opportunity for confessing its faith in the matter. The present is not such an opportunity. We do not profess to tax silver for currency purposes, we do not tax it for the purpose of strengthening our gold reserve, we do not tax it because we want to keep it out of the country, we tax it simply because we require money and because 4 annas an ounce, which is the rate we propose, is a moderate contribution to the revenues from an article which is introduced in such enormous quantities and a trade in which there must be very large profits. If our tax has incidentally the effect of raising the value of the small hoards of rupees or the silver ornaments which form the savings of many millions of humble people in India, we shall all be the more gratified.

"There is only one other alteration in our existing schedule to which I have not alluded. The present import duty on opium of 12 rupees a lb. is intended to be a prohibitive one, many of the derivatives of opium are now being brought into the country in large quantities for undesirable purposes. We propose therefore to tax the opium alkaloids at the same rate as opium itself, which will have the effect of bringing morphine and similar opiates into our net, unless of course they are introduced in the form of recognized medicines,—Dover's powder and the like,—when they will simply be, as at present, amenable to the ordinary 5 per cent. duty.

"I now beg leave to introduce this Bill. The ordinary practice would be, following well established precedents, to move Your Excellency to suspend all the standing rules which would interfere with its becoming law at one sitting. There are obvious justifications for this. When a rise in customs duties takes place there is an inevitable tendency for the taxable articles to be rushed out of bond at the old rates. On this occasion we cannot afford the loss of revenue which this might involve, and we accordingly propose that the new rates should take effect from this morning. As however the alteration of the tariff schedule affects a variety of interests, we are averse to hurrying the Bill through Council without such consideration as may be possible between this and the next meeting of the Council. We propose accordingly, with Your Excellency's permission, to refer the Bill to a Select Committee without prejudice to the liability of importers to pay the new rates from this morning onwards."

The motion was put and agreed to.

The Hon'ble MR. MESTON introduced the Bill.

The Hon'ble MR. MESTON moved that the Rules of Business be suspended.

THE PRESIDENT declared the Rules suspended.

The Hon'ble MR. MESTON moved that the Bill be referred to a Select Committee consisting of the Hon'ble Sir Guy Fleetwood Wilson, the Hon'ble Mr. S. P. Sinha, the Hon'ble Mr. Holms, the Hon'ble Mr. Gates, the Hon'ble Mr. Todhunter, the Hon'ble Mr. Gokhale, the Hon'ble Raja of Kurupam, the Hon'ble Moulvi Syed Shams-ul-Huda, the Hon'ble Mr. Graham, the Hon'ble Sir Sassoon David and the mover, with instructions to report on Friday, the 4th March.

The motion was put and agreed to.

INDIAN COMPANIES (AMENDMENT) BILL.

The Hon'ble MR. MAXWELL moved that the Report of the Select Committee on the Bill further to amend the Indian Companies Act, 1882, be taken into consideration.

The motion was put and agreed to.

The Hon'ble MR. MAXWELL moved that the Bill be passed.

The motion was put and agreed to.

DOURINE BILL.

The Hon'ble MR. MILLER moved that the Report of the Select Committee on the Bill to provide for the prevention of the spread of Dourine be taken into consideration. He said —“ My Lord, the Report of the Select Committee on the Bill has been before the Council for a week. In moving that it be taken into consideration, I should like to refer to one or two changes which the Select Committee have made. The Bill has been criticised as in some respects too liberal, especially as regards the grant of compensation. There is no doubt that its terms are exceedingly liberal in this respect, but this was thought advisable not merely to prevent hardship to individuals but as a safeguard against concealment of the disease. As some check, however, against the possible award of excessive compensation, the Committee have provided in section 10 (2) that in certain cases, when the compensation exceeds Rs 250, a reference should be made to the Collector. The Committee has also taken two provisions from the Glanders and Farcy Act, which appear as clauses 13 and 16 of this measure. The first is for the protection of the public against unnecessary or vexatious searches, and subjects any inspector who is guilty to severe punishment. The other one, on the other hand, protects persons who take proceedings under this Act in good faith.”

The motion was put and agreed to.

The Hon'ble MR. N SUBBA RAO moved that in clause 8, sub-clause (b) (ii), of the Bill, as amended, for the words “to be destroyed” the words “to be segregated in such place or places as the Local Government may fix” be substituted. He said —“ My Lord, section 8 deals with animals afflicted with dourine. In the case of diseased horses, the proposal is to have them castrated. In the case of diseased mares used for breeding purposes, there are two remedies provided to prevent the spread of the disease: one is to brand them and the other is to destroy them subject to the sanction of the Commissioner or other officer appointed by Government. There is no indication anywhere in the Bill that such animals might be segregated instead of being destroyed, and no provision is made for the purpose. This appears to be, I submit, a serious defect in the Bill which requires to be remedied.

“ I must confess that I am not aware of any circumstances which imperatively necessitate the destruction of mares afflicted with this disease. The Report of the Select Committee has not dealt with the point nor with the question of segregation of such animals. As to the probable operation of this section the United Provinces Government reports:—‘ If the disease of dourine is one which can only be stopped by the prevention of breeding from infected

animals, it appears to him that probably all mares affected should be destroyed or at least purchased and employed under proper supervision to prevent them from being used for breeding.' Thus two alternatives are placed before us: either destruction or segregation. My Lord, I have had the advantage of reading the note prepared by the Hon'ble Mr. Hyat Khan who is well entitled to speak with authority on the subject. He has kindly placed it at the disposal of the Hon'ble Members. From that it will be seen that the effective remedy against the spread of the disease is branding or ringing the mare. It appears that this remedy of ringing is freely adopted in the Punjab and is successful in attaining its object in connection with breeding purposes. He considers that it is the safest and easiest method of preventing the spread of the disease. The Hon'ble Mover will pardon me if I say that no case is made out for the insertion of this clause providing for the destruction of a diseased mare.

"Even if the method recommended by the Hon'ble Mr. Hyat Khan is not accepted, I do not see why the diseased mare should not be segregated instead of being destroyed. The disease which this Bill deals with is not infectious but only contagious and that too under particular conditions. It appears to me, therefore, that segregation is amply sufficient to meet the objects which the Bill has in view.

"My Lord, there are several asylums in different parts of the country where sick animals are taken care of and looked after—asylums supported by the public which form a striking feature of the civilization of this ancient land. There does not appear to be any reason why mares affected with dourine should not be segregated in such places, and if Government does not find them suitable in any way, special arrangements may well be made for their protection. No doubt some cost will have to be incurred. Surely, it will not be anything like what is incurred to prevent the spread of plague.

"I may be told that under Act XIII of 1899, horses affected with glanders or farcy or any other epidemic disease could be destroyed. I understand that that Act deals with infectious diseases and we are not discussing here the propriety of the provisions of that Act. Whatever that may be, one wrong does not give authority to commit another wrong. I hope this Council will respect the feelings of the people of the country and show some consideration to animals which are afflicted with dourine for no fault of theirs, especially when it is not clear that destruction in any case is required to prevent the spread of the disease.

"My Lord, the principle underlying this amendment, I need hardly say, is that animal life should be held sacred. I hope that this Council will not brush aside this noble ideal cherished by large populations in this country and will not give its sanction to the destruction of dumb animals, if it can be helped."

The Hon'ble LIEUTENANT MAJIK UMAR HYAT KHAN said:—"My Lord, the present Bill, which provides for the prevention of the spread of Dourine is a very important measure, as it deals with the safety of such animals as are very useful from every point of view. Any disease which may cause the destruction of such animals should be treated as serious and requires some speedy legislation. This disease was first discovered in Germany in 1795, and has since made its appearance in some other countries. Happily it did not reach India till recently, and that alone in the upper portion of the country. I am glad to say that it is not prevalent anywhere at present, but prevention is always better than cure, and it is well to have a safeguard for an evil before it is actually faced.

"I am glad to say that I was put on the Select Committee and was by chance of useful opinion on the subject, having undergone a short course of veterinary training and being a breeder of horses on a large scale, which fact is well known to Your Excellency. I have also had a bitter experience of epidemic and contagious diseases in losing some very valuable horses in the last few months, some of which were well known to horse-owners. I am, therefore, alive to the necessity of taking some useful measures, and this is one of the causes why I have not pressed many of my amendments which would have materially changed the Bill and caused an unnecessary delay in requiring its re-publication. The alterations and suggestions which I proposed to make may be found in my remarks

offered for the consideration of the Select Committee together with a brief history, the symptoms and period of the disease and an analysis of the reasons for the amendments desired.

"I started by omitting 5 $\frac{1}{2}$ sections in a small Bill of 15 sections and proposed some 13 amendments. My main object in brief and without going into details was :—

Firstly, to include all the equine species in the Bill.

Secondly, to take precaution against misuse of the power given by it.

Thirdly, to provide some penalty for violation of the general purposes of the Act.

Fourthly, to dispense with the destruction of affected animals.

Fifthly, to award no compensation to the owners of such animals.

Sixthly, to afford protection against legal proceedings to persons working under this Act.

"My Lord, the amendments my Hon'ble Colleague has moved were originally put in by me, though in another form which I have just alluded to in heading fourth.

"I am not going to advance the arguments which are fully given in my suggestions to the Select Committee for dispensing with the destruction of affected animals, the consequence of which would have saved any compensation awarded to the owners.

"I have given a brief reason for not pressing these arguments. When the necessary precautions are taken by castrating, branding, etc., and by another method which I had suggested or by segregating the animal affected, there is no necessity to destroy it; and the amendments of my Hon'ble Colleague go in the same direction and produce a similar result. If practicable, I think they may be useful if powers of destruction are also kept in extreme cases.

"However, as some of my important amendments have been taken into consideration, I did not press the rest on the Select Committee. I am satisfied with the Bill and in supporting the Hon'ble Mover I respectfully beg that the Bill be passed into law."

The Hon'ble MR. GOKHALE :—"My Lord, I should like to say a word on this amendment. I think there is very considerable force in what has fallen from my friend the Hon'ble Mr. Subba Rao. I think that the destruction of mares afflicted with this disease would be far too drastic a course and would be against the sentiment of large sections of the people. At the same time I recognize that to throw upon the Government of India the responsibility of bearing the expense of segregating the animals would perhaps be a large order. I do not think that the times of the Emperor Asoka have come back, but I think that if asylums or pinjrapoles are willing to take charge of such animals, there should be some provision for making over these animals to such bodies. I think that should meet the requirements of the case."

The Hon'ble RAJA VAIRICHERLA VAIRABHADRA RAZU BAHADUR of Kurupam said :—"My Lord, with reference to the Dourine Bill, I would recommend the advisability of expunging the alternative course recommended in section 8 (b) (ii) which reads "cause it to be destroyed".

"The idea of destroying a dumb and helpless creature is repugnant to the Hindu feelings. Hindus, Jains, Parsis and Buddhists are at one in this respect, and yet these form no insignificant section of the people over whom your Lordship rules. We are taught from our cradle that life is sacred, and we hold that the horse and the cow, amongst a large number of other animals, as auspicious creatures, are worthy of religious veneration. The Hon'ble Council may perhaps consider this my objection as purely sentimental. Call them mere sentiments, if you please, but there they are exercising a tremendous influence on the conduct, the character, nay, on the very life, of the Indo-Aryan. Sentiment forms a potent factor in the up-building of a nation. Associations, domestic and religious, ceremonials and ideals of life have made the Hindu a bundle of sentiments. 'Ahimsa Paramo Dharmaha' is our religious motto.

"Sibi, a great Emperor of Hindu mythology, in order to save the life of a poor pigeon which sought refuge in his lap from the hot pursuit of a hawk, is said to have given an equivalent weight of his own body's flesh to satisfy the hunger-stricken hawk. He said that the mighty Dharma of a Kshatriya is to extend his protecting hand to the weak and helpless, whether man or animal or insect of the lowest type, as long as they lived within the boundaries of his kingdom. Such are the traditions amidst which the Hindu mind is brought up. A wise and benevolent Government has always shaped its laws with due regard to the sentiments of even an insignificant section of its people for whom it legislated. Matters are made more complex when a foreign Government has to legislate for a heterogeneous nation, differing from itself in ideals, feelings, tastes and associations. But no foreign Government has ever shown greater tact, statesmanship, sagacity and patient consideration in the matter of its legislation than the wise and benevolent British rule. Your Lordship's Government has always been humane and considerate in this respect, and I trust that my humble suggestion will find favour in its eyes.

"Plague and cholera are as much, if not more, contagious as the dourine disease. Judged from the human standard, human life is considered more precious and sacred than that of any other animal; and as such, in order to prevent a certain section of people from the plague epidemic, plague regulations might have with equal justification provided for the destruction of a plague-stricken patient. But fortunately this is not done. Why then this special clause be inserted in this Bill? In India there are many asylums for the treatment and protection of such animals. Let them be segregated and a trial be recommended to test if things cannot be set aright without taking away the life of a God's creature.

"I therefore support the amendment proposed by the Hon'ble Mr. N. Subba Rao Pantulu."

The Hon'ble MR. MILLER said — "My Lord, we must all respect the sentiments that underlie the amendments that have been proposed by the Hon'ble Member opposite; but I regret that I cannot advise the Council to accept the proposal which he has put forward. Throughout this Bill we have endeavoured in every respect to adopt as mild a measure as possible. The whole procedure from beginning to end is intentionally lenient, and as a matter of fact we have been criticised because the provisions were not sufficiently drastic. In the case of mares the ordinary procedure prescribed in the Bill is simply to brand them. Now branding is segregation in a mild form: a branded animal is a marked animal; and in places where the serious effects of the disease are recognised, I have no doubt that the branding of an animal would be, in ordinary circumstances, sufficient to prevent its being allowed to go among other animals. What exactly is meant by segregation I am not quite certain that I know, and one reason for my advising the Council not to accept this amendment is that if we accept it, we should have to make it a little clearer in the Act exactly what is meant. Does segregation mean segregation by the owner, or, as the Hon'ble Member has suggested, in an asylum, or segregation under the eye of some Government official? We ought to make sure what is meant. But in that case we might be throwing a very heavy expense either on the people themselves or on public funds. I think it is very much better therefore to stick to the simpler proposal that we have made and simply to provide for branding, which does no harm to any one at all. Then the Hon'ble Member wishes to omit the power which is given to destroy animals in certain cases. I understood that my Hon'ble friend Malik Umar Hyat Khan considered it necessary to keep the power of destroying in reserve; but he also would introduce segregation; and my Hon'ble friend Mr. Gokhale also did not, I think, seriously object to the power of destroying. The power of destroying animals in certain cases is already given by certain Indian Acts: we cannot get over the fact that the Indian legislature has already, and very necessarily, given that power in certain cases. We were advised that it was necessary to have this power in reserve. There may be cases in which

in the interests of mercy it may be better that the power of destroying should be exercised at once. But we have in this Act safeguarded the power in a way that will certainly, I think all Hon'ble Members will admit, prevent any recourse to it except when it is absolutely necessary. In the first place special sanction has to be got, and in the second place, and this is really more important, full compensation has to be paid. It seems to me perfectly certain that in such circumstances this power will never be exercised at all recklessly or rashly, and I think we ought to keep it in the Bill, and not to strike it out, as it would be necessary if we accept the amendment of the Hon'ble Member opposite. I am afraid therefore I must oppose the amendment that has been proposed."

The Council divided—

Ayes—14.

The Hon'ble Pandit Madan Mohan Malaviya.
 The Hon'ble Mr. Abdul Majid.
 The Hon'ble Malik Umar Hyat Khan
 The Hon'ble Mr. Sachchidananda Sinha.
 The Hon'ble Babu Bhupendra Nath Basu.
 The Hon'ble Mr. M. Mazharul Haque.
 The Hon'ble Nawab Saiyid Muhammad Sahib Bahadur.
 The Hon'ble M. R. Ry. Nyapathy Subba Rao.
 The Hon'ble Raja Vairicherla Vairabhadra Razu Bahadur of Kurupam.
 The Hon'ble Ahmad Muhi-ud-din.
 The Hon'ble Mr. G. K. Gokhale.
 The Hon'ble Sir Vithaldas Damodar Thackersey.
 The Hon'ble Rao Bahadur R. N. Mudholkar.
 The Hon'ble Mr. G. M. Chitnavis.

Noes—42.

His Excellency the Commander-in-Chief.

So the motion was negatived.

The Hon'ble MR. MILLER moved that the Bill, as amended, be passed. He said :—"I should merely like to say, my Lord, in making this motion that if there had been a very strong expression of feeling in favour of some modification, though we could not accept the principle of the changes proposed by the Hon'ble Member, we should be quite ready to consider it again. But this Bill has been before the public for a considerable time; there has been no change suggested in this particular respect and no objection taken to the proposal as drafted, and it was only yesterday or the day before that the Hon'ble Member proposed the amendments. I will now formally move that the Bill as amended be passed."

The Hon'ble MR. SUBBA RAO :—"My Lord, I received the papers on Sunday, and I gave my notice on Tuesday. There was no delay on my part."

The motion was put and agreed to.

INDENTURED LABOUR FOR NATAL.

The Hon'ble MR. GOKHALE said :—"My Lord, I beg to move that the Council should adopt the following resolution :—"That this Council recommends that the Governor General in Council should be empowered to prohibit the recruitment of indentured labour in British India for the colony of Natal." My Lord, I must at the outset express my deep sense of the manner in which the Government has afforded facilities for today's debate. It is a matter of some significance that the first exercise of the new privilege of moving resolutions in this Council should be in respect of a question which has not only roused intense feeling among all classes of His Majesty's subjects in India, but in regard to which the Government of India itself is understood to be of one mind with the people. That being so, I think it is not too much to hope that my motion will be accepted by the Council and that the Government will thus place itself at the head of what is undoubtedly the universal sentiment in the matter throughout the country. My Lord, my object in raising this debate today is twofold :—First, to call the attention of the Council to the position of British Indians in South Africa, and secondly, to strengthen the hands of the Government of India in applying a remedy to the situation to the extent to which a remedy can be applied. I think the first thing to realise in this matter is the fact that the whole of the Indian problem in South Africa has arisen out of the supply of indentured labour to Natal. The Indian population in South Africa may be divided into three classes :—(1) Those who are under indenture. This class is of course confined to Natal. (2) The ex-indentured and their descendants, by the ex-indentured being meant those who have completed their term of indenture but have not returned to India nor have got themselves re-indentured but who are struggling amidst great difficulties to earn their livelihood as free Indians. This class has of course grown out of the first. And (3) traders and other Indians who have gone to South Africa at their own expense. These persons have gone there in the wake of the indentured Indians and primarily to supply their needs. It will thus be seen that but for the introduction of indentured Indians into Natal, there would have been no Indian problem in that Sub-Continent today. Now, my Lord, my own view of this system of indentured labour is that it should be abolished altogether. It is true that it is not actual slavery, but I fear in practice in a large number of cases it cannot be far removed from it. To take from this country helpless men and women to a distant land, to assign them there to employers in whose choice they have no voice and of whose language, customs, social usages and special civilization they are entirely ignorant, and to make them work there under a law which

they do not understand and which treats their simplest and most natural attempts to escape ill-treatment as criminal offences—such a system, by whatever name it may be called, must really border on the servile. I strongly hold therefore that the system should be done away with altogether. This is also the view which the entire Indian community throughout South Africa takes of the matter, as may be seen from several petitions addressed by them from time to time to the authorities on the subject. But it is not merely on its own account that I advocate an abolition of this system; I also advocate it because this continued influx of indentured labour into South Africa and the consequent inevitable annual additions to the ranks of the ex-indentured tends steadily to lower the whole position of the free Indian population. The feeling of contempt with which the indentured Indian is generally regarded comes to extend itself not only to the ex-indentured but even to traders and other Indians of independent means. The struggle of free Indians to maintain themselves becomes more and more acute by these constant additions, and the whole community feels an intolerable and continuously-increasing economic burden placed upon its shoulders. I therefore urge the total abolition of this system of indentured labour. I may however be told that this is an extreme view to take and that though circumstances may arise which may lead the Government of India to prohibit altogether the supply of indentured labour to Natal, for the present it would be a more prudent course to utilise Natal's need for securing an improvement in the treatment meted out to Indians in South Africa generally and in Natal in particular. Now, my Lord, though this is not the highest view to take of the matter, I am prepared to recognise that from a practical standpoint there is a good deal to be said in its favour. The position of Indians in South Africa, which has gone from bad to worse during the last fifteen years, has now grown absolutely intolerable, and in any remedy therefore which the Government can apply to the situation, it is entitled to the strong and hearty support of the people of this country. What, my Lord, is the position of the Indian community today in different parts of South Africa? I trust the Council will bear with me while I present to it a brief survey of that position. The total Indian population in the four colonies or States of South Africa which have recently been federated into the South African Union is about 150,000. Of this number 120,000 are in Natal, about 15,000 are in Cape Colony, about 13,000 are entitled to be in Transvaal—though the actual number there owing to the struggle of the last three years is not more than 6,000 at present—and about 100 only are in Orangia. Let us take Natal first. I take it first both because the bulk of the Indian population in South Africa is within its borders and also because, as I have already pointed out, the Indian problem in South Africa has grown out of the industrial needs of this colony. The supply of indentured labour from India to Natal first began in the year 1860. And with the exception of a brief period of 8 years from 1866 to 1874, it has continued to the present day. From the figures kindly supplied to me by the Hon'ble Mr. Maxwell I find that the total number of Indians actually under indenture today in Natal is about 40,000. In addition to this there are about 65,000 ex-indentured Indians and their descendants, while the trading Indian community stands at about 15,000. The period of indenture is for 5 years, after which a person may return to India, in which case he gets a free passage to this country, or he may get himself re-indentured, or again he may remain as a free individual in the colony on the payment of an annual license of £3 for every male above 16 years of age and every female above 13. Now so far as the persons actually under indenture are concerned, the principal grievance is naturally ill-treatment by employers. Very grave allegations on this subject have been made, and I must say that I have not seen them satisfactorily answered. On some estates the Indians are no doubt well treated—at any rate as well treated as they can be in the circumstances,—but the very relations between the employers and the employés are such that they easily lend themselves to serious abuse, and flagrant cases come to the notice of the public from time to time. The Protector of immigrants being an officer of the Natal Government, he affords but little real protection to the poor Indian labourers.

He is ignorant of their language and their ways of life and is generally imbued with the prejudices of the colony, and it is not his fault if he is unable to enter into their feelings or understand their grievances. A startling fact which has been mentioned and has not been contradicted is that the rate of suicide among the indentured is double of what it is among the ex-indentured and from ten to twelve times what it is among those classes in India from whom the indentured are drawn. My Lord, all these allegations require a searching and careful inquiry, and I think the Government of India should urge on the Government of Natal a joint inquiry by representatives of the two Governments in the matter. I also think that the Protector of indentured Indians in Natal should be an officer of the Government of India, periodically sent out from this country, and not an officer of the Natal Government. So much for those who are actually under indenture. Let us now turn to the case of the ex-indentured. Their number in the colony is, as I have already mentioned, about 65,000. The policy of the colony towards them has undergone a gradual and now a complete change. In the earlier years, after the system of indentured labour came into existence, the one anxiety of the Natal Government was how to keep in the colony those whose term of indenture had expired. Various inducements were offered, and one of the conditions then insisted on was that no indentured Indian should leave the colony before the expiry of ten years from the date of his arrival. There is no doubt that these ex-indentured Indians have deserved well of the colony. It is to their labour that the present prosperity of Natal is largely due. So recently as July 1908, Sir Leige Hulett, ex-Prime Minister of Natal, bore the following testimony on this point.—

‘The condition of the colony before the importation of Indian labour was one of gloom; it was one that then and there threatened to extinguish the vitality of the country, and it was only by the Government assisting the importation of labour that the country began at once to revive. The coast had been turned into one of the most prosperous parts of South Africa. They could not find in the whole of the Cape and the Transvaal what could be found on the coast of Natal—10,000 acres of land in one plot and in one crop—and that was entirely due to the importation of Indians.....Durban was absolutely built up on the Indian population.’

“Two other testimonies may be quoted. Mr. J. R. Saunders, a member of the Natal Commission on Indian immigration of 1884, in the course of his report says:—

‘If we look back to 1859, we shall find that the assured promise of Indian labour resulted in an immediate rise of revenue, which increased four-fold within a few years—mechanics, who could not get away and were earning five shillings a day and less, found their wages more than doubled, and progress gave encouragement to everyone, from the Berg to the sea. The colony was in dire straits in those days. The revenue was only about £4 per head of the white population, whereas now it is nearer £40If we mean to take up the matter in real earnest, we must be prepared to do away with indentured labour altogether;but, whatever we do, we must act justly, and remember that a certain number of Indians have been born and brought up in the colony, and that it is the only country they know and the only home they have.’

“Mr. Neame, author of the ‘Asiatic danger in the colonies’, says:—

‘Indian coolies work the sugar and tea estates of the coast; Indians develop the coal-mines; Indians perform an increasing share of the work on the farms, for the farmers, who at first viewed them with distrust, are now as anxious to retain them as the planters. Since the advent of coolie labour, the white population has more than doubled, the value of land has increased, the cost of living has gone down. It is the Indian coolie who gives Natal the cheap fruit and vegetables which are the envy of the Transvaal, who has brought under high cultivation large tracts which, but for his presence, would today be barren. The Umbilo Valley, near Durban (recently swept by the flood), and some of the land near Maritzburg, bear testimony to his industry.’

“And yet these Indians who have done so much for the colony have for years past been making bitter complaints of the unjust and oppressive manner in which they are being treated. The early policy of inducing ex-indentured Indians to remain in the colony was gradually given up, and during the last fifteen or twenty years one of the principal concerns of the colonists in Natal has been how to get rid of the free Indian element there. A number of expedients have been tried to make their lot intolerable, of which the most

serious, so far as the ex-indentured community is concerned, is the imposition by an Act of 1896 of an annual license of £3 for every male above the age of 16 and every female above the age of 13. My Lord, it is difficult to speak in terms of due restraint of this outrageous impost. It is a matter of some satisfaction that a Bill has now been introduced in the Natal Legislature to do away with this license so far as women are concerned. But the latest papers from Natal show that the measure has already been whittled down in Committee, and that instead of exempting all women it is now proposed to vest a discretion in the Magistrate to grant exemptions in such cases only as he deems proper. This cruel impost which has to be paid by the ex-indentured Indian in addition to the £1 poll-tax, which everybody has to pay in Natal, has already caused enormous suffering; it has broken up families, it has driven men to crime, and grave as the statement is, it must be made, for I see it repeated in Natal Legislature and practically corroborated by the Commission appointed by the Natal Government last year—it has driven women to a life of shame. My Lord, who are these people who are called upon by the colony to pay this annual license of £3 for the right to remain in the colony? They are probably persons whose experience of indenture has been none too kind, and who are therefore unwilling to indenture themselves again; who at the same time not having been able to lay by anything during the period of indenture and having probably lost caste in India by reason of their going to Africa, dare not return to this country to face a life of poverty added to social disgrace; and who therefore have no choice but to stay in South Africa, for whose sake they have left their country, and to whose service they have given five of their best years. I think the Natal Government ought to be urged to withdraw at once this iniquitous impost. It is not, however, only the presence of the ex-indentured Indians to which the colonists object. They also object to the Indian trading community whose number is about 15,000 today and who have been feeling the weight of harsh and unjust treatment for the last fifteen years. At one time this community possessed both the political and the municipal franchise. The political franchise was, however, withdrawn in 1896, and during the last two years attempts have been made to take away the municipal franchise also. Then during the last five years endless trouble and much suffering and loss have been occasioned by the absolutely arbitrary manner in which the licenses to trade have been withdrawn or refused, the persons ruined not even being permitted to appeal to the Supreme Court. During the last two months a little improvement has taken place in connection with this question, for an Act has been passed, probably under pressure from the Government of India, allowing again appeals to the Supreme Court where renewals of licenses are refused. This however removes only a part of the grievance, because there is still no appeal to the Supreme Court where new licenses are refused or permission to transfer licenses is withheld. Again since last year the educational facilities enjoyed by the free Indian community have been greatly curtailed, there being now no provision for the education of Indian boys above the age of 14 or for Indian girls of any age. In 1908 two Laws were passed by the colony which were subsequently disallowed by the Imperial Government proposing to extinguish altogether the Indian trading community in the colony in ten years. My Lord, the whole policy of Natal today towards the Indian population is an utterly selfish and heartless policy, and the only way in which any relief can be obtained is by the Government of India adopting a stern attitude towards the colony in return.

"I have so far dealt with the position of Indians in Natal. Let us now glance briefly at the state of things in the Transvaal. The agitation of the last three years in that colony has overshadowed the standing grievances of the Indian community there, which date from the time of the Boer Government. These grievances are three. In the first place, Indians cannot acquire any political or municipal franchise in the Transvaal. Secondly, they cannot hold any immovable property there. And thirdly, they are liable to be confined to residence in locations. In addition to these three grievances, the doors of the Transvaal have since 1907 been absolutely shut in the face of all Indians who were not there before the war, no matter what their status or qualifications may be. Alone among British Colonies, the Transvaal has placed statutory disabilities on His

Majesty's Asiatic subjects in the matter of entering that Colony. Alone among British Colonies, the Transvaal has sought to inflict galling and degrading indignities and humiliations on His Majesty's Indian subjects. The protest which the Indian community of the Transvaal has made against these disabilities and indignities during the last three years has now attained historic importance. It is not necessary for me to go on this occasion into its details, because the story has now been told from a hundred platforms in the country. The struggle has not yet ended—the end is not even in sight. But India has no reason to be ashamed of the part which her children have played in this struggle. The Indians in the Transvaal have suffered much for the sake of conscience and of country, but they have done nothing unworthy. And they have throughout been most reasonable. They have not asked for unrestricted Asiatic immigration into the Transvaal. They have only insisted that there shall be no statutory disabilities imposed upon their race, and that legislation subjecting them to degrading indignities shall be repealed. So far no relief has been forthcoming. But perhaps the darkest hour is already passed and the dawn is not now far.

"Of the Indian position in Orangia, not much need be said. The doors of this Colony are shut against all Asiatics except such as want to enter as domestic servants, and there are about a hundred Indians today there in that capacity. There were Indian traders at one time in Orangia, but they were forcibly turned out of the colony by the old Boer Government about 1893, and since then no others have been allowed to get in.

"Lastly I come to Cape Colony. Here on the whole a liberal policy is pursued towards Indians, and with the exception of East London the Colony treats them fairly well. The total number of Indians in this Colony is about 15,000. They are permitted to acquire both the political and the municipal franchise, and though they have difficulties in the matter of obtaining licenses to trade, and at times considerable suffering and loss has been caused by arbitrary refusals to grant or renew licenses, on the whole the position here is much more satisfactory than in other parts of South Africa. In East London, things are no doubt bad, but it is only a small part of Cape Colony.

"My Lord, I have described to the Council briefly, and, I hope, accurately the present position of the Indian community in different parts of South Africa. I will now turn for a moment to the terms of the resolution which I have laid before the Council. The resolution recommends that the Governor General in Council should acquire statutory powers to prohibit altogether if necessary the supply of indentured labour to the Colony of Natal. Under the law as it stands at present the Government does not possess these powers, and I am sure that is a serious handicap to the Government in any negotiations into which it may have to enter with the Government of Natal on questions connected with the treatment of Indians in that colony. It is of course true that the mere taking of these powers does not mean that they will be necessarily exercised. Still this resolution, if accepted by the Council today, will be an indication to South Africa generally, and to Natal in particular, as to how strong and deep is the feeling which has been roused in this country by their anti-Asiatic policy. The idea to stop the supply of Indian labour to Natal is not a new one. Immediately after the close of the Boer War, Lord George Hamilton, in addressing a deputation headed by Sir Lepel Griffin, made an emphatic declaration that unless Natal treated the Indian community more fairly, the Government of India might be driven to this course. But obviously Natal has never taken such a threat seriously; for had it done so, it would not have endeavoured, as it has steadily done, to make the position of the free Indian community worse than before; also its representatives in its Legislative Assembly would not be talking today with easy assurance of getting the Government of India to agree to the proposal that the indenture of indentured immigrants should terminate in India or on the high seas. My Lord, I sincerely trust that today's proceedings in this Council will open some eyes at least in South Africa. I think the power to stop recruitment of indentured labour for Natal should go a considerable way in securing from the Natal Government fair terms generally for the Indian community resident in that

Colony. Natal needs our labour. It cannot do without it.' A number of its industries depend largely, almost entirely, upon it, and they would be paralysed if this labour was withdrawn. On this point the testimony of the Commission appointed by the Government of Natal to consider the question of Indian immigration is conclusive. The Commission says in its report :—

'Absolutely conclusive evidence has been put before the Commission that several industries owe their existence and present condition entirely to indentured Indian labour, and that, if the importation of such labour were abolished, under present conditions, these industries would decline and in some cases be abandoned entirely. These are:—sugar, tea, and wattle-growing, farming, coal-mining and certain other industries.'

"This is so far as Natal is concerned. The actual effects of the suggested prohibition, if carried out, will however probably go beyond Natal, and extend to the Transvaal. For as the Natal Commission of last year points out, the withdrawal of indentured Indian labour from Natal will necessitate a corresponding withdrawal of the Kaffir labour of Natal from the Transvaal. My Lord, I think the present is an especially opportune moment for the Government of India to acquire the power proposed in this resolution. Not only has public attention in this country and England been drawn to the condition of Indians in South Africa as it was never drawn before, but the control of all Asiatic legislation in South Africa will shortly pass from the several Colonial Legislatures to the Union Parliament which will meet in October. This Parliament will be largely dominated by Cape Colony views, as nearly one-half of its members will be from Cape Colony. Very probably Mr. Merriman will be the first Federal Prime Minister, and he declared himself only the other day in favour of a just and uniform policy towards Indians in South Africa, by which he no doubt meant the Cape policy. It is possible therefore that strong representations made by the Indian and Imperial Governments on behalf of Indians, backed by the power which this resolution suggests, may prove more effective at this juncture than they have hitherto done in securing a redress of several of our grievances. My Lord, I urge this resolution on the acceptance of the Council because I believe it will prove of some use in remedying the evil from which we suffer. But I confess that even if there had been no chance of its proving in any degree effective, I should still have proposed it, because I think it is necessary for us now to mark in a formal and responsible manner our resentment at the treatment meted out to us by the South African Colonies and not to take that treatment entirely lying down. At the same time I recognise that the problem by which we are confronted is one of enormous difficulty and that while threats of reprisals might go some way, our main, indeed our real, reliance must continue to be upon a constant appeal to those immutable principles of justice and humanity which alone can form the enduring foundations of a great empire. My Lord, behind all the grievances of which I have spoken today, three questions of vital importance emerge to view. First, what is the status of us Indians in this Empire? Secondly, what is the extent of the responsibility which lies on the Imperial Government to ensure to us just and humane and gradually even equal treatment in this Empire? And thirdly, how far are the self-governing members of this Empire bound by its cardinal principles? Are they to participate in its privileges only and not to bear their share of its disadvantages? My Lord, it is not for me to frame replies to these questions; it is for Imperial and Colonial statesmen to do that. But I must say this, that they are bound to afford food for grave reflection throughout this country. My Lord, only a fortnight ago this Council passed an important Bill imposing serious restrictions on what is known as the liberty of the Press. I was one of those who gave their support to that measure, and I did this in spite of my strong disapproval of some of its provisions. I supported the Bill because I felt that something deeper and even more fundamental than the liberty of the Press was at stake in several parts of the country and was likely to be at stake sooner or later in other parts, unless preventive action was taken now, namely, the unquestioned continuance of British rule, with which all our hopes of a peaceful evolution are bound up. But, my Lord, what is the good of preventing an expression of ideas incompatible with the continued existence of British rule, if causes are allowed to be at work which forcibly suggest such ideas to men's minds? I think I am stating the plain truth when I say that no single question of our time has evoked more bitter feelings throughout India—feelings in the presence of which the best friends of British rule have had to remain helpless—than the

continued ill-treatment of Indians in South Africa. My Lord, I am sincerely glad that your Lordship's Government has allowed this question to be brought up before the Council. Your Lordship has had a time of extraordinary difficulty in our midst. During this time, while you have been driven from one repressive measure to another, you have also laboured incessantly for the permanent good of the people. I sincerely hope with Your Lordship that the shadow which the measures of repression have cast on our path will be only a passing one. But whether that hope is realised or not, this I know—that the good you have done will remain and it will grow from more to more. And of this good, I earnestly trust, a satisfactory settlement of the Indian question in South Africa will before long form an important part.

“My Lord, I move the resolution which stands in my name.”

The Hon'ble MR. DADABHOY said :—“My Lord, I support this resolution with all the emphasis and earnestness which a sense of deep wrong and a firm faith in the absolute necessity of the suggested course of action can induce. The action is as much to the interest of Government as to that of the people of this country. The treatment of the Indian settlers in South Africa, the Transvaal especially, is really too bad. It is not necessary to go into details. Practically all people who know anything about the subject are agreed about the existence of the evil. Outside this Council I have heard of differences of opinion about the minor details, but that the Indian does not receive the just treatment in the Transvaal to which British citizenship entitles him, and that disabilities and indignities are heaped upon him because he is an Indian, are broad facts which are not disputed. I believe Government, both here and in England, is equally anxious with the people to secure the Indian settlers better treatment. I am afraid, however, the urgency of the subject has not been fully realised by the Government. In dealing with this question it will be well for Government to constantly keep before them Lord Morley's salutary dictum of June 6, 1907 :—

‘The Indian Asiatic is a man with very vivid susceptibilities of all kinds, and with living traditions of a civilisation of his own, and we are bound to treat him with the same kind of respect and kindness and sympathy that we should expect to be treated with ourselves.’

“A self-governing colony, determined to make South Africa the exclusive home of Europeans, may ignore this truth; but it is obligatory upon the Government of this country, responsible as it is for the contentment of 300 millions of His Majesty's subjects, not to halt in the face of a growing evil of this kind, and to do all it can to secure to the expatriated Indian that kind and sympathetic treatment which will bind India to England with the golden chains of affection and gratitude. It is not that the subject has escaped the attention of this Government; it is not that Government has not moved in the matter. We know Government has made representation after representation to the Secretary of State, and has put the case for the Transvaal Indian fairly, strongly before him; but the difficulty seems to arise from the relation in which the Imperial Government stands to the colony. Had this Government adopted a more autonomous policy in the past, the situation would at least have been far less trying and complicated than it is now. I believe there were cogent reasons for the adoption of the cautious policy the Indian Government has so far followed; perhaps it expected greater good to the Indian from the powerful support of the Imperial Government; perhaps it did not anticipate the South African Government would develop such a violent anti-Indian feeling; perhaps too the course of events induced the hope of an early and satisfactory settlement of the whole question. But everything has happened contrary to expectations; time has only added to the difficulties of the situation. Meanwhile, matters have come to a crisis, demanding early attention on the part of this Government to the subject. My Lord, in 1899 Lord Lansdowne feared the moral consequences in India of a conviction of the powerlessness of the British Raj to save the Indian settlers in the Transvaal from oppression and harsh treatment. That was when there was peace all over this country, when sedition, much more anarchism,

was an unheard-of evil. If the situation was disquieting then, what is it now when the urgent problem of the moment is—How to put down and prevent the growth of unrest in the land? The masses do not understand the niceties of the relations between the Mother country and the colonies; they do not comprehend legal technicalities; the British Raj has so far revealed itself to them as a Power whose influence is irresistible. And when they find that with all its traditional omnipotence it has not succeeded so far in securing to their countrymen, admittedly a peaceable and decent body of settlers who rendered valuable services during the War—equal treatment at the hands of a small Dependency, they become disconcerted, and attribute the failure to the European colonist's influence over the Home Government. That is an impression which is fraught with incalculable potentialities of mischief and which British statesmanship should do everything in its power to dispel. The present political situation in India adds special urgency to the case. Besides, the danger to the Indian settlers promises to become acuter and more widespread with the formation of the South African Union. Already the infection has spread to Natal. The report of the Natal Commission recently published on the subject of indentured labour discloses a strong prejudice against the Indian. If the effect of the Transvaal immigration legislation was in 1903, in the words of the late Hon'ble Sir Denzil Ibbetson, then Home Member of this Government, 'the virtual exclusion of Indians from South Africa,' it has become most frankly and violently anti-Indian of late.

"The question arises—How to compass the object we all have in view? To my mind, the duty of Government is clear and the remedy is near at hand. We have had enough of correspondence and friendly pressure in the past; enough of assurances and hopes of responsible statesmen of England and South Africa. All that has failed. Let this Government now depend more upon its own resources, let the Government grapple with the question with its accustomed spirit; let the pressure of interest be brought to bear upon the Colonial Government; let the Government act on the lines suggested in my Hon'ble friend's Resolution. My Lord, the remedy suggested is not new, and eminent statesmen have in the past considered it, and have held out a promise to try it. The present prejudice of the colonist against the Indian being mainly commercial, as explained by the Colonial Secretary, Mr. Chamberlain, in his despatch to Sir Hercules Robinson of September 4, 1895, there must be something to touch the commercial conscience of the colonist to bring him to reason. The East Indian Association, an Association having for its members some of the most illustrious Anglo-Indian administrators as also English statesmen of the first rank, pressed the Government before 1903 to stop the emigration of Indian labour into the colonies until the obnoxious laws had been repealed. Sir Lepel Griffin on June 8, 1903, in the course of his speech at the East Indian Association strongly recommended the policy. Lord George Hamilton, then Secretary of State for India, in reply to the Deputation headed by Sir Charles Dilke, on October 31, 1902, said.—

'I do not like to make use of threats, but, after consultation with the Indian Government, if I find there is a disposition to get this labour and not to treat the people fairly, it will be a matter for serious consideration whether or not we should put some legal obstacles in their way.'

"Speaking in this Council of the supply of indentured labour from India on March 29th, 1905, Lord Curzon observed:—

'It has seemed to us to be our duty—to lose no opportunity of pleading the cause of those whose natural protectors we are, and we make no concession whatever until we obtain a full *quid pro quo* in return.'

"My Lord, all this was said before the colony became a self-governing colony. With the change in the status of the colony matters have become far worse for the Transvaal Indian. My Lord, we cannot look calmly on when the best and the foremost Indian settlers, men distinguished alike by their position, wealth, and patriotism, are sent to jail like common felons and treated there with inconceivable hardship and indignity for presuming to assert their rights as citizens of the British Empire, solemnly and permanently secured to them by the

noble Proclamations of their beloved Sovereigns. There is a strong feeling in the country on the subject, and it will be wise statesmanship to take note of it and to act in such a way as to calm the public resentment. Of the South African Colonies Natal employs a large number of Indians under a system of indenture. So many as five to six thousand labourers emigrate to that colony every year from India. This is a lever in the hands of the Government which can be used to great advantage in any settlement of the Indian question throughout South Africa. The prospective federation of the South African Colonies under the South African Union will shortly place this Government in an advantageous position in its fight for the Transvaal Indian, and for the matter of that for every free Indian settler in South Africa, through this system of indentured labour. If emigration of labour from India is stopped or even restricted, as the Resolution suggests it should be, by the Government, Natal, it is true, will be the principal loser; but what affects that colony will no longer be a matter of unconcern to its sister colonies. And in any solution of the Indian problem, the hope is not extravagant, the moral influence of Natal will be felt throughout South Africa, and its Indian policy will determine the policy of the other colonies. It will be prudent therefore to use this inoffensive means for the protection of the Indian settler. After the publication of the Natal Commission report Government cannot feel any hesitation in adopting this Resolution. Timely precautions are necessary. The arrangement cannot be all to the advantage of Natal as she coolly proposes it should be, and she cannot be allowed to have Indian labour on her own terms while the Indian settler is left hopelessly in the lurch. There are undoubtedly measures calculated to bring direct pressure upon the Transvaal. The Resolution before this Council indicates the line—surely the line of least resistance—on which the Government can act to bring about a wholesome change in the temper of the Colonial Government, without raising large issues of tariff protection. We are modest in our demand, and we beseech the Government to take a mild step and to exercise an undoubted right. I have every hope the Resolution will meet with the approval of this Council."

The Hon'ble MR. CHITNAVIS said — "My Lord, I unhesitatingly support this resolution. The course suggested appears to be the only feasible one left open to this Government after the apparent decision of the Home Government not to interfere in the internal affairs of the colony, however unreasonable its treatment of His Majesty's Indian subjects. The Government of India, as guardians and protectors of Indians in whichever part of the British Empire they may live, cannot adopt the *laissez faire* when Indian settlers, whose very virtues—industry and frugality—appear to have excited the hatred of the colonist, are unjustly treated, and have perforce to try drastic measures. It will therefore be quite proper for Government to restrict emigration to the only South African Colony, Natal, which employs indentured labour. The people realise the difficulties of Government on account of its dependence upon the Imperial Government; they appreciate its sympathy and its past efforts at a satisfactory settlement of the whole question. They do not blame this Government; they only respectfully submit that the exigencies of the situation clearly demand a firmer policy. Your Excellency's illustrious predecessor, Lord Curzon, held decided views on the subject, and resolved not to help the Colony in exploiting India for labourers until South Africa adopted a more reasonable and humane attitude towards the Indian settlers. The Resolution requests Government to go a step further, and instead of simply holding its hand while Natal imports labour from this country, to boldly intercept the supply. The status of the Indian settler in the colonies must once for all be satisfactorily settled for the future good of India. With growth of civilisation and increased prosperity under the beneficent British Administration there may come a time, however distant, when the population will be too large for the country. There will then be need for providing settlements outside India for the surplus population. But if the British Indians are now denied the rights of citizenship in the colonies, they may come to be confined for ever within this country. The present colonial legislation regarding Indians thus carries in it the seed of future legislation, and unless it is moulded on humane lines the doors of the

South African colonies will be shut against the Indian for all future time. It will create vested interests, and practice and usage will give it a rigidity which all future legislators, however broadminded, will find it difficult to soften. Natal should be used as a lever in settling this matter with South Africa on a satisfactory basis.

"Apart, however, from its moral effect upon the colonies in their relations with the Indian settler, such restriction of oversea emigration will, in my humble opinion, be productive of immediate good to India. The bulk of the labourers who emigrate to Natal are agriculturists either by birth or by choice. They can for a long time to come be usefully employed within the country. There is at present great dearth of agricultural labour in many parts of India, aggravated by the heavy plague mortality of recent years, which threatens to become perplexing with time and industrial development, and the most prudent course appears to be to attract intending emigrants to those parts. There are wastes now which by enterprise, helped by a judicious system of inland emigration, can be reclaimed and brought under cultivation. In congested parts too the great need is intensive cultivation, and although its success depends more upon the application of scientific methods than upon deep-ploughing, freer employment of manual labour is necessitated by the numerous demands of a complex system. In either case, therefore, a more copious supply of agricultural labour is desirable, nay necessary. The manufacturing industries also are in a difficulty for scarcity of labour. The restriction of oversea emigration is in the circumstances bound to help the development of the country, both agricultural and industrial. It may well be that the Natal Indians amass a small fortune during the period of indenture, but they will not be worse off here in India with extensive cultivation on an improved method and the development of her manufacturing industry. Wages have of late sensibly risen all over India, and every thing points to a further increase in the near future. In the Central Provinces the prevalence of high wages, due to 'the insufficiency' of the labouring classes 'to meet the demand for labour of all kinds,' has been the subject of comment in Administration Reports year after year."

The Hon'ble MR. JINNAH said :—"My Lord, I beg to support the resolution that has been placed before the Council. The Hon'ble the mover has put the question before the Council so clearly and concisely that there is very little left for any one else to say. But the importance of this question requires that at least some of us should say a few words and express our feelings on this resolution. If I may say at the outset, it is a most painful question—a question which has roused the feelings of all classes in this country to the highest pitch of indignation and horror at the harsh and cruel treatment that is meted out to Indians in South Africa."

His Excellency THE PRESIDENT: "I must call the Hon'ble gentleman to order. I think that is rather too strong a word, 'cruelty.' The Hon'ble Member must remember that he is talking of a friendly part of the Empire, and he must really adapt his language to the circumstances."

The Hon'ble MR. JINNAH :—"Well, my Lord, I should feel inclined to use much stronger language, but I am fully aware of the constitution of this Council, and I do not wish to trespass for one single moment; but I do say this, that the treatment that is meted out to Indians is the harshest which can possibly be imagined, and, as I said before, the feeling in this country is unanimous. It was in 1860, as far back as fifty years, that a cry came from the Colony of Natal for help, so to say from India. They wanted labour from India, and the authorities here as well as the authorities in Natal arranged that labour should go. For thirty years labour continued to be sent there from time to time, and as the Hon'ble the mover has put before the Council, a portion of that labour became the ex-indentured free Indians residing in Natal who naturally took to trade and various other branches. After what was best of the Indians was utilised for the purposes of the Colony, after the colony was developed, after the colony got its constitution and independence, the first measure against the Indians they

Colony of Natal put on the Statute-book in 1891 was what was known as the Indenture Law; and that Statute was followed by various other statutes, in all numbering four, the last of them was passed in 1905, all intended to govern the indentured labour, and what are known as the Indenture Laws. Some of the provisions of that Law are opposed to every principle of justice. Some of the principles are of the hardest character that we can imagine. After that series of Statutes, having dealt actually with the indentured labour, Natal was not content with that, but they wanted to deal with free Indians, namely, the ex-indentured labourer who became free and those who followed in the tracks of the ex-indentured labourer, and the series of Acts, which I am going to mention in the shortest possible way, are directed absolutely with the idea of wiping out the Indian population from Natal. The whole object of the series of Acts of legislation is to extirpate the Indian community from Natal. The first Act is the Act of 1895, which is known as the Immigration Restriction Law. That was directed at the fresh entrants, so as to stop fresh migration into the colony. The first thing that Natal wanted to do was to see that no fresh Indians got into Natal easily, and, having passed that Act, laid down the severest possible educational test for Asiatics, whereas the test for the other races is a nominal one. Having dealt, my Lord, with the fresh immigrants who might come in, the next Statute which they passed in 1897 was what was known as the Dealers' License Act, which was passed in 1897 and the object of which was to try and get rid of the Indian dealers in course of time from Natal. This Statute shortly lays down this: That a licensing officer has the absolute discretion to issue, renew or transfer a license or not, but in two cases he is absolutely obliged to refuse a license, and that was in the case of sanitation on sanitary grounds, and, second, in a case where the dealer failed to keep his books of account in accordance with the provisions of what was then in force as the Insolvency Act. In those two cases he was obliged to refuse a license, but in all other cases it was his discretion to refuse a license or to grant it. This Act was worked times out of number, if I may say so, unjustly against the Indian dealers, and there are innumerable instances which have appeared in the public Press and in the Courts. Not content with that, the Natal Government in 1908 actually passed a Bill which I am happy to say has not received the sanction of the Imperial Government as yet because the Imperial Government thought that that measure was absolutely unjust; and the object of that Bill, which is also directed towards the dealers, is (1) that no new licenses should be issued to any Asiatic after the 31st December 1908, and no renewals to be made after 31st December 1918 with nominal compensation, *i. e.*, within 10 years all the Asiatic dealers in the colony were to be wiped out. In the course of 10 years, the scheme is, that there should not remain a single Indian dealer in Natal. Now the next branch of legislation that came in Natal was in 1896. That piece of legislation is known as the Bill to disfranchise all Asiatics; that is the general term in which that Bill is known. That Bill deprived Indians of political franchise except some of them who already happened to have political franchise. The next measure which the Hon'ble the mover has referred to, and which I am again happy to say has not received the sanction of the Imperial Government, was what is known as the Municipal Consolidation Bill. The idea of that Bill was to deprive the Indian population of municipal franchise. Then the last Act, and the only Act, my Lord, which I wish to refer to in regard to Natal, was the Income and Land Assessment Act of 1908. I only want to quote one provision from this Act which shows how unjust that Act is. This is one of the provisions—

'Land owned by a European shall not be deemed to be beneficially occupied if the same is occupied solely by natives (Kaffirs) or Indians, unless such land is not suitable for European cultivation.'

"Therefore, my Lord, land owned by a European and if occupied by an Indian, is not supposed to be beneficially occupied unless it was unfit for cultivation for a European.

"Now the net result of a series of these Acts is obvious: that the Colony of Natal is determined to wipe out the Indian population from Natal. In this connection, there is the question of Transvaal which comes in indirectly—

so far as the terms of the resolution go, but it is most serious of all the colonies. I see that Transvaal has gone further than Natal or any other and has laid down two Statutes which are known as the Asiatic Law Amendment Act and the Immigrants Restriction Act, both of them of 1907. Under that, no Indian, whatever be his position, can enter the Colony of Transvaal, much less can he live there. Now this being the position taken up by these colonies of South Africa, the question that arises is what is left for us to do. We have passed resolutions after resolutions, public meetings have been held all over the country, and opinion, as I said before, is absolutely unanimous on this subject. I have no doubt that the Ministers and the Government of India are earnestly endeavouring to get some solution of this question; but I am bound to say this, my Lord, that up to the present moment, although this struggle is raging in Transvaal and Natal, although it has been going on for the last three years now, we have got no definite reply of any kind however, except—and I believe I am correct—that substantially the answer of Ministers and the answer of the Government of India is that the matter is receiving their best consideration. In ordinary times, in ordinary circumstances, a phraseology of that character is entitled to great weight and is bound to command the patience of the people, but, my Lord, this is the answer that has been repeatedly given for the last three years, and today we are not a wee bit better than we were at the commencement of 1907 when the struggle reached its very height. This being the position, we are driven to bring this resolution before this Council; and although the Hon'ble mover has not stated in so many words,—I have no hesitation in stating it frankly here,—that the first and the primary object of this resolution is retaliation, and the secondary or subsidiary object which is no doubt in the interests of the labour itself and in the interests of our country that this indentured labour ought to be put a stop to. Now the Hon'ble the mover has given your Lordship a very heartrending account of the condition of indentured labour, and I do not wish to dilate upon them. The total number that has been sent to Natal by way of indentured labour I believe in the last four or five years does not exceed 5,000 or 6,000 men altogether, men and women, and I believe on an average every year there are about 2,000 or 3,000 and not more sent to Natal. Now if the labour sent to the colony is not treated properly, if their condition is well nigh that of a slave in practice though in theory they are free men, we should prevent recruitment of the Indian labour for Natal in their own interests. To begin with, it may be asked, what does it matter whether a few thousand Indians are sent out of our country or not, what difference does it make to the country, when there are 300 millions of people here, and room enough for them here, if a few thousands go out. But on the contrary we feel and we know that the growing activities in our own country, with irrigation works, railways, mills and buildings, etc., there is plenty of scope for labour in this country. Sometimes of the year the demand is more than supply. Therefore I venture to say that this resolution ought to be acted upon by the Government without delay. There is only one point of special feature which I should point out, and which the Muhammadans particularly feel, and that is the special sting that is involved in the legislation in the Transvaal against the entry there by Muhammadans. They are excluded not by virtue of colour or of race, not by virtue of a domicile in any particular country, but they are excluded because they happen to be Muhammadans. It is a religious bar. For instance, an Armenian Christian subject of the Turkish Empire can enter Transvaal, but a Muhammadan cannot, because he is excluded from entering Transvaal by virtue of his religion. I feel sure that this resolution will be accepted by this Council; and with these remarks I support this resolution."

The Hon'ble SARDAR PARTAB SINGH said:—"My Lord, the subject-matter of the resolution which has been put forward by the Hon'ble Mr. Gokhale has been so well described by the Hon'ble the mover of the resolution, that I personally consider it unnecessary to say anything more about it. With your permission, I will only make one remark, and that is I hope and I am sure the Government of India will take the present opportunity of showing that on this question it is at one with those who really desire to see the lot of the Transvaal

Indian bettered. By doing so, by using their powerful influence with the British Cabinet, they will not only achieve success as regards the particular object in view, but they will remove the Transvaal question from the sphere of Indian to that of Imperial politics, and will thereby effect, I am sure, an important reduction in the stock-in-trade of the disloyal secessionist. If the Government of India and the people of India speak with one voice on this question, there will be no justification for the continuance of any agitation adopted against the British Government. For this reason, my Lord, I beg to support Mr. Gokhale's resolution."

The Hon'ble MR. SUBBA RAO said:—"My Lord, coming from a part of the country from which emigrants go to Natal, I rise to give my cordial support to the resolution moved by the Hon'ble Mr. Gokhale. It is gratifying that on this question the Government and the people are of one mind. We are glad that the Government of India has been taking active steps to protect the interests of British Indians in South Africa, and our thanks are due to your Lordship for the stand which your Excellency's Government has made to enforce the rights of its subjects against the unjust and arbitrary proceedings of the colonists in that country." But I cannot disguise from your Lordship that there is a feeling among the people at large that the Government has not been fortunate in being able to effectually enforce its protests and save Indians from the insults that are heaped upon them and the monstrous treatment to which they are being subjected there.

My Lord, matters have now reached a crisis when it is no longer possible to allow things to drift on, as they have been doing, from bad to worse, leaving the small colony of Indians, numbering about a lakh and a half, including indentured labourers, against eleven times that number of European colonists, to fight for their very existence in the colonies against the combined strength of colour-prejudice, race-hatred, and trade jealousy. There is a growing determination today on the part of the colonists in Natal and other colonies to keep South Africa as the preserve of the white man and wipe out the British Indian from that country by various insidious methods under the guise of civilised legislation. The most startling and outrageous of all the methods pursued by Natal is to order boys to leave school at the age of fourteen, when one would expect that their actual education would just begin, a restriction which has of course no application to European children. The Hon'ble Mr. Gokhale has with his usual eloquence graphically described the position of the British Indian in South Africa. To state briefly, the British Indian is treated there as a helot, as a member of an inferior race whose very touch is pollution, and whose breath is poison. His very virtues, his sobriety, industry and thriftiness, which are testified to on all hands and more recently by the Natal Indian Immigration Commission appointed in November 1908, are counted as his drawbacks, and he is considered as an economic danger, though by his labour at least the colony of Natal has prospered, and several industries 'owe their existence and present condition entirely' to him, as admitted by the Commission. It is therefore time to devise means to put an end to the present deplorable state of things

"As a first step in this direction I submit, my Lord, that it is necessary to stop indentured labour into Natal, as those who once go out to the colony find to their bitter disappointment that what was made to appear to them as an El Dorado has turned out to be nothing but a mirage. It is found that at the end of the period of indenture the savings of their labours are so small as either to compel them to return to India with practically nothing in their pockets or to re-indenture themselves, as the majority of them are doing, under the same undesirable conditions. A tax has been imposed on freedom, an annual license-tax of £3 per head, and it has become practically impossible for them to earn their living as independent cultivators paying four times the tax to Government which a European cultivator has to pay for the same land. Further, the system of indentured labour is highly questionable and has been condemned by no less an authority than the late Sir W. W. Hunter as being perilously akin to one of

'temporary slavery'; but as the system prevails in Natal it is much worse, for the labourer is not sufficiently protected against the cruelty and ill-treatment of an unscrupulous employer. It is, therefore, as a matter of principle and humanity and not on the ground of retaliation, I urge, my Lord, that the system of indentured labour should be put an end to, at least to prevent any more of our fellow-countrymen from going to South Africa, there to be subjected to indignities which the colonists insist on imposing on them.

"But if Natal wants indentured labour for the growth of her industries, and the Immigration Commission reports that the colony cannot get on without such labour, then I submit, my Lord, that it should be supplied only on conditions which would ensure elementary rights of citizenship to British Indians that go to South Africa. Further, if the present system should continue, I beg to associate myself with the Hon'ble Mr. Gokhale in suggesting that the officer at Natal whose duty it is to safeguard the interests of the labourers, and who is today a Natal colonist responsible to that Government, should be replaced by an Indian officer appointed by and responsible to the Government of India. At the least, I would suggest that a responsible officer on behalf of the Government of India should be associated with him to look after and protect the interests of British Indian immigrants. We can then hope that the officer appointed by Your Excellency's Government will prove to be a real protector of Indian immigrants and not an abettor of a policy created directly in favour of the employer.

"I would also suggest that the Government should adopt measures to ensure that Protectors of Emigrants in this country should only countersign such representations to emigrants as are known to the Government of India to be true. For instance, the Madras Protector of Emigrants authorises representations to the intending emigrant that on his arrival in Natal he will be given a good house to live in and plenty of garden land to cultivate. Yet a high Natal officer has publicly declared that many of these *good* houses are simply piggeries, whilst the garden land for private cultivation is non-existent, except perhaps in very few cases. Besides, as the Emigration Act is administered, the emigrant is not informed of the penalties which he would be liable for even trivial or technical breaches of the contract, while his remedy against the employer is almost impossible of enforcement under the Natal law.

"I would further suggest, my Lord, that the system under which intending emigrants are examined to test their free choice prior to the registration of their contracts should be placed on a more satisfactory footing than it is at present, and arrangements be made that they should be informed of the social conditions and other circumstances connected with Natal and some sort of check devised to disillusion them of their ideas of the enchanting picture of the colony impressed on their confiding ignorance by recruiting agents.

"My Lord, these suggestions I have ventured to make but touch the fringe of the real question that stands at the back of this resolution, which affects vitally the future of this country and the solidarity of the British Empire. Shall British citizenship be a by-word among the nations of the earth or a reality under which British Indians shall enjoy equal rights with other subjects of His Majesty the King-Emperor? Shall India be the dumping ground for other countries and the Indian alone debarred from enjoying the elementary rights of citizenship in the self-governing colonies of the Empire? For the example of Natal and the Transvaal are contagious. Portuguese and German colonies have begun to take lessons from them and impose restrictions and disabilities on British Indians. The question may no doubt be a difficult one to solve. But it is humiliating to reflect that the Imperial Government has felt powerless before the demands of the responsible Government of the Transvaal and has given sanction to various Acts galling to the British Indians. We were deeply pained to learn that the Imperial Parliament by passing the South African Union Act gave sanction to the disqualification of non-Europeans to a seat on the Union Parliament and thus introduced the race virus in an Act of Parliament, though with many protestations of goodwill towards India. However, it is a matter of congratulation that on this question there is no

difference of opinion between the Government and the people of this country and that the Government are solicitous to secure for the Indians in the colonies the rights enjoyed by other British subjects. Fortunately the better mind of England is also with the Government of India. For, as pointed out by Lord Selborne and other British statesmen before the outbreak of the South African War, the question is :—' Whether the British subject wherever he goes, all over the world, whether he be black or white, whether he comes from Great Britain itself or from Canada or New Zealand, is to have the rights that his Queen has secured to him.' As frankly stated by Lord Curzon recently in the debate in the House of Lords, the value which is attached to the rights of British citizenship is ' the only basis upon which you will expect the loyalty of an Asiatic population to an alien rule to be permanently developed or maintained.' I may take the liberty to state that one of the potent causes of unrest in this land is the inferior status accorded to the British Indian, and any number of Press laws or other repressive measures will not tend to allay the excitement or give contentment to the people unless and until British citizenship is made a reality both at home and abroad. Our thanks are due to your Lordship for making a real and earnest beginning in this direction, and we confidently expect that the way shown by your Lordship will be followed up steadily, consistently and speedily, making the Government broad-based on the people's will and their gratitude, so that the people of this country may realise that the Government is as much theirs as the British and feel proud that they are an integral and effective part of the mighty British Empire."

The Hon'ble MR. MAXWELL said :—" Before public attention was drawn in India to the matter under discussion, His Majesty's Government and the Government of India had been trying to obtain satisfactory guarantees for the protection of the interests of His Majesty's British Indian subjects in Natal, and these efforts have not been altogether unsuccessful. The chief grievance of the Indians in Natal arose in connection with the issue of licenses under Act XVIII of 1897 which relates to wholesale and retail dealers. The question of providing for the right of appeal against refusals to grant or renew licenses to trade has been one of the points in negotiation between us and the Colonial Government for some years past. These licenses are granted by Municipal Boards whose decisions under the Act of 1897 were not subject to review by, or appeal to, the Supreme Court. The Government of India pressed for an amendment of this Act so as to provide for a judicial review of the decisions of these Municipal Boards, and the Colonial Parliament recently passed an Act giving the right of appeal to the Supreme Court against refusals to renew existing licenses. The Government of India could not, however, accept this concession as a satisfactory settlement and have recently obtained the Secretary of State's sanction to undertake legislation to prohibit emigration from India on grounds such as exist in the case of Natal. The Government of India hope to be able shortly to introduce a Bill for this purpose and will be prepared to give effect to it if negotiations with the South African Union do not result in an agreement which the Government of India can accept as a proper settlement.

" The Government of India are prepared therefore to accept the Resolution of the Hon'ble Mr. Gokhale to the effect that they should be empowered to prohibit emigration to Natal. They can assure the Council that the treatment of His Majesty's British Indian subjects in South Africa is receiving their constant and sympathetic attention, and everything that lies in the power of the Government of India is being done to improve their position.

" My Lord, I have nothing further to say at this stage, but later I shall have a few observations to make regarding some of the points that have been raised by Hon'ble Members during the course of this discussion."

The Hon'ble SIR VITHALDAS D. THACKERSEY :—" My Lord, after what has been said by the Hon'ble Mr. Maxwell, I will not detain the Council long, and

will confine my remarks to only one point. My Lord, it has been said that this resolution is to be adopted and that recruitment is to be prohibited on grounds of retaliation; but there are also other considerations why, for the benefit of the labourers themselves and for the benefit of the country generally, the Imperial Government may well take this measure. It has been pointed out here that the total saving of a labourer returned from Natal averages Rs. 130 in five years, or Rs. 26 per year. Now, my Lord, I can speak with some experience so far as the labour conditions in the Bombay Presidency are concerned, and during my tour throughout India as a member of the Factories Commission, I had the opportunity of closely examining the conditions of labour throughout India and Burma. I can say without the slightest hesitation that the condition of the Indian labourer in factories is one which may be considered as absolutely independent. The labourers in India at present—so far as factory labourers are concerned—are masters of the situation. They can dictate their own terms to their employers. Not only that, but after eight or nine months' work in factories they go out to their native districts and take rest or employ themselves on their own land in agricultural operations for three or four months in the year on the savings of their work during the previous eight months. Now is that condition not considered better than the condition of a Natal labourer returning after five years of hard work away from his family and from his relations and friends, with the big sum of Rs. 130 as the saving of five years? I say if it is the fact that the labourers, in addition to other disadvantages, can only save Rs. 130 in five years, I say the condition of labour in India is a hundred times better. There are loud complaints everywhere. The Bombay cotton industry clamours that there is an insufficiency of labour. Here in Bengal we hear from jute manufacturers that they are suffering from insufficient labour. We hear reports from agricultural areas that the immigration of agricultural labourers to the industrial cities is rather too rapid to be consistent with the interests of agricultural operations. Taking all these things into consideration, I think it would not be at all a hardship to the labourers if the Government of India prohibit immigration to Natal."

The Hon'ble MR. MUDHOLKAR said:—"My Lord, I wish to associate myself with the resolution which has been moved by my friend the Hon'ble Mr. Gokhale. The subject with which he deals—the treatment of Indians in South Africa—has deeply stirred my countrymen. There exists in regard to it a singular unanimity of opinion among men of all the races, creeds, castes and sections who inhabit this vast continent. Public opinion in England has been equally scandalized, and men of all parties have joined in condemning the attitude of the South African Governments and people towards Indians and the treatment that is accorded to them. Even the better section of the colonials denounce these things. And well they all might. For it is a one long story of injustice, of colour prejudice, of race-hatred, of insults and indignities heaped upon law-abiding and peaceful subjects of the King-Emperor, and of cruelties practised towards helpless people. The attitude of the ordinary colonial, who now practically wields unchecked power, the sentiments which he entertains towards the Indians, the language which he adopts, and the course of conduct which in but too many cases he follows, are such as not only go counter to the Imperial idea, but are morally indefensible and shock our feelings of humanity. And there is absolutely no cause, no just excuse, for this bitterness towards Indians and the persecutions to which they are subjected. They are disliked and pursued not because they are turbulent, unruly or vicious. They are hated, as Your Lordship's predecessor pointed out, on account of their very virtues. It is because they are sober, thrifty, industrious, more attentive to their business than the white men, with whom they come into competition in their trade and business, that their presence in the colonies is considered intolerable. It is not possible within the time available here to give anything approaching an adequate recital of the numerous woes they suffer. A mere indication of some of the grievous ones can alone be attempted.

"It is in the two colonies of Natal and Transvaal that Indians have most to bear these insufferable wrongs. The Transvaalers with their characteristic exclu-

siveness have for well nigh thirty years been working to prevent the entry of Indians within their territory and to turn out those who were already there by imposing restrictions against them, by making their life miserable, and subjecting them to various pains and penalties. Till recently they were however unable to fully enforce their unjust laws, because the British Government stood by its subjects. One of the reasons for which the British Government went to war with the Boer republics was their ill-treatment of Indians. But this object of the War has been lost sight of. What those republics could not do is now being done by a Government which in law is subordinate to the Imperial Government. Indians in the Transvaal cannot hold landed property, they cannot trade without licenses, and that too in fixed localities; howsoever refined or cultured they might be, they are not permitted to reside anywhere except in locations which are kept in conditions not far removed from pigsties. They are not allowed to walk by the footpath or travel in the tram-cars, except on the outside. They cannot travel over railways without restrictions. No Indian is permitted to enter the Transvaal, unless he is registered and his finger-prints and photo taken as if he were a criminal. Even those who had lived in the colony for years before the War and had been already registered both before and after the War, were required to get themselves re-registered with these degrading ceremonies. And this in spite of the solemn assurance of the Queen's representative. No self-respecting man can stand such treatment. And naturally they refused compliance with an unjust edict. Then followed those sickening episodes of forcible deportations, of refusal to allow people to land, of imprisonments and ill-treatment in jails.

"My Lord, it is beyond question what the Transvaalers want. Persons holding high positions in that colony have publicly avowed their policy of getting rid of the 'Indian cancer' by making the Indians' life unbearable. Putting aside the course of conduct followed towards the passive resisters, the Government of India and the Government of His Majesty cannot and ought not to permit the bar sinister to be placed against so many millions of His Majesty's subjects. It is impossible for us Indians to quietly submit to this. Previous Viceroys, Secretaries of State for India, Colonial Secretaries, Prime Ministers, have all protested against it, but to no purpose. The condition of the Indians in the Transvaal is worse today than what it was in Paul Kruger's time. The number of Indians has dwindled down from 15,000 to 6,000.

"In Natal the state of things is almost equally deplorable in regard to the free population and greatly worse in regard to indentured labourers. Of the one and a half lakhs of Indians who are estimated to be residing in South Africa, about 4ths are in Natal. Of these about 32,000 are serving on indenture, 71,000 are ex-indentured or the descendants of ex-indentured Indians, and some 15,000 are traders. It was to save the colony from the bankruptcy and ruin with which it was threatened, and at the solicitations of the colony, that the Indian Government allowed labour under indenture for Natal to be recruited in India. The system has been in vogue since fifty years, and Indian labour has been mainly instrumental in converting what was once a wilderness into a garden. But gratitude, or, for the matter of that, ordinary feelings of humanity are not mental possessions greatly prized in South Africa, and the appalling roll of suicides and annals of the local Courts testify to the inhuman treatment which in but too many cases these unfortunate men suffer. There are masters and managers who treat their labourers kindly and humanely. But the cases which have come before the Courts and authorities show that a very large portion of the employers of labour regard the coolies, as they are called, as less deserving of consideration than cattle. The condition of the indentured labourer is not far removed from slavery. Most of the employers work them and treat them as slaves. Compelled to work from 4 A.M. to 7 P.M. or even 9 P.M., abused and assaulted, for every slight mistake by overseers and masters, many coolies when brought before the Courts have preferred imprisonment to living under their masters. Persons prosecuted for attempts to commit suicide have declared in Court that they tried to do away with themselves because they could no longer stand the cruelties they had to

undergo. They cannot walk about without written permits. If they do so, anybody can arrest them. Men brutally assaulted who went and complained to the Magistrates and established the truth of the complaint have been sentenced to hard labour for six months, because they left the master's premises without a written permit, while the master for his assault escaped with a light fine. It cannot be said that the cruelties are accidental and due to individual perversity. The whole system is vicious and utterly indefensible. The laws and rules are unjust and one-sided and are against the labourers. The supposed safeguards are worse than illusory. The so-called Protector is hardly ever a real protector and has indeed at times shown himself to be a persecutor.

" Apart from the badness of the law and the temptations to cruelty which it affords, the very system of indentured labour must be condemned as wrong in principle. It is degrading and debasing to the labourers, and it has a demoralising effect on the employers. The Government of India will, I fervently hope, come to the rescue of these poor people. Lord George Hamilton, while Secretary of State for India, said on a memorable occasion: ' Now, there is certain interest in South Africa, which, we are told, requires imported labour, and I believe that a very large proportion of the Native Indians in Natal are engaged in the developing of the sugar industries and kindred pursuits. I do not like to make use of threats. But after consultation with the Indian Government, if I find there is a disposition to get these labourers and not to treat people fairly, it would be a matter for serious consideration, whether or not we would put some legal obstruction in their way. * * * I should not hold the position I do and continue to tolerate the treatment, which seems now to be wholly undeserved and unnecessary.'

" It is not only the indentured labourers who suffer grievous wrongs at the hands of the Natal colonists. There is not indeed in Natal that total avowed exclusion of the Asiatics which is the great feature of Transvaal law. But the spirit of exclusiveness and unfairness is there, though things are done in a more refined manner. In addition to a heavy poll-tax of one pound per head, there is a license-tax of three pounds per annum per head, which an ex-indentured labourer wishing to stay in the colony as a free worker has to pay for himself, his wife and children.

" And as to traders and others there is the same story as in the Transvaal of deprivation of old rights, of persecution by trade rivals, of degrading restrictions, of heavy imposts, of interference with the right of residence, the right to carry on trade, of arbitrary exercise of the licensing power, and in some places there are the same restrictions about walking on foot-paths and travelling in tram-cars.

" My Lord, there is absolutely no justification for the cry which is raised that the Asiatics will flood South Africa. For the Indians there and in this country have accepted the view, that the claim of Asiatics to unrestricted immigration is beyond the pale of practical politics and is not to be pressed as things stand. All that they ask in the Transvaal is for the old Indian residents to be allowed to live peaceably, as in Cape Colony for instance, without being treated like habitual criminals, for men of education and position to be allowed to come in, so that they might have teachers, ministers of religion and doctors for themselves and their people. In Natal they ask for the maintenance of the rights and privileges they have had for years and years. But both these colonies are actively pursuing a hostile policy calculated to reduce Indians to a state of servitude. They do not want Indians to remain in the country except as indentured labourers, from whom they would take the best of work that is in them and then throw them away like a squeezed orange.

" My Lord, the people of India cannot accept a colour bar. Every English Minister of position, every true Englishman, has denounced it as utterly unworthy of persons who want to be partners in a world-wide empire. Your Lordship's Government will refuse to permit the Indian subjects of His Majesty to be ill-used. The evil example of the Transvaal and Natal is being imitated elsewhere also. On grounds of humanity and as a protest against injustice it is only proper that the help which the Indian Government is giving to Natal to obtain the labour

without which the work of the colony cannot go on should be stopped and the recruitment under indentures should be prohibited. This is the first step to be taken in the efforts which must be made for securing just and equal treatment to the Indians in the South African colonies and elsewhere, and the country confidently expects that the Government of India will take it."

The Hon'ble MAHARAJADHIRAJA BAHADUR OF BURDWAN said :—"I heartily congratulate the Government on having accepted the Resolution which has been put before the Government in such an able manner by my Hon'ble friend Mr. Gokhale. I take this opportunity on behalf of the non-official Indian members here to convey our grateful thanks to Mr. Gokhale for this most opportune Resolution."

The Hon'ble NAWAB SAIYID MUHAMMAD SAHIB BAHADUR said :—"My Lord, evidence is not needed to show that there is a deep feeling throughout the country and in every section of the community as regards the unjust treatment of British Indian subjects in South Africa. That feeling is daily growing in strength and intensity, and your Lordship's Government can no longer rest content with addressing remonstrances to the Home Government in England which are not heeded by the Transvaal Government. I am perfectly aware that your Lordship, the Secretary of State for India and also the Ministry are desirous of seeing justice done to the Indians in the Transvaal, but unfortunately the Government of that Colony has persisted in imposing humiliating disabilities upon the Indian residents without a shadow of any justification or any need whatsoever. After the Transvaal became a British Colony it was reasonable to expect that the administration would be informed by a sense of British justice and British toleration. But it is the reverse that has happened.

"The Asiatic Law Amendment Ordinance assumed without any foundation guilty knowledge on the part of all Indian residents of a wholesale introduction of unlawfully resident Asiatics. The deputation that waited upon Lord Elgin was given an assurance that the Ordinance would not come into operation till it had been considered by the Transvaal Parliament. But the Ordinance was passed as an Act of 1907 and this was followed by the movement of passive resistance. The Immigration Act was passed in December 1907 and immediately afterwards followed a number of arrests of the leaders of the two Asiatic communities. In consequence of the general agitation in England and India and also in South Africa the Immigration Act was suspended on the understanding that voluntary re-registration would be accepted and the Act repealed. In accordance with this assurance the leaders voluntarily registered, but the promise made to them was broken and compulsory registration was revived. The struggle recommenced and is still going on and is likely to go on unless better counsels prevail with the Transvaal Government.

"My Lord, domiciled Indians have been deported, there have been hardships of every kind in gaols, Muhammadan prisoners have not been able to observe the fast of the Ramzan to keep which they have a religious obligation and have been cynically told to go and observe the fast when they would be set at liberty after the month of Ramzan. Indians have been financially ruined, lawful residents have been persecuted, delegates to India have been arrested on the eve of their departure, and the policy of irritation has been pursued with the utmost rigour. Of 15,000 Indians before the war there are barely 6,000 left in the Transvaal. Between January 1908 and June 1909 no less than 2,500 sentences of imprisonment were passed, the age of the prisoners varying from 16 to over 60. What appears to be utterly incomprehensible is that all this has been done on the ground that the Natal Government is free to manage its own affairs. And what of the Empire? Is the Transvaal Government free to ignore the effects of its policy upon the people of India? That is undoubtedly its attitude, but it is perfectly clear that it cannot be shared by either the British Government or the Government of India. My Lord, the prohibition of the emigration of indentured Indian labour to Natal may not directly affect the Transvaal Government, but it will certainly produce a wholesome effect when the Union Parliament will come into existence and will mark the disapprobation of the Government of India of the highly injudicious course taken by the

Transvaal Government. With these few words I support the Resolution which I hope will be unanimously adopted by the Council."

The Hon'ble MR. MAZHARUL HAQUE said :—" My Lord, the resolution moved by my Hon'ble friend Mr. Gokhale deals with one of those questions about which there is absolutely no difference of opinion amongst the Indian people. Hindus and Muhammadans, Parsis and Sikhs, Christians and Buddhists, vie with each other in condemning the treatment our countrymen are receiving in South Africa, and insist upon their grievances being redressed, and speedily redressed. The entire European community, and specially the important European mercantile community, I am glad to say, is also largely in active sympathy with us, and is ready to co-operate. It is true now and then we hear a jarring note from some Anglo-Indian journals, but we need not take notice of them. They suffer from chronic Indo-phobia, and cannot see any justice in our claims. They would not even credit us with ordinary human feelings and emotions.

" My Lord, we have reason to believe that the Government of India also sympathises in our efforts to ameliorate the deplorable condition of our brethren in the South African colonies and would greatly like to help us but for its constitutional limitations. The Imperial Government itself is inclined to take a broad and statesmanlike view of the question but for the obstinate attitude of the colonists, who having received responsible government cannot be interfered with.

" My Lord, the question is a very serious one, and the feeling in the country is very strong. The insulting and humiliating treatment of the Indians affects not only the educated community but the country at large. The labourers who return to India after their period of indenture is over carry the tale of their woes and sufferings with them, and the country from end to end rings with the inhumanities of the colonists. The result is that the whole country is simply saturated with the stories of the maltreatment of the Indians in South Africa, and, my Lord, the tale is certainly grim enough to send a thrill of horror through the heart of every Indian.

" There are three classes of Indians residing in the South African colonies. The first is that of the indentured labourers. They go to work in the tea, coffee and sugar plantations, on the railways, in Government and Municipal service, in the coal mines, agriculture, and in domestic employments. On landing in South Africa they are allotted to different employers of labour and have to serve out their term of contract. The second class is of those men who have completed their period of indenture and have settled in South Africa and made it their home. The third class is that of traders, merchants, lawyers and other professional men, who have migrated in the wake of the above two classes to supply their ordinary wants. The fate of none of those Indians is enviable. The indentured labourer, the moment he lands in the colonies and is handed over to his employer, becomes for all practical purposes a slave of his master. Numerous laws have been enacted to curtail his freedom. New offences have been created specially for him, and he is punished, fined, whipped and sent to jail for most trivial acts—acts which are not and cannot be treated as criminal offences in any civilized country. Redress against his employer for maltreatment he has none. He may be brutally assaulted, but he cannot leave his place even for lodging a complaint without making himself liable to criminal prosecution.

" There are authentic cases on record which prove that for the most inhuman treatment meted out to these wretched creatures there is no redress beyond a paltry fine imposed upon the employers. Take for instance the case of the man who cut off a lobe of his coolie's ear, and when put upon his defence raised the curious and outrageous plea that as the law allowed him to cut off the ear of a sheep, why should he not be allowed to cut off the ear of his coolie, who was no better than a sheep? And what was the redress that the poor coolie got for this outrage? The Magistrate let the criminal off with the option of a fine of £20. Could human depravity go further? Could there

be a greater travesty of justice than that revealed in this case? My Lord, this one instance alone is sufficient to damn the whole system of indentured labour. Then again look at the number of suicides committed by these unhappy men. The rate of suicides for the whole of India is only 37 per million, while that of the indentured Indians in Natal alone is 551. My Lord, why should these poor Indians take their own lives, if not because of the unbearable oppression and cruelties perpetrated upon them? My Lord, the whole system of indentured labour is vicious in principle. It brutalises the employer. It demoralises the employed. It perpetrates the worse form of slavery in the guise of legal contract. It is bad in its inception, inhuman in its working and mischievous in its results, and ought to be done away with without any further delay.

"Then there is the case of those men who have completed the term of their contract and have made up their mind to settle in South Africa. There are no less than 61,000 of such men. By a strange irony of language, they are called free Indians. These men have given the best part of their lives to the development of the country. Many of them were born and bred there and know no country other than South Africa. These are the greatest eyesores, and every attempt is made either to turn them out or to compel them to re-indenture themselves, and thereby to relapse into their former state of slavery. Many devices have been invented to achieve these objects. The most formidable and successful is the imposition of an annual tax of £3 on every male of 16 years and upwards, and every female of 13 years and upwards. Over and above this they have to pay a poll-tax of £1. Most of these poor men are unable to bear this heavy burden of taxation, and to keep their body and soul together are forced to re-indenture themselves. It is not the love of wages, because in all conscience that is small enough, but sheer necessity, that compels them to take this course. They are taxed not for the purposes of revenue but on the express and declared ground of being undesirables. This is colour-hatred and race-prejudice with a vengeance.

"My Lord, European historians are never tired of impressing upon us the infamous nature of the poll-tax—the hated *Jezia*—imposed by the early Muslim conquerors on their non-Muslim subjects. *Jezia* at least had the merit of being optional to the non-Muslim. He had the freedom to choose between the tax and military service, a freedom denied to the Muslim, for he had to render compulsory military service. However, my Lord, that was in the 7th century, more than 1,300 years ago, when the greater part of the world was steeped in ignorance. Is there any justification for this poll-tax in the beginning of the 20th century? Is it right or just to tax a man because he is either black, brown, or yellow, or because he comes from the Asiatic continent? My Lord, Buddha, Christ and Mohammed were Asiatics.

"Lastly, I come to the case of those who are neither indentured or ex-indentured men—I mean traders, merchants, lawyers, doctors, school-masters, priests and men of similar classes. Many of them are ex-soldiers from His Majesty's army. They are men of wealth and education, culture and refinement, but are treated like parias in all the South African colonies, and much more so in the Transvaal. One of the most loudly-proclaimed reasons for the Boer War was the ill-treatment of the Indians by the Dutch Government. The lot of the Indians after the war is still worse. By Law III of 1885 the Boer Government labelled every Indian a coolie—a word now made historic in this Council. Under the British régime, the same insulting definition is maintained. There are no Indians there, but all are coolies, how high their position or attainments may be. The colonial law of the Transvaal knows no distinction, and the richest Maharaja or the wealthiest Nawab, the moment he enters the Transvaal territory, is instantly metamorphosed into a coolie. My Lord, we Indians may aspire to the highest place in the services of the British Government, we may occupy seats on the High Court Bench, we may sit with Your Lordship in this Council chamber, we may hope to secure the portfolio of an Executive Member, we may enter the India Council, we may be sworn in as a Privy Councillor of His Majesty, we may even knock at the portals of that holy of holies, the British Parliament, and

sit with the highest, the ablest, and the noblest of England; but in the Transvaal we must not travel on the railway in the same compartment with a white man, we must not ride a municipal tram-car except in the company of the Kaffirs, we must not walk on the public footpaths, nor use the public baths. We are unfit to live in European quarters, and must be relegated and confined to filthy locations, nor must we stir out of our houses after 9 o'clock in the night. We must register ourselves for the purposes of identification, and impress the print of the 10 digits on our certificates, like ordinary criminals; otherwise we must go to jail. A little band of heroic Indians headed by that noble patriot Gandhi have been time after time incarcerated in jail, suffered unspeakable indignities and hardships, broken stones like felons, done filthy work of the scavenger, for the sake of their conscience and national honour. My Lord, this is how the King-Emperor's Indian subjects are treated in another part of His Majesty's dominions. No wonder that the Indian people resent it and look to Your Lordship's Government for the redress of these wrongs

"My Lord, I cannot conclude my remarks without referring to a point which is nearest my heart, and which I have been specially commissioned by the people and the community whom I represent in this Council to bring to Your Lordship's notice. Apart from the fact that the largest number of traders are Musalmans and therefore these disabling and insulting enactments affect them most in their worldly concerns, the religion of Islam itself has been attacked. Our Hindu, Parsi, Christian and Buddhist brethren are ostracised on the ground of their colour and country only, but we Musalmans have been excluded on the ground of our religion as well. Law III of 1885, confirmed by the Asiatic Law Amendment Ordinance of 1906 and Act II of 1907, enacts that 'the so-called coolies, Arabs, Malays and Muhammadan subjects of the Turkish dominion,' cannot obtain rights of citizenship in the Transvaal. Now if you take away the non-Muslim elements included in the word coolies, the rest are followers of Islam. The Arabs are wholly and the Malays are mostly Musalmans. Turkish Muhammadans have been expressly forbidden. Why should the Musalmans be excluded as Musalmans? This is an insult which no Muhammadan can brook without a protest. To us Musalmans our religion is not a philosophical abstraction nor it is a creed of idealism. It is a religion which enters the stern realities of everyday life. It pervades and models our very existence. If Islam is insulted in one corner of the globe, it sends a thrill of indignation into the heart of all its votaries throughout the world. Have these colonists counted the cost to the Empire by this ill-fated legislation of theirs? Do they not know that our King-Emperor is the first Muhammadan Monarch in the world—for it is to His Majesty that the largest number of the followers of Islam render willing allegiance—not even excepting the Sultan of Turkey himself. And His Majesty has no more loyal and brave subjects in his dominions than these very Muhammadans.

"My Lord, such are the wrongs of the Indians in South Africa. The educated classes in this country know and realize to the fullest extent the difficulties of both the Indian and the Imperial Governments. Indeed they gratefully acknowledge the sincere and earnest attempts made by the Government of India to change the lot of these unhappy men. But the masses do not understand the nice distinctions and subtleties of high politics. They look to the result and not the cause. They see that His Majesty's subjects are ill-treated in one part of the Empire, and they wonder at the failure of England's might to secure justice for their ill-treated brethren. This is an impression which should not be allowed to go forth in the interests of the Empire.

"Is there no way out of the difficulty? We think that there is, and this resolution points out that way. The colonies are dependent for their prosperity and development on the Indian labour. We simply tell them, that unless and until you behave better and treat our people like human beings, with fairness and justice, you shall not have our help in securing that labour which you so much want.

" My Lord, as I have already said, the Indian people are absolutely united on this point. Is it too much to request the European members of this Council, official or non-official, to stretch a helping hand to us to stop this legalised form of slavery, to save our people from indignities and humiliations, and to vindicate our national honour? My Lord, I think not, I hope not."

The Hon'ble BABU BHUPENDRA NATH BASU: " After what has fallen from the Hon'ble Mr. Maxwell, it is needless to add any observations of mine. On behalf of the community which I have the honour to represent in Your Excellency's Council, I associate myself with every word that has fallen from the Hon'ble Mr. Gokhale regarding the grievances of our countrymen in South Africa and the remedies that may be applied. I render to Your Excellency our humble and most loyal thanks for the ready response which Your Excellency's Government has given to the resolution."

The Hon'ble MR SACHCHIDANANDA SINHA said :—" My Lord, after the very able and exhaustive treatment which the subject-matter of this resolution has received at the hands of the mover, the Hon'ble Mr. Gokhale, I do not think I shall be justified in inflicting on the Council a long speech, and yet the question is one of so vital an importance to the well-being of my country that I would fain say a few words in supporting the proposition. The first important point to note in connection with the subject is the almost absolute unanimity that exists on it, amongst all the sections of our rather heterogenous population. But whatever our differences on other questions may be, on this one question, that of the status of Indians in the South African Colonies and the remedial measure proposed by the Hon'ble Mr. Gokhale, there is, I am glad to say, an absolute agreement amongst thoughtful and educated Indians. This in itself is a great advantage. We know that what often passes for public opinion in this country is as often as not but the opinion of a particular community or of a small section of the people. Fortunately this is not the case in connection with the subject under discussion. Here the representatives of all the Indian communities stand on a common platform and are working shoulder to shoulder to have this great grievance redressed. Nor is the vast bulk of the great Anglo-Indian community unsympathetic in the matter, to judge from the writings of many of the leading exponents in the Press, of Anglo-Indian opinion. There might be here and there a dissentient voice, but I believe that the great bulk of His Majesty's European subjects in this country are at one with their Indian fellow-subjects, so far as this question is concerned. Last, but not least, some of the greatest British statesmen—members of both the great political parties—have repeatedly expressed their sympathy with the claims of the Indians in South Africa and suggested the adoption by the Government of some such measure as that urged by the Hon'ble Mr. Gokhale. Such unanimous support, official and non-official, British, Anglo-Indian and Indian, ought to materially strengthen the hands of the Government in grappling with the problem in the way suggested by the mover of the resolution.

" My Lord, speaking recently at Edinburgh on 'The Place of India in the Empire' Lord Curzon said that 'Strong language may well be justified in condemning some of the disabilities to which Indians of education and position have been subjected in the Transvaal and other Colonies.' And he himself speaking in the House of Lords, summarized the Indian grievances in the following terms—Said His Lordship—The Indian 'is invited and even encouraged by our Government to emigrate from India. We send him to a colony which he enriches by his labour, and then society there appears to turn round on him, as if he were a pariah dog. He is penalised there, not for his vices but for his virtues. It is because he is a sober, industrious, frugal and saving man that he is such a formidable economic danger in the situation. And then the Indian remembers that, at any rate, in a large number of cases he has fought for the British Empire in South Africa and that it was largely owing to his efforts that Natal was saved. Natal would not have been saved in the Boer war but for the contingents that were despatched to the scene of war from India.' But though I have one of the highest authorities on Indian questions in justification of the

use of strong language in speaking on this subject, I shall nevertheless refrain from doing so, as I believe the case of the Indians in South Africa is so strong as to render the use of strong language more or less unnecessary and superfluous. The tale of woe narrated by the mover of the resolution should satisfy all reasonable and all open-minded men that the statement of facts contains a most serious indictment that can be brought against any Government with any pretensions to a civilized system of administration. And when we remember that the principal cause of the Boer war was alleged by so responsible a Minister as Lord Lansdowne, and other responsible statesmen, to have been the ill-treatment of the Indians in the Transvaal, it is all the more regrettable to learn that though ten years have elapsed since that time, the condition of the Indians in the British Colonies in South Africa has far from improving, but grown worse. It is worth while quoting the very words of Lord Lansdowne: 'Among the many misdeeds of the South African Republic, I do not know that any fills me with more indignation than its treatment of these Indians. And the harm is not confined to sufferers on the spot; for what do you imagine would be the effect produced in India when these poor people return to their country to report to their friends that the Government of the Empress, so mighty and irresistible in India, is powerless to secure redress at the hands of a small South African State.' I wish those who are opposed to a policy of intervention by the Imperial Government on the ground of the Colonies being self-governing States could realise the feelings of the Indian people, seeing that these Colonies are now not independent but an integral portion of the great British Empire. For it is beyond a shadow of doubt that the substitution of the British for the Dutch Government has, so far from bringing any relief, but served to make the position of the Indians worse in many respects, and that these ten long years have been one long night of suffering and tribulation to our fellow countrymen in South Africa.

"My Lord, it was expected that matters might take a more favourable turn when the Colonies would be federated into one united commonwealth, but that occasion is also come and gone and we are now even farther than before from the destined goal; for strange to say, for the first time in the history of legislation of the Imperial Parliament, the racial bar-sinister has been accepted as a principle in the Act of Union. It is an irony of fate that the great British people who have given us Indians the rudiments of self-government should have sanctioned legislation for South Africa, the one effect of which would be the political degradation of the Indians in that country, by refusing them the possibility today of enjoying the ordinary rights of men, let alone the rights and privileges which we justly assume and claim to be the birthright of every British subject, in all parts of the Empire. I venture to say that unless the grievances are removed before long, the irritation and soreness in this country will deepen to an extent which no well-wisher of the Government can look forward to with equanimity.

"My Lord, the claim of the Indians in South Africa is based upon the noblest traditions associated with the conception of the British Empire. Seventy years ago Lord Palmerston in defending his foreign policy used the memorable words:—'As the Roman in the days of old held himself free from indignity when he could say *civis Romanus sum*, so also a British subject, in whatever land he may be, shall be confident that the watchful eye and the strong arm of England will protect him against injustice and wrong.' This was said with reference to the rights of the British subjects in foreign States and is thus all the more strongly applicable to the case of the British subjects within the dominions of His Majesty the King-Emperor. This doctrine has never been repudiated by any responsible statesman; on the contrary it was confirmed only two years back by Lord Curzon who, in the course of the debate on the South African question in the House of Lords, said that the Indian 'claims the full rights of citizenship of the British Empire.' 'I do not think,' continued his Lordship, 'it is for us to blame him for that, as we have taught it him and inspired him with those ideas,' and he significantly added that it is 'the only basis upon which you will expect the loyalty of an Asiatic population to an alien rule to be permanently developed or maintained.' If I

may say so without impertinence, these are wise words and lay down the only sound and healthy ideal of citizenship on which the great British Empire can exist as a real political unit. Set aside this ideal and the Empire will be reduced to a mere agglomeration of States and the nominal allegiance to the Crown will not be sufficient to stop its disintegration. I am aware that, of late, attempts have been made to whittle away the accepted view of British citizenship by some Ministers not sufficiently strong to put pressure on the colonies, and a leading Anglo-Indian journal—fortunately the only one—has tried more than once recently to furnish us with what it calls ‘a re-statement of what citizenship of the Empire imports and what it does not import’. It has told us that ‘Imperial citizenship confers no right to wander and settle throughout the Empire’, and it has not been afraid to say that ‘the conception of citizenship and what it connotes in the British Empire must be retaught to Indians.’ My Lord, I think I can safely say on behalf of my educated countrymen that we refuse to be taught anew the conception of British citizenship and that we are not prepared to accept any such new ideas as would make us but the footstool of the Empire. But apart from that I may be permitted to say that it seems to me a tactless thing to ask educated Indians to un-learn the lessons they have been taught for over a century and which have been instrumental in securing their willing allegiance to the Crown and to learn afresh lessons of doubtful wisdom the one effect of which would be to make them lose their self-respect. Besides, once the process of unlearning begins, one does not know where it may end and what difficulties it may not land us in. I therefore feel bound to repudiate this new conception of British citizenship and urge the claim of my countrymen to justice and fair play in all the British colonies on the basis of the ideals of citizenship propounded by some of the greatest British statesmen and administrators.

“ My Lord, it is all the more regrettable that the anti-Indian legislation in the South African colonies is based upon considerations of birth and colour. It is often said by those who are supporters of the colonial Government that their anti-Indian attitude is not inspired by racial considerations but purely economic. If that were the case, I think I could understand it. But I have the authority of Lord Curzon that the colonial standpoint is only ‘partly economic and partly sentimental,’ since, says Lord Curzon, ‘they are averse from the permanent introduction into the territories which they have won and are endeavouring to develop as white-men’s lands.’ This is just what we mean by saying that the colonial objection is based on what is called ‘the crime of colour.’ That this should be so in the twentieth century and in countries in which the type of civilization is what we understand by the word ‘christian’ is distressing to those who—albeit in the remote future—look forward to the Parliament of man and the federation of the world. It is distressing to find that in this particular matter not only has modern European civilization made no progress beyond the point attained by the ancient, but that it has actually retrogressed. Comparison is often instituted by students of history between the ideals and principles of the Roman Empire and the British Empire, and generally the verdict on most counts is in favour of the latter. It has, however, to be noted with regret that in the matter of the treatment of the peoples of dependencies, the Roman Empire, whether in Asia or Africa, displayed a much greater liberality than we can claim for the colonies of the British Empire, so far as birth and colour, playing any part in shaping political affairs, are concerned. We have lately had the benefit of studying a masterly exposition of the subject by so distinguished an administrator as the Earl of Cromer—who has had practical experience of both India and Egypt—and this is what he says in his luminous essay on ‘Ancient and Modern Imperialism’.—‘ Mere colour antipathy does not appear to have existed among the Greeks any more than amongst the Romans I have been unable to discover any distinct indication that colour antipathy existed to any marked extent in the ancient world. The dominant Roman and the intellectual Greek thought themselves without doubt very superior alike to the savage Gaul or Briton and to the more civilized Egyptian or Asiatic; but in estimating his sense of superiority, neither appears to have taken much account of whether the skins of the subject or less intellectually advanced races were white, black or brown.’ ‘ My

own conjecture is,' says Lord Cromer, 'that antipathy based on differences of colour is a plant of comparatively recent growth, and I cannot help thinking that antipathy based on colour is a much more prominent feature in the government and social relations of the world than was the case in ancient times.'

"My Lord, all efforts to bring the colonists to take a reasonable view of the affairs having failed, it now remains for us to devise an effective remedial measure, and the remedy suggested in the resolution is the one which seems to me likely to be most effective and one which will produce least discomfort to the parties concerned. As the four African colonies are now united together, they are jointly responsible for all such acts of any of them as affects the Indians, and by bringing pressure to bear upon even one of them we are likely to produce an appreciable indirect and reflex effect on the others, their interests being now intermixed. It has been conclusively shown by the Hon'ble Mr. Gokhale that on the admission of the Commission appointed by the Governor of Natal in 1908, that colony is materially dependent on Indian labour. 'Absolutely conclusive evidence has been put before the Commission,' we read in the report that several industries owe their existence and present condition entirely to indentured Indian labour, and if the importation of such labour were abolished, under the present condition these industries would decline and in some cases be abandoned entirely.' Here then is our chance. And we have to resort to this expedient not in any spirit of retaliation or vindictiveness against those who, however misguided, are nevertheless our fellow-subjects, but solely with the object of protecting the just and legitimate rights of our own people and thereby indirectly upholding the great and glorious traditions associated with the conception of British citizenship, embodied in the expression *civis Britannicus sum*. Nor is it that the step proposed in the resolution is one that is not sanctioned by the highest authority. It is some years since Lord George Hamilton speaking as Secretary of State for India declared, in replying to a deputation, as follows:—'I do not like to make use of threats, but if I find that there is a disposition to get this labour and not treat the people fairly, it will be a matter for serious consideration whether or not we should put some legal obstacles in their way.' 'After all,' said his Lordship, 'India is a very big place and a few thousands taken from here and there does not make any difference.' 'But I should not hold the position which I do,' said Lord George Hamilton, 'and continue to tolerate treatment which seems to be wholly unnecessary.' Similar language was used by Lord Curzon, in the course of his address at Edinburgh. He said:—'The Government of India is entitled to make what stipulations it may please in lending its labour to other parts of the Empire, for this loan is, as a rule, a greater benefit to them than it is a relief to India: and I did not hesitate, when Viceroy, to say that I would contemplate with equanimity the complete cessation of Indian emigration to South Africa, unless I could obtain better terms for those who were there. It is a part of the duty of the Indian Government to put every form of pressure that it legitimately can upon colonial Governments, disposed to exercise their self-governing rights in a selfish or invidious fashion.' We have thus on our side the support of two of the highest officials and, curiously enough, both Conservative statesmen. Resolutions to the same effect have been passed at many representative meetings in South Africa and in all parts of India. Such being, my Lord, the consensus of opinion on the question, I think your Excellency's Government will do well to place itself at the head of this great popular movement, behind which India stands up as one man. Endless remonstrances have been made to the colonial Governments, but to no purpose, and the time for some action has certainly arrived. This is, in the direction suggested in the resolution, all the more necessary at a time when it is contemplated to abolish indentured labour in Assam. To abolish it in Assam, where the system can be supervised by the Government, and to continue it in the case of colonies which by manifestation of racial prejudice have violated the first principles of the unity of the Empire, would be to maintain a practice absolutely indefensible. It seems to me, in my humble opinion, to be the clear duty of the Government no longer to countenance a system under which the colonies obtain the benefit of Indian

labour, while they withhold from Indian emigrants even the elementary rights of citizenship. Besides, the development of our own industries has brought us face to face with the problem of a larger supply of trained labour than is available at present. Expert opinion is agreed that one of the coming problems of the day would be the deficiency of trained Indian labour to meet our own growing industrial requirements, and there is no reason why we should be altruistic enough to benefit our colonial fellow-subjects, at our own expense, by sending them labour which we badly require. On all these grounds I support the resolution before the Council. I sincerely hope the Government will see their way not only to accept but also to give effect to it. By doing so they will not only have served the best interests of the people of this country, whose destinies they wield, but will have drawn them closer to themselves, by standing up for their rights and privileges. I am sure the Government sympathise with this resolution and, by rising to the height of their duty on this occasion, will fulfil the just expectations of India."

The Hon'ble Mr. GHUZZANI said :—" My Lord, I rise to support the resolution now before Your Excellency. It must indeed be a matter of satisfaction to us all that the first occasion on which we have been permitted the privilege of moving a resolution should be one in which the sympathies of Englishmen and Indians converge on the same worthy cause. The struggle that is being carried on in South Africa by our brethren for the honour of their country is a memorable one.

" My Lord, it is not necessary for me to expatiate on the sufferings of our countrymen in South Africa. The facts are already quite familiar to the Government of India and to the educated public, before whom they have been placed again and again. Petition after petition, representation after representation, public meetings after public meetings, have brought the matter before the Government of India, before Parliament and before responsible Ministers of the Crown, till the whole question has been worn threadbare. Your Excellency's Government have gone into the matter deeply and have considered it from every point of view. We know that Your Excellency's Government have made strong representations to His Majesty's Ministers on behalf of India and her people. We are also aware that great British statesmen of all parties with a sense of their sacred Imperial responsibilities have unanimously recognised the wrong that has been done to India. It is such statesmanship that keeps burning the hallowed fire of loyalty in our hearts, the indubitable trust that some solution will be found to this most difficult question. Hitherto, in spite of the unanimity of opinion as to the reality of the grievances and sufferings of our brethren in South Africa, British statesmen either in the United Kingdom or in India have been unable to find a solution to the problem.

" Our countrymen are struggling for the rights of citizenship in the Empire but the Empire is so constituted that the colonists in South Africa claim that they are in the best position to determine what is good for the internal administration of their country, and they have to be left free to do their will. They forget that the treatment of the races of one part of the Empire in another portion is an imperial and not a parochial question; but this at the same time raises the difficulty that there is no imperial Zollverein to decide Imperial matters. The colonies are not likely to leave the decision of such questions to the mother country, in spite of her being the senior partner in the great concern. In this difficult situation the Government of India may assert the same unrestrictedness in deciding matters of our internal policy. By accepting this resolution therefore we hope to strengthen the hands of the Government of India; we hope to assist British statesmanship in its sincere attempts to find a solution to this problem; and we hope to apply the only practical remedy that has so far been proposed.

" My Lord, if any measures had been proposed to get a modification of the Indentured Labour Laws or for the prohibition of emigration on the indenture system on its own merits, I would have heartily supported the ending of a system of virtual slavery, which is quite inconsistent with the

dignity of human labour. If the system be found unworkable in my own province and if it has been decided to end the system there, I submit in all humility, my Lord, that it ought to be scarcely allowed to continue in so distant a country, where we cannot have our own officers to supervise it. I support the resolution with the greater conviction, as I believe that, by refraining from assisting the emigration of indentured labour to Natal, we can put indirect pressure upon the whole of South Africa, for South Africa will soon be a federal Union, and Natal, as an equal member thereof with the other States, will in her own interest exercise no little influence.

"In the memorial to Indian valour in South Africa, which stands on the outskirts of Johannesburg, there are three tablets, on one alone of which is inscribed the word 'Mussulman,' on the other two are the words 'Christian-Zoroastrian' and 'Hindu-Sikh' respectively. It is on account of the large numbers of Mussulmans who poured their life-blood for the Empire on the battlefields of South Africa, it was thought worthy that they should have a separate tablet to themselves. As a Mussulman I cannot but take pride in this fact, but it is painful to think that the brother co-religionists of those who died so bravely are denied now the free exercise of their religion, though we are privileged to live under the most potent monarch of Muhammadan Empires. My Lord, the majority of Indians domiciled in the Transvaal belong to the Muhammadan faith. In addition to the indignities which they have to suffer in common with their brethren of other faiths, restrictions are put upon them which preclude them from having their simplest religious needs satisfied; such of them as are bravely undergoing imprisonment for the honour of their country are refused facilities for practising their religion in prison. By the Immigration Law, III of 1885, article 1, my co-religionists from European Turkey were singled out for inclusion within the provisions of that law, when the least educated of Europe and the lowest classes of Serbia and Bulgaria could freely emigrate into that country. The immigration laws were thus based not only on race-prejudice and colour-prejudice but also on religious prejudice. Though this Act has been recently amended, removing the restrictions upon Muhammadans of European Turkey, all other Muhammadans are still included within its scope.

"With these few remarks, my Lord, I beg leave to support this resolution."

The Hon'ble RAJA OF DIGHAPATIA said:—"My Lord, of all Imperial tragedies, there appears to be none more sad and bitter than the treatment which our fellow-countrymen in South Africa are receiving at the hands of some of the self-governing colonies in the British Empire.

"We had hoped that under the direct Imperial sway of England the condition of the Indians would everywhere improve in South Africa, but we regret we have been disappointed. Our countrymen are treated in most of the South African Colonies as undesirables and aliens, and they are municipally disenfranchised, socially degraded and in fact deprived of all elementary rights of citizenship which we have the privilege of enjoying in this country. I may be permitted to point out to your Lordship that no less than three ex-Viceroy's of India have publicly denounced the treatment of Indians in South Africa as a reactionary step in Imperial Government and as quite out of keeping with the best principles and traditions of the Empire.

"It is really deplorable that no Indian subject of His Majesty,—however high, cultured or influential he may be,—is permitted to enter some of His Majesty's territories in South Africa without going through an education test and taking out a certificate of identity—a certificate which he has to show to every constable or any other petty officer who may be pleased to demand it. If either intentionally or by chance he does not carry with him such a certificate, he is at once arrested and thrown into prison. In the case of Muhammadans, facilities are very often denied to them for their religious observances.

"Coming to the question of indentured labour in Natal, I need hardly point out to your Lordship that various authorities from Secretaries of State downwards are agreed that the life of the Indian labourer in that colony is

extremely hard and badly needs immediate redress. The high rate of suicide alone amongst indentured Indians is a convincing proof of the hardships they have to undergo. As all previous attempts to awaken the Natal Government to its sense of responsibility in the matter had proved fruitless, the only alternative left to us was to appeal to your Excellency's benign Government to take steps for the effectual prohibition of Indian emigration to Natal in the future,—not only as a measure of retaliation but also of protection for the thousands of poor Indian subjects of His Majesty who have been committed to your Lordship's charge.

"In conclusion I beg to thank the Government of India for their prompt and favourable response to so popular a resolution brought on by the Hon'ble Mr. Gokhale."

His Excellency THE PRESIDENT said:—"I consider that the resolution proposed by the Hon'ble Mr. Gokhale has been sufficiently discussed and will now call upon the mover to make any remarks which he desires to offer."

The Hon'ble MR. GOKHALE: "My Lord, I have no further remarks to make."

The Hon'ble MR. MAXWELL:—"My Lord, I now wish to add a few words with reference to such of the points raised by Hon'ble Members in the course of this discussion as seem to call for any observations at this stage. The Hon'ble Mr. Gokhale has enumerated the disabilities imposed on British Indians in Natal, and I have already dealt with the most serious one which relates to licenses. The grievance with respect to education is under consideration, and I am therefore unable to make any statement regarding it at this stage.

"As regards the municipal franchise, I may state that in the Natal Municipal Bill of 1905 it was proposed to disfranchise Indians, but the proposal was not carried into effect, and we are not aware that the subject has come up again.

"Reference has been made to the condition of indentured labourers in Natal, and it has been suggested that the Government of India should have an independent inquiry made on the subject. With regard to this proposal I may say that the Government of India carefully review the reports of the Protector of Immigrants on the condition of indentured labourers in the Colony, but they have found no occasion to take action regarding the ill-treatment of this class of emigrants and no complaints have been made to them by the labourers themselves, on the other hand, no difficulty is experienced in obtaining recruits for Natal. These circumstances do not indicate that the condition of indentured labourers in Natal is unsatisfactory and that a special inquiry by the Government of India is required. The Hon'ble Member's suggestion will, however, receive due consideration.

"The Hon'ble Mr. Jinnah has drawn attention to the terms of the Income Tax and Land Assessment Act as operating harshly on Indians in Natal; but I may point out that this Act will cease to be operative in June 1910.

"Mention has been made of the Natal Immigration Commission's Report. A copy of this Report has been furnished to the Government of India, but they have not yet been asked for their views on its findings. Hon'ble Members may, however, rest assured that the various questions with which it deals will receive the most careful consideration.

"As several Hon'ble Members have alluded to the treatment of Indians in the Transvaal, I may be permitted to state that the situation there is likely to improve considerably before long. The Transvaal Government have expressed their willingness to introduce legislation in order to repeal the Asiatic Law Amendment Act of 1907, which was strongly objected to by Indians, and to allow of the entry of six educated Indians annually as permanent residents. These concessions do not fully meet the wishes of the Indians resident in the

Transvaal, but they mark a distinct step towards the solution of the problem in that country.

"In conclusion, I beg to acknowledge the eloquent and lucid manner in which the Hon'ble Mr. Gokhale has moved his resolution and the moderation of the language used by him and most of the speakers, but I wish to say that in accepting the resolution the Government of India do not endorse all the statements made by the Hon'ble Members who joined in the discussion."

The resolution was put and adopted.

DISCUSSION OF FINANCIAL STATEMENT.

His Excellency THE PRESIDENT said:—"The Council is adjourned until Friday, the 4th March. On that day, after the ordinary business of the Council is concluded, the first stage of the discussion of the Financial Statement will begin.

"The second stage of the discussion will begin on Monday, the 7th March.

"In order to facilitate business and simplify procedure, I have decided to admit questions relating to either stage of the Budget discussion at two clear days' notice, instead of the ten clear days which the rules ordinarily require. This relaxation however is strictly conditional on the question being merely an inquiry as to the meaning of some specific figure in the estimates, and it will remain in force only for the purposes of the discussion on the Financial Statement."

J. M. MACPHERSON,
*Secretary to the Government of India,
Legislative Department.*

CALCUTTA; }
The 8th March 1910. }

SUPPLEMENT TO

The Gazette of India

No. 11}

CALCUTTA, SATURDAY, MARCH 12, 1910.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the Gazette may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 10th March 1910, based on the Indian Daily Weather Reports of the period.

The depression which was approaching northeast India on the 3rd reached Bengal on the following morning, and gave local rainfall in Eastern Bengal and Assam for two days, after which it ceased to affect the weather. The depression was followed by a short period of much cooler weather than usual over northern India, the central parts of the country and the Deccan. A feeble disturbance appeared in the Andaman Sea on the 6th, and caused a few falls of rain in south Burma daily for the rest of the week. Light snowfalls were of frequent occurrence in parts of Kashmir throughout the period.

Burma.—Rain fell over the greater part of Lower Burma, excluding the Arakan coast, and on the 9th it also occurred locally in central Burma. Skies were more or less cloudy, and temperature did not differ much from the normal.

Northeast India, including Orissa.—Rainfall occurred in all parts of Assam and in the Jalpaiguri, Mymensingh, Narayanganj and Jessore districts. While a few thundershowers were reported from Bihar Skies were cloudy at the beginning and end of the week. Maximum temperature was normal, but the minimum was in defect on most days.

The United Provinces, Central India and the Central Provinces.—Pendra reported a light fall of rain on the 10th. Skies were generally clear and weather was cooler than usual during the greater part of the week.

Northwest India—Light precipitation occurred in Kashmir and northeast Baluchistan. Skies were thickly clouded in the area of precipitation on several days and were clear or lightly clouded on the plains. Both day and night temperatures were in moderate to large defect up to the 8th

The Peninsula—A few thundershowers occurred on the Malabar coast. Skies were clear or lightly clouded. Temperature was low on the Konkan coast, in the Bombay Deccan and Hyderabad during the first part of the week, but with this exception it was normal.

The following summarises the chief rainfall amounts as reported at 8 hrs. each day :—

March 4th. Mergui 2·02", Dhubri 0·90", Mymensingh 0·78" and Jessore 1·06".

„ 6th. Dbrugarh 0·57" and Silchar 0·71".

„ 9th. Tavoy 1·85" and Rangoon 1·28".

„ 10th. Rangoon 1·11" and Diamond Island 1·05".

Rainfall for the week was in large excess in Lower Burma and Bihar, and normal in Eastern Bengal and Assam and Bengal proper, but elsewhere it was in large defect. The week's rainfall has not changed appreciably the seasonal departures from normal and there is a deficiency of more than 30 per cent. in Assam, Bihar, the east of the United Provinces, Baluchistan, the east of Central India and the greater part of the Peninsula.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 5th March 1910.

Burma.—Heavy showers fell in Mergui and light showers in Thayetmyo. Threshing and winnowing of winter rice are almost finished. Sowing and transplanting of spring rice are progressing generally and are completed in places. The harvest of early miscellaneous spring crops has commenced. The condition and prospects of standing crops are satisfactory. The price of unhusked rice is unchanged at the principal export town and is slightly above normal in most districts.

Eastern Bengal and Assam.—The weather was seasonable. Light showers which fell throughout the Province benefited the standing crops but more rain is wanted. Ploughing for winter rice and autumn crops is in progress. Sowing of summer rice in the Rajshahi and Assam Valley divisions and of jute in the Rajshahi district has commenced. Potato is being sown in the Khasi hills. Gathering of mustard continues. Harvesting of tobacco has commenced and that of sugarcane is going on. Prospects of spring rice, sugarcane, linseed and flax are good and of wheat and tobacco fair. The average price of common rice is almost stationary. Cattle disease prevails in Backarganj, Malda, Goalpara, Darrang and Nowgong.

Bengal.—Light rain fell in Champaran, Hazaribagh, Cooch Behar and in the Burdwan Presidency and Bhagalpur divisions, excepting Burdwan, Midnapore, Bhulna and Monghyr. Harvesting of oilseeds and pulses is in progress. Pressing of sugarcane still continues. Preparation of lands for the next season's crops is going on. Prospects of spring crops are satisfactory. The price of common rice has risen in Midnapore, Howrah, Murshidabad and Patna, has fallen in Singhbhum and is stationary in the remaining districts. Cattle disease is reported from ten districts. The fodder and water supply is sufficient throughout the Province.

United Provinces.—Light rain fell in two hill districts. Standing crops are excellent. Sowing of sugarcane and extra crops continues. Harvesting is in full swing in many districts. Prospects of poppy are generally good. Extraction of opium is in progress. The condition of agricultural stock continues generally good. Cattle disease is reported in parts of ten districts. Fodder and supplies are ample. Prices show a tendency to fall in the Eastern districts but are generally stationary.

Punjab.—Slight rainfall is reported from the hilly tracts of the Ambala and Rawalpindi districts. Pressing of sugarcane continues in some districts and the outturn is good to average. Standing crops are generally in good condition but rain is wanted for late sown crops in Ambala and Rawalpindi and crops are suffering for want of rain in Mianwali. Sowings of extra spring crops are in progress in several districts. Damage by rats is reported from Rohtak and Ambala. The recent high wind and low temperature have damaged gram in Rohtak and gram and wheat in Ferozepore. *Mahua* has been injured by frost in Sialkot and *taramira* and *sarson* have been damaged by insects in Ferozepore. Prices of food grains are generally unchanged but in places there is a slight downward tendency. The condition of cattle is generally good. Fodder is sufficient in all districts except in Jullundur and parts of Ambala, Shahpur and Mianwali.

North-West Frontier Province.—No rain fell during the week except 6 cents in Hazara and 8 cents in the Marwat tahsil of the Bannu district. The condition of standing crops is generally good throughout the Province except that in the Dera Ismail Khan district the crops are reported to be damaged by high winds. Sugarcane pressing still continues in parts of the Peshawar and Bannu districts. Planting of sugarcane is in progress in the Bannu district. Sowings of extra spring crops are in progress. The water supply and fodder are sufficient except in the Shigga circle of the Marwat tahsil of the Bannu district. There has been no irrigation from the Paharpur canal in the Dera Ismail Khan district. Cattle are generally in good condition except in one village of the Swabi tahsil in the Peshawar district. The public health is generally good. Prices, except those of bajra and barley, are fluctuating. Prices:—Wheat 11½; gram 18½ to 24; maize 18½ to 23½, bajra 17½ to 19 and barley 20½ seers per rupee.

Jammu.—Slight rain fell during the week. Prices are fluctuating. Wheat sells from 11 to 20 and maize from 15 to 32 seers per rupee. The condition of standing crops is fair. Cattle disease of milo type prevails in the Ramban tahsil. Fodder is sufficient.

Kashmir.—No rain fell during the week. Spring crops are in good condition. Ploughing for autumn crops is in progress. There is no disease among cattle. Fodder is average except in flooded villages. Prices are unchanged.

Rajputana.—Spring crops are progressing. Harvesting has commenced in places. Slight damage to crops is reported in places in Mewar, Partabgarh, Jaipur and Bharatpur. Cattle are in good condition. Fodder is sufficient. Prices are rising in Bikaner, Marwar, Jaisalmer, Mewar, Shahpura, Kotah and Jaipur and are steady or falling elsewhere.

Central India.—Rainfall nil. Threshing of autumn and irrigation of spring crops continue. Crops have been damaged slightly in Gwalior, Indore, Bundelkhand and Bhopawar. Agricultural stock are good except for some disease in Bundelkhand and Bhopawar. Prices are fluctuating in Indore and are high and stationary elsewhere. Weeding and watering of poppy continue.

Central Provinces.—The weather has been clear and cool but the days are warm. Harvesting of spring crops continues everywhere. The condition of standing crops is generally good and prospects are decidedly favourable in all districts. Construction of field embankments and ploughing of fields for the next autumn crops are in progress in seven districts. Fodder and water are sufficient. Agricultural stock are in good condition. Prices.—Wheat in Seoni, Betul and Chhindwara fell by 1 to 1½ seers per rupee. *Juar* in Yeotmal and gram in Jabburpore, Chhindwara and Bhandara became cheaper by 1 to 2 seers. The price of rice in Bhandara and of gram in Saugor and Chanda rose by 2 to 3 seers. Elsewhere there were no marked variations in the prices of staple food grains.

Feudatory States.—Cutting of spring crops continues. The condition of standing crops is generally good. Planting of sugarcane is in progress in Raigarh, Sarangarh and Udaipur. The supply of fodder and water is adequate. Prices:—The price of wheat in Kawardha, Khairagarh, Nandgaon, Kanker and Sarangarh became cheaper and that of rice in Khairagarh, Kanker and Sarangarh became dearer by 1 to 2 seers per rupee. Rice became cheaper by 4 seers in Sirguja.

Bombay.—Standing crops have been damaged slightly by insects in parts of Hyderabad; by frost in Larkana and Hyderabad and are generally good elsewhere. Harvesting of spring crops is generally in progress. Threshing continues in parts of Hyderabad, Kaira, Broach, the Konkan, the Deccan and Palanpur. Cotton picking is progressing in parts of Gujarat, West Khandesh, Bijapur, Dharwar, Kathiawar, Baroda, Cutch and Rewa Kantha. Lands are being prepared for next season in parts of Karachi, Hyderabad, the Konkan and the Deccan. The fodder supply is generally adequate. Agricultural stock are sufficient except in parts of the Deccan and generally in good condition. Drinking water is generally sufficient. Irrigation water is adequate except in parts of Nasik and Poona. Grain stocks are sufficient. Prices have fallen in the Panch Mahals and Surat, have risen in Karachi and Dharwar and are stationary elsewhere. The quantity purchasable per rupee is in Sind 20 to 42 per cent; in Gujarat 3 to 23 per cent; in the Konkan 2 to 38 per cent; in the Deccan 11 to 32 per cent and in the Karnatak 26 to 37 per cent less than the normal.

Hyderabad.—No rain fell during the week. The spring harvest is still in progress and the crop is generally fair to good but poor in parts of the Warangal, Nalgonda, Karimnagar and Raichur districts. Late rice sowings still continue in a very few parts. The crop is being irrigated and weeded in many places and is generally fair but the area is limited owing to insufficiency of water in tanks. Water scarcity is reported in parts of Linsugur in the Raichur district, Udgir and Janwada in the Bidar district, Ashti in the Bir district, Jintur and Pallam in the Parbhani district, Biloli in the Nander district and Sultanabad and Mahadeopur in the Karimnagar district. The water supply is decreasing in Paloncha in the Warangal district; Deverkonda and Miryalguda in the Nalgonda district; Nizamabad in the Nizamabad district; Parenda in the Osmanabad district; Alpur, Gangawati, Kushtagi and Manvi in the Raichur district and Karimnagar and Jagtiyal in the Karimnagar district. Cattle disease is reported in five talukas and fodder scarcity in nineteen. Prices.—Wheat 7, coarse rice 7 and *juar* 14½ seers per rupee. White and yellow *juar* are selling in Hyderabad City at 13 and 15 seers per rupee respectively. The highest price in districts is 10 seers in Jagtiyal and Jamikunta in the Karimnagar district and the lowest 22 seers in Rajura in the Bidar district.

Mysore.—Prices of food grains are generally steady. Markets are well supplied. Standing crops are in good condition. Prospects of the season are good. Cattle are generally healthy. Water and fodder are available.

Coorg.—Picking of coffee and threshing of rice are nearly completed. Prices of food grains are stationary. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—There was no rain during the week. Irrigation supplies are sufficient in Ganjam, North Arcot, Malabar and the Nilgiris and insufficient in parts of other districts. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are generally fair but some in parts of Guntur, Cuddapah, the Carnatic, Central and South have withered or are withering or require more rain. Harvests continue with outturn poor to normal and bumper. Pasture is insufficient in parts of the Circars, the Deccan, Nellore, Chingleput, North Arcot, Coimbatore, Tinnevely and South Canara. Fodder is scanty in parts of Guntur and Nellore. The condition of cattle is generally good. The price of rice is stationary in nine districts; has fallen in seven and has risen in seven. The prices of millets have fluctuated as follows.—*Ragi* is stationary in seven districts, has fallen in two and has risen in twelve. *Cholam* is stationary in six districts; has fallen in one and has risen in seven. *Cumbu* is stationary in six districts; has fallen in two and has risen in seven. The public health is generally good. Prospects are generally fair though more rain is required in Salem. The condition of the labouring classes is satisfactory everywhere and employment is readily available. Grain stocks are generally sufficient.

R. W. CARLYLE,

Secretary to the Government of India.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MARCH 12, 1910

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 25th October 1909.

From the 13th November next till further notice, the complete *Gazette of India* will be published at Calcutta. After the 6th November all notifications and other matter intended for publication in the *Gazette* should be addressed to the Publisher, 8, Hastings Street, Calcutta.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901 :—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India.

- No. 452 of 1909.—John Tayler, engineer, partner in firm of Messrs. Burn & Co., Ltd., Howrah, India. *A double lever press.* (Specification filed 1 February 1910)
- No. 475 of 1909.—Archibald Allan Crawford, engineer, 9, Meadows street, Bombay. *A system for the production and supply of electricity at given tensions by means of a variable-speeded axle-driven dynamo, in conjunction with a storage battery, for railway carriages, and other suitable applications.* (Specification filed 24 January 1910)
- No. 567 of 1909.—Ella Rosalie Forbes, widow, Azamgarh, residing at the Sanatorium, Puri, British India. *A safety nut and bolt whereby the nut is prevented from loosening.* (Specification filed 31 January 1910)
- No. 631 of 1909.—Raymond Edward Korts, oil well driller, of Yenang Yaung, Upper Burma. *An improvement in and relating to bits used in mining or boring by means of the American cable tools or any churn motion.* (Specification filed 24 February 1910.)
- No. 31 of 1910.—Reginald Aubrey Fessenden, engineer, of Brant Rock, Massachusetts, United States of America. *Improvements in methods of utilising radiant energy.* (Specification filed 26 February 1910)
- No. 32 of 1910.—Herman Diamant, physician, of 2, Church Court, Clements Lane, London, England. *Process of and apparatus for obtaining on a screen luminous projections visible in full light.* (Specification filed 26 February 1910.)
- No. 33 of 1910.—Samuel John Earl, Engineer of 265, Strand, London, W. C., England. *Improvements in and connected with compounds for treating the surfaces of and making roads, paths, and the like.* (Specification filed 26 February 1910.)
- No. 35 of 1910.—Fred Herbert, consulting engineer and foundry expert, of 853, South Seventh street, Coshocton, county of Coshocton, state of Ohio, United States of America. *Pipe foundry plants.* (Specification filed 24 February 1910.)

No. 1247 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

- No. 331 of 1899.—John James Marsland. *An improved seat and shoot for a latrine or privy to be called "The aryan combined privy seat and shoot."* (From 13 March 1910 to 13 March 1911.)
- No. 216 of 1900.—Arthur Boyd Price and John James Marsland. *Improvements in roofing slabs and tiles and methods of laying same, to be called "The simplex Patent flat roof covering"* (From 27 March 1910 to 27 March 1911.)
- No. 303 of 1900.—William Wilson and Thomas Bennett. *Improvements in or in connection with life saving guards for tramcars and like vehicles.* (From 6 March 1910 to 6 March 1911.)
- No. 417 of 1902.—Georges Baum and Fernand Boyer. *A loom designed for the manufacture of oriental carpets.* (From 21 April 1910 to 21 April 1911.)
- No. 203 of 1904.—Edward Shaw. *Improvements in the treatment or preparation of sugar and in machinery or apparatus for use therein.* (From 2 December 1909 to 2 December 1910.)
- No. 353 of 1904.—Albert Toisoul, Eugene Auguste Fradet and Louis Piedefert. *An improved crematorium or crematorium gas furnace and method of working the same.* (From 28 March 1910 to 28 March 1911.)
- No. 22 of 1906.—Heinrich Colloseus. *Improvements in apparatus for pulverising blast-furnace slag.* (From 4 April 1910 to 4 April 1911.)
- No. 23 of 1906.—Heinrich Colloseus. *Improvements in the manufacture of cement from furnace slag.* (From 4 April 1910 to 4 April 1911.)
- No. 420 of 1903.—John Parker. *Improvements in the jointing of drain pipes, conduits, and the like.* (From 9 February 1910 to 9 February 1911.)
- No. 423 of 1896.—Frederic Fowler Farlow. *An improved automatic low water alarm apparatus.* (From 5 February 1910 to 5 February 1911.)
- No. 541 of 1904.—John Russel Little. *Improvements in and relating to fireproof floors and like structures.* (From 10 March 1910 to 10 March 1911.)

No. 1248 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling and using the said inventions in British India, and of authorizing others so to do, has ceased :—

- No. 239 of 1905.—Henry Garner. *Improvements in or connected with vehicle wheel tyres.* (Specification filed 4 December 1905.)
- No. 250 of 1905.—New Century Engine (Foreign Patents) Company Limited. *Improved method of and means or apparatus for preparing and applying as motive fluid a heated mixture of steam and a gaseous medium.* (Specification filed 1 December 1905.)
- No. 453 of 1905.—Bhagat Ram. *An improved hockey stick* (Specification filed 28 November 1905.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for each of the above inventions.

- No. 398 of 1902.—Alfred Godfrey. *Improvements in apparatus for the manufacture of cases or shells for cigarettes and the like.* (Specification filed 27 November 1903.)
- No. 77 of 1903.—Lewis Peter Ford. *Mould for the manufacture of large blocks of artificial stone.* (Specification filed 1 December 1903.)
- No. 431 of 1903.—James Keith. *Improvements in apparatus for moistening air and saturating the same with vapours.* (Specification filed 2 December 1903.)
- No. 450 of 1903.—William Charles Stephens. *Improvements in rock drills.* (Specification filed 4 December 1903.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of Rs 50 for each of the above inventions.

No. 60 of 1899.—Charles Daniel Theobald. *A simplex lock block or train key apparatus for regulating traffic on single or double lines of railway* (Specification filed 27 November 1899.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (g) After the expiration of the ninth year and before the expiration of the tenth year from the date of the filing of the specification—

The sum of Rs 100 for the above invention.

Designs Act, V of 1888.

SULPHATE OF QUININE AND SULPHATE OF CINCHONIDINE.

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona Alkaloids. Quinine can be purchased by Government officers, District and Local Boards. It can also be purchased by Missionaries for *bona fide* public purposes. Otherwise it is not sold to private persons or firms. Cinchonidine is for sale to Government officers and to dealers. Both Quinine and Cinchonidine are for sale for cash only and may be obtained from the Superintendent, Royal Botanic Garden, Sibpur, near Calcutta.

The rates for both drugs from 1st April 1909 are as follows:—

For original sealed cases containing not less in one delivery than the undernoted quantities or for any larger quantities Rs 10 per lb. Carriage extra.

Quinine—	{	In 4 lb. tins	48 lbs.
		" 1 " "	50 "
		" 1/2 " "	30 "
		" 1/4 " "	30 "
		" 1 oz. "	60 "
Cinchonidine—	{	In 1 lb. tins	50 lbs.
		" 1/2 " "	30 "
		" 1/4 " "	30 "

For any less quantity in one delivery than the above Rs 15 per lb. By post 6 annas or every lb. and 4 annas for every half or quarter lb. extra.

CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased for cash only by Government officers and the general public from the Superintendent, Royal Botanic Garden, Calcutta.

The rates for Government officers are : —

	R	a.	p.	Post-free.
16-oz. tin	7	8	0	7 14 0
8 " "	3	12	0	4 0 0
4 " "	1	14	0	2 2 0

The rates for the general public taking 5 lbs. and upwards at a time are the same as for Government officers. For any quantity below five pounds, the rates are:—

	R	a.	p.	Post-free.

THE HON'BLE THE RESIDENT IN MYSORE.**NOTIFICATIONS.****BANGALORE RIFLE VOLUNTEERS.****APPOINTMENT.**

Bangalore, the 2nd March 1910

No. 21.—The Reverend Bertram Mitford Morton to be Honorary Chaplain *vice* Heycock resigned. Dated 15th February 1910.

The 2nd March 1910.

No. 23.—The licenses issued under sections 6 and 9 of the Indian Christian Marriage Act, 1872 (XV of 1872), to the Reverend Johannes Rudolf August Ferdinand Kabis, of the Leipzig Evangelical Lutheran Mission, Tranquebar, in notifications Nos. 6 and 7, dated the 20th January 1908, to solemnise marriages and to grant certificates of marriage within the territories of Mysore including the Civil and Military Station of Bangalore, are hereby cancelled.

No. 24.—In exercise of the powers conferred by section 9 of the Indian Christian Marriage Act, 1872 (XV of 1872, as modified by Act II of 1891), and which have been delegated to him by the Governor-General in Council under section 86 of the Act by Foreign Department Notification No. 3747-I B, dated the 1st October 1897, the Hon'ble the Resident in Mysore is pleased to grant a license to the Reverend Kuppusami David, of the Leipzig Evangelical Lutheran Mission, Tranquebar, authorising him to grant certificates of marriage between Native Christians within the territories of Mysore including the Civil and Military Station of Bangalore.

The powers hereby conferred are to be exercised only so far as regards Christian subjects of His Majesty.

No. 25.—Whereas by the notification of the Government of India in the Foreign Department, No. 2252-I, dated the 7th August 1883, the Indian Christian Marriage Act, 1872, was with certain modifications declared to apply to the Civil and Military Station of Bangalore, so far as regards marriages between persons, one of whom is a Native Christian subject of Mysore, and neither of whom is a Christian British subject :—

In exercise of the powers conferred by section 9 of the Act, the Hon'ble the Resident in Mysore is pleased to grant a license to the Reverend Kuppusami David, of the Leipzig Evangelical Lutheran Mission, Tranquebar, authorising him to grant certificates of marriage within the territories included in the Civil and Military Station of Bangalore between Native Christians, one of whom is a Native Christian subject of Mysore, and neither of whom is a Christian subject of His Majesty.

By order,

W. G. GREY, Major,
First Assistant Resident.

General Conditions.

1. Tenders should be superscribed "Tenders for Stationery articles, etc", and should specify the rates at which the tenderers undertake to supply the articles. They should be accompanied by a deposit of 5 per cent on the value of the tender. This deposit should be remitted into the Bank of Madras and the Bank's receipt attached to the tender. No money will be accepted.

2. Except in the case of tenders for locks and scales, samples of articles to be supplied should invariably accompany the tender; they should be distinctly described and marked with the name of the tenderer on labels attached to them. Standard samples of articles other than locks may be inspected at the Stationery Office.

3. An examination fee of Rs. 10 should accompany each sample of ink or ink powder.

4. Standard samples of locks are in the custody of the Superintendent of the Public Works Workshops, and the locks to be supplied should be in accordance with them. The outer case and the whole internal mechanism should be of brass, the shackles of the padlocks only being of mild steel. Unless locks with common keys are ordered, the key of one lock should not ordinarily open any other of the same description. An examination fee of rupee one will be required in respect of each of the descriptions of locks contained in each consignment which the successful tenderer makes in pursuance of his contract.

5. The successful tenderer will be required to deposit as security 10 per cent. of the value of his tender together with the necessary stamp duty and to sign a contract bond (form of which can be seen at the office) within fifteen days from the date of his being informed of the acceptance of his tender. In case of failure, his deposit of 5 per cent. delivered with the tender will be forfeited and his tender considered to be cancelled.

6. The quantities mentioned above are only approximate, the actual quantities required will be intimated to the contractor from time to time and should be delivered at the cost and risk of the contractor at the Stationery Office, Madras, punctually on the date fixed in the orders issued, failing which the terms of the contract bond will be strictly enforced.

7. The Superintendent of Stationery reserves to himself the right of rejecting any tender without assigning any reason for so doing.

8. Forms of tender and any further information can be obtained on application to the Stationery Office on any office day between the hours of 11 A.M. and 5 P.M.

A. R. CUMMING,
Superintendent of Stationery.

NOTIFICATIONS.

Peshawar, the 23rd February 1910.

No. 11.—In exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), the Hon'ble the Chief Commissioner proposes to add the following proviso to rule 5, Chapter III, Part II, of the new Petroleum rules published in Notification No. 62, dated the 17th April 1909 —

“Provided also that in the case of installations or storage sheds intended for the storage of petroleum which has a flashing point above 150° F, the license may contain in lieu of the conditions endorsed on the form prescribed for it by these rules such conditions as may in each case be approved by the licensing authority on the recommendation of the Chief Inspector of Explosives ”

This draft is published under the provisions of section 24 of the Indian Petroleum Act, 1899 (VIII of 1899), for the information of persons likely to be affected thereby, and it is hereby notified that the draft will be taken into consideration on or after the 1st April 1910.

Any objection or suggestion which may be received from any person with respect to the said draft proviso before the date aforesaid will receive consideration.

By order, etc.,

S. E. PEARS,

Assistant Secretary to the Chief Commissioner,
North-West Frontier Province.

The 7th March 1910.

No. 21.—Under the provisions of section 16 of the Indian Press Act (No. 1 of 1910) the Chief Commissioner is pleased to direct that the Inspector General of Police, North-West Frontier Province, shall be the officer to whom and Peshawar the place at which copies of newspapers published in the North-West Frontier Province shall be delivered as prescribed in that section

The 25th October 1909

From the 13th November next till further notice, the complete *Gazette of India* will be published at Calcutta. After the 6th November all notifications and other matter intended for publication in the *Gazette* should be addressed to the Publisher, 8, Hastings Street, Calcutta.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to the extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India.

- No. 646 of 1909.—Albert Edward Van Ristell, signal and interlocking inspector, E I R., Allahabad *An automatic signal wire compensator.* (Specification filed 16 February 1910.)

- No. 26 of 1910.—Clancy Metals Process Company, engaged in the business of treating ores, of No. 170 Broadway, in the city of New York (Borough of Manhattan), county and state of New York, United States of America. *Treatment of precious metalliferous ores.* (Specification filed 1 March 1910.)
- No. 28 of 1910.—Badische Anilin & Soda Fabrik, of Ludwigshafen-on-Rhine, in the German empire. *Improvements in the absorption of oxides of nitrogen.* (Specification filed 4 March 1910.)
- No. 40 of 1910.—Hydrocarbon Converter Company, manufacturers, a corporation organized under the laws of the state of Delaware, with a place of business at No. 37 Wall street, in the city of New York, county and state of New York, United States of America. *Improvements relating to the manufacture of gas from hydrocarbon oils and the like.* (Specification filed 4 March 1910.)
- No. 44 of 1910.—Alexander McLennan, manufacturer, of 165 Bermondsey street, Bermondsey, London, England. *An improved process for the treatment of leather.* (Specification filed 3 March 1910.)

No. 1270 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

- No. 285 of 1899.—Sri Krishna Joshi *The utilisation of solar heat for culinary, industrial and other purposes, to be called the Bhanu-tap or the Heliotherm* (From 15 March 1910 to 15 March 1911.)
- No. 323 of 1902.—Arthur Kitson. *Improvements in or pertaining to vapor-burning apparatus* (From 17 March 1910 to 17 March 1911.)
- No. 376 of 1903.—Hans Siegwart *Improvements in or relating to apparatus for cutting beams, girders and other structures particularly to those made of artificial stone or the like* (From 11 May 1910 to 11 May 1911.)
- No. 377 of 1903.—Hans Siegwart *Improvements in or relating to cores or formers for use in the manufacture of hollow girders or structures.* (From 11 May 1910 to 11 May 1911.)
- No. 476 of 1903.—C. W. Lamb *Lamb's improved light weight harness saddle.* (From 10 March 1910 to 10 March 1911.)
- No. 55 of 1905.—John Taylor. *Improvements in or relating to humidifying apparatus.* (From 4 April 1910 to 4 April 1911.)
- No. 582 of 1905.—George Dubern. *An improved duplex lighting microscope.* (From 15 March 1910 to 15 March 1911.)
- No. 140 of 1906.—The Ore Concentration Company (1905), Limited *Improvements in processes for separating certain constituents of finely divided material by causing them to rise or float in a liquid.* (From 25 April 1910 to 25 April 1911.)

No. 1271 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling and using the said inventions in British India, and of authorizing others so to do, has ceased:—

- No. 219 of 1905.—Benjamin Thomas Lindsay Thomson. *Improvements in tyres for wheels of vehicles.* (Specification filed 6 December 1905.)
- No. 246 of 1905.—Jay van Tuyl Daniels *Improvements in vibrating machines for therapeutic and like purposes.* (Specification filed 9 December 1905.)
- No. 293 of 1905.—Daniel Hall. *A cotton gin.* (Specification filed 11 December 1905.)
- No. 350 of 1905.—Charles Frederick Strauss *An improved lever gripper and attachments for ore feeders and the like.* (Specification filed 9 December 1905.)
- No. 373 of 1905.—Victor Joseph Kuess. *Improved method of manufacturing soap or the like or briquettes from petroleum and other mineral oils.* (Specification filed 7 December 1905.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for each of the above inventions.

No. 463 of 1904.—George Looms. *Improvements in or relating to boots and shoes* (Specification filed 6 December 1904.)

No. 468 of 1904.—Freeman Hines, Limited. *Improvements in pipes and in the method of jointing the same* (Specification filed 6 December 1904.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (b) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of Rs 50 for each of the above inventions.

No. 173 of 1902.—Christopher Rawson. *Improvements in indigo manufacture* (Specification filed 10 December 1902.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (d) After the expiration of the sixth year and before the expiration of the seventh year from the date of the filing of the specification—

The sum of Rs 5 for the above invention.

NOTICES.**THE PATENT OFFICE.**

2, BANKSHALL STREET, CALCUTTA.

* Public room open, 11 A.M. to 4 P.M., Saturdays 11 A.M. to 1 P.M.

1. *All communications* relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act (V of 1888), or in continuation of such applications should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta. 37. Postal scales with tola and ounce weights	"	80
38. Tola weights for Postal scales	"	20
39. Ounce weights do.	"	20

General Conditions.

1. Tenders should be superscribed "Tenders for Stationery articles, etc.", and should specify the rates at which the tenderers undertake to supply the articles. They should be accompanied by a deposit of 5 per cent. on the value of the tender. This deposit should be remitted into the Bank of Madras and the Bank's receipt attached to the tender. No money will be accepted.

2. Except in the case of tenders for locks and scales, samples of articles to be supplied should invariably accompany the tender, they should be distinctly described and marked with the name of the tenderer on labels attached to them. Standard samples of articles other than locks may be inspected at the Stationery Office.

3. An examination fee of Rs. 10 should accompany each sample of ink or ink powder.

4. Standard samples of locks are in the custody of the Superintendent of the Public Works Workshops, and the locks to be supplied should be in accordance with them. The outer case and the whole internal mechanism should be of brass, the shackles of the padlocks only being of mild steel. Unless locks with common keys are ordered, the key of one lock should not ordinarily open any other of the same description. An examination fee of rupee one will be required in respect of each of the descriptions of locks contained in each consignment which the successful tenderer makes in pursuance of his contract.

5. The successful tenderer will be required to deposit as security 10 per cent. of the value of his tender together with the necessary stamp duty and to sign a contract bond (form of which can be seen at the office) within fifteen days from the date of his being informed of the acceptance of his tender. In case of failure, his deposit of 5 per cent. delivered with the tender, will be forfeited and his tender considered to be cancelled.

6. The quantities mentioned above are only approximate; the actual quantities required will be intimated to the contractor from time to time and should be delivered at the cost and risk of the contractor at the Stationery Office, Madras, punctually on the date fixed in the orders issued, failing which the terms of the contract bond will be strictly enforced.

7. The Superintendent of Stationery reserves to himself the right of rejecting any tender without assigning any reason for so doing.

8. Forms of tender and any further information can be obtained on application to the Stationery Office on any office day between the hours of 11 A.M. and 5 P.M.

A. R. CUMMING,
Superintendent of Stationery.

**THE HON'BLE THE AGENT TO THE GOVERNOR GENERAL AND CHIEF
COMMISSIONER, NORTH-WEST FRONTIER PROVINCE.**

NOTIFICATIONS.

Peshawar, the 23rd February 1910.

No. II—In exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), the Hon'ble the Chief Commissioner proposes to add the following proviso to rule 5, Chapter III, Part II, of the new Petroleum rules published in Notification No. 62, dated the 17th April 1909 —

“Provided also that in the case of installations or storage sheds intended for the storage of petroleum which has a flashing point above 150° F, the license may contain in lieu of the conditions endorsed on the form prescribed for it by these rules such conditions as may in each case be approved by the licensing authority on the recommendation of the Chief Inspector of Explosives ”

This draft is published under the provisions of section 24 of the Indian Petroleum Act, 1899 (VIII of 1899), for the information of persons likely to be affected thereby, and it is hereby notified that the draft will be taken into consideration on or after the 1st April 1910.

Any objection or suggestion which may be received from any person with respect to the said draft proviso before the date aforesaid will receive consideration.

By order, etc.,

S. E. PEARS,
Assistant Secretary to the Chief Commissioner,
North-West Frontier Province.

The 10th March 1910.

15. Bhai Vallabh Das Marchinda.
16. Bhai Utti Chand, Anda.

Reappointed.

No. 141-L.F.—The following bye-laws framed at a special meeting held on the 17th December 1909, by the Municipal Committee of Peshawar, under section 25 of Act XX of 1891, have been approved by the Revenue Commissioner, North-West Frontier Province, and are hereby published for general information, in supersession of the rules published in Commissioner and Superintendent, late Peshawar Division's Notification No. 7, dated the 29th December 1894.

These bye-laws will come into force in the Municipality of Peshawar six weeks from the date of publication of this Notification.

(1) All meetings of the Municipal Committee whether ordinary or special shall be held in the Town Hall or at such other place as the Chairman may direct and at such hours as the President, or in his absence, the Vice-President may direct, provided that General Meetings shall generally be held on the last Saturday of the month

Section 25 (1) (a) time and place of meeting.

2. The President or in his absence the Vice-President may, whenever occasion requires, convene an emergent, ordinary or special meeting, at any time or place

3. (a) Notice of an ordinary meeting shall be given at least 48 hours, and of special meeting at least 3 days, before the date fixed, and a copy of the same shall be posted at the Town Hall

Section 25 I B. The manner in which notice of ordinary and special and adjourned meetings shall be given

(b) Notice of an adjourned meeting shall be given at the time of adjournment by the Chairman, members absent from the meeting being informed.

(c) In cases of emergency twelve hours' notice will be sufficient for either an ordinary, or special meeting.

(d). Every notice of a meeting shall be signed by the Secretary and be accompanied by a list of the business to be transacted there at. Such notice and list shall be circulated to each member.

4. (a) No business shall be transacted at an ordinary meeting unless at least 5 members are present.

Section 25 I. C. The quorum necessary for the transaction of business at ordinary or special meetings. See section 21 (1) and (2).

(b) The quorum for the transaction of business at a special meeting shall be 7 members.

5. Copies of the minutes of all meetings shall be circulated to members, if possible, previous to the next following meeting. Where this has been done, the minutes of the previous meeting shall be taken as read and confirmed.

Section 25 I D. The conduct of proceeding and the adjournment of meetings.

Provided that it shall be open to the confirming meeting to raise an objection if any resolution has not been properly recorded.

Where such circulation has not been carried out the minutes of the previous meeting shall be read and then confirmed or amended as the case may be.

6. The Chairman of the meeting may give priority to any item or items of business, irrespective of the order in which such item or items stands or stand on the list of business circulated under Rule (3) d.

The Chairman may also bring up before the meeting any matter of importance which he considers desirable to bring up, and which has not been included in the agenda circulated under the above rule.

7. The proceedings shall be conducted in the vernacular and shall be recorded in both English and Urdu minute books. Provided that a member unable to express himself in the vernacular may address the meeting in English, the purport of his remarks being interpreted.

8. No written speeches shall be read *without the consent* of the meeting.

9. The Chairman shall decide all points of order or procedure and shall decide who has the ear of the meeting.

10. Only one member shall speak at a time. Speakers shall address themselves to the Chair.

11. A member who proposes to move any substantive motion or resolution shall intimate the fact in writing (attaching a copy of his proposed resolution) to the Secretary, at least five clear days before the date of the meeting at which such motion or resolution is to be brought forward, in order to admit of the inclusion of the said proposition in the list of the business to be transacted at the said meeting. A record of such proposal shall be entered in a register which shall be laid upon the table at every ordinary meeting of the Committee.

12. Every such motion or resolution shall be read and if seconded, shall be considered to be before the meeting for discussion. The mover shall, if he desires, speak first in

support of the motion. The seconder may then speak but the seconder may, if he desires reserve his speech for a later period of the debate.

13. Members shall speak only once to each motion, but the mover or seconder of a substantive motion may reply at the conclusion of a debate thereon, provided that the Chairman, at his discretion, may at any time allow a member who has already spoken to make a brief explanation.

14. After a motion has been proposed and seconded, any member may propose an amendment thereto.

An amendment must be seconded or it falls through.

Any number of amendments may be before the meeting at the same time but they shall be put to the vote in the reverse order in which they have been moved.

15. A member who has already spoken to a motion before the meeting, is not thereby debarred from speaking to an amendment to the motion, provided that in so doing, he confines himself strictly to the fresh matter introduced by the amendment.

16. Every question voted on shall be put both for and against

17. Unless a poll is demanded by any member present at a meeting, a declaration made at the meeting by the chairman that a resolution has been passed, shall be sufficient warrant for the making of an entry to that effect

If a poll is demanded by any member present it shall be taken by show of hand, and the result of such poll as declared by the Chairman shall be deemed to be the resolution of the Committee

Opposing members' names shall be written below the resolution, as a note, if they so desire it

18. No subject on which the Committee has passed a resolution shall be reopened except —

- (i) With the permission of the President or in his absence or if specially empowered in this behalf by him of the Vice-President, or
- (ii) In compliance with the express wishes of the Local Government or Revenue Commissioner, or
- (iii) Upon the written request of at least one-half of the members of the Committee, provided that it shall have been circulated in the Agenda paper under Rule 3 and that 3 months shall have elapsed from the date of disposal

19. All meetings shall be public provided that the public may be required to withdraw if it should be deemed necessary by the meeting that any particular matter should be discussed with closed doors.

20. No person from the public shall be allowed to speak on any matter at a meeting

21. The Chairman may cause to be summarily removed, from the building or place in which the meeting is held, any person not being a member of the Committee, who interrupts the business of the meeting or makes any noise or expression of approval or disapproval or conducts himself in any unseemly manner

22. The common seal shall be affixed to the following documents, and shall remain in the custody of the Secretary —

Section 25 (e) The custody of the common seal and purpose for which it shall be used

- (a) All deeds and plans whether relating to moveable or immoveable property executed by or on behalf of the Committee
- (b) All written contracts and deeds entered into, and leases given by, the Committee
- (c) All copies of the Committee's orders granted on behalf of the Committee.
- (d) All notices issued under the Municipal Act and the rules thereunder.
- (e) All certificates for good conduct or sanads granted by the Committee.
- (f) All other documents on which the Committee or President may direct the seal to be affixed

Executive Administration.

(1) *The President and his powers.*

23. The President or in his absence or if specially empowered by him the Vice-President is authorized to disburse —

Section 25 I. F. Executive Administration

- (1) The fixed salaries of all sanctioned establishment.
- (2) All sanctioned Educational grants-in-aid and scholarships, contributions payable to Government or the Deputy Commissioner and ordinary contingent charges within budget limit.
- (3) All expenditure duly sanctioned in accordance with any rule or bye-law in force

24. The President or in his absence or if specially empowered by him the Vice-President is authorized to order the expenditure of a sum not exceeding Rs100 on any urgent matter up to a limit of Rs800 per mensem, provided there is budget provision for the expenditure.

All such expenditure shall be placed before the next General Meeting for information.

25. The President or in his absence or if specially empowered by him the Vice-President may if he deems it necessary send any paper or question to any Standing Sub-Committee or member for report or enquiry.

(ii) *Sub-Committee- their procedure, powers and duties.*

26. The following Standing Sub-Committees shall be appointed by the President or in his absence or if specially empowered by him the Vice-President at a General Meeting by casting lots. The number of Hindus and Mohammedans in each Sub-Committee shall be equal :—

		Members.
1. Sanitation	Sub-Committee	4
2. Octroi	"	6
3. Lighting	"	2
4. Finance	"	6
5. Education	"	2
6. Public Works	"	4
7. Roads and Gardens	"	2
8. Water Works	"	2

27. Members of Standing Sub-Committees shall, unless otherwise ordered by the President, or in his absence or if specially enforced by him, the Vice-President hold office for six months provided that a member ceasing to be a member of the General Committee shall also vacate his seat on the Sub-Committee

28. The President and Vice-President shall be *ex-officio* a member of every Sub-Committee, and the Secretary shall act as its Secretary

29. The President or in his absence or if specially empowered by him the Vice-President may appoint any other Sub-Committee of not less than two members to report on any special matter, not within the province of any Standing Sub-Committee

Such a Sub-Committee shall dissolve as soon as the object of its being nominated has been disposed of by the General Committee or by the President

30. The Standing Sub-Committee may, if deemed necessary, appoint temporary Sub-Committees from their own members for investigation and report on any matter.

31. If a proposal, which requires the sanction of the General Committee, is negatived by the Sub-Committee, it shall not be brought up in discussion before the General Committee unless specially introduced into the Agenda by order of the President or under Rule 17.

32. Every Sub-Committee shall exercise a general supervision in respect of the matters placed under its control, subject to any special or standing orders of the Committee, and shall report upon questions connected therewith either on its motion, or on a reference made to it by the General Committee or the President or in his absence or if specially empowered by him by the Vice-President

33. Each Sub-Committee shall pass its own Budget Estimate in October of each year and submit the same to the Finance Sub-Committee

34. Papers connected with any matter placed under the control of the Sub-Committee shall be open to inspection of all members at the Municipal Office during office hours, but in times of urgency the members may send for the papers from the office to their own home or to the Town Hall.

35. Standing Sub-Committees have power to spend up to Rs50 in case of emergency and to report the matter to the President, or in his absence or if specially empowered by him the Vice-President through the Secretary for the information of the General Committee, provided that, such expenditure is within budget limits and a maximum expenditure of Rs100 per mensem is not exceeded

36. Standing Sub-Committees will meet as given in Rules 39, 44, 45 and 46 at such dates and hours as may be fixed by the members of the Sub-Committees, and their meetings shall be held at the Town Hall or at such place as may be agreed on by the members of the Sub-Committee

37. The quorum for a Standing Sub-Committee shall be two members, except for the Finance Sub-Committee for which three members will form a quorum.

38. (i) No expenditure shall *ordinarily* be incurred unless a proper estimate has been framed for it and approved by the sanctioning authority under Rules 24, 35 and 58. In cases of *emergency* this rule may be relaxed.

(ii). All other estimates exceeding Rs100 shall ordinarily be taken before the General Committee for sanction before work is commenced.

39. The Sanitation Sub-Committee shall dispose of all questions arising under Chapters VI and VII of the Municipal Act, excepting sections 82 to 95, 120 A to 120 H, 137 and 137 A, 139, 140, 141, 142 and 145 acting in accordance with such orders as may be issued by the Committee from time to time. The Sanitation Sub-Committee shall be responsible for the proper up-keep of conservancy carts, animals, etc. They will also distribute the salaries of the Conservancy Staff at the Municipal Office, or such other place as the General Committee may direct. The Sanitation Sub-Committee shall meet at least once a week. All the papers in connection with the Sanitation will be produced before them. Besides all the reports of the Conservancy Daroghas against the conservancy staff as well as breach of rules will be placed before them for disposal.

40. The Octroi Sub-Committee shall report upon or dispose of all matters connected with the imposition and remission, the collection and refund of the octroi tax. They will distribute the pay of the Octroi Establishment at the Municipal Office or wherever they think proper, and shall act in accordance with such orders as may be issued by the Committee from time to time. The Octroi Sub-Committee will meet at least once a week. All the papers in connection with the same and all reports against persons at fault will be laid before the Sub-Committee. The monthly transfer of the octroi staff will be in the hands of this Sub-Committee.

41. The Lighting Sub-Committee will be responsible for the lighting arrangements of the Municipal Committee and will distribute the salaries of the lighting staff at the Municipal Office or wherever they think proper.

The Lighting Sub-Committee will meet at least once a fortnight.

42. The Finance Sub-Committee shall enquire into and will make a report or dispose of the questions affecting receipts and expenditure, the imposition and remission of taxes other than octroi and all other matters affecting the finances of the Committee. It shall also be responsible for the preparation and submission of the Budget. It shall meet at least once a fortnight.

43. The Educational Sub-Committee shall report upon or if empowered by the General Committee dispose of all questions relating to education. It shall meet at least once a month. All questions in connection with Education will be laid before the Educational Sub-Committee who will report and give their opinion thereon which will be laid before the General Committee for sanction.

The Head Master, M. B. High School, shall be an ex-officio member of this Sub-Committee.

44. The Public Works Sub-Committee shall report upon or if empowered by the General Committee dispose of all matters relating to the Public Works buildings and lands in charge of the Committee and in regard to sections 85 to 90, 120 A to 120 H and 172 to 175 of the Municipal Act. All estimates for works and repairs will first be laid before the Buildings Sub-Committee for submission to the General Committee for sanction.

(2) When the estimate has received the sanction of the General Committee, the Sub-Committee shall be responsible to have the works done either by the direct agency of the Committee or by the contract as the General Committee may direct.

(3) Contracts are of two kinds major and minor. Minor contracts are those the value of which is less than Rs50. Major contracts are those the value of which exceeds Rs50. Tenders should be always invited for major contracts except in the case of urgency, but for minor contracts it is optional with the Secretary to invite tenders or not as he may think fit.

(4) The Sub-Committee in consultation with the Secretary will be competent to give or cancel all contracts (major or minor). All contracts will subsequently be laid before the General Committee for sanction.

(5) The following procedure will be adopted in giving contracts for major works.

Tenders will be invited which should be sent to the Secretary to the Municipal Committee in closed covers. The Secretary will in the presence of the Sub-Committee at the Municipal office open the envelopes, and the latter will in consultation with the former decide the same.

(6) Any work which the General Committee may direct to be carried out under direct management will be done under the supervision of the Sub-Committee and the Secretary.

(7). After a contract has been sanctioned and given, the Secretary shall send a vernacular copy of the estimate to the Public Works Sub-Committee, who will inspect all materials to be used in the work, before work is commenced and shall inspect the work from time to time. In the case of unsatisfactory material or any defective constructions, the Public

Works Sub-Committee will at once stop the work and report to the Secretary with the object of cancelling the contract or imposing a fine, which questions will be laid before the General Committee for sanction. The Sub-Committee will be competent to examine the plans of any work at the Municipal Office at any time during office hours or at the time of necessity send for the same for examination completion certificates of all works must be endorsed by at least two members of the Public Works Sub-Committee and the Secretary in token that the work has been inspected and has been completed according to specifications (estimate).

(8) No work duly sanctioned in accordance with the bye-laws foregoing which has not been commenced within 12 months of the date of sanction shall be taken in hand, unless a renewal of sanction to proceed with it has been made by the Committee.

The Public Works Sub-Committee will meet at least once a week.

45. The management of the Gardens, Arboriculture Agricultural lands and roads shall, subject to the control of the Committee and any orders of the President, be vested in the Sub-Committee, provided that the Shahi Bagh will remain under the direct management of the Secretary.

The Roads and Gardens Sub-Committee shall meet at least once a month. All papers in connection with the expenditure and promotion of mals and any other thing relating thereto will be laid before the Sub-Committee.

The Sub-Committee will regularly supervise the gardens and roads.

46. The Water Works Sub-Committee shall report upon or if empowered by the General Committee dispose of all matters relating to the water works in charge of the Committee. The procedure in connection with the water works estimates will be the same as explained in paragraph 44. They will also be responsible for the proper supervision of the water works establishment. The Water Works Sub-Committee will meet at least once a week.

47. There shall also be a Legal Adviser appointed by the President with the approval of the General Committee, whose duty it will be to enquire into and advise the General Committee on all legal questions.

48. For the purposes of administration the City shall be divided into wards. These wards shall be seven in number. Each ward will have two Municipal Commissioners as ward-members. They shall be appointed by the President and confirmed by the General Committee. (One shall be a Mohammeden and the other a Hindu.)

All matters relating to sections 91 to 95, 127, 128 and 164 shall be enquired into and disposed of by the ward members.

49. In the event of a ward member's absence from any cause, the other ward-member shall carry on the absentee's duties.

50. A wardmember shall hold office for six months provided that in vacating his seat in the General Committee he shall cease to be a ward member.

51. Ward-members will be responsible for the conservancy of their wards. All points requiring attention will be reported by them to the Secretary.

52. All applications under the Municipal Act relating to buildings shall be received and forwarded by the Secretary, to the ward-members who shall themselves pass orders or submit a report on the case for the orders of the Committee within ten days from receipt of the application.

If the ward-members grant permission they shall supervise as far as possible all buildings or other operations, and will make a final report when the work is completed.

In case the applicant is himself a ward-member and the building concerned is situated in his ward, the application shall be forwarded to the other member.

53. It shall moreover be the duty of the ward-members to see—

(i) that proposed buildings do not encroach upon the street or upon any public or nazul property or interfere with public drains unless sanction has previously been obtained,

(ii) that means of access to such proposed buildings are provided which will obviate the necessity for subsequent applications to build stairs or ramps projecting into the streets.

(iii) that all permissions and directions given by them under bye-law 52 are in accordance with the standing orders of the Committee in this behalf.

(iii) Secretary's duties and powers.

54. The Secretary will attend all meetings of the Committee.

55. The Secretary shall be the executive officer of the Committee and shall discharge his duties subject to the control and the immediate orders of the President or in his absence or if specially empowered by him of the Vice-President.

56. The whole of the Municipal Establishment shall be subject to the orders of the Secretary who shall conduct all the office duties of the Committee and shall be responsible that

- (1) All orders and resolutions of the Committee are duly carried out ;
- (2) No money is expended without proper sanction ;
- (3) All monies are paid to the right parties on bills properly drawn and checked ;
- (4) Registers and records are properly kept up and accounts and returns punctually submitted ,
- (5) All subordinate officials carry out their duties.
- (6) The income from all sources is duly realized and credited in the accounts ;
- (7) All cheques are initialled by him before submission for signature by the President and member.

57. All correspondence in municipal matters shall be received by the Secretary, who shall himself dispose of all matters of ordinary routine, forward for report or disposal to ward-members and Sub-Committees, matters falling within their cognizance and take the orders of the President on all other matters.

58. The Secretary is empowered to incur expenditure from the permanent advance not exceeding Rs 50 on any one work for urgent repairs or for any emergent work or purpose within budget limits, provided that a maximum expenditure of Rs 200 is generally not exceeded in any one month and the expenditure is placed before the next General Meeting for information.

59. The following persons are authorized to grant receipts for money received on behalf of the Committee.—

Section 25 (1) J (G). The persons by whom receipt shall be granted on behalf of the Committee for money received under the Act

1. Secretary
2. Head Clerk.
3. Octroi Superintendent.

4. Members of the Committee either individually or as a member of a Sub-Committee provided that the power is ratified by a Resolution of the General Committee.

60. The appointment, promotions, reductions of salary, degradation, suspension and dismissal of all servants drawing salaries of Rs 50 and over shall vest in the General Committee

61. (i) The appointment, promotions, reductions of the salary, degradation, suspension and dismissal of all servants whose salary does not exceed Rs 50 shall vest in the President.

(ii). A similar power is vested in the Secretary as regards servants drawing less than Rs 15 and the same powers will be exercised by the Sub-Committees

62. The President may in cases of urgent necessity suspend any servant of the Committee

63. The following may inflict fines :—

- (1) The President or in his absence or if specially empowered by him the Vice-President on any servant of the Committee not exceeding one month's pay.
- (2) The Secretary on any servant of the Committee not exceeding two week's pay subject to appeal to the President.
- (3) Standing Sub-Committees on servants under their control not exceeding two week's pay subject to appeal to the President.
- (4) Ward-members on servants in the Conservancy Department not exceeding one week's pay, subject to appeal to the President. All fines inflicted will be immediately reported to the Secretary.

64. Subject to the control of the President or in his absence or if specially empowered by him of the Vice-President the Secretary may grant leave to any servant of the Committee up to any period permissible under the Civil Service Regulations, provided that any additional expenditure involved shall require the sanction of the General Committee.

65. All servants of the Committee shall be entitled to leave in accordance with the provisions of the Civil Service Regulations for the time being in force for servants of Government.

66. The duties of servants shall be regulated by such orders as may from time to time be issued by the General Committee the President or in his absence or if specially empowered by him the Vice-President, Sub-Committees or the Secretary.

67. Subject to the control of the President or in his absence or if specially empowered by him the Vice-President the Secretary may transfer any servant from one Department to another if he deems it necessary in the interests of the service.

68. All Sub-Committees formed, ward-members nominated or servants appointed before or hereafter shall be deemed to have been formed, nominated and appointed subject to the provisions of these bye-laws.

The 12th March 1910.

No. 145-L. F.—In accordance with the provisions of section 18, Act XX of 1891 (The Punjab Municipal Act), it is hereby notified that the following persons are appointed, under section 5, sub-section 2, of the said Act, members of the Municipal Committee of Kohat in the Kohat District

- | | |
|---|-----------------|
| 1. Choudhri Bhawani Das, | } re-appointed. |
| 2. Malik Atta Mohammed, | |
| 3. Bhai Kanhya Singh, | |

F. E. DEMPSTER,
Offg. Director-General of Telegraphs.

INDIAN MUSEUM.

NATURAL HISTORY SECTION.

NOTIFICATION.

Calcutta, the 18th March 1910

No. 450 —With the sanction of the Secretary of State and of the Government of India, Mr. Stanley Wells Kemp, B A, is appointed to be an Assistant Superintendent in the Natural History Section of the Indian Museum, on probation for two years, from the morning of the 18th March 1910.

By order,
N. ANNANDALE,
Secretary to the Trustees,
Indian Museum, Natural History Section.

THE HON'BLE THE RESIDENT IN MYSORE.

NOTIFICATIONS.

Bangalore, the 8th March 1910

No. 26.—The Resident in Mysore is pleased to declare "eucaine, beta eucaine, lactate eucaine and holocaine" to be included in the definition of "intoxicating drugs" contained in section 3, sub-section (1), clause (j) of the Excise Act, 1896 (XII of 1896), as applied to the Civil and Military Station of Bangalore by the Notifications of the Government of India, Foreign Department, Nos 2471-I. A and 2112-I. A, dated the 29th May 1903 and the 25th May 1906, respectively.

No. 27—In exercise of the power conferred by section 18, sub-section (2) of the Excise Act, 1896 (XII of 1896), as applied to the Civil and Military Station of Bangalore, and with reference to this office Notification No. of this day's date by which eucaine, beta eucaine, lactate eucaine and holocaine are declared to be intoxicating drugs for the purposes of the said Act, the Resident in Mysore is pleased to declare that the provisions of that section prohibiting the possession of eucaine, beta eucaine, lactate eucaine or holocaine, shall not apply—

- (i) to eucaine, beta eucaine, lactate eucaine or holocaine, possessed in accordance with the conditions of his license by a person who is authorized by a license granted under the provisions of the said Act to sell eucaine, beta eucaine, lactate eucaine or holocaine; or
- (ii) eucaine, beta eucaine, lactate eucaine or holocaine, which has been purchased from a duly authorized vendor, for medicinal purposes, on the prescription of a person who has been registered under an European or American Medical Act, or who has received a medical diploma from an Indian University or College, and who practises medicine according to European methods, provided that the eucaine, beta eucaine, lactate eucaine, or holocaine, is in the possession of the person for whom it was prescribed or of a person authorized to purchase or to possess it on his behalf; or
- (iii) to eucaine, beta eucaine, lactate eucaine or holocaine, required for the exercise of his profession in the possession of a person who has been registered under an European or American Medical Act, or who has received a medical diploma from an Indian University or College and who practices medicine according to European methods.

No. 28—The Resident is pleased to direct that the following amendments be made

No 64, dated the 16th November 1908, No 75, dated the 22nd December 1908, No 22, dated the 18th March 1909, No 40, dated the 24th May 1909, No 49, dated the 3rd July 1909 and No 17, dated the 25th February 1910.

in the rules issued with his Notification No. 55, dated the 11th July 1908, as subsequently amended by the Notifications specified in the margin, for the grant of licenses for the sale of spirits, fermented liquors and intoxicating drugs in the Civil and Military Station of Bangalore—

Add the following to rule 2—

- “(18) Eucaine license—For the sale of eucaine—R1
- (19) Beta eucaine license—For the sale of beta eucaine—R1
- (20) Lactate eucaine license—For the sale of lactate eucaine—R1
- (21) Holocaine license—For the sale of holocaine—R1.
- 2 (a) Licenses Nos 8 to 21 will be issued in form (15) prescribed for novocain license.”

By order,

W. G. GREY, Major,
First Assistant Resident.

2. All persons claiming the treasure or any part thereof are required to appear personally or by a duly authorised agent before the Collector of Vizagapatam at

his office at Vizagapatam on September 1st, 1910, in view to the matter being enquired into and determined according to law.

P. MINAKSHISUNDARAM,
for Collector.

HIGH COURT—ORIGINAL SIDE.

Rules made by the High Court of Judicature at Fort William in Bengal under section 21 of the Indian Press Act, 1910.

1. These Rules may be cited as "The Rules under the Indian Press Act, 1910". They shall come into operation on the 18th day of March 1910 and shall apply to all applications made to, and all proceedings taken in, the High Court of Judicature at Fort William in Bengal under the Indian Press Act, 1910, hereinafter referred to as "The Act"

2. Every application to the High Court, under section 17 of the Act, to set aside an order of forfeiture under section 4, 6, 9, 11 or 12 shall be made by the presentation of a petition which shall be signed by the applicant and verified at foot by the affidavit of the applicant

3. The petition shall be written in the English language on foolscap paper, or other paper similar to it in size and quality, bookwise, and divided into paragraphs numbered consecutively. Dates and sums occurring in the petition shall be expressed in figures. ●

4. The petition shall be headed—

"In the High Court of Judicature at Fort William in Bengal, Original Jurisdiction In its Special Bench constituted under Act 1 of 1910" and shall be intitled "In the Matter of the (name if any) Printing Press or the (name or description) book, document or newspaper, as the case may be"

5. The petition shall state what the interest of the applicant is in the property in respect of which the order of forfeiture has been made and all documents or copies thereof in proof of such interest together with a copy of the notice of forfeiture under section 4, 6, 9, 11 or 12 of the Act, as the case may be, shall be annexed as exhibits to the petition.

6. The petition shall state the ground or grounds on which it is sought to set aside the order of forfeiture.

7. All vernacular documents annexed as exhibits to the petition and all vernacular documents relied on by the applicant and intended to be tendered in evidence shall be translated into English by a competent and duly qualified translator or translators so that no question may arise as to the accuracy of the translations or the admissibility in evidence of the documents and the translations annexed to them by reason of defects in such translations.

8. The petition with exhibits annexed thereto and their translations, if any, together with a copy of such petition and exhibits with translations, shall be presented to the Chief Justice who will constitute a Special Bench and appoint a day for the hearing and determination of the application.

9. Notice in writing of the day appointed for the hearing and determination of the application shall be given by the Registrar, Original Jurisdiction, to the Chief Secretary to the Government of Bengal and the copy of the petition and exhibits with translations, if any, in the last preceding rule mentioned, shall accompany such notice.

10. Printed Paper-Books containing the petition and all exhibits annexed thereto with translations shall be prepared in the manner prescribed by the Rules for the preparation of Paper-Books in appeals from the High Court, Original Jurisdiction, and shall be delivered to the Registrar, Original Jurisdiction, by the applicant at least one week before the day fixed for the hearing and determination of the application.

10. (a) There shall be ordinarily printed 30 copies of the Paper-Book, but the Registrar may, when necessary, direct a larger number to be printed

11. The Table of Fees now in force in this Court in its Original Civil Jurisdiction shall be applicable to applications under the Act and proceedings thereon, and costs payable in respect of such applications and proceedings shall be taxed, when so directed, by the Taxing Officer of this Court in its Original Jurisdiction

12. The provisions of the Code of Civil Procedure and the Rules and Orders of this Court relating to execution of decrees and orders shall be applicable to the execution of orders passed by the High Court on applications under the Act

* Agents for sale of the Legislative Department publications.

NOTICE—Books and Acts required for private use only can be purchased. Applications should be accompanied by a remittance, unless it is wished that the books should be sent by value-payable post, in which case, besides the ordinary postage, an additional charge is made for registration and commission.

Books and Acts required for the public service should be obtained through the Local Government to whom the applicant is subordinate.

Application for Government publications which are no longer in print should be made to the Agent to the particular Government under whose orders they were originally issued.

[The amounts within parentheses are for packing and postage.]

- XII. Charge for supply for public lamps.

Testing and inspection.

- XIII. Licensee to establish testing stations and keep instruments for testing.
- XIV. Facilities for testing.
- XV. Testing of works.

Plans.

- XVI Plan of area of supply to be made and kept open for inspection.

Additional notice of certain works.

- XVII. Notice to Electric Inspector.

*The Indian Electricity Act, 1910.**(Part I.—Preliminary,—Part II.—Supply of Energy.)*

An Act to amend the law relating to the supply and use of electrical energy.

WHEREAS it is expedient to amend the law relating to the supply and use of electrical energy ; It is hereby enacted as follows —

PART I.**PRELIMINARY.**

1. (r) This Act may be called the Indian Short title, extent Electricity Act, 1910 and commencement

(s) It extends to the whole of British India, inclusive of British Baluchistan and the Santhal Parganas ; and

(t) It shall come into force on such date as the Governor General in Council may, by notification in the Gazette of India, direct in this behalf

2. In this Act, expressions defined in the Indian Telegraph Act, 1885, have the meanings assigned to them in that Act, and, unless there is anything repugnant in the subject or context,—

(a) "aërial line" means any electric supply-line which is placed above ground and in the open air

(b) "area of supply" means the area within which alone a licensee is for the time being authorized by his license to supply energy

(c) "consumer" means any person who is supplied with energy by a licensee, or whose premises are for the time being connected for the purposes of a supply of energy with the works of a licensee.

(d) "daily fine" means a fine for each day on which an offence is continued after conviction therefor :

(e) "distributing main" means the portion of any main with which a service line is, or is intended to be, immediately connected

(f) "electric supply-line" means a wire, conductor or other means used for conveying, transmitting or distributing energy together with any casing, coating, covering, tube, pipe or insulator enclosing, surrounding or supporting the same or any part thereof, or any apparatus connected therewith for the purpose of so conveying, transmitting or distributing such energy.

(g) "energy" means electrical energy when generated, transmitted, supplied or used for any purpose except the transmission a message.

(h) "licensee" means any person licensed under Part II to supply energy.

(i) "main" means any electric supply-line through which energy is, or is intended to be, supplied by a licensee to the public :

(j) "prescribed" means prescribed by rules made under this Act :

(k) "public lamp" means an electric lamp used for the lighting of any street :

(l) "service line" means any electric supply-line through which energy is, or is intended to be, supplied by a licensee to a consumer either from a distributing main or immediately from the licensee's premises :

(m) "street" includes any way, road, lane, square, court, alley, passage or open space, whether a thoroughfare or not, over which the public have a right of way, and also the roadway and footway over any public bridge or causeway and

(n) "works" includes electric supply-lines and any buildings, machinery or apparatus required to supply energy and to carry into effect the objects of a license granted under Part II.

PART II.**SUPPLY OF ENERGY***Licenses*

3. (r) The Local Government may, on application made in the prescribed form and on payment of the prescribed fee (if any), grant to any person a license to supply energy in any specified area, and also to lay down or place electric supply-lines for the conveyance and transmission of energy,—

(a) where the energy to be supplied is to be generated outside such area, from a generating station situated outside such area to the boundary of such area, or

(b) where energy is to be conveyed or transmitted from any place in such area to any other place therein, across an intervening area not included therein, across such area

(s) In respect of every such license and the grant thereof the following provisions shall have effect, namely:—

(a) any person applying for a license under this Part shall publish a notice of his application in the prescribed manner and with the prescribed particulars, and the license shall not be granted—

(i) until all objections received by the Local Government with

*The Indian Electricity Act, 1910.**(Part II.—Supply of Energy.)*

reference thereto have been considered by it

Provided that no objection shall be so considered unless it is received before the expiration of three months from the date of the first publication of such notice as aforesaid, and

- (ii) until, in the case of an application for a license for an area including the whole or any part of any cantonment, fortress, arsenal, dockyard or camp or of any building or place in the occupation of the Government for naval or military purposes, the Local Government has ascertained that there is no objection to the grant of the license on the part of the General Officer Commanding the Division,

- (b) where an objection is received from any local authority concerned, the Local Government shall, if in its opinion the objection is insufficient, record in writing and communicate to such local authority its reasons for such opinion,

- (c) no application for a license under this Part shall be made by any local authority except in pursuance of a resolution passed at a meeting of such authority held after one month's previous notice of the same and of the purpose thereof has been given in the manner in which notices of meetings of such local authority are usually given,

- (d) a license under this Part—

- (i) may prescribe such terms as to the limits within which, and the conditions under which, the supply of energy is to be compulsory or permissive, and as to the limits of price to be charged in respect of the supply of energy, and generally as to such matters as the Local Government may think fit, and

- (ii) save in cases in which under section 10, clause (b), the provisions of sections 5 and 7, or either of them, have been declared not to apply, every such license shall declare whether any generating station to be used in connection with the undertaking shall or shall not form part of the undertaking for the purpose

of purchase under section 5 or section 7;

- (e) the grant of a license under this Part for any purpose shall not in any way hinder or restrict the grant of a license to another person within the same area of supply for a like purpose,

- (f) the provisions contained in the Schedule shall be deemed to be incorporated with, and to form part of, every license granted under this Part, save in so far as they are expressly added to, varied or excepted by the license, and shall, subject to any such additions, variations or exceptions which the Local Government is hereby empowered to make, apply to the undertaking authorized by the license:

Provided that, where a license is granted in accordance with the provisions of clause IX of the Schedule for the supply of energy to other licensees for distribution by them, then, in so far as such license relates to such supply, the provisions of clauses IV, V, VI, VII, VIII and XII of the Schedule shall not be deemed to be incorporated with the license

- (3) The exercise of the powers conferred on the Local Government by this section shall be subject to the control of the Governor General in Council.

4. (1) The Local Government may, if in its opinion the public interest so requires, revoke a license in any of the following cases, namely—

- (a) where the licensee, in the opinion of the Local Government, makes wilful and unreasonably prolonged default in doing anything required of him by or under this Act,

- (b) where the licensee breaks any of the terms or conditions of his license the breach of which is expressly declared by such license to render it liable to revocation;

- (c) where the licensee fails, within the period fixed in this behalf by the license or any longer period which the Local Government may substitute therefor by order under sub-section (3), clause (b), and before exercising any of the powers conferred on him thereby in relation to the execution of works,—

- (i) to show, to the satisfaction of the Local Government, that he is in

*The Indian Electricity Act, 1910.**(Part II.—Supply of Energy.)*

a position fully and efficiently to discharge the duties and obligations imposed on him by his license, or

(ii) to make the deposit or furnish the security required by his license,

(d) where the licensee is, in the opinion of the Local Government, unable, by reason of his insolvency, fully and efficiently to discharge the duties and obligations imposed on him by his license

(2) Where the Local Government might, under sub-section (1), revoke a license, it may, instead of revoking the license, permit it to remain in force subject to such further terms and conditions as it thinks fit to impose, and any further terms or conditions so imposed shall be binding upon, and be observed by, the licensee, and shall be of like force and effect as if they were contained in the license

(3) Where in its opinion the public interest so permits, the Local Government may, on the application or with the consent of the licensee, and, if the licensee is not a local authority, after consulting the local authority (if any) concerned,—

(a) revoke a license as to the whole or any part of the area of supply upon such terms and conditions as it thinks fit, or

(b) make such alterations or amendments in the terms and conditions of a license, including the provisions specified in section 3, sub-section (2), clause (f), as it thinks fit

5. Where the Local Government revokes, under section 4, sub-section (1), the license of a licensee, not being a local authority, the following provisions shall have effect, namely —

Provisions where license of licensee, not being a local authority, is revoked

(a) the Local Government shall serve a notice of the revocation upon the licensee, and, where the whole of the area of supply is included in the area for which a single local authority is constituted, upon that local authority also, and shall in the notice fix a date on which the revocation shall take effect, and on and with effect from that date all the powers and liabilities of the licensee under this Act shall absolutely cease and determine,

(b) where a notice has been served on a local authority under clause (a), the local authority may, within three months after the service of the notice,

and with the written consent of the Local Government, by notice in writing, require the licensee to sell, and thereupon the licensee shall sell, the undertaking to the local authority on payment of the value of all lands, buildings, works, materials and plant of the licensee suitable to, and used by him for, the purposes of the undertaking, other than a generating station declared by the licensee not to form part of the undertaking for the purpose of purchase, such value to be, in case of difference or dispute, determined by arbitration

Provided that the value of such lands, buildings, works, materials and plant shall be deemed to be their fair market-value at the time of purchase, due regard being had to the nature and condition for the time being of such lands, buildings, works, materials and plant, and to the state of repair thereof, and to the circumstance that they are in such a position as to be ready for immediate working and to the suitability of the same for the purposes of the undertaking, but without any addition in respect of compulsory purchase or of goodwill or of any profits which may be or might have been made from the undertaking, or of any similar considerations,

(c) where no purchase has been effected by the local authority under clause (b), and any other person is willing to purchase the undertaking, the Local Government may, if it thinks fit, with the consent of the licensee, or without the consent of the licensee in case the price is not less than that for which the local authority might have purchased the same, require the licensee to sell, and thereupon the licensee shall sell, the undertaking to such other person,

(d) where no purchase has been effected under clause (b) or clause (c) within such time as the Local Government may consider reasonable, or where the whole of the area of supply is not included in the area for which a single local authority is constituted, the Local Government shall have the option of purchasing the undertaking and, if the Local Government elects to purchase, the licensee shall sell the undertaking to the Local Government upon terms and conditions similar to those set forth in clause (b);

*The Indian Electricity Act, 1910.**(Part II.—Supply of Energy)*

(e) where a purchase has been effected under any of the preceding clauses,—

- (i) the undertaking shall vest in the purchasers free from any debts, mortgages or similar obligations of the licensee or attaching to the undertaking;

Provided that any such debts, mortgages or similar obligations shall attach to the purchase-money in substitution for the undertaking; and

- (ii) the revocation of the license shall extend only to the revocation of the rights, powers, authorities, duties and obligations of the licensee from whom the undertaking is purchased, and, save as aforesaid, the license shall remain in full force, and the purchaser shall be deemed to be the licensee

Provided that where the Local Government elects to purchase under clause (d), the license shall, after purchase, in so far as the Local Government is concerned, cease to have any further operation,

- (f) where no purchase has been effected under any of the foregoing clauses, the licensee shall have the option of disposing of all lands, buildings, works, materials and plant belonging to the undertaking in such manner as he may think fit

Provided that, if the licensee does not exercise such option within a period of six months from the date on which the same became exercisable, the Local Government may forthwith cause the works of the licensee in, under, over, along or across any street to be removed and every such street to be reinstated, and recover the cost of such removal and reinstatement from the licensee,

- (g) if the licensee has been required to sell the undertaking, and if the sale has not been completed by the date fixed in the notice issued under clause (a), the purchaser may, with the previous sanction of the Local Government, work the undertaking pending the completion of the sale

6. (1) Where the Local Government revokes the license of a local authority under section 4, sub-section (1), and any person is willing to purchase the undertaking, the Local Government may, if it thinks fit, require the local authority to sell, and thereupon the local authority shall sell, the undertaking to such person on such terms as the Local Government thinks just.

(2) Where no purchase has been effected under sub-section (1), the licensee shall have the option of disposing of all lands, buildings, works, materials and plant belonging to the undertaking in such manner as he may think fit.

Provided that, if the licensee does not exercise such option within a period of six months from the date on which the same became exercisable, the Local Government may forthwith cause the works of the licensee in, under, over, along or across any street to be removed and every such street to be reinstated, and recover the cost of such removal and reinstatement from the licensee

7. (1) Where a license has been granted to any person not being a local authority, and the whole of the area of supply is included in the area for which a single local authority is constituted, the local authority shall, on the expiration of such period, not exceeding fifty years, and of every such subsequent period, not exceeding twenty years, as shall be specified in this behalf in the license, have the option of purchasing the undertaking, and, if the local authority, with the previous sanction of the Local Government, elects to purchase, the licensee shall sell the undertaking to the local authority on payment of the value of all lands, buildings, works, materials and plant of the licensee suitable to, and used by him for, the purposes of the undertaking, other than a generating station declared by the license not to form part of the undertaking for the purpose of purchase, such value to be, in case of difference or dispute, determined by arbitration

Provided that the value of such lands, buildings, works, materials and plant shall be deemed to be their fair market-value at the time of purchase, due regard being had to the nature and condition for the time being of such lands, buildings, works, materials and plant, and to the state of repair thereof, and to the circumstance that they are in such a position as to be ready for immediate working, and to the suitability of the same for the purposes of the undertaking

Provided also that there shall be added to such value as aforesaid such percentage, if any, not exceeding twenty per centum on that value as may be specified in the license, on account of compulsory purchase.

The Indian Electricity Act, 1910.
(Part II.—Supply of Energy.)

(2) Where—

- (a) the local authority does not elect to purchase under sub-section (1), or
- (b) the whole of the area of supply is not included in the area for which a single local authority is constituted, or
- (c) a licensee supplies energy from the same generating station to two or more areas of supply, each controlled by its own local authority, and has been granted a license in respect of each area of supply,

the Local Government shall have the like option upon the like terms and conditions

(3) Where a purchase has been effected under sub-section (1) or sub-section (2),—

- (a) the undertaking shall vest in the purchasers free from any debts, mortgages or similar obligations of the licensee or attaching to the undertaking:

Provided that any such debts, mortgages or similar obligations shall attach to the purchase-money in substitution for the undertaking, and

- (b) save as aforesaid, the license shall remain in full force, and the purchaser shall be deemed to be the licensee

Provided that where the Local Government elects to purchase under sub-section (2), the license shall, after purchase, in so far as the Local Government is concerned, cease to have any further operation

(4) Not less than two years' notice in writing of any election to purchase under this section shall be served upon the licensee by the local authority or the Local Government, as the case may be

(5) Notwithstanding anything hereinbefore contained, a local authority may, with the previous sanction of the Local Government, waive its option to purchase and enter into an agreement with the licensee for the working by him of the undertaking until the expiration of the next subsequent period referred to in sub-section (1), upon such terms and conditions as may be stated in such agreement

8. Where, on the expiration of any of the periods referred to in section 7, sub-section (1), neither a local authority nor the Local Government purchases the undertaking

Provisions where no purchase and license revoked with consent of licensee.

and the license is, on the application or with the consent of the licensee, revoked, the licensee shall have the option of disposing of all lands, buildings, works, materials and plant belonging to the undertaking in such manner as he may think fit:

Provided that, if the licensee does not exercise such option within a period of six months, the Local Government may proceed to take action as provided in section 5, clause (f), proviso.

9. (1) The licensee shall not, at any time without the previous consent in writing of the Local Government, acquire, by purchase or otherwise, the license or the undertaking of, or associate himself so far as the business of supplying energy is concerned with, any person supplying, or intending to supply, energy under any other license, and, before applying for such consent, the licensee shall give not less than one month's notice of the application to every local authority, both in the licensee's area of supply, and also in the area or district in which such other person supplies, or intends to supply, energy:

Provided that nothing in this sub-section shall be construed to require the consent of the Local Government for the supply of energy by one licensee to another in accordance with the provisions of clause IX of the Schedule.

(2) The licensee shall not at any time assign his license or transfer his undertaking, or any part thereof, by sale, mortgage, lease, exchange or otherwise without the previous consent in writing of the Local Government.

(3) Any agreement relating to any transaction of the nature described in sub-section (1) or sub-section (2), unless made with, or subject to, such consent as aforesaid, shall be void.

10. Notwithstanding anything in sections 5, 7 and 8, the Local Government may, with the previous sanction of the Governor General in Council, in any license to be granted under this Act,—

General power for Government to vary terms of purchase

(a) vary the terms and conditions upon which, and the periods on the expiration of which, the licensee shall be bound to sell his undertaking, or

(b) direct that, subject to such conditions and restrictions (if any) as it may think fit to impose, the provisions of the said sections or any of them shall not apply.

11. (1) Every licensee shall, unless expressly exempted from the liability by his license, or by order in writing of the Local Government, prepare and render to the Local Government or to such authority as the Local Government may appoint in this behalf, on or before the prescribed date in each year, an annual statement of accounts of his undertaking made up to such date, in such form, and containing such particulars, as may be prescribed in this behalf.

(2) The licensee shall keep copies of such annual statement at his office and sell the same to any applicant at a price not exceeding five rupees per copy.

*The Indian Electricity Act, 1910.**(Part II.—Supply of Energy.)**Works.*

12. (1) Any licensee may, from time to time but subject always to the terms and conditions of his license, within the area of supply, or, when permitted by the terms of his license to lay down or place electric supply-lines without the area of supply, without that area—

- (a) open and break up the soil and pavement of any street, railway or tramway,
- (b) open and break up any sewer, drain or tunnel in or under any street, railway or tramway,
- (c) lay down and place electric supply-lines and other works,
- (d) repair, alter or remove the same, and
- (e) do all other acts necessary for the due supply of energy

(2) Nothing contained in sub-section (1) shall be deemed to authorize or empower a licensee, without the consent of the local authority or of the owner and occupier concerned, as the case may be, to lay down or place any electric supply-line or other work in, through or against any building, or on, over or under any land not dedicated to public use whereon, whereover or whereunder any electric supply line or work has not already been lawfully laid down or placed by such licensee

Provided that any support of an aerial line or any stay or strut required for the sole purpose of securing in position any support of an aerial line may be fixed on any building or land or, having been so fixed, may be altered, notwithstanding the objection of the owner or occupier of such building or land, if the District Magistrate or, in a Presidency-town or Rangoon, the Commissioner of Police by order in writing so directs

Provided, also, that, if at any time the owner or occupier of any building or land on which any such support, stay or strut has been fixed shows sufficient cause, the District Magistrate or, in a Presidency-town or Rangoon, the Commissioner of Police may by order in writing direct any such support, stay or strut to be removed or altered

(3) When making an order under sub-section (2) the District Magistrate or the Commissioner of Police, as the case may be, shall fix the amount of compensation or of annual rent, or of both, which should in his opinion be paid by the licensee to the owner or occupier

(4) Every order made by a District Magistrate or a Commissioner of Police under sub-section (2) shall be subject to revision by the Local Government

(5) Nothing contained in sub-section (1) shall be deemed to authorize or empower any licensee to open or break up any street not repairable by the Government or a local authority, or any railway or tramway, except such streets, railways or tramways (if any), or such parts thereof, as he is specially authorised to break up by his license, without the written consent of the person by whom the street is repairable or of the person

for the time being entitled to work the railway or tramway, unless with the written consent of the Local Government :

Provided that the Local Government shall not give any such consent as aforesaid, until the licensee has given notice, by advertisement or otherwise as the Local Government may direct, and within such period as the Local Government may fix in this behalf, to the person above referred to, and until all representations or objections received in accordance with the notice have been considered by the Local Government

13. (1) Where the exercise of any of the powers of a licensee in relation to the execution of any works involves the placing of any works in, under, over, along or across any street, part of a street, railway, tramway, canal or waterway, the following provisions shall have effect, namely —

(a) not less than one month before commencing the execution of the works (not being a service line immediately attached, or intended to be immediately attached, to a distributing main, or the repair, renewal or amendment of existing works of which the character or position is not to be altered), the licensee shall serve upon the person responsible for the repair of the street or part of a street (hereinafter in this section referred to as "the repairing authority") or upon the person for the time being entitled to work the railway, tramway, canal or waterway (hereinafter in this section referred to as "the owner"), as the case may be, a notice in writing describing the proposed works, together with a section and plan thereof on a scale sufficiently large to show clearly the details of the proposed works, and not in any case smaller than one inch to eight feet vertically and sixteen inches to the mile horizontally, and intimating the manner in which, and the time at which, it is proposed to interfere with or alter any existing works, and shall, upon being required to do so by the repairing authority or owner, as the case may be, from time to time give such further information in relation thereto as may be desired,

(b) if the repairing authority intimates to the licensee that it disapproves of such works, section or plan, or approves thereof subject to amendment, the licensee may, within one week of receiving such intimation, appeal to the Local Government, whose decision, after considering the reasons given by the repairing authority for its action, shall be final,

(c) if the repairing authority fails to give notice in writing of its approval or

*The Indian Electricity Act, 1910.**(Part II.—Supply of Energy.)*

disapproval to the licensee within one month, it shall be deemed to have approved of the works, section and plan, and the licensee, after giving not less than forty-eight hours' notice in writing to the repairing authority, may proceed to carry out the works in accordance with the notice and the section and plan served under clause (a) ;

(d) if the owner disapproves of such works, section or plan, or approves thereof subject to amendment, he may, within three weeks after the service of the notice under clause (a), serve a requisition upon the licensee demanding that any question in relation to the works or to compensation, or to the obligations of the owner to others in respect thereof, shall be determined by arbitration, and thereupon the matter shall, unless settled by agreement, be determined by arbitration ;

(e) where no requisition has been served by the owner upon the licensee under clause (d), within the time named, the owner shall be deemed to have approved of the works, section and plan, and in that case, or where after a requisition for arbitration the matter has been determined by arbitration, the works may, upon payment or securing of compensation, be executed according to the notice and the section and plan, subject to such modifications as may have been determined by arbitration or agreed upon between the parties ;

(f) where the works to be executed consist of the laying of any underground service line immediately attached, or intended to be immediately attached, to a distributing main, the licensee shall give to the repairing authority or the owner, as the case may be, not less than forty-eight hours' notice in writing of his intention to execute such works ;

(g) where the works to be executed consist of the repair, renewal or amendment of existing works of which the character or position is not to be altered, the licensee shall, except in cases of emergency, give to the repairing authority, or to the owner, as the case may be, not less than forty-eight hours' notice in writing of his intention to execute such works, and, on the expiry of such notice, such works shall be commenced forthwith and shall be carried on with all reasonable despatch, and, if possible, both by day and by night until completed.

(2) Where the licensee makes default in complying with any of these provisions, he shall make full compensation for any loss or damage incurred by reason thereof, and, where any difference or dispute arises as to the amount of such

compensation, the matter shall be determined by arbitration.

(3) Notwithstanding anything in this section, the licensee may, in case of emergency due to the breakdown of an underground electric supply-line, after giving notice in writing to the repairing authority or the owner, as the case may be, of his intention to do so, place an aerial line without complying with the provisions of subsection (1) ;

Provided that such aerial line shall be used only until the defect in the underground electric supply-line can be made good, and in no case (unless with the written consent of the Local Government) for a period exceeding six weeks, and shall be removed as soon as may be after such defect is removed.

14 (1) Any licensee may alter the position of
Alteration of pipes or any pipe (not forming, in wires a case where the licensee is not a local authority, part of a local authority's main sewer), or of any wire under or over any place which he is authorized to open or break up, if such pipe or wire is likely to interfere with the exercise of his powers under this Act ; and any person may alter the position of any electric supply-lines or works of a licensee under or over any such place as aforesaid, if such electric supply lines or works are likely to interfere with the lawful exercise of any powers vested in him.

(2) In any such case as aforesaid the following provisions shall, in the absence of an agreement to the contrary between the parties concerned, apply, namely —

(a) not less than one month before commencing any alteration, the licensee or other person desiring to make the same (hereinafter in this section referred to as "the operator") shall serve upon the person for the time being entitled to the pipe, wire, electric supply-lines or works, as the case may be (hereinafter in this section referred to as "the owner"), a notice in writing, describing the proposed alteration, together with a section and plan thereof on a scale sufficiently large to show clearly the details of the proposed works, and not in any case smaller than one inch to eight feet vertically and sixteen inches to the mile horizontally and intimating the time when it is to be commenced, and shall subsequently give such further information in relation thereto as the owner may desire ;

(b) within fourteen days after the service of the notice, section and plan upon the owner, the owner may serve upon the operator a requisition to the effect that any question arising upon the notice, section or plan shall be determined by arbitration, and thereupon the matter shall, unless settled by agreement, be determined by arbitration ;

(c) every arbitrator to whom a reference is made under clause (b) shall have regard to any duties or obligations

*The Indian Electricity Act, 1910.**(Part II.—Supply of Energy.)*

which the owner is under, and may require the operator to execute any temporary or other works so as to avoid as far as possible interference therewith,

- (d) where no requisition is served upon the operator under clause (b) within the time named, or where such a requisition has been served and the matter has been settled by agreement or determined by arbitration, the alteration may, upon payment or securing of any compensation accepted or determined by arbitration, be executed in accordance with the notice, section and plan and subject to such modifications as may have been determined by arbitration or agreed upon between the parties,
- (e) the owner may, at any time before the operator is entitled to commence the alteration, serve upon the operator a statement in writing to the effect that he desires to execute the alteration himself and requires the operator to give such security for the repayment of any expenses as may be agreed upon or, in default of agreement, determined by arbitration,
- (f) where a statement is served upon the operator under clause (e), he shall, not less than forty-eight hours before the execution of the alteration is required to be commenced, furnish such security and serve upon the owner a notice in writing intimating the time when the alteration is required to be commenced, and the manner in which it is required to be made, and thereupon the owner may proceed to execute the alteration as required by the operator,
- (g) where the owner declines to comply, or does not, within the time and in the manner prescribed by a notice served upon him under clause (f), comply with the notice, the operator may, himself execute the alteration,
- (h) all expenses properly incurred by the owner in complying with a notice served upon him by the operator under clause (f) may be recovered by him from the operator.

(3) Where the licensee or other person desiring to make the alteration makes default in complying with any of these provisions, he shall make full compensation for any loss or damage incurred by reason thereof, and, where any difference or dispute arises as to the amount of such compensation, the matter shall be determined by arbitration.

Laying of electric supply-lines or other works near sewers, pipes or other electric supply-lines or works.

15 (1) Where—

- (a) the licensee requires to dig or sink any trench for laying down any new electric supply-lines or other works, near to which any sewer, drain, water-course or work under the

control of the Local Government or of any local authority, or any pipe, syphon, electric supply-line or other work belonging to any duly authorized person, has been lawfully placed, or

- (b) any duly authorized person requires to dig or sink any trench for laying down or constructing any new pipes or other works, near to which any electric supply-lines or works of a licensee have been lawfully placed, the licensee or such duly authorized person, as the case may be (hereinafter in this section referred to as "the operator"), shall, unless it is otherwise agreed upon between the parties interested or in case of sudden emergency, give to the Local Government or local authority, or to such duly authorized person, or to the licensee, as the case may be (hereinafter in this section referred to as "the owner"), not less than forty-eight hours' notice in writing before commencing to dig or sink the trench, and the owner shall have the right to be present during the execution of the work, which shall be executed to the reasonable satisfaction of the owner.

(2) Where the operator finds it necessary to undermine, but not to alter, the position of any pipe, electric supply line or work, he shall support it in position during the execution of the work, and before completion shall provide a suitable and proper foundation for it where so undermined.

(3) Where the operator (being the licensee) lays any electric supply-line across, or so as to be liable to touch, any pipes, lines or service-pipes or service-lines belonging to any duly authorized person or to any person supplying, transmitting or using energy under this Act, he shall not, except with the written consent of such person and in accordance with section 34, sub-section (1), lay his electric supply-lines so as to come into contact with any such pipes, lines or service-pipes or service lines.

(4) Where the operator makes default in complying with any of the provisions of this section, he shall make full compensation for any loss or damage incurred by reason thereof.

(5) Where any difference or dispute arises under this section, the matter shall be determined by arbitration.

(6) Where the licensee is a local authority, the references in this section to the local authority and to sewers, drains, water-courses or works under its control shall not apply.

16. (1) Where any person, in exercise of any of the powers conferred by or under this Act, opens or breaks up the soil or pavement of any street, railway or tramway, or any sewer, drain or tunnel, he shall—

- (a) immediately cause the part opened or broken up to be fenced and guarded,
- (b) before sunset, cause a light or lights, sufficient for the warning of passengers, to be set up and maintained until sunrise against or near the part opened or broken up;

*The Indian Electricity Act, 1910.**(Part II.—Supply of Energy.)*

(c) with all reasonable speed fill in the ground and reinstate and make good the soil or pavement, or the sewer, drain or tunnel, opened or broken up, and carry away the rubbish occasioned by such opening or breaking up; and,

(d) after reinstating and making good the soil or pavement, or the sewer, drain or tunnel, broken or opened up, keep the same in good repair for three months and for any further period, not exceeding nine months, during which subsidence continues

(2) Where any person fails to comply with any of the provisions of sub-section (1), the person having the control or management of the street, railway, tramway, sewer, drain or tunnel in respect of which the default has occurred, may cause to be executed the work which the defaulter has delayed or omitted to execute, and may recover from him the expenses incurred in such execution

(3) Where any difference or dispute arises as to the amount of the expenses incurred under sub-section (2), the matter shall be determined by arbitration.

17 (1) A licensee shall, before laying down or placing, within ten yards of any part of any telegraph-line, any electric supply line or other works (not being service-lines immediately attached or intended to be immediately attached to a distributing main, or electric supply-lines for the repair, renewal or amendment of existing works of which the character or position is not to be altered), give not less than ten days' notice in writing to the telegraph-authority, specifying—

(a) the course of the works or alterations proposed,

(b) the manner in which the works are to be utilized,

(c) the amount and nature of the energy to be transmitted, and

(d) the extent to, and manner in, which (if at all) earth returns are to be used;

and the licensee shall conform with such reasonable requirements, either general or special, as may be laid down by the telegraph-authority within that period for preventing any telegraph-line from being injuriously affected by such works or alterations

Provided that, in case of emergency (which shall be stated by the licensee in writing to the telegraph-authority) arising from defects in any of the electric supply-lines or other works of the licensee the licensee shall be required to give only such notice as may be possible after the necessity for the proposed new works or alterations has arisen.

(2) Where the works to be executed consist of the laying of any underground service-line immediately attached, or intended to be immediately attached, to a distributing main,

the licensee shall, not less than forty-eight hours before commencing the work, serve upon the telegraph-authority a notice in writing of his intention to execute such works.

18. (1) Save as provided in section 13, sub-section (3), nothing in this Part shall be deemed

Aerial lines.

to authorize or empower a licensee to place any aerial line along or across any street, railway, tramway, canal or waterway unless and until the Local Government has communicated to him a general approval in writing of the methods of construction which he proposes to adopt:

Provided that the communication of such approval shall in no way relieve the licensee of his obligations with respect to any other consent required by or under this Act.

(2) Where any aerial line has been placed or maintained by a licensee in breach of the provisions of sub-section (1), the Local Government may require the licensee forthwith to remove the same, or may cause the same to be removed and recover from the licensee the expenses incurred in such removal.

(3) Where any tree standing or lying near an aerial line, interrupts or interferes with, or is likely to interrupt or interfere with, the conveyance or transmission of energy, a Magistrate of the first class or, in a Presidency town or Rangoon, the Commissioner of Police may, on the application of the licensee, cause the tree to be removed or otherwise dealt with as he thinks fit.

(4) When disposing of an application under sub-section (3), the Magistrate or Commissioner of Police, as the case may be, shall, in the case of any tree in existence before the placing of the aerial line, award to the person interested in the tree such compensation as he thinks reasonable, and such person may recover the same from the licensee.

19 (1) A licensee shall, in exercise of Compensation for any of the powers conferred by or under this Act, cause as little damage, detriment and inconvenience as may be, and shall make full compensation for any damage, detriment or inconvenience caused by him or by any one employed by him.

(2) Save in the case provided for in section 12, sub-section (3), where any difference or dispute arises as to the amount or the application of such compensation, the matter shall be determined by arbitration

Supply.

20. (1) A licensee or any person duly authorized by a licensee may, at any reasonable time, and on informing the occupier of his intention, enter any premises to which energy is or has been supplied by him, for the purpose of—

(a) inspecting and testing the electric supply-lines, meters, fittings, works and apparatus for the supply of energy belonging to the licensee; or

*The Indian Electricity Act, 1910.**(Part II.—Supply of Energy)*

(b) ascertaining the amount of energy supplied or the electrical quantity contained in the supply, or

(c) removing, where a supply of energy is no longer required, or where the licensee is authorized to take away and cut off such supply, any electric supply-lines, fittings, works or apparatus belonging to the licensee.

(2) A licensee or any person authorized as aforesaid may also, in pursuance of a special order in this behalf made by the District Magistrate or, in a Presidency-town or Rangoon, by the Commissioner of Police, and after giving not less than twenty-four hours' notice in writing to the occupier, enter any premises to which energy is or has been supplied or is to be supplied, by him, for the purpose of examining and testing the electric wires, fittings, works and apparatus for the use of energy belonging to the consumer.

21. (1) A licensee shall not be entitled to prescribe any special form of appliance for utilizing energy supplied by him, or, save as provided by section 23, sub-section (2), or by section 26, sub-section (7), in any way to control or interfere with the use of such energy

Restrictions on licensee's controlling or interfering with use of energy

Provided that no person may adopt any form of appliance, or use the energy supplied to him, so as unduly or improperly to interfere with the supply by the licensee of energy to any other person.

(2) Where any difference or dispute arises as to whether a licensee has prescribed any appliance or controlled or interfered with the use of energy in contravention of sub-section (1), the matter shall be either referred to an Electric Inspector and decided by him or, if the licensee or consumer so desires, determined by arbitration.

22. Where energy is supplied by a licensee, every person within the area of supply shall, except in so far as is otherwise provided by the terms and conditions of the license, be entitled, on application, to a supply on the same terms as those on which any other person in the same area is entitled in similar circumstances to a corresponding supply.

Obligation on licensee to supply energy.

Provided that no person shall be entitled to demand, or to continue to receive, from a licensee a supply of energy for any premises having a separate supply unless he has agreed with the licensee to pay to him such minimum annual sum as will give him a reasonable return on the capital expenditure, and will cover other standing charges incurred by him in order to meet the possible maximum demand for those premises, the sum payable to be determined in case of difference or dispute by arbitration.

23. (1) A licensee shall not, in making any agreement for the supply of energy, show undue preference to any person, but may, save as aforesaid, make such charges for the supply of energy as may be agreed upon, not exceeding the limits imposed by his license.

(2) No consumer shall, except with the consent in writing of the licensee, use energy supplied to him under one method of charging in a manner for which a higher method of charging is in force.

24. Where any person neglects to pay any charge for energy or any other sum due from him to a licensee in respect of the supply of energy to him, the licensee may, after giving not less than seven clear days' notice in writing to such person and without prejudice to his right to recover such charge or other sum by suit, cut off the supply and for that purpose cut or disconnect any electric supply-line or other works, being the property of the licensee, through which energy may be supplied, and may discontinue the supply until such charge or other sum, together with any expenses incurred by him in cutting off and re-connecting the supply, are paid, but no longer.

Provided that where any difference or dispute has been referred under this Act to an Electric Inspector before notice as aforesaid has been given by the licensee, the licensee shall not exercise the powers conferred by this section until the Inspector has given his decision.

25. Where any electric supply-lines, meters, fittings, works or apparatus belonging to a licensee are placed in or upon any premises, not being in the possession of the licensee, for the purpose of supplying energy, such electric supply-lines, meters, fittings, works and apparatus shall not be liable to be taken in execution under any process of any Civil Court or in any proceedings in insolvency against the person in whose possession the same may be.

26. (1) In the absence of an agreement to the contrary, the amount of energy supplied to a consumer or the electrical quantity contained in the supply shall be ascertained by means of a correct meter, and the licensee shall, if required by the consumer, cause the consumer to be supplied with such a meter:

Meters

Provided that the licensee may require the consumer to give him security for the price of a meter and enter into an agreement for the hire thereof, unless the consumer elects to purchase a meter.

*The Indian Electricity Act, 1910.**(Part II.—Supply of Energy. Part III.—Supply, Transmission and Use of Energy by non-licensees.)*

(2) Where the consumer so enters into an agreement for the hire of a meter, the licensee shall keep the meter correct, and, in default of his doing so, the consumer shall, for so long as the default continues, cease to be liable to pay for the hire of the meter.

(3) Where the meter is the property of the consumer, he shall keep the meter correct, and, in default of his doing so, the licensee may, after giving him seven days' notice, for so long as the default continues, cease to supply energy through the meter.

(4) The licensee or any person duly authorized by the licensee shall, at any reasonable time and on informing the consumer of his intention, have access to, and be at liberty to inspect and test, and for that purpose if he thinks fit, take off and remove, any meter referred to in sub-section (1), and, except where the meter is so hired as aforesaid, all reasonable expenses of, and incidental to, such inspecting, testing, taking off and removing shall, if the meter is found to be otherwise than correct, be recovered from the consumer, and, where any difference or dispute arises as to the amount of such reasonable expenses, the matter shall be referred to an Electric Inspector, and the decision of such Inspector shall be final.

Provided that the licensee shall not be at liberty to take off or remove any such meter if any difference or dispute of the nature described in sub-section (6) has arisen until the matter has been determined as therein provided.

(5) A consumer shall not connect any meter referred to in sub-section (1) with any electric supply-line through which energy is supplied by a licensee, or disconnect the same from any such electric supply-line, without giving to the licensee not less than forty-eight hours' notice in writing of his intention.

(6) Where any difference or dispute arises as to whether any meter referred to in sub-section (1) is or is not correct, the matter shall be decided, upon the application of either party, by an Electric Inspector, or by a competent person specially appointed by the Local Government in this behalf, and, where the meter has, in the opinion of such Inspector or person, ceased to be correct, such Inspector or person shall estimate the amount of the energy supplied to the consumer or the electrical quantity contained in the supply, during such time as the meter shall not, in the opinion of such Inspector or person, have been correct, on the basis of the previous supply, and where the matter has been decided by any person other than the Electric Inspector, an appeal shall lie to the Inspector, whose decision shall in every case be final but, save as aforesaid, the register of the meter shall, in the absence of fraud, be conclusive proof of such amount or quantity.

(7) In addition to any meter which may be placed upon the premises of a consumer in pursuance of the provisions of sub-section (1), the licensee may place upon such premises such meter, maximum demand indicator or other apparatus as he may think fit for the purpose of ascertaining or regulating either the amount of energy supplied to the consumer, or the number of hours during which the supply is given, or the rate per unit of time at which energy is supplied to the consumer, or any other quantity or time connected with the supply:

Provided that the meter, indicator or apparatus shall not, in the absence of an agreement to the contrary, be placed otherwise than between the distributing mains of the licensee and any meter referred to in sub-section (1):

Provided, also, that, where the charges for the supply of energy depend wholly or partly upon the reading or indication of any such meter, indicator or apparatus as aforesaid, the licensee shall, in the absence of an agreement to the contrary, keep the meter, indicator or apparatus correct, and the provisions of sub-sections (4), (5) and (6) shall in that case apply as though the meter, indicator or apparatus were a meter referred to in sub-section (1).

Explanation—A meter shall be deemed to be "correct" if it registers the amount of energy supplied, or the electrical quantity contained in the supply, within the prescribed limits of error, and a maximum demand indicator or other apparatus referred to in sub-section (7) shall be deemed to be "correct" if it complies with such conditions as may be prescribed in the case of any such indicator or other apparatus.

27 Notwithstanding anything in this Act, the Local Government may, by order in writing, and subject to such conditions and restrictions, if any, as it thinks fit to impose, authorise any licensee to supply energy to any person outside the area of supply, and to lay down or place electric supply-lines for that purpose.

Provided, first, that no such authority shall be conferred on the licensee within the area of supply of another licensee without that licensee's consent, unless the Local Government considers that his consent has been unreasonably withheld.

Provided, secondly, that such authority shall not be conferred unless the person to whom the supply is to be given has entered into a specific agreement with the licensee for the taking of such supply.

Provided, thirdly, that a licensee on whom such authority has been conferred shall not be deemed to be empowered outside the area of supply to open or break up any street, or any sewer, drain or tunnel in or under any street, railway or tramway, or to interfere with any telegraph-line, without the written consent of the local authority or person by whom such street, sewer, drain or tunnel is repairable, or of the telegraph-authority, as the case may be.

Provided, fourthly, that, save as aforesaid the provisions of this Act shall apply in the case of any supply authorised under this section as if the said supply were made within the area of supply.

, PART III.

SUPPLY, TRANSMISSION AND USE OF ENERGY BY NON-LICENSEES.

28. (1) No person, other than a licensee, shall engage in the business of supplying energy except with the previous sanction of the Local

Sanction required by non-licensees in certain cases.

*The Indian Electricity Act, 1910.**(Part III.—Supply, Transmission and Use of Energy by non-licensees. Part IV.—General.)*

Government and in accordance with such conditions as the Local Government may fix in this behalf, and any agreement to the contrary shall be void.

Provided that such sanction shall not be given in any case unless the Local Government considers that, having regard to the extent of the proposed supply and the other circumstances of the case, the obtaining of a license under Part II would be attended with undue expense or delay.

Provided also that such sanction shall not be given within the area for which a local authority is constituted, without that local authority's consent, or within the area of supply of any licensee, without that licensee's consent, unless the Local Government considers that consent has been unreasonably withheld.

(2) Where any difference or dispute arises as to whether any person is or is not engaging, or about to engage, in the business of supplying energy within the meaning of sub-section (1), the matter shall be referred to the Local Government, and the decision of the Local Government thereon shall be final.

29 (1) The local authority may, by order in writing, confer and impose upon any person, who has obtained the sanction of the Local Government under section 28 to engage in the business of supplying energy, all or any of the powers and liabilities of a licensee under sections 12 to 19, both inclusive, and the provisions of the said sections shall thereupon apply as if such person were a licensee under Part II.

(2) A local authority, not being a licensee, shall, for the purpose of lighting any street, have the powers and be subject to the liabilities respectively conferred and imposed by sections 12 to 19, both inclusive, so far as applicable, as if it were a licensee under Part II.

(3) In cases other than those for which provision is made by sub-section (1), the person responsible for the repair of any street may, by order in writing, confer and impose upon any person who proposes to transmit energy in such street all or any of the powers and liabilities of a licensee under sections 12 to 19 (both inclusive), in so far as the same relate to—

(a) opening or breaking up of the soil or pavement of such street, or

(b) laying down or placing electric supply-lines in, under, along or across such street, or

(c) repairing, altering or removing such electric supply-lines,

and thereupon the provisions of the said sections shall, so far as aforesaid, apply to such person as if he were a licensee under Part II.

(4) If no order is made within fourteen days after the receipt of an application for the same under sub-section (1) or sub-section (3), the order so applied for shall be deemed to have been refused, and every order, and every refusal to make an order, under sub-section (1) or sub-section (3), shall be subject to revision by the Local Government.

30. (1) No person, other than a licensee duly authorized under the terms of his license, shall transmit or use energy at a rate exceeding two hundred and fifty watts,—

(a) in any street, or

(b) in any place.

(i) in which one hundred or more persons are likely ordinarily to be assembled, or
(ii) which is a factory within the meaning of the Indian Factories Act, 1881, or
(iii) which is a mine within the meaning of the Indian Mines Act, 1901, without giving not less than seven clear days' notice in writing of his intention to the District Magistrate or, in a Presidency-town or Rangoon, to the Commissioner of Police, and complying with such of the provisions of Part IV, and of the rules made thereunder, as may be applicable:

Provided that nothing in this section shall apply to energy used for the public carriage of passengers, animals or goods on, or for the lighting or ventilation of the rolling-stock of, any railway or tramway subject to the provisions of the Indian Railways Act, 1890:

Provided, also, that the Local Government may, by general or special order and subject to such conditions and restrictions as may be specified therein, exempt from the application of this section or of any such provision or rule as aforesaid any person or class of persons using energy on premises upon or in connection with which it is generated, or using energy supplied under Part II in any place specified in clause (b).

(2) Where any difference or dispute arises as to whether a place is or is not one in which one hundred or more persons are likely ordinarily to be assembled, the matter shall be referred to the Local Government, and the decision of the Local Government thereon shall be final.

(3) The provisions of this section shall be binding on the Crown.

PART IV.**GENERAL.***Protective Clauses.*

31 No person shall, in the generation, transmission, supply or use of energy, in any way injure any railway, tramway, canal or water-way or any dock, wharf or pier vested in or controlled by a local authority, or obstruct or interfere with the traffic on any railway, tramway, canal or water-way.

32 (1) Every person generating, transmitting, supplying or using energy (hereinafter in this section referred to as the "operator") shall take all reasonable precautions in constructing, laying down and placing his electric supply-lines and other works and in working his system, so as not injuriously to affect, whether by induction or otherwise, the working of any wire or line used for the purpose of telegraphic, telephonic or electric-signalling communication, or the currents in such wire or line.

(2) Where any difference or dispute arises between the operator and the telegraph-authority as to whether the operator has constructed, laid down or placed his electric supply-lines or other works, or worked his system, in contravention of sub-section (1), or as to whether the working of any wire, line or current is or is

*The Indian Electricity Act, 1910.**(Part IV.—General.)*

not injuriously affected thereby, the matter shall be referred to the Governor General in Council; and the Governor General in Council, unless he is of opinion that the wire or line has been placed in unreasonable proximity to the electric supply-lines or works of the operator after the construction of such lines or works, may direct the operator to make such alterations in, or additions to, his system as may be necessary in order to comply with the provisions of this section, and the operator shall make such alterations or additions accordingly.

Provided that nothing in this sub section shall apply to the repair, renewal or amendment of any electric supply-line so long as the course of the electric supply-line and the amount and nature of the energy transmitted thereby are not altered.

(3) Where the operator makes default in complying with the requirements of this section, he shall make full compensation for any loss or damage incurred by reason thereof, and, where any difference or dispute arises as to the amount of such compensation, the matter shall be determined by arbitration.

Explanation.—For the purposes of this section, a telegraph-line shall be deemed to be injuriously affected if telegraphic, telephonic or electric signalling communication by means of such line is, whether through induction or otherwise, prejudicially interfered with by an electric supply-line or work or by any use made thereof.

33. (1) Every person shall, within twenty-four hours of the occurrence, send to the Electric Inspector, and also to the District Magistrate or, in a Presidency-town or Rangoon, to the Commissioner of Police, notice in writing of any accident in connection with the generation, transmission, supply or use of energy, resulting or likely to have resulted in loss of life or personal injury in any part of such person's works or electric supply-lines, or in connection with the same, and also notice of any loss of life or personal injury actually occasioned by any such accident.

(2) The Local Government may, if it thinks fit, require any Electric Inspector, or any other competent person appointed by it in this behalf, to inquire and report—

(a) as to the cause of any accident affecting the safety of the public, which may have been occasioned by or in connection with the generation, transmission, supply or use of energy, or

(b) as to the manner in, and extent to, which the provisions of this Act or of any license or rules thereunder, so far as those provisions affect the safety of any person, have been complied with.

34. (1) No person shall, in the generation, transmission, supply or use of energy permit any part of his electric supply-lines to be

Prohibition of connection with earth and power for Government to interfere in certain cases of default.

connected with earth except so far as may be prescribed in this behalf or may be specially sanctioned by the Governor General in Council.

(2) If at any time it is established to the satisfaction of the Local Government—

(a) that any part of an electric supply-line is connected with earth contrary to the provisions of sub-section (1), or

(b) that any electric supply-lines or other works for the generation, transmission, supply or use of energy are attended with danger to the public safety or to human life or injuriously affect any telegraph-line, or

(c) that any electric supply-lines or other works are defective so as not to be in accordance with the provisions of this Act or of any rule thereunder,

the Local Government may, by order in writing, specify the matter complained of and require the owner or user of such electric supply-lines or other works to remedy it in such manner as shall be specified in the order, and may also in like manner forbid the use of any electric supply-line or works until the order is complied with or for such time as is specified in the order.

Administration and rules.

35. (1) The Governor General in Council may, for the whole or any part of British India, and each Local Government may, for the whole or any part of the province, by notification in the Gazette of India or the local official Gazette, as the case may be, constitute an Advisory Board.

(2) Every such Board shall consist of a chairman and not less than two other members.

(3) The chairman and, where there are more than two other members, two of the other members, or, where there are only two other members, one of the other members, shall be nominated by the Governor General in Council or the Local Government, as the case may be, and the remaining members shall be nominated by such local authorities, Chambers of Commerce or other Associations as the Governor General in Council or the Local Government, as the case may be, may direct.

(4) The Governor General in Council or the Local Government, as the case may be, may, by general or special order,—

(a) define the duties and regulate the procedure of any such Board,

(b) determine the tenure of office of the members of any such Board, and

(c) give directions as to the payment of fees to, and the travelling expenses incurred by, any member of any such Board in the performance of his duty.

36. (1) The Governor General in Council may, by notification in the Gazette of India, appoint duly qualified persons to be Electric Inspectors, and every Electric Inspector so appointed shall exercise the

* Appointment of Electric Inspectors.

*The Indian Electricity Act, 1910.**(Part IV.—General.)*

powers and perform the functions of an Electric Inspector under this Act within such areas and subject to such restrictions as the Governor General in Council may direct

(2) The Local Government may, by notification in the local official Gazette, appoint duly qualified persons to be Electric Inspectors within such areas as may be assigned to them respectively, and every Inspector so appointed shall exercise the powers and perform the functions of an Electric Inspector under this Act subject to such restrictions as the Local Government may direct.

(3) In the absence of express provision to the contrary in this Act or any rule thereunder, an appeal shall lie from the decision of an Electric Inspector to the Governor General in Council or the Local Government, as the case may be.

37. (1) The Governor General in Council may make rules, for the whole or any part of British India, to regulate the generation, transmission, supply and use of energy, and, generally, to carry out the purposes and objects of this Act.

(2) In particular and without prejudice to the generality of the foregoing power, such rules may—

- (a) prescribe the form of applications for licenses and the payments to be made in respect thereof,
- (b) regulate the publication of notices,
- (c) prescribe the manner in which objections with reference to any application under Part II are to be made,
- (d) provide for the preparation and submission of accounts by licensees in a specified form,
- (e) provide for the securing of a regular, constant and sufficient supply of energy by licensees to consumers and for the testing at various parts of the system of the regularity and sufficiency of such supply, and for the examination of the records of such tests by consumers,
- (f) provide for the protection of persons and property from injury by reason of contact with, or the proximity of, or by reason of the defective or dangerous condition of, any appliance or apparatus used in the generation, transmission, supply or use of energy,
- (g) for the purposes of electric traction regulate the employment of insulated returns, or of uninsulated metallic returns of low resistance, in order to prevent fusion or injurious electrolytic action of or on metallic pipes, structures or substances, and to minimise, as far as is reasonably practicable, injurious interference with the electric wires, supply-lines and apparatus of parties other than the owners of the electric traction system, or with the currents therein, whether the earth is used as a return or not;

(k) provide for preventing telegraph-lines and magnetic observatories or laboratories from being injuriously affected by the generation, transmission, supply or use of energy;

(l) prescribe the qualifications to be required of Electric Inspectors;

(j) authorize any Electric Inspector or other officer of a specified rank and class to enter, inspect and examine any place, carriage or vessel in which he has reason to believe any appliance or apparatus used in the generation, transmission, supply or use of energy to be, and to carry out tests therein, and to prescribe the facilities to be given to such Inspectors or officers for the purposes of such examinations and tests; and

(k) authorize and regulate the levy of fees for any such testing or inspection, and, generally, for the services of Electric Inspectors under this Act.

(3) In making any rule under this Act, the Governor General in Council may direct that every breach thereof shall be punishable with fine which may extend to three hundred rupees, and, in the case of a continuing breach, with a further daily fine which may extend to fifty rupees.

38 (1) The power to make rules under section 37 shall be subject to the condition of the rules being made after previous publication.

(2) The date to be specified in accordance with clause (3) of section 23 of the General Clauses Act, 1897, as that after which a draft of rules proposed to be made under section 37 will be taken into consideration shall not be less than three months from the date on which the draft of the proposed rules was published for general information.

(3) Any rule to be made under this Act shall, before it is published for criticism under subsection (2), be referred to the Advisory Board (if any) constituted for the whole of British India, or, if no such Board has been constituted, then to such Board or Boards (if any) as the Governor General in Council may direct, and the rule shall not be so published until such Board or Boards (if any) has or have reported as to the expediency of making the proposed rule and as to the suitability of its provisions.

(4) All rules made under section 37 shall be published in the Gazette of India, and on such publication shall have effect as if enacted in this Act.

Criminal Offences and Procedure.

39. Whoever dishonestly abstracts, consumes or uses any energy shall be deemed to have committed theft within the meaning of the Indian Penal Code; and the existence of artificial mean for such abstraction shall be prima facie evidence of such dishonest abstraction.

*The Indian Electricity Act, 1910.**(Part IV.—General.)*

40. Whoever maliciously causes energy to be wasted or diverted, or, with intent to cut off the supply of energy, cuts or injures, or attempts to cut or injure, any electric supply-line or works, shall be punishable with imprisonment for a term which may extend to two years, or with fine which may extend to one thousand rupees, or with both.

41. Whoever, in contravention of the provisions of section 28, engages in the business of supplying energy shall be punishable with fine which may extend to three thousand rupees, and, in the case of a continuing contravention, with a daily fine which may extend to three hundred rupees

Penalty for illegal or defective supply or for non-compliance with order.

42 Whoever—

(a) being a licensee, save as permitted under section 27 or section 51 or by his license, supplies energy or lays down or places any electric supply-line or works outside the area of supply; or,

(b) being a licensee, in contravention of the provisions of this Act or of the rules thereunder or in breach of the conditions of his license and without reasonable excuse, the burden of proving which shall lie on him, discontinues the supply of energy or fails to supply energy; or

(c) makes default in complying with any order issued to him under section 34, sub-section (2),

shall be punishable with fine which may extend to one thousand rupees, and, in the case of a continuing offence or default, with a daily fine which may extend to one hundred rupees.

43. Whoever, in contravention of the provisions of section 30, transmits or uses energy without giving the notice required thereby, shall be punishable with fine which may extend to five hundred rupees, and, in the case of a continuing offence, with a daily fine which may extend to fifty rupees.

Penalty for interference with meters or licensee's works and for improper use of energy.

44. Whoever—

(a) connects any meter referred to in section 26, sub-section (1), or any meter, indicator or apparatus referred to in section 26, sub-section (7), with any electric supply-line through which energy is supplied by a licensee, or disconnects the same from any such electric supply-line, without

giving to the licensee forty-eight hours' notice in writing of his intention; or

(b) lays, or causes to be laid, or connects up any works for the purpose of communicating with any other works belonging to a licensee, without such licensee's consent; or

(c) maliciously injures any meter referred to in section 26, sub-section (1), or any meter, indicator or apparatus referred to in section 26, sub-section (7), or wilfully or fraudulently alters the index of any such meter, indicator or apparatus, or prevents any such meter, indicator or apparatus from duly registering; or

(d) improperly uses the energy of a licensee;

shall be punishable with fine which may extend to three hundred rupees, and, in the case of a continuing offence, with a daily fine which may extend to thirty rupees, and the existence of artificial means for making such connection as is referred to in clause (a) or such communication as is referred to in clause (b) or for causing such alteration or prevention as is referred to in clause (c) or for facilitating such improper use as is referred to in clause (d) shall, where the meter, indicator or apparatus is under the custody or control of the consumer, whether it is his property or not, be *prima facie* evidence that such connection, communication, alteration, prevention or improper use, as the case may be, has been knowingly and wilfully caused by such consumer.

45. Whoever maliciously extinguishes any public lamp shall be punishable with imprisonment for a term which may extend to six months, or with fine which may extend to three hundred rupees, or with both.

46 Whoever negligently causes energy to be wasted or diverted, or negligently breaks, throws down or damages any electric supply-line, post, pole or lamp or other apparatus connected with the supply of energy, shall be punishable with fine which may extend to two hundred rupees.

47 Whoever, in any case not already provided for by sections 39 to 46 (both inclusive), makes default in complying with any of the provisions of this Act, or with any order issued under it, or, in the case of a licensee, with any of the conditions of his license, shall be punishable with fine which may extend to one hundred rupees, and, in the case of a continuing default, with a daily fine which may extend to twenty rupees.

Provided that, where a person has made default in complying with any of the provisions of

*The Indian Electricity Act, 1910.**(Part IV.—General.)*

sections 13, 14, 15, 17 and 32, as the case may be, he shall not be so punishable if the Court is of opinion that the case was one of emergency and that the offender complied with the said provisions as far as was reasonable in the circumstances.

48 The penalties imposed by sections 39 to 47 (both inclusive) shall be in addition to, and not in derogation of, any liability in respect of the payment of compensation or, in the case of a licensee, the revocation of his license, which the offender may have incurred.

49. The provisions of sections 39, 40, 44, 45 and 46 shall, so far as they are applicable, be deemed to apply also when the acts made punishable hereunder are committed in the case of energy supplied by or of works belonging to the Government.

50 No prosecution shall be instituted against any person for any offence against this Act or any rule, license or order thereunder, except at the instance of the Government or an Electric Inspector, or of a person aggrieved by the same.

Supplementary.

51. Notwithstanding anything in sections 12 to 16 (both inclusive) and sections 18 and 19 the Governor General in Council may, by order in writing, for the placing of appliances and apparatus for the transmission of energy, confer upon any public officer or licensee, subject to such conditions and restrictions (if any) as the Governor General in Council may think fit to impose, and to the provisions of the Indian Telegraph Act, 1885, any of the powers which the telegraph-authority possesses under that Act, with respect to the placing of telegraph lines and posts for the purposes of a telegraph established or maintained by the Government or to be so established or maintained.

52 Where any matter is, by or under this Act, directed to be determined by arbitration, the matter shall, unless it is otherwise expressly provided in the license of a licensee, be determined by such person or persons as the Local Government may nominate in that behalf on the application of either party, but in all other respects the arbitration shall be subject to the provisions of the Indian Arbitration Act, 1899.

53 (1) Every notice, order or document by or under this Act required or authorized to be addressed to any person may be served by post or left,—

(a) where the Government is the addressee, at the office of the Secretary in the Public Works Department;

(b) where a local authority is the addressee, at the office of the local authority;

(c) where a company is the addressee, at the registered office of the Company or, in the event of the registered office of the Company not being in India, at the head office of the Company in India;

(d) where any other person is the addressee, at the usual or last known place of abode or business of the person.

(2) Every notice, order or document by or under this Act required or authorized to be addressed to the owner or occupier of any premises shall be deemed to be properly addressed if addressed by the description of the "owner" or "occupier" of the premises (naming the premises), and may be served by delivering it, or a true copy thereof, to some person on the premises, or, if there is no person on the premises to whom the same can with reasonable diligence be delivered, by affixing it on some conspicuous part of the premises.

54. Every sum declared to be recoverable by section 5, clause (f), section 6, sub-section (2), section 14, sub-section (2), clause (h), section 16, sub-section (2), section 18, sub-section (2) or sub-section (4), or section 26, sub-section (4), and every fee leviable under this Act, may be recovered, on application to a Magistrate having jurisdiction where the person liable to pay the same is for the time being resident, by the distress and sale of any moveable property belonging to such person.

55. (1) The Local Government may, by general or special order, authorize the discharge of any of its functions under section 13 or section 18, or clause V, sub-clause (2), or clause XIII of the Schedule by an Electric Inspector.

56 No suit, prosecution or other proceeding shall lie against any public officer, or any servant of a local authority, for anything done, or in good faith purporting to be done, under this Act.

57. (1) In section 40, sub-section (1), clause (b), and section 41, sub-section (5), of the Land Acquisition Act, 1894, the term "work" shall be deemed to include electrical energy supplied, or to be supplied, by means of the work to be constructed.

(2) The Local Government may, if it thinks fit, on the application of any person, not being

The Indian Electricity Act, 1910.

(Part IV.—General. The Schedule—Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II, so far as not added to, varied or excepted by the license.)

a company, desirous of obtaining any land for the purposes of his undertaking, direct that he may acquire such land under the provisions of the Land Acquisition Act, 1894, in the same manner and on the same conditions as it might be acquired if the person were a company

58 (r) The Indian Electricity Act, 1903, Repeals and savings is hereby repealed :

Provided that every application for a license made and every license granted under the said Act shall be deemed to have been made and granted under this Act

(s) Nothing in this Act shall be deemed to affect the terms of any license which was granted, or of any agreement which was made, by or with the sanction of the Government for the supply or use of electricity before the commencement of this Act

THE SCHEDULE.

PROVISIONS TO BE DEEMED TO BE INCORPORATED WITH, AND TO FORM PART OF, EVERY LICENSE GRANTED UNDER PART II, SO FAR AS NOT ADDED TO, VARIED OR EXCEPTED BY THE LICENSE

[See section 3, sub-section (2), clause (f)]

Security and accounts

I Where the licensee is not a local authority, Security for execution of works of licensee not being local authority the following provisions as to giving security shall apply, namely —

(a) The licensee shall, within the period fixed in that behalf by his license, or any longer period which the Local Government may substitute therefor by order under section 4, sub-section (3) clause (b), of the Indian Electricity Act, 1910, before exercising any of the powers by the license conferred on him in relation to the execution of works, show, to the satisfaction of the Local Government, that he is in a position fully and efficiently to discharge the duties and obligations imposed upon him by the license throughout the area of supply

(b) The licensee shall also, within the period fixed in that behalf by his license, or any longer period which the Local Government may substitute therefor by order under section 4, sub-section (3), clause (b), of the Indian Electricity Act, 1910, and before exercising any of the powers conferred on him in relation to the execution of works, deposit or secure to the satisfaction of the Local Government such sum (if any) as may be fixed by the license or, if not so fixed, by the Local Government

(c) The said sum deposited or secured by the licensee under the provisions of this clause shall be repaid or released

to him on the completion of the works or at such earlier date or dates and by such instalments, as may be approved by the Local Government.

II. Where the licensee is not a local authority, the following provisions as to the audit of accounts shall apply, namely —

(a) The annual statement of accounts of the undertaking shall, before being rendered under section 11 of the Indian Electricity Act, 1910, be examined and audited by such person as the Local Government may appoint or approve in this behalf, and the remuneration of the auditor shall be such as the Local Government may direct, and his remuneration and all expenses incurred by him in or about the execution of his duties, to such an amount as the Local Government shall approve, shall be paid by the licensee on demand

(b) The licensee shall afford to the auditor, his clerks and assistants, access to all such books and documents relating to the undertaking as are necessary for the purposes of the audit, and shall, when required, furnish to him and them all vouchers and information requisite for that purpose, and afford to him and them all facilities for the proper execution of his and their duty

(c) The audit shall be made and conducted in such manner as the Local Government may direct

(d) Any report made by the auditor, or such portion thereof as the Local Government may direct, shall be appended to the annual statement of accounts of the licensee, and shall thenceforth form part thereof

(e) Notwithstanding the foregoing provisions of this clause, the Local Government may, if it thinks fit, accept the examination and audit of an auditor appointed by the licensee.

III The licensee shall, unless the Local Government otherwise directs, Separate accounts at all times keep the accounts of the capital employed for the purposes of the undertaking distinct from the accounts kept by him of any other undertaking or business

Compulsory works and supply

IV The licensee shall, within a period of three years after the commencement of the license, execute Execution of work after commencement of license to the satisfaction of the

Local Government all such works as may be specified in the license in this behalf or, if not so specified, as the Local Government may, by order in writing issued within six months of the date of the commencement of the license, direct.

The Indian Electricity Act, 1910.

(The Schedule.—Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II, so far as not added to, varied or excepted by the license)

V. (1) Where, after the expiration of two years and six months from the commencement of the license, a requisition is made by six or more owners or occupiers of premises in or upon any street or part of a street within the area of supply or by the Local Government or a local authority charged with the public lighting thereof, requiring the licensee to provide distributing mains throughout such street or part thereof, the licensee shall comply within six months with the requisition, unless,—

Provisions as to laying down of further distributing mains

(a) where it is made by such owners or occupiers as aforesaid, the owners or occupiers making it do not, within fourteen clear days after the service on them by the licensee of a notice in writing in this behalf, tender to the licensee a written contract duly executed and with sufficient security binding themselves to take, or guaranteeing that there shall be taken, a supply of energy for not less than two years to such amount as will in the aggregate produce annually, at the current rates charged by the licensee, a reasonable return to the licensee, or,

(b) where it is made by the Local Government or a local authority, the Local Government or local authority, as the case may be, does not, within the like period, tender a like contract binding itself to take a supply of energy for not less than seven years for the public lamps in such street or part thereof

(2) Where any diffidence or dispute arises between the licensee and such owners or occupiers as to the sufficiency of the security offered under this clause, or as to the amount of energy to be taken or guaranteed as aforesaid, the matter shall be referred to the Local Government and either decided by it or, if it so directs, determined by arbitration.

(3) Every requisition under this clause shall be signed by the maker or makers thereof and shall be served on the licensee

(4) Every requisition under this clause shall be in a form to be prescribed by rules under the Indian Electricity Act, 1910, and copies of the form shall be kept at the office of the licensee and supplied free of charge to any applicant

VI (1) Where a requisition is made by the owner or occupier of any premises situate within one hundred yards from any distributing main requiring the licensee to supply energy for such premises, the licensee shall, within one month from the making of the requisition, supply, and, save in so far as he is prevented from doing so by cyclones, floods, storms or other occurrences beyond his control, continue to supply, energy in accordance with the requisition :

Provided, first, that the licensee shall not be bound to comply with any such requisition unless and until the person making it—

(a) within fourteen days after the service on him by the licensee of a notice in writing in this behalf, tenders to the licensee a written contract, in a form approved by the Local Government, duly executed and with sufficient security, binding himself to take a supply of energy for not less than two years to such amount as will produce, at current rates charged by the licensee, a reasonable return to the licensee, and,

(b) if required by the licensee so to do, pays to the licensee the cost of so much of any service line as may be laid down or placed for the purposes of the supply upon the property in respect of which the requisition is made, and of so much of any service-line as it may be necessary for the said purposes to lay down or place beyond one hundred feet from the licensee's distributing main, although not on that property

Provided, secondly, that the licensee shall be entitled to discontinue such supply—

(a) if the owner or occupier of the property to which the supply is made has not already given security, or if any security given by him has become invalid or insufficient, and such owner or occupier fails to furnish security or to make up the original security to a sufficient amount, as the case may be, within seven days after the service upon him of notice from the licensee requiring him so to do, or

(b) if the owner or occupier of the property to which the supply is made adopts any appliance, or uses the energy supplied to him by the licensee for any purposes, or deals with it in any manner, so as unduly or improperly to interfere with the efficient supply of energy to any other person by the licensee, or

(c) if the electric wires, fittings, works and apparatus in such property are not in good order and condition, and are consequently likely to affect injuriously the use of energy by the licensee, or by other persons, or

(d) if the owner or occupier makes any alterations of, or additions to, any electric wires, fittings, works or apparatus within such property as aforesaid, and does not notify the same to the licensee before the same are connected to the source of supply, with a view to their being examined and tested

Provided, thirdly, that the maximum rate per unit of time at which the owner or occupier shall be entitled to be supplied with energy shall not exceed what is necessary for the maximum consumption on his premises, and, where the owner or occupier has required a license to supply him at a specified maximum rate, he shall not be entitled to alter that maxi-

The Indian Electricity Act, 1910.

(The Schedule.—Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II, so far as, not added to, varied or excepted by the license.)

num, except after one month's notice in writing to the licensee, and the licensee may recover from the owner or occupier any expenses incurred by him by reason of such alteration in respect of the service-lines by which energy is supplied to the property beyond one hundred feet from the licensee's distributing main, or in respect of any fittings or apparatus of the licensee upon that property and

Provided, fourthly, that, in the event of any requisition being made for a supply of energy from any distributing main of which the licensee can prove, to the satisfaction of an Electric Inspector,—

(a) that it is already loaded up to its full current-carrying capacity, or

(b) that, in case of a larger amount of current being transmitted by it, the loss of pressure will seriously affect the efficiency of the supply to other consumers in the vicinity,

the licensee may refuse to accede to the requisition for such reasonable period, not exceeding six months, as such Inspector may think sufficient for the purpose of amending the distributing main or laying down or placing a further distributing main

(2) Any service line laid for the purpose of supply in pursuance of a requisition under sub-clause (1) shall, notwithstanding that a portion of it may have been paid for by the person making the requisition, be maintained by the licensee.

(3) Where any difference or dispute arises as to the amount of energy to be taken or guaranteed as aforesaid, or as to the cost of any service-line or as to the sufficiency of the security offered by any owner or occupier, or as to the improper use of energy, or as to any alleged defect in any wires, fittings, works or apparatus, or as to the amount of the expenses incurred under the third proviso to sub-clause (1), the matter shall be referred to an Electric Inspector and decided by him.

(4) Every requisition under this clause shall be signed by the maker or makers thereof and shall be served on the licensee.

(5) Every requisition under this clause shall be in a form to be prescribed by rules under the Indian Electricity Act, 1910, and copies of the form shall be kept at the office of the licensee and supplied free of charge to any applicant.

VII. (1) Where an application is made by any person for laying the supply of energy within the area of supply, for any premises not situate within one hundred yards from any distributing main, or in any street in which distributing mains have not already been laid down or placed, and where a special agreement has been entered into to give and receive such supply, the licensee shall, before commencing to lay down or place in any such street any electric supply-line serve upon the local authority (if any) and

upon the owner or occupier of all premises abutting on so much of the street as lies between the points of origin and termination of the electric supply-line so to be laid down or placed a notice stating that the licensee intends to lay down or place the electric supply-line, and intimating that, if within the said period the local authority or any two or more of such owners or occupiers require in accordance with the provisions of the license that a supply shall be given for any public lamps or to their premises, as the case may be, the necessary distributing main will be laid down or placed by the licensee at the same time as the electric supply-line intended for the particular person

(2) Where any such special agreement as is referred to in sub-clause (1) has been entered into between the licensee and any person, the licensee shall supply, and, save in so far as he is prevented from doing so by cyclones, floods, storms or other occurrences beyond his control, continue to supply energy in such quantities as may have been agreed upon, and the provisions contained in the first, second, third and fourth provisos to sub-clause (1) and in sub-clauses (2) and (3) of clause VI shall, so far as may be, apply to every case in which energy is supplied under this clause as if such person had made a requisition under clause VI

VIII. (1) Where a requisition is made by the Supply for public Local Government or by lamps a local authority requiring the licensee to supply for a period of not less than seven years energy for any public lamps within the distance of one hundred yards from any distributing main, the licensee shall supply, and, save in so far as he is prevented from doing so by cyclones, floods, storms or other occurrences beyond his control, continue to supply energy for such lamps in such quantities as the Local Government or the local authority, as the case may be, may require

(2) The provisions of sub-clause (b) of the first proviso, of sub-clauses (c) and (d) of the second proviso, and of the third and fourth provisos to sub-clause (1) and the provisions of sub-clauses (2) and (3) of clause VI shall, so far as may be, apply to every case in which a requisition for the supply of energy is made under this clause as if the Local Government or local authority were an owner or occupier within the meaning of those provisions.

Supply by bulk-licensees.

IX (1) Where, and in so far as, the licensee Special provisions (hereinafter in this clause applying to supply by referred to as "the bulk-bulk licensees licensee") is authorized by his license to supply energy to other licensees for distribution by them (hereinafter in this clause referred to as "distributing licensees"), the following provisions shall apply, namely.—

(a) any distributing licensees within the bulk-licensee's area of supply may make a requisition on the bulk-

The Indian Electricity Act, 1910.

(The Schedule — Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II, so far as not added to, varied or excepted by the license)

licensee requiring him to give a supply of energy and specifying the point, and the maximum rate per unit of time, at which such supply is required, and the date upon which the supply is to commence, such date being fixed after the date of receipt of the requisition so as to allow an interval that is reasonable with regard to the locality and to the length of the electric supply-line and the amount of the plant required,

- b) such distributing-licensee shall, if required by the bulk-licensee so to do, enter into a written agreement to receive and pay for a supply of energy for a period of not less than seven years of such an amount that the payment to be made for the same at the rate of charge for the time being charged for such supply shall not be less than such an amount as will produce a reasonable return to the bulk licensee on the outlay (excluding expenditure on generating plant then existing and any electric supply-line then laid down or placed) incurred by him in making provision for such supply,
- c) the maximum rate per unit of time at which a distributing-licensee shall be entitled to be supplied with energy shall not exceed what is necessary for the purposes for which the supply is required by him, and need not be increased except upon a fresh requisition made in accordance with the foregoing provisions,
- d) if any difference or dispute arises under this clause, it shall be determined by arbitration, and, in the event of such arbitration, the arbitrator shall have regard to the following amongst other considerations, namely:—

- (i) the period for which the distributing-licensee is prepared to bind himself to take energy,
- (ii) the amount of energy required and the hours during which the bulk-licensee is to supply it
- (iii) the capital expenditure incurred or to be incurred by the bulk-licensee in connection with the aforesaid supply of energy, and
- (iv) the extent to which the capital expended or to be expended by the bulk-licensee in connection with such supply may become unproductive upon the discontinuance thereof.

(2) Notwithstanding anything in sub-clause (1), the bulk-licensee shall give a supply of

energy to any distributing-licensee within his area of supply applying therefor, even although the distributing-licensee desires to be supplied with only a portion of the energy required for distribution by him.

Provided that the distributing-licensee shall, if so required by the bulk-licensee, enter into an agreement to take such energy upon special terms (including a minimum annual sum to be paid to the bulk-licensee) to be determined, if necessary, by arbitration in the manner laid down in sub-clause (1) (d)

(3) The maximum price fixed by a license for energy supplied to a distributing-licensee shall not apply to any partial supply given under sub-clause (2)

(4) Every distributing-licensee, who is supplied with energy by a bulk-licensee and intends to discontinue to receive such supply, shall give not less than twelve months' notice in writing of such intention to the bulk-licensee

Provided that, where the distributing-licensee has entered into a written agreement with the bulk-licensee to receive and pay for a supply of energy for a certain period, such notice shall be given so as not to expire before the end of that period

Charges

X In the absence of an agreement to the contrary, the licensee may charge for energy supplied by him to any consumer—

- (a) by the actual amount of energy so supplied, or
- (b) by the electrical quantity contained in the supply, or
- (c) by such other method as may be approved by the Local Government:

Provided, first, that, where the licensee charges by any method so approved by the Local Government, any consumer who objects to that method may, by not less than one month's notice in writing, require the licensee to charge him, at the licensee's option, either by the actual amount of energy supplied to him or by the electrical quantity contained in the supply, and thereafter the licensee shall not, except with the consent of the consumer, charge him by another method

Provided, secondly, that, before commencing to supply energy through any distributing main, the licensee shall give notice, by public advertisement, of the method by which he proposes to charge for energy so supplied, and, where the licensee has given such notice, he shall not be entitled to change that method of charging without giving not less than one month's notice in writing of such change to the Local Government, and to every consumer of energy who is supplied by him from such distributing main:

The Indian Electricity Act, 1910.

(The Schedule.—Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II, so far as not added to, varied or excepted by the license)

Provided, thirdly, that, if the consumer is provided with a meter in pursuance of the provisions of section 26, sub-section (1), of the Indian Electricity Act, 1910, and the licensee changes the method of charging the energy supplied by him from the distributing main, the licensee shall bear the expense of providing a new meter, or such other apparatus as may be necessary by reason of the new method of charging.

XI. Save as provided by clause IX, sub-clause (3), the prices charged by the licensee for energy supplied by him shall not exceed the maxima fixed by his license, or, in the case of a method of charge approved by the Local Government, such maxima as the Local Government shall fix on approving the method.

Provided that, if, at any time after the expiration of seven years from the commencement of the license, the Local Government considers or is satisfied that the maxima so fixed or approved as aforesaid should be altered, it may, after such inquiry (if any) as it thinks fit, make an order accordingly, which shall have effect from such date as may be mentioned therein.

Provided, also, that, where an order in pursuance of the foregoing proviso has been made, no further order altering the maxima fixed thereby shall be made until the expiration of another period of five years.

XII. The price to be charged by the licensee and to be paid to him for energy supplied for the public lamps, and the mode in which those charges are to be ascertained, shall be settled by agreement between the licensee and the Local Government or the local authority, as the case may be, and, where any difference or dispute arises, the matter shall be determined by arbitration.

Testing and inspection

XIII. The licensee shall establish at his own expense testing stations and keep in proper condition such number of testing instruments for testing stations, situated at such places within reasonable distance from any distributing main, as the Local Government may direct for the purpose of testing the pressure or periodicity of the supply of energy in the distributing main, and shall supply and keep in proper condition thereat, and on all premises from which he supplies energy, such instruments for testing as an Electric Inspector may approve, and shall supply energy to each testing station for the purpose of testing.

XIV. The licensee shall afford all facilities for inspection and testing of his works and for the reading, testing and inspection of his instruments, and may, on each occasion of the testing of his works or the reading, testing or inspection of any instruments, be represented by an agent, who may be present, but shall not interfere with the reading, testing or inspection.

XV. On the occasion of the testing of any works of the licensee by an Electric Inspector, reasonable notice thereof shall be given to the licensee, and the testing shall be carried out at such suitable hours as, in the opinion of the Electric Inspector, will least interfere with the supply of energy by the licensee, and in such manner as the Electric Inspector may think fit; but, except under the provisions of an order made in each case in that behalf by the Local Government, the Electric Inspector shall not be entitled to have access to, or interfere with, the works of the licensee at any points other than those at which the licensee himself has access to the same.

Provided that the licensee shall not be held responsible for any interruption or irregularity in the supply of energy which may be occasioned by, or required by the Electric Inspector for the purpose of, any such testing as aforesaid:

Provided, also, that the testing shall not be made in regard to any particular portion of the works oftener than once in any three months, unless in pursuance of an order made in each case in that behalf by the Local Government.

Plans.

XVI. (1) The licensee shall, after commencing to supply energy, forthwith cause a plan to be made of the area of supply, and shall cause to be marked thereon the alignment and the approximate height above or depth below the surface of all his then existing electric supply-lines, street-distributing boxes and other works, and shall once in every year cause that plan to be duly corrected so as to show the electric supply-lines, street-distributing boxes and other works for the time being in position. The licensee shall also, if so required by an Electric Inspector, cause to be made sections showing the approximate level of all his existing underground works other than service-lines.

(2) Every such plan shall be drawn to a scale which shall not be smaller than sixteen inches to the mile.

(3) Every such section shall be drawn to a horizontal scale which shall not be smaller than sixteen inches to the mile and to a vertical scale which shall not be smaller than one inch to eight feet.

(4) Every plan and section so made or corrected, or a copy thereof, marked with the date when it was so made or corrected, shall be kept by the licensee at his principal office or place of business within the area of supply, and shall at all reasonable times be open to the inspection of all applicants, and copies thereof shall be supplied on such terms and conditions as may be prescribed by rules under the Indian Electricity Act, 1910.

(5) The licensee shall, if required by an Electric Inspector and where the licensee is

The Indian Electricity Act, 1910.

(The Schedule.—Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II, so far as not added to, varied or excepted by the license)

not a local authority, by the local authority (if any) concerned, supply free of charge to such Electric Inspector or local authority, a copy of every such plan or section duly corrected so as to agree with the original kept at the principal office or place of business of the licensee

Additional notice of certain works.

XVII On the day next preceding the commencement of any such works as are referred to in section 13 of the Indian

Notice to Electric Inspector

Electricity Act, 1910, the licensee shall, in addition to any other notices which he may be required to give, serve upon the Electric Inspector, or such officer as the Local Government may appoint in this behalf for the area of supply, a notice in writing stating that he is about to commence the works, and the nature and position of the same.

J. M. MACPHERSON,

Secretary to the Government of India

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 18th March, 1910, and is hereby promulgated for general information —

ACT NO. X OF 1910.

An Act to consolidate and amend the law relating to the Indian Museum.

WHEREAS it is expedient to consolidate and amend the law relating to the Indian Museum; It is hereby enacted as follows:—

Preliminary

1. (1) This Act may be called the Indian Museum Act, 1910.

Short title and commencement

(2) It shall come into force on such date as the Governor General in Council, by notification in the Gazette of India, may direct

Incorporation of the Trustees

2 (1) The Trustees of the Indian Museum (hereinafter called the Trustees) shall be—

(a) the six persons for the time being performing the duties of the following offices, namely —

- (i) the Accountant General of Bengal,
- (ii) the Principal, Government School of Art, Calcutta;
- (iii) the Director, Geological Survey of India;

(iv) the Superintendent of the Zoological and Anthropological Section of the Museum,

(v) the Director General of Archaeology, and

(vi) the Officer in charge of the Industrial Section of the Museum,

(b) one other person to be nominated by the Governor General in Council;

(c) three other persons to be nominated by the Lieutenant-Governor of Bengal,

(d) one other person to be nominated by the Council of the Asiatic Society of Bengal,

(e) one other person to be nominated by the Bengal Chamber of Commerce,

(f) one other person to be nominated by the British Indian Association, Calcutta

(g) one other person to be nominated by the Syndicate of the Calcutta University; and

(h) three other persons to be nominated by the Trustees,

(2) The Trustees shall be a body corporate, by the name of "The Trustees of the Indian Museum," with perpetual succession and a common seal, and in that name shall sue and be sued, and shall have power to acquire and hold property, to enter into contracts, and to do all acts necessary for and consistent with the purposes of this Act.

(3) The nominated Trustees shall, save as herein otherwise provided, hold office for a period of three years

Provided that the authority nominating a Trustee may extend his term of office for one or more like periods

- (1) The powers of the said body corporate may only be exercised so long and so often as there are nine members thereof
- Minimum number of Trustees and quorum
- Every quorum necessary for the transaction of business at a meeting of the Trustees shall not be less than six

Power to appoint new Trustees. 4 If a nominated Trustee—

- (a) dies, or
- (b) is absent from the meetings of the Trustees for more than twelve consecutive months, or
- (c) desires to be discharged, or
- (d) refuses or becomes incapable to act, or
- (e) is appointed to perform the duties of any office specified in section 2, clause (a),

the authority which nominated the Trustee may nominate a new Trustee in his place

5 From the commencement of this Act the term of office of all persons appointed to be Trustees under the Indian Museum Act, 1876, shall cease

Property and powers of the Trustees.

6 (1) All the property, whether moveable or immovable, which at the commencement of this Act is held by the Trustees of the Indian Museum constituted by the Indian Museum Act, 1876, on trust for the purposes of the said Museum shall together with any such property which may hereinafter be given, bequeathed, transferred or acquired for the said purposes, vest in the Trustees of the Indian Museum constituted by this Act on trust for the purposes of the said Museum

Provided that the Trustees may expend the capital of any portion of such property which may consist of money on the maintenance, improvement and enlargement of the collections deposited in, presented to or purchased for the said Museum or otherwise for the purposes of the same as they may think fit

(2) The Trustees shall have the exclusive possession, occupation and control, for the purposes of such trust, of the land specified in the schedule, including any buildings which may have been, or may hereafter be, erected thereon, other than the portions thereof which have been set apart by the Trustees for the records and offices of the Geological Survey of India

7 Subject to the provisions of any bye-laws made in this behalf, the Trustees may, from time to time,—

- (a) deliver, by way of loan, to any person the whole or any portion of, or any article contained in, any collection vested in them under this Act;

(b) exchange or sell duplicates of articles contained in any such collection and take or purchase, in the place of such duplicates, such articles as may in their opinion be worthy of preservation in the Museum,

(c) present duplicates of articles contained in any such collection to other Museums in British India, and

(d) remove and destroy any article contained in any such collection.

8 (1) The Trustees may from time to time, with the previous sanction of the Governor General in Council, make bye-laws consistent with this Act for any purpose necessary for the execution of their trust

(2) In particular, and without prejudice to the generality of the foregoing power, such rules may provide for—

- (a) the summoning, holding and adjournment of general and special meetings of the Trustees,
- (b) the securing of the attendance of Trustees at such meetings,
- (c) the provision and keeping of minute-books and account-books,
- (d) the compiling of catalogues,
- (e) the lending of articles contained in the collections vested in the Trustees;
- (f) the exchange and sale, and the presentation to other Museums in British India, of duplicates of articles contained in such collections,
- (g) the removal and destruction of articles contained in such collections; and
- (h) the general management of the Museum.

9 Subject to such regulations and conditions as may be prescribed by them in this behalf the Trustees shall appoint such officers and servants as may be necessary or proper for the care or management of the trust-property, and may assign to such officers and servants such pay as they may think fit.

Provided that—

- (a) no officer shall be appointed—
 - (i) if such officer is, at the date of his appointment, in India, without the approval of the Governor General in Council, or
 - (ii) if such officer is not then in India, without the approval of the Secretary of State for India in Council; and
- (b) no new office shall be created, and no salaries of officers shall be altered, without the previous sanction of the Governor General in Council.

Duties of the Trustees.

10. (1) The Trustees shall furnish on or before the first day of December in each year—
Trustees to furnish annual reports and accounts.

- (a) to the Government of India a report of their several proceedings for the previous financial year, and
- (b) to such auditor as the Governor General in Council appoints in this behalf, accounts of all moneys expended by the Trustees during the previous financial year, supported by the necessary vouchers.

(2) The Trustees shall cause such report and accounts to be published annually for general information.

11. (1) The Trustees shall cause every collection of article in the collections Asiatic Society to be in the said Indian kept distinguished in Museum formerly belonging to the Asiatic Society of Bengal and all additions that may hereafter be made thereto otherwise than by purchase under section 6, to be marked and numbered and (subject to the provisions contained in sections 7 and 16) to be kept and preserved in the said Museum with such marks and numbers.

(2) An inventory of such additions shall be made by the said Society, one copy whereof shall be signed by the Trustees and delivered to the said Society, and another copy shall be signed by the Council of the said Society and delivered to the Trustees, and shall be kept by them along with the inventory delivered to the predecessors in office of the Trustees when the said collections were deposited in the said Museum.

12 All objects taken in exchange and articles purchased under section 7 and all moneys realised from sales made in accordance with the terms of the same section shall be held on trust and subject to powers and declarations corresponding as nearly as may be with the trusts, powers and declarations by this Act limited and declared.

Supplemental Provisions

13. All officers and servants appointed under this Act shall be deemed to be public servants within the meaning of the Indian Penal Code, and, so far as regards their salaries, allowances and pensions and their leave of absence from duty, they shall be subject to the rules which under the Civil Service Regulations for the time being in force would be applicable if their service was service under Government.

14. Notwithstanding anything hereinbefore contained, the Trustees may, if they think fit, with the previous sanction of the Governor General in Council, and

subject in each case to such conditions as he may approve and to such rules as he may prescribe, assume the custody and administration of collections which are not the property of the Trustees for the purposes of their trust under this Act and keep and preserve such collections either in the Indian Museum or elsewhere.

Provided that if the trust constituted by this Act is at any time determined, such collections shall not by reason of their not being in the Indian Museum become the property of His Majesty.

15 The Trustees may, with the previous sanction of the Governor General in Council, and subject to such conditions as he may approve, deliver possession of the whole or any part of the property described in the schedule to such person as the Lieutenant-Governor of Bengal may appoint in that behalf.

16 If the trust constituted by this Act is at any time determined,—

- (a) the collections and additions mentioned in section 11 shall become the property of the said Asiatic Society or their assigns, and
- (b) all the other collections then in the said Indian Museum shall, save as otherwise provided by section 14, become the property of His Majesty.

17 The Indian Museum Act, 1876, and the Indian Museum Act, 1887, are hereby repealed.

THE SCHEDULE

(See sections 6 and 15.)

Land bounded—

- on the north side by the premises No. 2, Sudder Street, and by Sudder Street,
 - on the west side by Chowringhee Road and by the premises No. 29 Chowringhee Road (occupied by the Bengal United Service Club),
 - on the south side by the premises No. 29, Chowringhee Road, by Kyd Street, and by the premises No. 4, Chowringhee Lane, and
 - on the east side by the premises No. 15, Kyd Street, and the premises Nos. 4, 3, 2 and 1, Chowringhee Lane,
- together with all buildings, roads and tanks existing or erected thereon, and all easements appertaining thereto.

J. M. MACPHERSON,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 18th March, 1910, and is hereby promulgated for general information:

ACT NO XI OF 1910.

An Act to amend the Central Provinces Courts Act, 1904.

WHEREAS it is expedient to amend the Central Provinces Courts Act, 1904, It is hereby enacted as follows —

1 This Act may be called the Central Provinces Courts (Amendment) Act, 1910

2 For Chapter II of the Central Provinces Courts Act, 1904, the following shall be substituted, namely —

"CHAPTER II

"THE COURT OF THE JUDICIAL COMMISSIONER.

"3 The Court of the Judicial Commissioner of the Central Provinces shall be the highest Civil Court of Appeal, and, except in reference to proceedings against Euro-

pean British subjects and persons jointly charged with European British subjects, the highest Court of Criminal appeal and revision in and for the territories to which this Act extends.

"4 (1) The Court of the Judicial Commissioner shall consist of three or more Judges, one of whom shall be the Judicial Commissioner of the Central Provinces who shall be appointed by the Governor General in Council, and the others Additional Judicial Commissioners who shall be appointed by the Local Government with the previous sanction of the Governor General in Council

(2) Every person appointed under this section shall hold his office during the pleasure of the Governor General in Council

"4A (1) The Judicial Commissioner, whether permanent or officiating, shall have rank and precedence before the other Judges of his Court

(2) The Additional Judicial Commissioners shall have rank and precedence among themselves according to the seniority of their appointment as such Additional Judicial Commissioners

Provided that an Additional Judicial Commissioner permanently appointed shall be deemed to be senior to and to have rank and precedence before an officiating Judge

(3) In this Act the expression 'the senior Judge' shall mean the Judge for the time being entitled to the first place in rank and precedence

Exercise of jurisdiction by Judges of Court of Judicial Commissioner
 "(1) Except as otherwise provided by this Act or by any other enactment for the time being in force, and subject to any rules made under this Act, the jurisdiction of the Court of the Judicial Commissioner may be exercised by a single Judge of the Court

(2) The Court of the Judicial Commissioner may, with the sanction of the Local Government, make rules to provide, in such manner as it thinks fit, for the exercise of any of its powers by a bench of two or more Judges of the Court

"5A (1) The Court of the Judicial Commissioner may make rules declaring what number of benches Judges, not being less than three, shall constitute a full bench of the Court of the Judicial Commissioner, and may by such rules prescribe the mode of determining which Judges shall sit as a full bench when a full bench sitting becomes necessary

(2) Subject to the provisions of sub-section (1), the Judicial Commissioner may determine which Judge in each case or class of cases shall sit alone and which Judges shall constitute any bench

Power of Judicial Commissioner to transfer cases
 "5B The Judicial Commissioner may transfer any case, whether the hearing has or has not commenced, from the file of any Judge sitting alone to his own file or to that of any other Judge of the Court

Power to refer question to full bench
 "5C Any single Judge of the Court of the Judicial Commissioner, and any bench of Judges thereof of not being a full bench, may refer for the decision of a bench of two Judges or of a full bench any question of law or custom having the force of law, or of the construction of any document, or of the admissibility of any evidence arising in any case before the Judge or bench, and shall dispose of the case in accordance with the decision of the bench to which the question has been referred.

Appeals
 "6 A Judge of the Court of the Judicial Commissioner shall when sitting as a bench of three or more Judges of that Court, but not otherwise, be competent to try any appeal from a decree, order or sentence passed by himself, whether in a civil or criminal matter and to adjudicate upon any proceeding connected with or arising out of such decree, order or sentence notwithstanding anything contained in section 556 of the Code of Criminal Procedure, 1898.

"6A. Except as otherwise provided by any enactment for the time being in force,—
 Rule of decision where Judges differ.

(a) where there is a difference of opinion among the Judges composing any bench of the Court of the Judicial Commissioner, the decision shall be in accordance with the opinion of the majority of those Judges,

(b) if there is no such majority, then,—

(i) if the bench is a full bench, the decision shall be in accordance with the opinion of the senior Judge of the bench

(ii) in other cases, the bench before which the difference has arisen shall refer it to another Judge of the Court and shall dispose of the case in accordance with the decision of such Judge

"7. (1) The Registrar of the Court of the Registrar and Judicial Commissioner shall be appointed by the Local Government

(2) The ministerial officers of the said Court shall be appointed by the Judicial Commissioner

"8 (1) In addition to any other powers to Power to Court of make rules expressly or Judicial Commissioner by implication conferred on the Court of the Judicial Commissioner, with the previous sanction of the Local Government, may, from time to time, by notification in the local official Gazette, make rules consistent with this Act and any other enactment for the time being in force,—

(a) declaring what persons shall be permitted to practise as petition-writers in the Courts, regulating the conduct of the business of persons so practising and determining the authority by which breaches of rules under this clause shall be tried,

(b) providing for the translation of any papers filed or produced in the Court of the Judicial Commissioner, and for the payment of the expenses thereby incurred,

(c) regulating the procedure in cases where any person applies to inspect a record of any Court or to obtain a copy of the same, and prescribing the fees payable by such persons for searches and copies,

(d) prescribing the travelling and other expenses to be allowed to witnesses in civil cases, and the fees to be allowed to Commissioners appointed by Civil Courts,

(e) conferring and imposing on the ministerial officers of the Court of the Judicial Commissioner and of the Courts

subordinate thereto such powers and duties of a non-judicial or quasi-judicial nature as it thinks fit, and regulating the mode in which powers and duties so conferred and imposed shall be exercised and performed ;

- (f) prescribing forms to be used in the subordinate Courts for such proceedings, books, entries, statistics and accounts as it thinks necessary ;
- (g) providing for the visitation and inspection of the subordinate Courts, and the supervision of the working thereof ; and
- (h) regulating all such matters as it may think fit with a view to promoting the efficiency of the judicial and ministerial officers of the Court of the Judicial Commissioner and of the subordinate Courts and maintaining proper discipline among those officers

(2) Whoever commits a breach of any rule made under sub-section (1), clause (a), shall be punishable with fine which may extend to fifty rupees

"9 The Court of the Judicial Commissioner shall keep such registers, books and accounts, returns, statements and reports as may be necessary for the transaction of the business of the Court, and shall comply, in such form and manner as the Local Government may deem proper, with any requisitions which the Local Government may make for records of, or papers belonging to, the Court of the Judicial Commissioner or any Civil Court subordinate thereto, or for certified copies of, or extracts from, such records or papers, or for returns, statements or reports."

3 In section 13, sub-section (1), of the said Amendment of Act, the following alterations shall be made, namely —

- (i) in sub-clause (a), for the words "five hundred" the words "one thousand" shall be substituted, and
- (ii) in sub-clause (b), for the word "five" the word "ten" shall be substituted.

4 For section 14 of the said Act the following substitution of new section shall be substituted, namely —

"14. The Local Government may, by notification in the local official Gazette, invest any District Court or any Court of a Subordinate Judge or

of a Munsif with the powers of a Court of Small Causes under the Provincial Small Causes Courts Act 1887, up to such value not exceeding five hundred rupees in the case of a District Court or of the Court of a Subordinate Judge or one hundred rupees in the case of the Court of a Munsif as it thinks fit, to be exercised in cases arising within the limits of the Court's jurisdiction or in any specified area within such limits, and may withdraw any powers so conferred."

5. For section 15, clause (b), of the said Amendment of Act, the following shall be substituted, namely :—

"(b) an appeal from the decree or order of the Court of a Subordinate Judge shall lie —

- (i) where the value of the suit in such Court does not exceed one thousand rupees, to the District Court,
- (ii) where the value of such suit exceeds one thousand rupees but does not exceed five thousand rupees, to the Divisional Court, and
- (iii) where the value of such suit exceeds five thousand rupees, to the Court of the Judicial Commissioner."

6 In section 17 of the said Act, the following addition of new sub-section to section 17, Act II, 1904 shall be inserted, namely —

"(2) The Judicial Commissioner or an Additional Judicial Commissioner appointed by him shall from time to time visit, and inspect the proceedings of, the Civil Courts subordinate to the Court of the Judicial Commissioner, and shall give such directions on matters not provided for by law as may be necessary to secure the due administration of justice."

7 In section 22, sub-section (2), and section 26, sub-section (1), of the said Act, for the word "the Judicial Commissioner" the words "the Court of the Judicial Commissioner" shall be substituted.

PART V.

Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council, and Bills published under Rule 28.

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 18th March, 1910:—

NO. 7 OF 1910.

A Bill to amend the Law relating to Glanders and Farcy.

WHEREAS it is expedient to amend the law relating to Glanders and Farcy, It is hereby enacted as follows:—

1. This Act may be called the Glanders and Farcy Law Amendment Act, 1910.

Short title

2 Part II of the Second Schedule to the Repeal of part of Repealing and Amending Schedule II, Act XI, Act, 1901, is hereby repealed.

3 In section 3 of the Glanders and Farcy Amendment of Act, 1899, after the word section 3, Act XIII, "any provision of the 1899. Act," the words "so far as all or any of the diseases mentioned in, or specified in a notification under section 2, sub-section (1), are concerned," shall be inserted.

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to amend the Glanders and Farcy Act (XIII of 1899) as amended by Act XI of 1901. Section 2 (1) of the Act empowers the Government of India to notify the application of the Act to dangerous epidemic diseases among horses, other than glanders and farcy, either generally or in respect of any local area. In paragraph 329 of their Report the Royal Commission upon Decentralization recommended that when once a disease has been notified by the Government of India as one that may properly be dealt with under the Act, discretion should be left to Local Governments as to the specific application of the law in respect thereto. This recommendation has been accepted and is given effect to in the Bill.

J. O. MILLER.

The 12th March 1910.

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 18th March, 1910.—

NO 8 OF 1910.

A Bill to amend the Prisons Act, 1894.

WHEREAS it is expedient to amend the Prisons Act, 1894, It is hereby enacted as follows.—

1. This Act may be called the Prisons (Amendment) Act, 1910.

Short title

2 In section 52 of the Prisons Act, 1894, the following amendments shall be made, namely:—

- (1) after the words "Magistrate of the first class" the words "or Presidency Magistrate" shall be inserted; and
- (2) for the first proviso the following shall be substituted, namely:—

"Provided that any such case may be transferred for inquiry and trial by the District Magistrate to any Magistrate of the first class and by a Chief Presidency Magistrate to any other Presidency Magistrate, and".

STATEMENT OF OBJECTS AND REASONS.

It has recently been held by the Madras High Court that, since section 52 of the Prisons Act, 1894, confers powers only upon Magistrates of the first class, a Presidency Magistrate has no power under that section to try prisoners for offences against prison discipline.

It is necessary that Superintendents of Prisons situated in Presidency-towns should have the power which Superintendents of other prisons possess of having recourse to the Courts in order to secure the punishment of serious prison offences.

The object of the Bill is to confer this power upon them.

PART VI.

Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA,
ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS
UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS,
1861 TO 1909 (24 & 25 VICT., C. 67, 53 & 56 VICT., C. 14,
AND 9 EDW. VII, C. 4).

The Council met at Government House on Friday, the 4th March 1910.

PRESENT:

His Excellency THE EARL OF MINTO, P.C., G.C.M.G., G.M.S.I., Viceroy and Governor General of India, *presiding*.

and 59 Members, of whom 53 were Additional Members.

OATH OF OFFICE.

The following Additional Member, before taking his seat, made the prescribed oath of his allegiance to the Crown:—

The Hon'ble Mr. B. Robertson.

ELECTRICITY BILL.

The Hon'ble MR. MILLER said:—“It will save time hereafter if, in presenting the Report of the Select Committee, I refer briefly to a few of the more important changes that have been made in the Bill as previously published. We have endeavoured to make the Bill as clear as is possible in the case of an

exceedingly technical measure. Its consideration has thrown on the Members of the Committee a great deal of labour, and I should like to take this opportunity of acknowledging the assistance they have willingly given. The Committee, as well as the Government, are much indebted to the Electrical Adviser, Mr. Meares, for very valuable help at all stages of their deliberations; and the experience of the Hon'ble Mr. Kesteven, both in dealing with questions arising under the existing Act and as a member of the preliminary Committee of the Bill, enabled him to give most important advice and criticism.

"The first of the important changes to which I will refer is in clause 7 where the Committee has altered the terms on which an undertaking is liable to purchase by a local authority on the expiration of a specified period. Under the existing Act the terms are ordinarily the same as in the case of a license which has been revoked, and it has been urged that these terms do not give sufficient encouragement to the development of enterprise. It has even been represented, both now and in 1903, that the purchase clause should be done away with altogether. It is true that under section 10 of the former Act, full power is given to vary the terms of purchase, and this power has, in some cases, been exercised, though it appears from the criticisms we have received that the effect of section 10 has not always been correctly understood. It has been assumed that this section gave power to Government to vary the terms of purchase after a license had been granted without any reference to the wishes of the licensee. This, however, was not its intention. It was inserted so as to allow of the substitution of different terms in any case in which those specified in section 7 were not sufficiently liberal or were otherwise unsuitable. The existing Act thus allows of the grant of more liberal terms by special arrangement, but it has seemed to us advisable to insert somewhat more liberal provisions than were ordinarily allowed under the old Act, in a definite and unmistakable form. We have, therefore, in section 7, extended the maximum period, after which an option to purchase first arises, from 42 to 50 years, and the subsequent recurring period from 10 to 20 years; and we have, at the same time, provided for an arrangement by which an addition may be made to the purchase-money of a certain percentage on account of compulsory acquisition. There are, no doubt, cases for which some different, and more suitable, arrangement might be devised, and there may be undertakings of a class in which it is unnecessary to reserve any power of purchase to the local authority, such as large undertakings for supply in bulk. Such cases are fully provided for under the amended clause 10, the terms of which have been made as wide as is possible. But we think that the power of sanctioning such departures from the ordinary course contemplated by this Bill should be reserved, as in the existing Act, to the Governor General, and not left, as it was in the Bill as introduced, to the Local Government.

"In clause 23 the Committee has made a change to which I refer only for the sake of explaining that no alteration in substance is intended. The section prevents licensees from showing any undue preference to their customers; but it was thought necessary in the existing Act to add that rebates might be allowed, and certain methods were indicated by which rebates were to be calculated. In the Bill it was proposed to make this provision more comprehensive by allowing any such rebates as the Local Government might permit—a provision which has been adversely criticised. The Committee have struck out the reference to rebates altogether, as they think it unnecessary. The important matter is that a licensee shall not show any undue preference, and the grant of rebates does not appear in itself to be contrary to the principle of the clause, or to require any specific authorization.

"Part III of the Bill has been considerably altered, and clause 28 as it now stands—clause 29 of the Bill as introduced—has been transferred to it from Part II. Part II now deals with licenses, and Part III with the supply and use of electricity by non-licensees. The Council will understand that there are many cases in which it would be entirely unnecessary to insist on all the formalities of a license. There are many cases in which no license is required, but where the transmitter of energy requires some of the powers of a licensee. The

owner of one country house, for example, who had put in an electric installation, might be prepared to supply a neighbouring house or houses, or a factory might wish to supply the offices and dwellings of its employes. There is no prohibition against this by itself in the Act. It may be, however, that in the process of supply a road or a street has to be crossed, and there is no authority at present for the grant of power to make such crossings. In practice, I understand that permission to make them is given: that is to say, the authorities intimate that they have no objection, and the person who wants the electricity proceeds to make his arrangements, but the legal position is not secure. To meet such cases we have, first of all, provided by clause 28 that the Local Government may give permission to persons without licenses to supply electricity in certain cases. In doing this we have been careful to safeguard the interests of the local authority and of existing licensees, and have placed on the Local Government the responsibility of determining that the case is one in which it is unnecessary to insist on the formalities of a license.

"Then, by clause 29, we have provided for the grant of the powers that may be necessary, both in these cases and in cases that might occur of the class contemplated by section 31 of the existing Act, under which notice has to be given to the Commissioner of Police, or District Magistrate, of intention to transmit electricity in a street.

"The only other change to which I will refer on this occasion is the repealing clause No 58. We have made it quite clear that the new measure does not affect the terms of any license granted under the existing Act."

INDIAN MUSEUM BILL.

The Hon'ble MR. HARVEY presented the Report of the Select Committee on the Bill to consolidate and amend the law relating to the Indian Museum.

CENTRAL PROVINCES COURTS (AMENDMENT) BILL.

The Hon'ble SIR HARVEY ADAMSON presented the Report of the Select Committee on the Bill to amend the Central Provinces Courts Act, 1904.

INDIAN STAMP (AMENDMENT) BILL.

The Hon'ble SIR GUY FLEETWOOD WILSON presented the Report of the Select Committee on the Bill further to amend the Indian Stamp Act, 1899, and moved His Excellency the President to suspend the Rules of Business to admit of the Report of the Select Committee being taken into consideration.

THE PRESIDENT declared the Rules suspended.

The Hon'ble SIR GUY FLEETWOOD WILSON moved that the Report of the Select Committee be taken into consideration.

The Hon'ble MR. N. SUBBA RAO said—"My Lord, I may venture to say that the various aspects of the Bill have not received sufficient attention. In fact, the public have not had sufficient time to submit their representations. Even the Report of the Select Committee is just now placed on the table. The Committee has made numerous alterations in the Bill. I must say that we are much handicapped in dealing with the Report to-day. I plead, therefore, that the consideration of the Bill may be deferred, if possible, for a few days.

"As the Bill stands, my Lord, it presses unequally on those carrying on same trade in its different branches. Under section 3 of the Bill as introduced, those who are engaged in the sale of Government securities and in exchange contracts would ordinarily have to pay not less than 20 per cent. of what they earn by way of brokerage; whereas those who negotiate in shares would be liable to pay only from half to one per cent. of what they get.

The incidence in the two classes of cases was abnormally disproportionate. When we take the duty on the counterpart into consideration, those dealing in Government securities and bills of exchange would have had to pay much more than 20 per cent—so much as 40 per cent.—on transactions below Rs. 8,000 and between 20 to 40 per cent. on transactions up to Rs. 88,000.

“Under the Bill as amended by the Select Committee, bills of exchange are placed on a separate footing chargeable with a fixed duty of two annas, whereas Government securities and shares are charged with an *ad valorem* duty at one anna for every 10,000 or part thereof. But the inequality still remains though not in such a glaring manner. Thus on a bill of exchange for Rs. 10,000, the brokerage earned is Rs. 6-4 at one anna per hundred and the duty is 2 annas, i.e., 2 per cent of what is earned. In the case of Government paper of the value of Rs. 10,000, the brokerage is the same, but the duty is one anna, i.e., one per cent., half of what is levied on a bill of exchange for the same amount. Now, with regard to shares which are classed with Government securities, the brokerage varies—

On shares of the face value of Rs. 10	at Rs. 0	4	0	per share
Do.	of Rs. 100	at Rs. 1	0	0
Do.	of Rs. 500	at Rs. 2	8	0

Now, if 100 shares of Rs. 10 each, i.e., of Rs. 1,000, are sold, the brokerage is Rs. 25, the stamp one anna, and the percentage $\frac{1}{400}$
 if 100 shares of Rs. 100 each, i.e., Rs. 10,000, the brokerage is Rs. 100, the stamp one anna and the percentage $\frac{1}{1,000}$,
 if 100 shares of Rs. 500 each, i.e., Rs. 50,000, the brokerage is Rs. 250, stamp 5 annas, and the percentage $\frac{1}{800}$.

“Thus it will be observed that those who deal in shares are placed in a more advantageous position than those dealing in Government paper and bills of exchange. This is irrespective of any duty on the bought note.

“I find that in some of the representations made to this Council from Bombay and Calcutta it is assumed that duty has to be paid on both bought and sold contracts. It appears to me that the intention of the Bill is to impose only one duty on a single transaction, and not two duties, and any doubt on the subject ought to be cleared up. If the bought contract were held to be a counterpart or duplicate of the sold contract under article 25, the maximum duty on the counterpart or duplicate would be one rupee. This is in addition to the maximum of Rs. 10 on the original contract, presumably the sold contract.

“Side by side with these contracts, there are others of a similar kind with respect to jute, gunnies, petroleum, coal, produce, etc., in which brokers earn a commission ordinarily of one per cent., though in some cases their commission goes up to 2½ per cent. Yet in all these transactions there was no stamp-duty provided for in the original Bill. To show how immense is the business carried on, I may mention that jute worth about 15 crores of rupees is sold every year, in which a commission is earned of about 15 lakhs of rupees at 1 per cent. The value of gunnies produced by mills is about 18 crores, and at ½ per cent. the brokerage is about 13 lakhs and a half. Similarly, in petroleum, produce, coal, the transactions are carried on in crores of rupees and the brokerage earned is by lakhs. In all these cases the commission received is generally one per cent., whereas in the case of Government securities and bills of exchange covered by the original Bill, the brokerage is only one anna per hundred, i.e., one-sixteenth of the former. I am glad that an attempt has been made by the Select Committee to include these in the revised Bill. I have ventured to draw the attention of the Hon'ble Finance Member to some aspects of the Bill, and request that the consideration of the Bill be deferred for a few days, to adjust the inequalities of taxation therein. I take this opportunity of thanking the Hon'ble Member in charge of the Bill for the readiness with which he gave attention to the suggestions I placed before him.”

The Hon'ble MR. ARMSIRONG said :—“My Lord, I am very glad to hear of the concession which the Finance Minister has decided to make. It will be

very welcome, and so far as I can see at a hurried glance will go far to meet the objections that have been made. I am very sorry however that nothing has been done as regards the stamp-duty on bills of exchange. I would like to ask the Finance Minister if he is aware that the new scale is far in excess of the stamp-duty which is now levied in Great Britain. I hold in my hand a paper which was given to me by one of the leading Banks in Bombay in which values are stated from Rs. 75 up to Rs. 25,000, and in some cases the new duties are just three times as much as the stamp-duty now leviable in Great Britain. In many other cases it is very nearly half, and in all cases it is very far in excess. For instance, on a bill of exchange for Rs. 2,600 the stamp-duty in Great Britain would be Rs. 1-8; in India it is now to be Rs. 4-8; on Rs. 3,000 in England it is Rs. 1-8; in India it is to be Rs. 4-8; on Rs. 4,500 and Rs. 5,000 in England it is Rs. 2-4, in India it is to be Rs. 4-8; again on Rs. 15,000 it is Rs. 7-8 at home and Rs. 13-8 in India and on Rs. 25,000 it is Rs. 12-12 in England and Rs. 22-8 in this country.

"Well, my Lord, in my protest on behalf of European commercial firms and banking houses, by whom these duties are mainly paid, I am also supported by the Madras Chamber of Commerce, who consider the new scale an exorbitant one. I hope some concession may be made and that a revision of the schedule may be considered advisable to bring it more into line with the duties now levied in Great Britain."

The Hon'ble MR. GRAHAM said:—"My Lord, when this Bill was first introduced, there was a very strong opposition on the part of the Calcutta commercial community as well as that of the rest of India against two of its provisions. I am very thankful to the Hon'ble Finance Member for the concessions which have been made, which, as far as I can see, go far to remove these objections. But on principle I think the commercial community must object to the very enhanced stamp-duties on bills and share transfers, and though perhaps to a certain extent these additional stamp-duties are necessary, yet I think they have been made out of proportion. I would, therefore, without going so far as to oppose the Bill, ask that if possible these may be reconsidered, whenever the next opportunity may occur."

The Hon'ble MR. MILSON said:—"As a member of the Select Committee which dealt with this Bill, I have the permission of the Member in charge of the Bill to offer a somewhat more detailed account than was possible in the Committee's Report of the changes that have been introduced into it since it was first placed before the Council, and incidentally I may perhaps be able to meet some of the objections which we have just listened to. The details of the amendments in the Bill are somewhat dull to the ordinary listener, and I will deal very briefly with them, but an appreciable amount of revenue is undoubtedly involved, and there are certain interests whose very life is concerned and to whom accordingly we owe special consideration."

"As was explained when the Bill was first brought before Council, the intention of Government is to obtain a certain amount of extra revenue from, on the one hand, bills of exchange and promissory notes, and on the other hand, the ordinary transactions of the stock exchange, i.e., the issue and transfer of marketable securities. As regards bills of exchange and promissory notes, the additional taxation had not until this morning met with any opposition whatever, so far as we were aware. I have to frankly admit that, as the Hon'ble Mr. Armstrong has said, the duties on bills of exchange are somewhat higher than they are in England. This, however, is in keeping with the whole tenor of the stamp law in this country. The stamp-duties were certainly higher in India than in England, and all that we have done was to try and bring the rates into harmony with the general scale. The Committee, however, have slightly modified the rates which were originally proposed in the Bill so as to leave the smaller classes of transactions, viz., transactions of the value of Rs. 600 and under, at the old rates. This is a special concession to petty *hundis* and other small transactions of that sort which cannot afford to pay very much more than they do at present."

"Coming to marketable securities the Committee have made no change in the duty proposed upon the transfer of shares or debentures, that is, upon the ordinary stock exchange transactions in ordinary securities, Government paper being excepted. The Committee have also accepted the proposals of the Bill in regard to the enhanced duty upon share warrants; but when they came to the duty upon the issue of debentures, they decided—and their decision rested on the most reasonable ground—to draw a distinction between debentures payable to bearer and debentures which are transferable by endorsement or by separate deed. Debentures payable to bearer, that is transferable by delivery, were put, as the Bill proposed, on exactly the same footing as loans issued by local authorities. They will both pay in future the same duty, which may be roughly described as one per cent. on the face value of the security. This payment will, in the one case by law, in the other case by mercantile practice, exempt the security from the payment of any transfer duty when it changes hands. But debentures which are not bearer bonds and which accordingly require separate deeds of transfer and the payment of separate stamp-duty on each occasion that they are bought or sold, have a claim for more considerate treatment. The Committee have accordingly decided to leave them at the same rates of duty as they pay at present, that is to say, roughly $\frac{1}{2}$ per cent. on their face value. The present law in England is that debentures transferable by delivery pay one per cent., and that is the rate to which we now wish to raise our taxation in India. Marketable securities which are not transferable by delivery pay in England, as they will now do here, a favoured rate.

"I turn now to the particular transaction which I referred to at some length in introducing the Bill—the transfer of securities between parties who have no intention of becoming permanent holders and who treat the securities as articles of currency or as material of credit or as matter for pure speculation. It is the practice, in the Calcutta market at least, for very heavy transactions of this character to pass without any formal transfer deed at all. What is known as a blank transfer is drawn up. It is signed and generally stamped by the first *bona fide* seller, but after that it may be the vehicle for dozens of transfers without paying any further duty. When, after changing hands over and over again, the security covered by the blank transfer finally finds a resting place in the hands of the permanent investor, the transfer deed is completed, but for all the intermediate transactions the Government revenues have received nothing. It has always been recognised that the arrangement is unfair to the general public, and the question of insisting upon regular transfer deeds has frequently been discussed. On the present occasion, however, there was no intention of attempting any such radical reform. All that Government desired was to secure some revenue from operations which may reasonably be asked to pay a contribution to the Exchequer. It was decided accordingly to be satisfied with a moderate impost upon the contract notes which change hands when a transfer of this description is carried through. The new rates which it was proposed originally to apply to contract notes were made the subject of general representations from the Chambers of Commerce and the chief commercial centres throughout India. We were told that the new duty would fall very heavily on the actual business of the market, would hamper the free circulation of securities, and would incidentally affect certain sections of the market interests much more heavily than others. The Committee gave those representations their most careful consideration and have advised the Council to reduce the rate originally proposed and to make a distinction, which the present law does not draw, between transactions in shares and similar securities on the one hand and bills of exchange on the other. What the Committee advise is that on agreements for the sale of Government securities or on shares the duty should be taken at one anna for every 10,000 rupees of value, but that for bills of exchange the duty should be fixed at double the existing rates, that is, at a fixed amount of two annas irrespective of the amount of the bill. It is understood that the latter transactions are based upon a very narrow margin of profit or brokerage, that under the custom of the market it would be impossible for the broker to transfer the duty to his clients, and that the high graduated scale of taxation would probably have the effect of killing out an useful and honourable business.

"One further amendment has been introduced by the Select Committee, as a corollary to the increased duty upon contract notes. Some doubt has been expressed by those who are most competent to judge as to whether certain transactions would be regarded in the eyes of the law as agreements under article 5 of the stamp schedule or as memoranda under article 43 of the same. In order to prevent misapprehension as well as the possibility of an evasion of duty the Committee propose to tax memoranda under article 43 in exactly the same manner as those under article 5. The effect of this will be that brokers' notes relating to stock or marketable security will pay one anna for every 10,000 rupees of value. Article 43, however, covers brokers' notes for the purchase or sale of goods, and it is proposed to exempt them from the graduated scale and to make them subject, as in the case of bills of exchange transactions, to a fixed duty of two annas without reference to the value of the goods.

"One more point. Questions have been asked as to whether the new rates of duty are already in force. This I need hardly say is not the case. They do not come into force until this Bill is passed by the Council and receives Your Excellency's assent.

"My friend the Hon'ble Mr. Subba Rao has had the courtesy to give us private notice of certain amendments which he proposes to move. I trust that the explanations which I have now given and the alterations which have now been made in the Bill will probably meet most of his objections. I believe the Council will readily accept the view that the Bill has been materially improved since they last saw it and that the careful attention which the Select Committee have bestowed upon it will make it readily acceptable to the general public."

The motion was put and agreed to.

The Hon'ble SIR GUY FLEETWOOD WILSON moved that the Bill, as amended, be passed.

The motion was put and agreed to.

COURT-FEES (AMENDMENT) BILL.

The Hon'ble SIR GUY FLEETWOOD WILSON presented the Report of the Select Committee on the Bill further to amend the Court-fees Act, 1870, and moved His Excellency the President to suspend the Rules of Business to admit of the Report of the Select Committee being taken into consideration.

THE PRESIDENT declared the Rules suspended.

The motion was put and agreed to.

The Hon'ble BARI BHUPENDRA NATH BASU moved that at the end of clause 2, sub-clause (1), of the Bill, the following be inserted, namely:—

"Provided further that when the amount or value of the property exceeds Rs. 10,000 or Rs. 50,000, duty shall be calculated at the rates mentioned above only on the amount or value in excess of Rs. 10,000 or Rs. 50,000, as the case may be."

He said:—"My Lord, under the Bill, as presented to this Council, the duty is at the old rate of 2 per cent. up to Rs. 10,000, and then at the rate of 2½ per cent. from Rs. 10,000 to Rs. 50,000, and at the rate of 3 per cent. on all sums from Rs. 50,000 upwards. What my amendment proposes is this, and I take a concrete case to illustrate what I mean. Take an estate valued at Rs. 11,000. In this case, under the Bill as proposed, the duty will be at the rate of 2½ per cent. upon the whole Rs. 11,000. What I say is, following the precedent of the income-tax, that it should be 2 per cent. up to Rs. 10,000 and from above Rs. 10,000 it ought to be 2½ per cent., otherwise there will be a great difference in the incidence of taxation between estates valued at Rs. 11,000 and over. Similarly in the case of estates valued at Rs. 50,000 and over, my amendment,

Sir, proposes that up to Rs. 50,000 the assessment should be at the rate of 2½ per cent., and above Rs. 50,000 it should be at the rate of 3 per cent., so that the relief sought to be given may be felt by all estates which are in excess of the sums of Rs. 10,000 and Rs. 50,000 respectively."

The Hon'ble MR. MESTON :—" My Lord, I cannot advise the Government to accept the Hon'ble Member's amendment. The analogy which he indicates hardly seems appropriate. The income-tax deals with revenue ; we are dealing with capital which passes hands on the decease of the late holder. Furthermore, the analogy, if an analogy is to be sought, lies with the probate duties which were in force in England prior to Sir William Harcourt's death and estate duties were imposed ; and the practice in England was to take the 2½ per cent. and 3 per cent. on the total value of the estates. I see no reason why the Government of India should be content with anything less, and I should be very much surprised if the Government of India agreed to give up the revenues which the Hon'ble Member wishes us to sacrifice."

The Hon'ble SIR GUY FLEETWOOD WILSON :—" I am afraid it is not possible for me to accept that amendment."

The motion was put and negatived.

The Hon'ble BABU BHUPENDRA NATH BASU moved that after clause 2 of the Bill the following be added, namely :—

" 3. Nothing in this Act shall apply to any probate, letters of administration or certificate in respect of which the fee payable under the law for the time being in force has been paid prior to the commencement of this Act, but which have not been issued "

He said :— " This amendment relates to a separate state of circumstances altogether. Under the practice in our Courts, and under the Court-fees Act the duty on probate or letters of administration has got to be paid at the time that the application is made. When the application is made under the provisions of the Court-fees Act, an affidavit of value has got to be annexed to the application and the probate-duty has to be paid into Court and a certificate has to be filed granted by the executive officer of the Court that probate-duty has been paid. After these preliminaries have been observed and the application has been made, there is often times a great deal of delay, either owing to contest, or the natural delays that are inherent in our Law Courts in the issue of probate or the grant of letters of administration, and I am quite sure that at the present moment there are many estates in Bengal at least in respect of which the probate-duty has been paid, but where probate has not yet been issued. It would be hard in respect of these estates, that they should be called upon to pay the enhanced probate-duty. I believe, my Lord, that was not the intention of the Legislature, and to make the point clear I beg to move that this provision may be inserted so that estates in respect to which the duty has been paid may not be subject to the enhanced duty."

The Hon'ble MR. DADABHOY said :—" I beg to support this amendment. I think the suggestion made by my Hon'ble friend is a most equitable one. All those estates in respect of which proceedings have already been initiated should not certainly be brought under the operation of the new Act. It might upset family arrangements ; it might upset family duties ; it might affect payment of debts ; and it might also disturb many other interests. It is only equitable that an Act of this kind should only affect interests that are to come into operation hereafter. I have very great pleasure, therefore, in supporting this amendment, and I trust Government will see their way to accept the suggestion which appeals to every one as a most equitable one."

The Hon'ble SIR GUY FLEETWOOD WILSON said :—" My Lord, I find myself at last in a more agreeable position in being able to meet my Hon'ble friend and to accept on behalf of the Government the amendment of the Hon'ble Babu Bhupendra Nath Basu."

The motion was put and agreed to.

The Hon'ble RAJA PRAMADA NATH RAY OF DIGHAPATIA moved that in clause 2, sub-clause (i), of the Bill as amended, the words "but does not exceed fifty thousand rupees" and the entries—

"When such amount or value exceeds fifty thousand rupees. | Three per centum on such amount or value."

be omitted.

He said:—"My Lord, as a representative of the landowning interest in the Council, I feel it my bounden duty to point out to your Lordship that the proposed increase in the court-fees for purposes of probate and succession will prove a great hardship upon all classes of people who have to dispose of their properties by wills, particularly the landowning classes.

"An additional duty of one per centum in many cases will prevent people from making wills or testaments of any kind, and the absence or paucity of such documents, I venture to submit to your Lordship, will lead to litigations and divisions of estates into petty shares. This again will ultimately weaken the landholding interest in this country which, in my humble opinion, will be deplorable both from the standpoint of the landholders themselves and also of the Government to which their loyalty and attachment have been assets of some value. And when people find that it does not suit their interests to make out wills, the number of wills will fall off, and consequently lesser number of probates will be taken, with the result that the ultimate object of this measure will be frustrated to a certain extent.

"My Lord, speaking for myself, I would certainly like to see the richer classes taxed in preference to the poorer, but at the same time, my Lord, I submit that it must not be made too hard even for the rich to dispose of their properties, and prevent their children from being ruined by litigation. According to the Bill under discussion, a man, inheriting an estate which yields an income of say 5 lakhs, will have to pay 3 lakhs as probate-duty, i.e., nearly three-fourths of his whole year's income. This amount has to be paid almost immediately after the death of the person whom he succeeds and whose shraddh and other rites will also involve very heavy expenditure according to the Hindu custom. In many cases, my Lord, inheritors of estates will have to go to the money-lender and secure the amount for the probate-duty at a heavy rate of interest. As the duty stands at present, it has been found heavy enough, and to make it heavier still would, I submit, be very much prejudicial to the interests of all who have to dispose of their properties by wills, no matter whether they are zamindars or not. At the same time, I am fully alive to the fact that the Government is in need of funds, and this has to be met somehow. I therefore would not oppose the Bill wholesale, but beg leave to appeal to your Lordship to limit the proposed additional duty to 2½ per centum in all cases. That would meet with the ends of justice as well as the requirements of the Hon'ble the Finance Member."

The Hon'ble MAHARAJADHIRAJA BAHADUR OF BURDWAN said —"My Lord, representing the zamindars of Bengal in this Council, I would be failing in my duty if I were not to support the amendment that has been proposed by the Hon'ble Raja Pramada Nath Ray of Dighapatia. I fully sympathize with the Finance Member in the difficulties that he is in, but I doubt if the Finance Member is aware that permanently settled estates, while they enjoy certain privileges, have also got certain distinct disadvantages; also that families governed by the Hindu law of Dayabhaga would greatly suffer by this enhanced duty on probate. I, therefore, think that if it could be possible for the Finance Member to accept 2½ per cent. as probate-duty all round it would give great satisfaction to a great number of zamindars."

The Hon'ble SIR GUY FLEETWOOD WILSON said:—"My Lord, I confess to feeling considerable sympathy, from the personal standpoint, with the views

which have been advanced with great moderation and great clearness by the Hon'ble the Raja of Dighapatia and the Maharaja of Burdwan, but I am sorry to say that I must approach all these amendments, or most of these amendments, which involve a surrender of revenue, not from the standpoint of my own personal feelings but from the more hard-hearted attitude of a Finance Member, and I find myself unable to surrender the revenue which this change would involve. I am afraid that I can only meet the request with a negative answer."

The Hon'ble B. C. SUPENDRA NATH BASU said:—"My Lord, there is one point in connection with this amendment which I think it my duty to bring to the notice of the Council. As is well known to the Law Member, and I hope also to the Finance Member, in India, except Bengal, the vast majority of the Hindu population is governed by the *Mitakshara*, where the property belongs to the family and not to the individual, and upon the death of any individual member of the family the property remains amongst the surviving members of the family, and there is no need to take out probate or letters of administration or succession certificate. I believe Hon'ble Members are aware that the difference between probate and letters of administration and the succession certificate is this, that the legislature has provided in the case of persons upon whom it is not incumbent to take out probate or letters of administration, that they may only in respect of debts which have got to be gathered, take out a certificate of succession in respect of those debts and pay duty upon those debts alone, leaving aside the bulk of the estate. For instance, if an estate is valued at four lakhs and three lakhs represent the real property belonging to the estate, and if one lakh represents monies to be collected, then duty has to be paid on that one lakh alone, and for that purpose the Successor Certificate Act provides the procedure. In the *Mitakshara*-governed population of India they have not even to take out a succession certificate. There the Courts have held that the property belonging to the family, the surviving members get the benefits of debts to be collected without taking out a succession certificate. So, in the result, the effect of this legislation will be that the Bengalis, Hindus and the Musalmans of India will only have to pay this duty. *Mitakshara* families all escape, the great trading communities of India in other provinces, the rich and prosperous bania communities, they will all escape, and in Bengal itself if a landed proprietor dies without making a will, or without leaving debts to be collected—and my experience is that amongst Bengal zamindars, they oftentimes die with debts to be paid rather than with debts to be collected, they will not have to pay. It is only in cases where Bengal zamindars have to make settlements for the benefit of their families, that the estate will have to pay any duty at all. If they do not leave behind any settlements, and in most cases they do not, no duty is leviable. The heir succeeds in Bengal to the father and gets his name enrolled in the register of the Collector without producing a probate or letters of administration, but upon merely satisfying the Collector that he is the heir. That being so, I apprehend that the duties leviable from this source will be very small compared to the inconvenience and compared to the unfairness of the incidence of taxation. I am far from denying that probably no better method of taxation could be devised than of levying a reasonable amount of duty upon the estate when it passes to the successors of the man to whom it belonged. That is a proposition in economics which has been universally accepted, but if the effect of this legislation was that it would be general, that it could not be evaded and that the rich and prosperous communities of India were to pay it, I should be the first person to support it, but what I find is this, that oftentimes the debt-ridden zamindars of Bengal will have to pay it and the middle class men who already pay income-tax and other taxes, they will have to pay in Bengal, and only a very small number in other provinces where it would apply in the case of self-acquired property by a separate member of the joint Hindu family. The Finance Member has not given any data to show what is the revenue that he expects on this head, and in the absence of any data I think it would be hard to expect that we should vote blindly for a measure which would be productive of great hardship, and may be productive of very little good indeed."

The Hon'ble MR. MAZHARUL HAQUE : " My Lord, I had no intention whatever of taking part in this debate but for a reference to the Musalmans of India in the speech of my Hon'ble friend Babu Bhupendra Nath Basu.

" My Lord, when this Bill was first introduced in this Council by the Hon'ble the Finance Member, I myself had certain doubts about it, and I was inclined to believe at that time that perhaps these death duties would affect the Muhammadans of India much more than they would the Hindu community. However, since then, I have had time to think over the matter, and I have also had the advantage of consulting some of my Muhammadan friends, and I have changed my mind. I do not think that these duties will affect us in the same way as they would affect my Hindu brethren in Bengal; so my Hon'ble friend the Finance Minister may have an easy mind so far as the Muhammadans of India are concerned. They are not going to oppose these death duties.

" My Lord, what I find now is that when the aristocracy of wealth has been touched in its pocket, it is up in arms. Of course no body wants to be taxed, my Lord, but I think it is only right and proper that the shoulders which are able to bear the burden should be taxed. My Lord, I congratulate the Hon'ble the Finance Minister for having brought before your Lordship's Council such a popular budget. I say it is a popular budget, and, my Lord, I shall support this Bill "

The Hon'ble MR. SYED SHAMSUL HUDA said :—" I have a few observations to make and I think I must say that I support with great pleasure the amendment of my friend the Hon'ble Raja of Dighapatia.

" My Lord, the Muhammadan community whom I have the honour to represent will not suffer in this matter to the same extent as my Hindu friends, because in the first place, so far as probate is concerned, the power of a Muhammadan to make a testamentary disposition is extremely limited and hedged round by conditions which makes testamentary dispositions almost impossible. And I support the amendment because, as a matter of fact, practically this enhanced duty would fall on one class, and therefore on principle I am opposed to it. As regards probates, it is well known that a Muhammadan will need not be admitted to probate at all.

" Then, my Lord, as regards letters of administration, people in this country are not bound to take out letters of administration, but I think it is very desirable that there should be encouragement rather than difficulties placed in the way of letters of administration being taken out. It may be said that, equitable or inequitable, the tax exists, but it seems to me that although it exists it need not be heavy. Not knowing to what extent the Hon'ble the Finance Member expects to benefit by this increased taxation, and having regard to the fact that the tax will fall heavily on one community and more in one province than in the other provinces, I feel bound to support the amendment that has been just moved "

The Hon'ble SIR GUY FLEETWOOD WILSON :—" My Lord, I merely wish to say that it appears to me that the speeches of the two Hon'ble Members are possibly valuable as dealing with first principles in law, but we are not proposing to amend the whole death duties and succession duties and I am afraid I cannot withdraw from the position I took up. I cannot accept the amendment."

The Council divided :—

Ayes—14.

Noes—44

The Hon'ble Pandit Madan Mohan Malaviya.

The Hon'ble Maharajadhiraja of Burdwan.

The Hon'ble Babu Bhupendra Nath Basu.

His Honour the Lieutenant-Governor.
His Excellency the Commander-in-Chief.

The Hon'ble Mr. J. O. Miller.

The Hon'ble Sir Guy Fleetwood Wilson.

Ayes—14.

 The Hon'ble Mr. C. Stewart-Wilson.
 The Hon'ble Mr. F. E. Dempster.
 The Hon'ble Lieutenant-General Sir Douglas Haig
 The Hon'ble Sir T. R. Wynne.
 The Hon'ble Mr. G. H. B. Kenrick.
 The Hon'ble Colonel F. B. Longe.

So the motion was negatived.

The Hon'ble SIR GUY FLEETWOOD WILSON moved that the Bill, as amended, be passed.

The motion was put and agreed to.

INDIAN TARIFF (AMENDMENT) BILL.

The Hon'ble SIR GUY FLEETWOOD WILSON presented the Report of the Select Committee on the Bill further to amend the Indian Tariff Act, 1894, and moved His Excellency the President to suspend the Rules of Business to admit of the Report of the Select Committee being taken into consideration.

THE PRESIDENT declared the Rules suspended.

The Hon'ble SIR GUY FIETWOOD WILSON moved that the Report be taken into consideration.

The Hon'ble MR. GOKHALE said :—" My Lord, before the Council proceeds to a consideration of the several amendments of which notice has been given, I would like to make a few observations on the general financial situation which in the opinion of the Hon'ble the Finance Minister has necessitated the imposition of fresh taxation. Hitherto fresh taxation has been associated in our minds with war or famine or a sudden increase in military charges or a falling exchange. This is the first time, so far as I am aware, when it is proposed to levy additional taxation in a normal year, free from any specially disturbing factors. The Finance Minister has told us that opium and East Bengal are responsible for the new burdens sought to be imposed upon the country. He expects the opium revenue for next year to fall short of the amount realised during the current year by £872,000 or about a crore and thirty lakhs, and he is called upon in addition to find an extra quarter of a million or thirty-eight lakhs to relieve the embarrassment of the Government of East Bengal and Assam. In the Finance Minister's opinion therefore the principal share of the responsibility for the present difficulty falls on opium. Now, my Lord, I think it is necessary to protest against this view. Even assuming that the estimate of opium revenue for next year is not an under estimate, we still find that the net receipts budgetted for under opium are $3\frac{1}{2}$ millions sterling which was precisely the amount of the net opium revenue realised in 1907-08, when there was no deficit and when the policy of gradually extinguishing the opium revenue in ten years was laid down. In announcing this policy, His Honour Sir Edward Baker, who was then Finance Minister, expressed himself as follows :—

' Twenty years ago or even less the prospect of losing a revenue of five and a half crores a year would have been a cause of very grave anxiety. Even now, if the whole or a great part of the revenue should be struck off at a blow, the dislocation of our finances would be serious and might necessitate recourse to increase of taxation. But if, as we have a clear right to expect, the transition is effected with a due regard to our convenience and spread over a suitable term of years, the consequences may be faced if not with equanimity at least without apprehension '

" And again :—

' The point which I wish to emphasise at present is that there is no need for despondency and that if all goes well there is nothing worse to fear than the absorption for a few years of the means of affording further relief to the taxpayer and of incurring useful expenditure for the development of the country '

" Sir Edward Baker was thus prepared three years ago to face the loss of a tenth part of the opium revenue of 1907-08 every year without having recourse to extra taxation if the circumstances of the country continued normal. And the Government should have been prepared today to part with three-tenths of three-and-a-half millions, that is, about a million sterling. Instead however of the net opium revenue being only $2\frac{1}{2}$ millions sterling, the Hon'ble Member has actually budgetted for $3\frac{1}{2}$ millions for next year, and yet he throws on opium the main responsibility for his additional taxation ! No, my Lord, if fresh taxation has really become necessary, which I for one venture to doubt, we must look for an explanation deeper. It is true that Eastern Bengal is now to have 38 lakhs a year more from the Imperial Government, which means that the Partition of Bengal is now going to affect the whole country materially as it has already done politically. But as our normal growth of revenue is about a crore and twenty lakhs, as once estimated by Sir Edward Baker, it is clear that the increased allotment to Eastern Bengal and Assam need not by itself have led to extra taxation. To understand what has really brought about a deterioration in the financial position of the country, we must go back to the year 1907-08 and compare the figures of revenue and expenditure for that year with those in the budget proposals for next year. Taking both receipts and charges net, as given in statement E—and that is the best thing to do for purposes of a real comparison—I find that the total net receipts under major revenue heads for next year are estimated at 3 millions sterling more than for 1907-08—the opium receipts being the same for

both years, namely, 3½ millions, but land revenue being two millions more for next year and there being a total increase of another million under other heads. I also find that as against this increase of 3 millions there is a deterioration under railways of over a million, an increase of no less than 1·91 millions under net charges of civil departments, nearly half a million under military services, and over half a million under interest, telegraph, mint and other heads. To my mind therefore it is clear that the main responsibility for our present difficulties rests on the shoulders of the civil departments and the Railway Board. My Lord, I cannot help saying that an increase of nearly 2 millions sterling in the net charges of the civil departments in three years is a phenomenal increase and needs explanation. I will not say that I am much surprised, for during the last few years there was hardly ever a day when we did not hear of higher scales of pay being sanctioned for the superior officers of some civil department or other. The operations of the Railway Board too, which called forth a sharp remonstrance from His Honour the Lieutenant-Governor of Bengal last year, have had the inevitable effect of throwing on the resources of the Government a steadily increasing burden of working expenses. In addition to these two causes I am of opinion that the prevalence of high prices in the country is bound to affect the Exchequer adversely in two ways. First the Government, as the largest purchaser in the country, has to pay more for its purchases, and secondly the pressure of high prices on the resources of the people tends to diminish the revenue contributed by them to the Government under several heads. I think, my Lord, that all these questions need a careful investigation. I had hoped from the observations made by the Finance Minister in his Financial Statement last year that he would not turn to fresh taxation until at least a policy of severe retrenchment had been carried out in all departments. It appears however from the present Financial Statement that the Hon'ble Member has almost given up the unequal struggle. The forces that make for economy in this country are extremely weak while those that make for continuous increases in expenditure in different departments are enormously strong, and one of the greatest needs of the country is to devise measures which will effectively safeguard the interests of economy.

"My Lord, the proposed enhancements of duty under the Tariff Bill are expected to bring in an extra million sterling or a crore-and-a-half of rupees, half of which will be contributed by tobacco and liquors and the other half by silver and petroleum. Now I strongly hold that there is really no need for this extra taxation. In the first place, if the circumstances of the country continue normal, the estimates for the next year framed by the Hon'ble Member will be found to be too cautious. Under salt, for instance, I am confident that the increase will be considerably more than what has been budgetted for. Again those who are well acquainted with the conditions of the opium trade are clearly of opinion—my Hon'ble friend Sir Sassoon David is a recognised authority in regard to that trade and he strongly holds the view that in view of the special circumstances of the Chinese market the rate of Rs 1,750 per chest of opium which has been taken for next year is much too low and that Rs 2,000 a chest will be a safe estimate. Lastly, I wish to draw the attention of the Council to the fact that a sum of over three fourths of a million sterling has been provided in the budget for the redemption of railway debt out of revenue. My Lord, I consider that this is an amazing thing to do, absolutely unjust to the taxpayers, when the Finance Minister comes forward with proposals for extra taxation on the ground that the money that will otherwise be raised will be insufficient for current purposes. Railway debt is productive debt. Even now, in spite of the fact that the Railway Board has pushed up working expenses in all directions, the railways are more than paying the interest on their capital, and there is absolutely no need—I think it is wholly unjustifiable—to devote a part of revenue to the reduction of productive debt. The three-fourths of a million, which represents the capital portion of railway annuities, should clearly come out of loan funds raised for the purpose and not out of current revenue which is needed for so many pressing current purposes. Even assuming that the Budget estimates are not framed too cautiously

and that the whole of the money proposed to be raised by the contemplated enhancements of duty under the Tariff Bill is really required, the transfer of the amount provided for the redemption of railway capital from revenue to capital will enable the Government to dispense with the enhanced duties on silver and petroleum. My Lord, I have no objection to the proposed enhancement of tobacco and liquor duties if there must be extra taxation. In my opinion, however, spirits used in medicinal preparations should be exempted from duty. But I object most strongly to the proposed enhancements on silver and petroleum. The duty on petroleum will necessarily hit the poorest class in the country. Burma oil may get some advantage under it, but I am sure the price of even that oil will be raised, if not to the full extent of the new duty, at any rate by a large proportion of it. And as regards silver I hope even the Finance Minister now sees that a great mistake has been committed in proposing the enhancement. It is bound to add seriously to the great difficulties through which the mill industry is at this time passing. My Lord, the country had a right to expect that the Government would not show such disregard of the interests of its greatest industry after agriculture. The action of the Government while injuring Indian exporters of yarn will benefit Chinese producers and thereby bring sensibly nearer the day when India will lose her yarn market in China altogether. It has been claimed for the proposal of Government that it will appreciate the silver trinkets of the mass of poor people throughout the country. The poor people will probably have no opportunity of testing that till a famine comes when they might have to part with their trinkets. Meanwhile, in ordinary times they will find themselves adversely affected by the duty every day, as they will have now to pay a higher price for all fresh investments of their small savings in silver. My Lord, I strongly urge even at this last moment that the proposed enhancements of duty on petroleum and silver should be given up. If the Government insists on having the half-million which they are expected to bring in, there are other ways far less objectionable of raising the amount. For instance, an enhanced import-duty on sugar will be greatly preferable to the enhanced duty on petroleum, and a small export-duty on jute, of which we have a monopoly in the world, with a countervailing excise in India, if necessary, will bring in more revenue than the proposed duty on silver and will have much to recommend it. My Lord, I advocate an export-duty on jute on two grounds. In the first place, it is partly for meeting the increased cost of administration in Eastern Bengal that the new taxation is proposed. It is therefore only fair that Bengal, who already pays less than other provinces owing to her permanent settlement, should find the money by a tax on one of her great staples. Secondly, it is not just that while the cotton industry of Bombay is already taxed, a further burden should again be laid on it, and the jute industry of Bengal should go altogether free. An export-duty on raw hides and skins which are being exported in enormous quantities may also bring in a considerable revenue, and the same may be said of seeds. Or if the Government prefer it, they may raise (and later lower) according to their needs the whole of the customs-duties taken together treating them in India as they treat the income-tax in England. I think, my Lord, that that would be preferable to selecting a few commodities like silver and petroleum for heavy enhancement."

The Hon'ble MR. MESTON said.—"My Lord, the speech of the Hon'ble Mr. Gokhale opens up a line of argument which was somewhat unexpected. It has not been usual in this Council to question the accuracy of the Government of India's financial estimates; and although that form of criticism is wholly within the competency of the Council, it is only natural that those who had some part in the preparation of the estimates should take the earliest opportunity of defending them. I have listened to Mr Gokhale's description of our general financial position with respect, but entirely without conviction; and I would bespeak the patience of the Council while I deal with the suggestion that these Bills which we are being asked to consider today are a superfluous exercise of our legislative powers."

"The gravamen of my Hon'ble friend's criticism is that we do not really want the extra taxation which this Bill provides, in fact, if I understand him rightly,

we do not need any extra taxation at all. If we had showed more dash in estimating our revenues, if we used less of our revenue in relieving debt, if we treated our expenditure with a larger pruning knife, we could probably scrape through the coming year without additional taxes in any form. There is a familiar sound about this, and there is a familiar sound in much of the kindred criticism which we have heard outside upon the Budget proposals since they were published a week ago. We are told that last year's Budget was over-sanguine and that this year's Budget was over-cautious; opium pulled us through last year and something or other is sure to pull us through this year. This sort of criticism is so easy and so easy, and generally so irresponsible and generally so wise after the event, that I am afraid we have got into the habit of discounting a good deal of it. There are several of our critics whose advice we all agree in putting on a very different footing; and among those I need hardly say is our Hon'ble friend Mr. Gokhale. I therefore gladly accept the Hon'ble gentleman's challenge, and I shall endeavour to show the Council that the extra taxation which the Government proposes is fully justified by the needs of the year and by the ordinary canons of financial prudence.

"During the coming year, the Hon'ble Finance Member has shown that our estimate of Imperial expenditure, according to the most careful calculations in our power, will be 50½ millions sterling. To meet this we estimate that our ordinary revenues would yield us only 49½ millions. We should thus have to fill up a deficit of close on a million, but we must also in common prudence provide a working balance for the year. The Government of a great country cannot surely be expected to start upon a new year, with all its possibilities for surprise and emergencies, without the margin of safety which is afforded by a revenue surplus. In past years we have attempted to work to a surplus of one crore or thereabouts and it is a grievous blow to the traditions of the Finance Department to have to budget for such a small and precarious surplus as we are taking for next year. The Council must take it as evidence of the Finance Member's aversion to increase the taxation by one superfluous rupee. They must not take it in any other sense. We thus have, my Lord, to provide roughly 170 lakhs of extra taxation in order to prevent a deficit and to give us a reasonable working balance.

"It is hinted however that a deficit need not have befallen us if we had cut our scale of expenditure shorter. The Hon'ble gentleman has not pursued this suggestion into any detail, and I shall follow his example. We have in the Budget obviously to deal with the administration of the country as a going concern, and to find funds for it as it stands. Whether the administration is extravagant or otherwise, this is not the time for us to consider. The question is one which is never for a single day out of the thoughts of the Government. It is one which requires time and patience and breadth of outlook. But it is decidedly not a question which we can take up as an incident to the financial provisions of the year. I cannot imagine an edict for the retrenchment of expenditure to the extent of 170 lakhs without a dislocation of business, a waste of power and sacrifice of efficiency which, I am sure, this Council would be the first to resent. We must therefore lay aside for some more convenient opportunity the discussion of any proposals for reducing the cost of Government.

"But, says the Hon'ble gentleman, we have under-estimated our revenue in several directions, notably in the case of opium. I have the highest respect for the Hon'ble gentleman's financial acumen and for his many other gifts. But when he ascends the mountain of prophecy, he passes into regions in which I am not altogether disposed to follow him. I will come back to opium again, it requires special treatment. In regard to the other heads of revenue, I do not admit that the Hon'ble Member is right in advising us to raise our figures. We believe it quite possible that our railway returns will be higher than we have taken; but the demands for improvements and renewals are heavy and insistent, and we have taken a net figure which we believe is unlikely to be materially exceeded. In regard to salt, the large increase in consumption, which was stimulated by the recent reduction in duty, appears to be slackening off. In regard to excise, the rapid strides with which the

revenue rose are getting shorter. What are the other heads of revenue under which the Hon'ble Member thinks that our estimates are unduly nervous? I confess that after two months' close study of the figures, I cannot call them to mind. It is not, however, as I quite understand, with minor or unimportant corrections that the Hon'ble gentleman is concerned. He paints his pictures in broader colours than that. He describes us as losing an opportunity for increasing our opium estimates by no smaller a sum than 90 lakhs. I rather marvel at his moderation. Why should we not take another Rs. 250 a chest for our opium sales, raise our revenue 3,150 lakhs, and thus cover the whole deficit which we attempt to rectify? Why should he not take Rs. 3,000 a chest, and let us get rid of the salt duty?

"My Lord, the figure that we took for opium was not the result of a timorous or haphazard calculation. We have had many extraordinary fluctuations in the long history of our opium revenue; but never has the position been more difficult or the future more uncertain than it is today. Just look at the factors with which we have to reckon. We have the daring speculation of a large and cosmopolitan market. We have the obscure, I may almost say the mysterious, movements of the great central Government of China. We have the varying and not always disinterested policy of its provincial magnates. Last of all we have the strange vagaries of human appetite and vice. It is quite easy to say that the Chinese will pay us 2,000 rupees a chest or even a higher figure for our dwindling supply of opium. But looking at all the factors which I have mentioned, is it reasonable to ask us to adopt a figure which is far in excess of anything that we have received for half a century until the last three months? It is quite probable that the market will continue high; but it is very far from certain: and is it right that we should stake the equilibrium of our budget and to that extent the credit of India on a single throw of the dice? I submit to the Council that our duty was to take a figure of studious moderation, and that is what we have done.

"But there is another aspect to the matter. These high prices are only being paid in the belief that India will in time cease its supplies to the China market altogether. If that belief turns out to be justified, it is easy to see how sharp will be the fall from the revenue which we now receive from opium to that which will accrue to us when the China market is closed. It is surely not imprudent on the part of Government to discount that fall, just as any business firm would discount a disappearing trade, and to re-adjust our basis of revenue accordingly. If the receipts from opium in the near future should rise far beyond our expectations as the result of an artificial market, let us treat the excess as a windfall. That is virtually what we have done this year. It is what I hope the Government would be prepared to consider should similar conditions recur. I have no desire and no authority to commit the Government in this matter in any way; but if the market should happen to yield the extra 90 lakhs which the Hon'ble Mr. Gokhale hopes for, I trust that the money will not be spent in recurring expenditure which will only increase our difficulties hereafter, but will be in some way reserved for special purposes which we have been unable to provide for in the budget now before the Council.

"Another criticism which has been directed at our estimate is one with which I need only deal very briefly. We are told that, in view of the general prosperity and the high credit of the country, we put away far too much of our revenue for capital expenditure. The Council is aware of what we do in that way. We give up our surplus, and we give part of our famine grant in accordance with an arrangement which has met with the approval of this Council for many years. We also pay off part of the purchase-money of certain State railways by terminable annuities which are wholly charged to the current revenues of each year. It has been explained more than once why this arrangement exists. It represents in reality the operations of a sinking-fund—of a genuine and compulsory sinking-fund which an impecunious chancellor of the exchequer can never raid or suspend. As such, it is an element of strength in our position, a buttress to our national credit, which I am sure my Hon'ble friend would not wish us to remove or weaken. My Hon'ble friend shakes his head. All I can do

then is to leave the subject as a standing difference between him and the Government of India. As a Parthian shot, perhaps I may remind him that these annuities are established by Acts of the British Parliament, and that it is entirely outside our power to alter them. When Mr. Gokhale is member for India in that august assembly, perhaps he will induce them to do tardy justice to his contention.

"I have not attempted to enter at any length into our financial position. After the exposition ^{made} by the Hon'ble Financial Member last Friday, very little remains to be said. I should not have intervened in this stage of the debate had it not been that the whole justification for our taxation proposals was impugned. It was not without prolonged and anxious thought that these proposals were developed, and the Government are satisfied not only that the taxes are needed but that they will cause less hardship to the general body of tax-payers than any other combination of new taxes which has been suggested in its place. Whether the growth of our revenue will make us independent of these taxes, time will show, and I would ask for no hasty judgments. India lately has been in the same condition as you will often see on the Hooghly. The tide has just gone out. The small crafts on the river are swinging erratically and bumping at their moorings. At one moment a swirl of water seems to indicate that the tide is coming in; at the next moment there is a back-rush which shows that the ebb is not yet over. That is the state of India. It has been in a period of slack water. The tide of prosperity ebbed and left us in 1908. We are looking for return flow which may come any day, may even have begun now. Meanwhile with those who are responsible for India's finances, caution is the only safe rule of navigation. We may have been over-cautious. If we have, and the surplus is larger than we estimate, there is much to do with it. The large schemes of social reform, of educational advance, of industrial development, which are now on the anvil will demand money, and it is Government that will have to find that money. How could your new taxation be better employed if and when it ceases to be necessary for the needs of the immediate present? The Budget is a careful one, and I believe it is a good one. It has certainly not lowered the credit of India in the great markets of the world; for our securities are firm, and the first sale of Council Bills since the Budget was published resulted in the disposal of 1 crore, of which no less than 92 lakhs were Telegraphic Transfers at a high premium. A straw shows how the wind blows, and this movement at this particular time of the year is some indication of the confidence felt by the London market in the control of our Indian finances."

The motion was put and agreed to.

The Hon'ble SIR SASSOON DAVID moved that sub-clause (ii) of clause 3 of the Bill, as amended by the Select Committee, and item No. 6 in Schedule III appended to the said Bill, be omitted. He said—"My Lord, my objections to the enhanced duty on silver fall under two heads. In the first place, I very strongly object to the policy of levying duties on silver as if it were a question merely of revenue. The Government are no doubt aware that a heavy duty on silver has been strongly advocated in certain quarters as a part of a currency scheme. I do not express an opinion as to the efficacy or otherwise of the scheme at present. All that I wish to point out is that the proposal to levy a special duty on silver conveys to many minds the idea that Government are probably embarking on a new departure in currency matters. Whether this be so or not, the effect of such an impression cannot but be far-reaching, and I respectfully submit that if Government are inclined towards a policy of this kind the public are entitled to have a declaration of it in explicit terms instead of leaving it to be inferred from the proposal before us.

"In the second place, I object to the proposed enhancement of duty as inflicting a serious injury on India's trade with silver-using countries, notably our yarn trade with China. And I wish to state here that I associate myself entirely with the protest that has been addressed to Your Lordship's Government by the Bombay Mill-owners Association. My Lord, it is well known

that the cotton mill industry is passing through a difficult crisis. At any time a proposal to force down the value of silver would be detrimental to the trade with China; at present, it is positively ruinous. The proposed duty has already had the effect of forcing down silver and lowering the rate of exchange with China. The selling price of the Indian yarn in China shall have to be raised with the result that eventually the China market will be almost entirely closed to us. My Lord, I beg Government and I beg the Council to bestow their serious attention on this aspect of the proposal. My Lord, there is a good deal of sympathy expressed for the industrial development of this country. I most earnestly appeal to Your Lordship's Government not to ~~cap~~ ^{cap} still further a growing industry which has conferred immense ~~benefits~~ ^{benefits} on the country by levying the proposed enhanced duty.

"My Lord, the currency policy of Government has placed India in an extremely disadvantageous position in respect of our trade with the silver-using countries. But, at least, it could be said for it that, though injurious to the interests of one particular trade, it benefited many others? Can this be said of the proposed enhanced duty on silver? The cotton mills are injured, but neither any other industry nor the trade of India can derive the smallest advantage from it. If additional revenue has to be raised,—a point on which I venture to differ from the Hon'ble Finance Member,—there are several ways of doing it, without inflicting hardship on the most important of modern industries in India alone.

"Have we got to raise this revenue expected from the enhanced silver duty? My Lord, for my own part I say most emphatically, No. I say from my experience of many years in the opium business that, in the present circumstances of the market in China, having regard to the intention of the Government for the eventual abolition of the export of this drug to China within a few years, the estimated price at Rs. 1,750 per chest for next year is too low and that Government is certain to get at least Rs. 2,000 per chest. At the latter rate, the deficit in the Budget will be considerably reduced. In proof of my statement I invite the Finance Member to put up the whole or half lot for the year to auction today and I am sure it will be taken up at a price of not less than Rs. 2,000. My Lord, the deficit which the proposed duties are intended to meet is founded on an under-estimate. I say with the utmost confidence that the opium revenue next year will be such as to provide for the larger part of the requirements of the Budget. If further provision is necessary, the enhanced duties on spirits and tobacco will be more than enough to assure a surplus. Under these circumstances, and for the reasons given above, I appeal to Your Excellency's Government and this Council to drop the proposal to levy the greatly increased duty on silver. Before concluding I wish to point out that the exemption of silver imported by Government from the general tariff duty results in loss to the general revenue, the whole of the profits of coinage being credited to the Gold Reserve. I venture to suggest that the duty on Government silver should be credited to the customs revenue in the same way as private imports."

The Hon'ble MR. ARMSTRONG said:—"My Lord, I agree with a great deal of what has been said by Sir Sassoon David. He has explained at some length the position from the Bombay yarn manufacturing point of view, and I quite agree with him that Bombay has a grievance, in that by their action for revenue only Government have upset the silver market and silver exchanges and have made the trade of silver-using countries more difficult. Not only have they done this for Bombay but they have also upset the British trade with China and all countries using silver as a basis, and it is I think a great mistake, when action is taken for revenue only, that the trade should be upset in so many directions. The Hon'ble Financial Member has told us that this increased duty is only for revenue, and I accept his assurance with pleasure because there is a limit to all such taxation, and on silver this limit must surely now have been reached. If so—and if the assurance is worth anything—then the future at any rate is fairly safe. At the same time is not 16 per cent a very heavy duty on a precious metal and a medium of exchange? And after all where is the

necessity for this additional taxation and for the very heavy increase now proposed on many other articles some of which will fall with very undue severity on the European population in India. What is our position at the present time? By limiting our exports to China for reasons into which I need not enter, we are steadily losing our revenue from opium, and as by acts of generosity in the past we have reduced our revenue from salt, by at any rate one-half, we are now feeling—and I am not at all surprised at it—the pinch of these two very important items.

“What the future of opium is to be no one can tell, but if we are to suffer a further serious loss in the future, is it not best to recognise it at once and go back to the salt-tax? I know it will not be accepted, but I say if we know we are going to lose this very large amount, is it not better to fall back on the salt-tax? I am quite aware of the answer that might be given to this contention, but will not the same arguments apply more or less to petroleum on which an additional tax is levied? I quite agree with the Hon'ble Mr. Gokhale that consumers of Burma oil are not likely to reap any particular benefit from this small measure of protection. I feel very certain that the additional profit that will be earned by the Burma Oil Company will go into the pockets of the shareholders. I am told on reliable authority that the large reduction of salt-duty has scarcely reached the consumer and that it never will reach him. If this is so, a small advance at the present time will perhaps not be felt. Even for a fractional advance the labour class of this country are far better off than they were ten or fifteen years ago. Their wages have risen very considerably all over the country and are likely to keep up and food is coming down in price, and a small addition to salt will bring in a substantial sum and will not be felt. Would this not be better than taxing the savings of the people and giving a fictitious value to their purchases of silver. Hereafter would it not be better than many of the increases now proposed, which in many cases fall with undue severity on one class of people in India? The Europeans in India are quite willing to bear a fair share of taxation and help the Government. I remember very well about twenty years ago when Government were in difficulties over their financial statement owing to a rapid and continuous fall in exchange, the Europeans in India saw the necessity and they agreed as a temporary measure on an income-tax. I think it was very generous on their part, at the same time I may remind Council that this tax has ever since remained and become a permanent source of revenue. A scale of taxation might be suitable in England, but is not necessarily suitable in India, because the conditions of this country are so different.

“Now from the point of view of our currency, the additional tax, I think, is also objectionable if the price of silver is depressed. The Finance Minister in future will be able to accumulate more quickly the limited sum of twenty-four million sterling which is now apparently considered a sufficient guarantee. We are told that this is all we need and aim for at present, but I doubt very much if twice this sum will be considered too much by very many people: in fact it rather seems to me that our gambling in rain has been so successful that we are now going to gamble in silver.

“The position seems to be this. We are widening the difference between the gold value of the rupee and its actual value. We are taxing the savings of the people 16 per cent. and damaging the trade of the silver-using countries. Apparently we do not intend to accumulate a larger gold standard reserve than we had in use very long ago. The Financial Minister has told us that this additional duty is for revenue only, and it cannot therefore have been intended to check imports of silver. If however it is hoped that it may do this, I do not think it will. If there is a splendid harvest this year, I imagine that silver like all other imports will come freely into the country. Again I must say that I look upon the increased duty on silver as an unwise step and the duties imposed on other articles are so excessive as to drive consumers to cheaper and inferior articles and in many instances to kill trade altogether. A more moderate basis all round would be better.

“Then, my Lord, I come particularly to the amendment which has been moved by Sir Sassoon David as regards sub-clause (ii) of clause 3 of the Bill, that

it be omitted, and I must say that I hope this will be received sympathetically. The very stiff advance in the duty on silver came as a very great surprise. It was never expected that for revenue only Government would further enhance the duty on precious metal and a medium of exchange. And on many other articles besides silver the new duty will press heavily. I feel that in many cases a great injustice will be done if this policy is adhered to, especially the duty on the goods in bond. The trade that has been done is a legitimate business arranged for in good faith, and although I am well aware that in many cases the additional duty will be obtained from the consumer, a great change in this connection must disorganise business in many lines by driving consumers on to cheaper and inferior articles; thereby leaving importers with excessive quantities of high class goods on hand. There are also cases where trade may be killed altogether, and this would be a great loss. Let us take, for instance, cheap imported cigarettes or cigarettes made in this country from imported tobacco. These should be treated leniently. This will presumably be the last lot on which duty will be paid. Country tobacco, imported spirits and other things are in somewhat similar position. And as the Finance Minister does not want a windfall for this year's revenue, they may perhaps be leniently treated. I feel sure that Government do not wish to do injustice to any one by insisting upon their pound of flesh in a year which shows a surplus. The coming year can take very good care of itself: trade is improving in so many directions. If the new rates had been moderate, nothing would probably have been said; but they are so heavy as to be regarded in some quarters with very great apprehension and their full force without a moment's warning must of itself constitute a hardship on many items."

The Hon'ble SIR VITHALDAS D. THACKERSEY said:—"Your Lordship will permit me to explain to the Council how the duty on silver stands altogether on a different footing from other duties. It is much more than a duty levied upon a commodity. In the first place, silver is not only a commodity but it is the basis of currency in the Far East. Anything that affects the value of silver, therefore, affects the exchange between India and China. The duty thus affects the commercial relations between the two countries, and is, therefore, a more important matter than a tax on tobacco or alcohol. I cannot think that this aspect of the duty was sufficiently considered by Government when they resolved on this proposal. Why, my Lord, it is tantamount to giving a bounty to the manufacturers of China at the expense of the Indian manufacturers. I really think that if the object of Government were to give such assistance to the Chinese manufacturers they could not have hit upon a better plan. This question of the trade relations of the two countries, my Lord, is a complex one, and those only who are intimately connected with the trade can fully understand it in all its bearings. I will, therefore, with Your Lordship's permission endeavour to explain briefly to the Council how the proposed duty is likely to affect our yarn trade with China. The new duty amounts to nearly 17 per cent. as against the 5 per cent. *ad valorem* levied under the old Act. It is evident, my Lord, that such a heavy duty must reduce the quantity of silver consumed in India. It is unnecessary for me to insist upon this point, because Government themselves admit that only 6 crores worth of silver will be imported next year against 11 crores in the current year. This enormous decrease in the Indian consumption must lower the price of silver in London. Now, my Lord, we all know that the currency of China is founded on a silver basis. The Indian exporters to China receive the price of their goods in silver which has to be converted afterwards into gold standard rupees. We export between 5 to 6 lakhs of bales of yarn every year to China, and the value of this yarn is about 10 crores of rupees. The duty now imposed will greatly reduce the number of rupees which the Indian spinner will get for his yarn owing to the depreciation of silver. The Chinese manufacturers on the other hand will benefit to that extent as their manufacturing charges will not be appreciably affected. And in this unequal competition our export trade to that country will be adversely affected."

"My Lord, this would have been a great calamity at any time. At present, when owing to the high price of cotton which is 50 per cent. higher than normal and the loss of general confidence in the industry owing to the big failures of last year, the Bombay cotton mills are passing through a very gloomy period, and when prospects are very dull, the effect of this additional duty is bound to be absolutely ruinous. It may prove to be the last straw on the camel's back.

"The Indian industry has to contend with unequal competition. Take, for instance, Japanese cotton mills. They are nursed by their Government as a mother nurses a favourite child. Japan has given a protected home market to her cotton mills, thus enabling them to dump down their surplus products in China markets at less than cost price without any loss to their shareholders. Japanese manufacturers are also helped by loans of cheap money in times of depression and also by a special ridiculously low rate of freight for cotton from India to Japan through subsidised steamship companies. So far as China is concerned our currency policy of 1893 has proved a blessing to her and the proposed silver duty will still further strengthen her position against the Indian exporter. I hope, my Lord, I have made myself sufficiently clear that the effect of the four-annas duty will be highly injurious to an important Indian industry, and I earnestly hope that Government will see their way to drop the proposal as a means of raising revenue."

The Hon'ble RAO BAHADUR R. N. MUDHOIKAR said :—"The Council has before it expressions of opinion from the representative of the Bombay Chamber of Commerce, from the representative of Indian commerce selected by Government, and from a gentleman who is largely interested in the Bombay mill industry, and who at one time occupied the position of President of the Mill Owners' Association. My Lord, I wish to lay before Council the experience of one who on a smaller scale is interested in a mufassal mill and who even now here is pursued by cares about that mill. I also wish to place before the Council how an agricultural Province like Berar, interested largely in cotton, will be affected by this present legislation. My Lord, it is because I fear that my Province and all the other districts which grow cotton will be seriously affected, it is because I believe that the mill-industry which we consider to be our mainstay in the industrial struggle we have to carry on will be seriously affected, and it is because I believe that our export trade which we are carrying on with silver-using countries would be seriously injured, that I wish to associate myself with what has been said by the Hon'ble Sir Sassoon David and the Hon'ble Sir Vithaldas Thackersey with regard to this proposal of an enhanced duty on silver.

"My Lord, Berar is a Province in which nearly 45 per cent. of the land is actually under cotton cultivation under a system of rotation. We grow there between $\frac{1}{4}$ th and $\frac{1}{3}$ rd of the cotton produced in the country. A considerable portion of the cotton grown there is purchased by Japanese merchants on the spot. The balance is sent to Bombay or Calcutta and a large part of it is exported to Japan or China. Only a small portion of what is grown in Berar is consumed by local mills or by the mills in the country. Most of it goes out to Europe or Japan or China. Well, what is true of Berar is also true of Khandesh, of Gujerat, of the Southern Mahratta countries of the Bombay Presidency, of Hoshangabad, of Wardha, Nagpur and other districts of the Central Provinces—in fact of all tracts which grow cotton. Now, my Lord, the effect of this enhanced duty will be this, that our trade with silver-using countries will be seriously handicapped. On the silver we receive from them in exchange for our goods there would be an enhancement of 300 per cent. in the duty which has to be paid on silver. For what we export to those countries we are paid in silver and we shall have to give more of our goods for receiving the same quantity of silver than we do now. It is not a small interest which is affected. The total export trade in cotton amounted to about 21 crores of rupees during the last ten months, and out of that over 9½ crores went to China and Japan.

"We have all heard so much of the phenomenally high prices of this year obtained for cotton. The raiyat might well say that the short spell of good

prices he had is now to be followed by the imposition of a permanent burden on his industry.

"Then there are our struggling mills which are sorely hit by the curious combination of extraordinary high prices of the raw material with exceedingly low prices for the manufactured article. A glutted market, an absence of demand all over the world, tightness of money, all credit shaken by some recent failures, have all contributed to render the lot of those engaged in this industry very unenviable. My Lord, there are several here who say so from personal experience. The cotton-spinning and weaving industry is the one manufacturing industry which holds promises of industrial and commercial greatness to this country. With the tremendous advance made by the Western countries in applied science, with the knowledge and the skill which the directors and organizers of industries and the operatives concerned therein possess, with the practically unlimited supply of capital they have at their command, the task of the Indian manufacturer is an uphill one. My Lord, the importance of the industry well justifies the demand for special facilities. But leaving aside facilities, we might well ask the Government not to do anything which would have the effect of increasing its difficulties. The excise-duty already subjects us to a great disadvantage. The factory laws impede our free growth not a little. Let not our burdens be increased and our progress retarded. I would ask your Lordship and the Government here and in England to see how serious would be the loss which this industry will suffer. It is with difficulty that it is building up an export-trade in cotton piece-goods. During the last 10 months the value of this trade came to Rs. 1,67,18,836. The goods were all exported to Asiatic and African countries, which being silver-using countries would pay us in silver. Then there is the trade in cotton yarn and twist. This amounted to 8 crores during the last 10 months. Of this China took goods worth 7 crores and 4 lakhs. That country is our chief customer in this matter. Our other considerable customers are Asiatic Turkey, Persia, Aden and the territories thereabout, the Straits Settlements and Egypt. These are all silver-using countries and we have to receive payment in silver.

"Then take the trade in jute gunny bags, the total value of which came to 7½ crores of rupees during the last 10 months. Fully one-third of this was exported to silver-using countries in Asia and Africa.

"Taking the figures for 1908 the total export trade with China comes to about 15 crores of rupees, with the Straits Settlements nearly seven crores, with Egypt little less than 2 crores, Ceylon over six crores and a quarter, Japan a little less than 9 crores, and over four crores and a half with other Asiatic and African countries. It will be all this trade which will be affected and in regard to which the people of India would be placed in a position of disadvantage. My Lord, the Government is the custodian of the interests of the country in all external relations. Should the Government adopt a measure not calculated to promote these interests?

"It is said that the duty on silver will serve to raise the value of the silver 'hoards' in the country, of the silver ornaments possessed by the masses and the silver articles of use possessed by the middle and well-to-do classes. As to the hidden hoards supposed to be buried under ground, or stored in secret recesses, their existence on any large scale has yet to be demonstrated. But apart from this it would only be when these silver ornaments and silver articles are brought out for sale that any benefit would accrue to the possessors. For the time being it is the same to them whether the price of silver in the market is at 66-10 or 75. The increase in the potential value does them little practical good. But to the cultivator, the trader, the mill owner and those interested in the export trade, the appreciation of silver means a serious loss.

"There is another consideration which ought to weigh with Government. By imposing a tax on silver the Government is taxing the precious metal out of which the current coin in the country is made. Are we sure that the appreciation in the value of silver will not affect the profit made by coinage? Are we sure that the objects aimed at by the currency policy of the Government will not be partially defeated?

" My Lord, it is not quite satisfactorily established that the deficit will be as great as it is feared it would be. The present price of opium does not certainly spell a deficit. There is a margin of Rs. 600 kept between the present price of the stuff and that on which the calculations in the Financial Statement are based. We cannot, it is true, ignore the fact that the prices realised this year are unprecedented. In the quinquennium ending with March 1908, the highest average price realised was Rs. 1,587 and the lowest Rs. 1,350. But there is nothing to show that the circumstances which have brought about the present price of Rs. 2,397 have ^{child} ^{am to} ^{used to exist} and that there will be a drop of 600 next year.

" But even if the price drops down to 1,750 and there is a big deficit which has to be faced, it cannot certainly be ^{be} ^{and the resources of the Hon'ble Finance Member's financial statesmanship to} ^{provide a substitute for the silver duty which is less objectionable and less harmful.}

" It is much to be desired that your Lordship's Government were unhampered in the matter of this opium trade and had a free hand. But this is not the occasion to raise the question of the propriety of the restrictions which have been put over the Indian Government. Irrespective of this article there are other sources from which the additional money that is wanted by the Government can be raised without doing any harm to the interests of this country and of its Government. My Lord, since there is an amendment in my name in which I suggest a substitute for silver, and as it is by no means impossible that the Hon'ble Member in charge of the Bill may reconsider the matter when he sees how strong the feeling is against this tax, it would not be out of place to consider whether a substitute for it cannot be found. My Lord, I congratulate the Government, and the Hon'ble the Finance Member in particular, on the unconventional and bold manner in which they have raised the duties on certain articles of luxury consumed mostly by well-to-do persons. Might not the same unconventionality and boldness be applied in another direction also? There is probably no tax to which Indians and Europeans, having any sort of permanent interest in this country, have less objection than the customs-duties on imported cotton goods. Those duties have been advocated on the ground of revenue. I do hope that the Hon'ble the Financial Member will see his way to propose that in place of raising the duties on silver the duty on imported cloth should be raised.

" But apart from any increase in the duty on imported cloth, there is another duty which I suggest should be imposed in the place of the proposed one on silver. There is sugar for example. This article, which is merely used by the middle and well-to-do classes, can well be taxed higher without causing dislocation of trade or of the agricultural industry, or any other interest in this country. The imports of sugar into India have been steadily increasing. From 6 crores and 3 lakhs in 1903-04 they went up year after year till last year their value amounted to ten crores and ninety lakhs of rupees. In the current year the value of the quantity imported during the 10 months ending with 31st January was nine crores eighty-six lakhs. The sugar which comes from outside sells in mufassal stations at the rate of Rs. 9 per maund of 40 seers; sugar vouched as made in India by modern processes sold some time ago at Rs. 12 a maund; while Benares sugar—that is, sugar made by the indigenous process—sells at the rate of Rs. 16. If the duty on imported sugar is raised from Rs. 5 to Rs. 7-8 per cent., it would mean an increase of Rs. 1-13 per maund. After paying this additional duty, imported sugar will still be cheaper than India-made sugar. There is thus absolutely no reason why this increase in the tax on sugar should not be substituted for the proposed addition to the tax on silver. There is no Indian interest which will be affected injuriously. The most jealous lover of free trade ought to feel no compunction. I am not one of those who are terrified by the word 'protection'. But as we want revenue, the tax should be fixed on a scale which will not prohibit the entry of the imported article.

" My Lord, I do hope that the Government will see their way to withdraw the proposal about raising the tax on silver. It will inflict injury on the agriculturists, it will dislocate our cotton-industry, it will hamper our export trade. More than one tax can be found which will serve the purposes of Government as well. May we hope that Government will reconsider their proposal? "

The Hon'ble MR DALABHOY said:—" My Lord, the imposition of enhanced duty on silver is a subject of such momentous and far-reaching consequences that I cannot help saying a few words today. I cordially second this amendment. I had myself thought of moving an amendment to this effect. I believe it represents faithfully the views of the community, and were it only for this fact I, as a representative of the people, should have supported it. But there are weighty considerations besides to compel my support. Silver is a metal which, however discredited, still largely influences the commercial operations of the world, and unless mines come to be closed for sheer loss, a remote contingency by-the-bye, the output is not likely to be sensibly reduced in the near future. We cannot with impunity disturb the value of the fine metal, the least of all can the Government of India do that. India has intimate commercial connection with silver-using countries, and whatever view may be taken of its currency policy the success of that policy largely depends upon the rehabilitation of the rupee which is facilitated by an appreciation in the value of silver. The present currency policy of this Government came to be adopted in consequence of the phenomenal depreciation in the value of the metal. Every effort has been made in the past to check this depreciation, and with the passage of the Sherman Acts, the urgency for the adoption of a bold policy became apparent. The Indian mints came to be closed to the free coinage of silver, with the object of producing an artificial contraction in the volume of the currency, thereby giving tone to the rupee. That policy has so far succeeded in the attainment of its object. But we have not yet passed through the experimental stage, and he will be a bold prophet who will claim for the rupee a permanent appreciation in value through the currency measures of Government. The Gold Standard Reserve proves the necessity of caution and preparation against future fall in Sterling Exchange. There are periods when the Council Bills do not pass through the market as easily as could be desired, and the Secretary of State has to withdraw bills from it in order to give tone to it. But, my Lord, what strain will it cause upon the resources of Government if there is a heavy fall in the value of silver? The greater the disparity in values between gold and silver the greater is the risk of an unwholesome disturbance in the Sterling Exchange, and the acuter is the difficulty of this Government. Interest and prudence should make the Government careful not to take any step which has as the effect of depreciating the value of silver. For the success of its currency policy the price of silver should be maintained at as high a figure as possible. Admitted this, it necessarily follows that any measure calculated to cause a slump in silver will jeopardise its currency policy, and will be productive of fearful consequences. That the measure proposed of placing a heavy import duty on silver will force down its price, no one, I trust, will deny. The announcement has already caused considerable depression in the market. The only hope now depends upon the unabated activity of the private demand. Upon this point, however, we are left to conjecture. The view that the demand will remain unaffected by the duty is, in my humble opinion, too optimistic. If the price in India is temporarily increased on account of the heavy duty, the only reasonable supposition is that the demand will shrink. If the demand is weak, the price of silver in the world's market must fall until it reaches a point when it will be possible for importers to maintain in India the present level of prices even after payment of the duty. But that is a contingency which cannot be viewed with equanimity by Government. The harmful effects of a further fall in silver can be neutralised by Government by creating further contraction in the volume of the currency, and thus producing a greater scarcity of the rupee, by maintaining the Gold Standard Reserve at a higher figure, and, further, by more frequent withdrawal of Council Bills from the market. Each of these measures, which may have to be adopted simultaneously, will have serious consequences of its own.

"I know, my Lord, there is a respectable body of opinion in favour of a heavy duty on silver as a subsidiary currency measure, but, through the natural operation of economic laws, such a duty would cause a fall in the price of silver. I do not understand how a further depreciation in the value of silver can help Sterling Exchange. There are prophets who predict that the proposed

duty will gradually lead to the introduction of a gold currency into the country. The Hon'ble Finance Minister's exposition of the financial difficulties of Government and the circumstances under which and the purposes for which the duty on silver is sought to be increased, should disillusionise them. A Finance Minister troubled with increasing shortage of revenue cannot be expected to undertake such a costly change in the currency of the country. I believe the Hon'ble Sir Guy Fleetwood Wilson has no such ambitious idea, and his proposal to get more money from silver imports is clearly inspired by financial necessities only. And I point out its probable effects upon the Sterling Exchange only to prove its unsuitableness as a fiscal measure. It remains to be seen how long the present firmness in the exchange continues. If it does not continue, it will not be for this duty on silver.

" My Lord, the existing currency policy of the Government is attacked by a large number of critics on the ground that it imposes an indirect tax upon the people of nearly 40 per cent. I will not attempt to fix with precision the extent of the increased burden, but it must be admitted that the scarcer the rupee the greater is the liability of the citizen having to make fixed payments. Anything therefore which may force Government to produce a greater contraction in the volume of the currency must be viewed with alarm by the people. The other two measures which the exigencies of the situation may force upon Government must be more or less matters of serious concern to Government and the people alike.

" Then there is the question of general prices of commodities which, according to expert opinion, are not completely free from the influence of the currency policy of the Government. The present high level which has necessitated an official inquiry into the causes is, in the opinion of people who ought to know, partially due to that policy and the consequential depreciation of silver. A further fall in the value of silver may be responsible for a further rise in prices. That will be a position full of difficulty and distress.

" The influence of the duty again on the infant cotton industry of the country, which is admittedly passing through a period of great depression, will be incalculably deleterious. The Indian manufacturers do large business in yarn and piece-goods with China. The Indian export trade with China was in a prosperous condition when the mints were open to the free coinage of silver. China is a silver-using country, and the Chinese coin can, after the closure of the mints, only bring to the Indian seller its intrinsic or metallic value. With a prostrated silver market his profits became attenuated. The closure necessarily affected him seriously. If now there is a further depreciation in the value of silver, the Indian trade with China must suffer. It is a question if Indian yarn and manufactures will be exported to that country as freely as at present. Unless there is a corresponding rise in the China prices, the decrease in the value of silver will measure the loss in profits of the Indian manufacturer. Experience shews prices do not respond so readily to the circumstances. The result will therefore be a further serious reduction in the profits of the mill-owner. This is an alarming prospect, especially in the present depressed condition of the industry. The Indian mill-owner in his distress had fully expected to receive some sort of encouragement from Government. The duty on silver is a sad surprise to him. It will affect him most. I do not undertake to predict how many mill-owners would be able to withstand this fresh taxation.

" A further depreciation in silver, the natural economic result of the proposed duty, will also prove detrimental to public interests by encouraging false coinage. Any great disparity in values between silver and the rupee offers temptations to the dishonest utterer of counterfeit coins too strong to resist. The number of spurious coins in circulation is already large, and many poor people are sufferers. The difficulties of the masses from this source will become far acuter with the imposition of the duty. The people may well ask Government to take special precautionary measures for ensuring the circulation of true coins, and the expulsion of counterfeit coins. Any fiscal measure which encourages, albeit indirectly, the circulation of false coins must *ipso facto* be injurious to the interests of the honest citizen.

"Viewed in any light, this duty on silver will result in much suffering and difficulty. Government should in the best interests of the country abandon it. The enormous imports of silver of recent years which have attracted the notice of the Finance Member should be welcome to Government. They have steadied the market somehow, and have to some extent contributed to the success of the currency measures. As I have already said, it will be sad if the silver imports are pared down. But the Hon'ble Finance Minister seems to think that the volume of the imports will remain unaffected by the duty. The weak feeling in the market produced by his announcement of Friday last should shake his optimism. Silver is quoted 23½d per ounce in London, less than the lowest figure since 1898, and still the market continues quiet.

"I do not admit that silver is a luxury and is the fittest subject of taxation. My Lord, there is a much more promising subject—the cotton imports. The duty upon cotton goods was in 1894 fixed at 5 per cent., and if it was reduced to 3½ per cent. in 1896, it was because the state of the finances allowed of the rebate. Now that there are financial difficulties again, the duty can surely be raised to its former figure without giving legitimate occasion for controversy about free trade and protection. This increase will be welcomed by the country, and will yield a revenue of about 60 lakhs of rupees. I cannot understand why such a tax, popular and productive alike, should be abandoned in favour of an impost which is open to serious objection for various reasons.

"To give retrospective effect to the duty will be a serious injury to importers, and against precedent. Imports on their way to India should in equity be exempted, even if Government does not see its way to accept the amendment."

The Hon'ble MR GOKHALE said:—"My Lord, I wish to say just a word in support of this amendment. My Hon'ble friend, Sir Sassoon David, who has moved this amendment, has been invited by Government to serve on this Council as an expert in commercial matters, but I see that the Hon'ble Mr. Weston is already inclined to regard him as an adviser of the market place. My Lord, I do not oppose this taxation simply because it is additional taxation. As a matter of fact I should be prepared to support additional taxation for objects connected with the moral and material welfare of the people, but this is taxation merely for administrative purposes. However, I am not going to pursue that further because Mr. Weston has told us that the Finance Department knows better. In regard to that I will only say this, that I am content to wait. This is my ninth year in this Council—and sometimes I have waited for a whole year for my justification—and if things go well probably the actual figures next year will decide matters between the Hon'ble Member and myself. As regards the amendment I only want to say one word about the injury which this proposal is bound to do to the mill industry in this country. I want to mention one or two points which have not been mentioned by previous speakers. My Lord, we are already gradually losing our yarn trade with China. The position is this: Today we export about half a million bales; China produces about half a million bales of her own and Japan sends nearly half the quantity of what we send there. Ten years ago Japan did not send a single bale. Another circumstance that I would like to mention is this that since 1899 when exchange was screwed up to 1s. 4d. not a single spinning mill has been put up in Bombay. Not only this, but in 1901-02 about 20 to 25 spinning mills went into liquidation and several other spinning mills turned themselves into weaving mills; while even during the last cycle of extraordinary prosperity not a single spinning mill was added. That is the position, and just now, when the industry is in a state of great distress, the Government are adding to its difficulties by imposing this burden. I do not think the Government would do this in England. I do not wish to say anything more."

The Hon'ble Mr. BRUNYATE said:—"My Lord, the Government cannot of course deprecate the criticism to which the Bill has been subjected on behalf of the very important mill-owning interests which are concentrated in Bombay. The Council is constituted with the express object of securing that such interests shall be adequately represented and their claims properly pressed. But when

the matter which the Council has to deal with is a proposal for new taxation, undoubtedly by far its most important aspect is the way in which it affects the mass of the population from whom the contribution is to be taken. Now, as a preface to what I shall have to say on this general aspect of the tax, I should like to state in the first place, speaking with the full authority of the Hon'ble Finance Member, that the only object of the Government in proposing this tax is to raise revenue. They have not undertaken this legislation with the idea of enhancing the value of the silver ornaments and hoards of the population; it is not any part of their intention to assist the sale of Council bills by discouraging the imports of silver; they are not acting under any felt necessity of taking further steps to discourage counterfeiting. In short there is absolutely no connection whatever between this tax and their currency policy. It would not be sound finance to introduce a tax simply with the object of tampering with values, or artificially appreciating a commodity in general use, or to base a fiscal policy on the theory that a tax is a beneficent enriching agency when under the best of circumstances it must involve a privation. A tax on silver means that a person who would like to possess silver will be able to get less than he wants, and that is, in its way, a privation, whether he uses the silver for his dinner table, or to decorate his wife, or makes a hole in the ground and leaves it there.

"Admitting all this, I would ask the Council to consider whether our need for a large sum of money which must be raised from many humble contributors could be met at the cost of less privation to them than this tax will involve. I do not think so. It would have been easy to find a necessary of life from which the revenue could have been obtained readily enough, but it would be difficult indeed to find an article in general use to which the term luxury can be so appropriately applied, and very difficult as it seems to me to find a tax which as regards any individual is less obligatory, though when we look at the mass of individuals we know that they will not in fact unanimously avoid it, and that it will produce a substantial revenue. The man who invests his savings, using the term investment in the ordinary sense, will not pay the tax at all. The man who hoards in coined rupees will also escape it altogether. The man who insists on buying ornaments or hoarding in bullion will pay the tax at the time, but when he chooses to convert his inert possessions to an active use he will get the bulk of the tax back again or rather pass it on to the next buyer. This idea of taxing the buried talent has in fact some very attractive aspects. I will leave them, however, to others who are better qualified to speak upon them, merely remarking that the broad general effect of the tax is not only the most important matter for our consideration but one which, as I take the liberty of suggesting, should specially appeal to the elected members of this Council who, though chosen by particular interests, collectively represent the vast mass of the population who are unable to select their own champions.

"I now turn to the case presented on behalf of the Bombay mill industry. I take it that the fundamental result of our tax, to which all other results are subsidiary and consequential, is that some reduction may be expected in the Indian demand for silver, and consequently some reduction in the world demand for silver. This means a fall in the world price of silver. Such a fall has in fact actually occurred. Now China being a country with a silver standard, the silver which she uses as currency feels the effect of this fall just as much as silver used for any other purpose. Consequently her exchange with India, and not only India but India's gold standard competitors for the China trade, may be expected to fall. Such a fall has occurred. I may illustrate at once by actual figures what has happened and what is expected to happen. Just before the announcement made last Friday, the London price of an ounce of silver stood at 24d. exactly. The moment the intention to impose a tax was known, it fell to 23½d. On the 28th it fell from 23½ to 23. On the 1st March there was another fall to 22½, and on the 3rd there was a recovery to 23½. The whole fall from the 24th to the 3rd is just over a half penny or 2 per cent. of the value of silver at the outset. Similarly with the Shanghai exchange with India. On the 25th of February, i.e., before the announcement made in this Council on that date was known a 100 Shanghai taels exchanged for Rs. 178. The next day

the exchange fell to Rs. 173½. There was then an improvement to Rs. 174, but the rate fell back on the 3rd March to about Rs. 173. Here the fall is 3 per cent. The contention put forward on behalf of the mill industry is, first, that this fall of 2 or 3 per cent. in the value of silver and in the Eastern exchanges represents a bounty of the same amount conferred on the local production in China by the mere fact that this tax is being imposed; second, that the bounty is permanent in its nature, and whatever may be the future fluctuations in the value of silver, the price of the metal will always be higher by that amount than it otherwise would have been; and third, that this bounty is sufficient to do irreparable damage to our yarn trade in China.

"I will first take the suggestion that the increased duty in India will act as a bounty or protective duty in favour of Chinese yarn. The argument is that until last Friday the Indian manufacturer who sold yarn to the value of 100 taels in China was able to convert those taels into Rs. 178. Today for the same quantity of yarn sold, he can only get Rs. 173. Thus, whatever the conditions of equilibrium previously established, it is claimed that the balance has now been disturbed to that proportionate extent.

"I shall have some criticisms of this theory to suggest in dealing, in a moment, with the alleged permanence of the so-called bounty. But before passing on to that question I should like to draw attention to the figure we have thus arrived at. In putting the case as I have done, I do not mean to imply that the Hon'ble Sir Sassoon David and his supporters are satisfied that the fall in the value of silver due to this tax will not ultimately prove greater than 3 per cent. I believe Sir Sassoon David anticipates that in certain circumstances it will. But I do not think he has shown any clear grounds for the supposition that the fall which has already occurred does not fully discount the probable reduction in the world demand for silver. We all know that with large and sensitive markets the trade instantaneously adjusts itself to new conditions and protects itself against them. The tendency is rather to seek over-protection than to underrate the importance of a new disturbing factor. In the last few days we have had our one and only opportunity for distinguishing the influence of the new factor introduced by the menace of this tax. A year hence or even a month hence a score of new circumstances affecting the value of silver may come into operation. But today effect and cause are clearly related, and we are justified in regarding the change of price as representing expert practical opinion as to the full effect of the tax.

"Now, Sir, assuming the main argument to be valid, can we seriously be asked to believe that this handicap of 2 or 3 per cent. is going to ruin the Indian yarn industry? We have all heard of protective duties being justified as a means of stimulating infant industries. Have any of us heard of a protective duty imposed with this object being limited to such an extraordinarily low figure as 3 per cent? We know very well that in actual practice much higher rates are always required. We treat that as an axiom, and for that reason we are accustomed to claim that our general 5 per cent tariff in India cannot fairly be regarded as in any real sense protective, and exactly the same line has been repeatedly taken by those who have resisted the imposition of excise duties in this very case of cotton. And can it be imagined that capital will flow out to China on the strength of this small reduction in the value of silver, that mills will be constructed, that machinery will be ordered and the existing organization completed on the scale required to drive out the Indian manufacturer? I think, Sir, the proposition has only to be stated clearly for its unsoundness to be obvious. All this may come; it is possible of course that it may come quickly, for China already holds a large portion of the trade, but that the fall of silver by ½d. in the last week will materially affect the question is not, I submit, a reasonable expectation. And that, Sir, as far as I can gather is the opinion of the Bombay shareholders themselves. There has been a good deal of noise about this tax, and consequently no doubt some real trepidation; but as far as my information goes the decline in the value of shares has been limited

to a few mills and confined, with hardly an exception, to about 1 or 2 per cent. of market value.

"I come now to the second of the three points which I mentioned above, namely, the claim that this bounty will be permanent in its effect. This is a claim which we can in no way admit, and which was not admitted by the Currency Committees of 1893 and 1898. The whole theory of the protection given by a fall in exchange is, we believe, thoroughly unsound the moment its application is extended beyond the purely temporary period of disturbance and the theory becomes a pronouncement as to permanent results. To revert to my previous example of a 100 taels' worth of Chinese yarn competing with 100 taels of Indian yarn. The proposition implied is that though 100 taels will in future represent a smaller value owing to the depreciation of silver, they will still be as effective as before in paying wages in China, in purchasing raw material and in buying the machinery required for new mills from gold standard countries, or in meeting the dividends of foreign capitalists. This is obviously fallacious as regards payments, such as those for machinery, which are made in gold. It is also ultimately incorrect as regards wages and prices in China, for you cannot indefinitely obtain a given quantity of labour or material while the real value of what you give in exchange is a constantly decreasing amount. There must in the end be an adjustment of wages and prices, and in China in particular such adjustments are in some ways particularly rapid. The silver currency of the country is not a currency in any effective sense, but an article of barter pure and simple. There is no constant and stable relation between subsidiary currency and the conventional silver unit, it is a matter of daily fluctuating exchange. The true currency of the country in which all the minor purchases take place and most of the wages are paid is the copper cash. Here again there is a constantly fluctuating rate of exchange between the copper cash and the silver unit; and as the copper unit is infinitesimally small, so that it may take 10,000 cash to make up a pound sterling, and the coolie in China is a good deal more familiar with exchange problems than most educated men in other countries, there is no possibility of a gain or loss on exchange being overlooked by either of the parties affected. This is a commonplace of standard writers on Chinese trade and economics, and evidence to the same effect was given before the Indian Currency Commission of 1898. It was shown that the lower purchasing power of silver in terms of copper, i.e., in terms of labour, had actually proved a considerable set-off to the fall in its purchasing price in terms of gold which was caused by the closing of the mints.

"My Lord, I have emphasized the fact that the best opinion, namely, that of those who control the movements of world prices, is that the discrimination against the Bombay industry which is created by this tax cannot be put above 2 or 3 per cent. I have pointed out that the conditions in any silver standard country, and in China of all others, must set up adjustments which will diminish this marginal disadvantage to a negligible quantity. I have argued on general grounds that this small and temporary injury—if injury it is—cannot reasonably be expected to have any marked effect on the welfare of the industry. I might have hesitated to oppose these views (though I believe them to be soundly based and they are supported by the recent course of prices in the Bombay share market) to the opinions of practical experts like Sir Sassoon David and Sir Vitaldas Thackersey, but we have on these matters an absolutely conclusive appeal to experience. During the currency discussions of 1893, and again when the Currency Committee sat in 1899, there were the same gloomy forebodings—justified however by an immeasurably greater disturbance of conditions. Many here will remember the arguments used on behalf of the tea-planting industry. At that time India and China had been competing together for years on the same footing as regards currency. It was argued that the disturbance of the exchange, the appreciation of the rupee and the depreciation of silver, might not only result in India's ascendancy in regard to tea being wrested from her, but in the entire and irretrievable ruin of the tea industry. I am quoting the words actually used by the Darjeeling Planters' Association in 1892. The question of tea is

of course outside our province today, and I will only mention the result. In the year before the closing of the mints India exported 115 million pounds of tea to foreign countries and by 1909 had a little more than doubled that amount. Almost exactly the same arguments were used in regard to the cotton industry, and here I must enter into more detail. What the mill-owners feared, and had excellent reason for fearing, was an enormous depreciation in silver. This actually took place. In 1892-93, the year before the mints were closed, the average value of silver per ounce was nearly 40s. The next year it fell to 33½s; the year after to about 29; and it stayed at or below 30s. for some years. Surely here were the conditions in which a disastrous stimulus to production in China might have been expected. The so-called bounty in this case was not 2 per cent. but 25 per cent. It was not a temporary decline which might be counterbalanced by other causes in the course of a single month. It continued for years, and as we know silver has not since returned to a price anything like 40s. an ounce. In addition, just before the closing of the mints occurred there had been considerable overtrading, and the mills had actually been working short time for some months before to enable the Chinese markets to dispose of their accumulated stocks. There was, as a matter of fact, a fall in exports in 1893-94 partly due to the dislocation arising from the changes in our currency system and partly to the existing glut of the Chinese market. The exports picked up, however, in 1894-95, and it would appear that the adjustment of prices and wages in China to the extraordinary new conditions began very quickly, for I find it stated that by the first month of 1894 the mills were again working steadily and profitably. I may perhaps give the actual figures. In 1891-92 the exports of yarn had been 161 million pounds. In 1892-93, the inflated year just preceding the closing of the mints, they rose to 189 million pounds. In 1893-94 they fell (as I have said) to 134 millions, but went up again the following year to 159 millions. In 1902-03 and 1903-04, though by this time the value of silver had now fallen to 24s. the exports were about 250,000,000 pounds, and in 1905-06 they reached the record figure of 298 millions. In the last two or three years there has been a falling off, owing to various causes, but the amount exported in 1908-09 was as much as 235 millions, and in the exports to China in particular there was a marked improvement.

"I claim, Sir, that this experience of an increase in exports, which may be roughly put at 50 per cent. during a period in which the value of silver fell by close on 40 per cent., entirely refutes the contention that a fall of 2 or 3 per cent. in the value of silver or even a much higher reduction is going to drive our yarn out of China. There could not have been a more decisive test of the 'bounty' theory than that to which it was subjected in the great experiment made in 1893. The theory was completely exploded in the case of tea and in the case of cotton; and I confess to some astonishment at finding it revived today in connection with a disturbance of exchange which might almost be called insignificant in itself and will certainly disappear the moment improving conditions make it possible for the Indian Government to resume silver purchases.

"The facts of the case, my Lord, at any rate as I read them, are that we are not dealing with an industry the ordinary conditions of which are so fixed that even a slight disturbance may produce a disproportionate result. As regards the Indian mills, the conditions under which they have been working for the last twenty years has been subjected to the widest fluctuation. The price of the raw material varies within the widest range. Exchange, as I have now repeatedly pointed out, has fallen and has also fluctuated to an extent which makes the present disturbance practically negligible. The mills have also no doubt been affected by the general rise of prices and wages in this country. Trade with China has also been interfered with by the deterioration of her copper coinage. Again as regards the general competition, the awakening activity of China is no doubt a real factor and one the importance of which must increase. If we take all these considerations together, there is no doubt much in the outlook which is uncertain and something which is disturbing. We can realise that under such conditions the mill-owners may feel bound to resist

any charge which might even conceivably affect them adversely. But though those apprehensions are natural, it has not, as I submit, been shown that as regards the duty on silver they are well grounded, and we cannot be expected to refrain from using a fiscal instrument which from the broader point of view possesses exceptional advantages.

"I have now dealt as a whole, my Lord, with the case presented by the mills. There are, however, certain special points which demand reply. The first of these is the contention that the enhancement of the duty is incorrect in principle, that silver is an article of currency and should not be taxed. We do not accept this view. We have not accepted it in our tariff, in which we already distinguish between silver bullion which has hitherto paid the general rate of 5 per cent and coined rupees which pay nothing. And if there is any proposition which has been treated as axiomatic in connection with our present currency system, it is the statement reiterated over and over again that the effect of the closing of the mints was to divorce the rupee from its relation to silver and to constitute it a token coin linked up with gold.

"Next, my Lord, we are told that the imposition of this tax will shatter confidence; that the mercantile community will never know when it may not be taken off or enhanced. It would be very regrettable, my Lord, if business were permanently hampered through any feeling of uncertainty as to the future intentions of Government. The position is the more difficult in that it is impossible for Government to bind their successors, or even as regards themselves to go about saying what they will do and what they will not do at some future date in matters of taxation. But I must say that this question of the fate of the silver duty seems to me the least disturbing of all the problems which beset the cotton manufacturer in India. He can see for himself that to take off a duty of this kind is infinitely more difficult than to impose it; and that the rate now proposed is so high that we could not readily contemplate taking another step. He might also assume that in such a matter as this the Government will not act with levity; and that if circumstances should arise—it is just conceivable that they might—in which the tax has to be modified, they will be circumstances of obvious and pressing necessity. For my own part I can imagine nothing better calculated to disturb the minds of the mercantile community, nothing more suggestive of the thin end of the wedge than a tax of 2 annas or 2½ annas, which I see suggested in one of the amendments on the agenda paper. If the ultimate object of Government were to impose as high a tax as silver could bear, but to do it gradually, this is exactly the way in which they would begin. Our proposal has at any rate the merit of apparent finality: whether it will be really final or not is more than any one here can take upon himself to declare.

"Another complaint, and a very natural one, is that we are imposing the tax at a time of special embarrassment to the mills. Well, my Lord, it is impossible for Government to choose when to impose new taxation, and their times of exigency are very likely, in a country governed so completely by seasonal conditions, to be times of difficulty for agriculture and trade as well. If the tax had been proposed for currency purposes, we might well have deferred it, though, as I have already mentioned, the state of the trade in 1893 did not restrain the Government from closing the mints in that year. But its object is purely fiscal, and we have had to consider the interests of the mass of the population rather than those of one section which, as we believe, though it may feel apprehensive at the moment, will not in the result be materially prejudiced.

"My Lord, I will end as I began by stating that the one and only object of Government is to raise revenue; and their object in selecting this form of taxation in preference to others is that they believe that the revenue required will in this way be raised with a minimum of hardship. I trust, my Lord, that a fuller consideration of the case will induce the great majority of the Council cordially to accept the proposal on this basis, and to recognise the spirit of consideration for the taxpayer which has induced the Government to fix its choice on this particular fiscal expedient."

The Hon'ble PANDIT MADAN MOHAN MALAVIYA said.—“My Lord, the amendment that is now before the Council relates to the amount of additional duty to be imposed on silver, and so far as it affects the mill industry of Bombay it has been very ably and eloquently supported by many gentlemen who are better entitled to speak upon the matter. I do not propose therefore to take up the time of the Council by dwelling on that aspect of the question. But, my Lord, there is another aspect of the proposed taxation to which pointed reference has been made by the Hon'ble Mr. Brunyate in the speech to which we have listened just now, and that is how it will affect a large number of people among the general population. On that point I wish to submit a few words for your Excellency's consideration and for the consideration of this Council. My Lord, so far as the mill industry is concerned, it may be able to bear the loss which the imposition of the increased duty will inflict upon it, or it may not; but so far as a large number of people among the general population is concerned, it ought not to be forgotten that a great deal of silver is consumed by them not as a matter of luxury but under the compulsion of a necessity imposed by social and socio-religious considerations. On the occasion of marriages, and on the occasion of other ceremonies connected with marriages, a large number of the middle class people have to make silver presents to their female relations. These presents are not made merely by those who have made savings and can spare something, but by even the humbler man who is unable to spare anything but feels that social considerations require that he should pinch himself, that he should put himself under pecuniary obligations in order to present some small silver ornament to his daughter or to his daughter-in-law who is being married. My Lord, this custom has even a religious sanction. In the sacred books of the Hindus it is laid down that the most approved form of marriage is that in which the father of the bride selects the husband, invites him to the house and gives away his daughter in marriage after giving her such ornaments as he can. This being so over the whole length and breadth of the country a large number of the people of the middle class will be exposed to a very heavy imposition if the proposal to increase the duty on silver is accepted. My Lord, the result will be this. The man who will go to the market to buy Rs. 15 worth of silver will have to pay Rs. 2 extra. That will not be the value of the silver, but it will be the tax paid to the Government. Is it fair, my Lord, to put this tax on these middle class men, and even on the humbler classes who also try when they can to present such ornaments to their female relations?

“There is yet another aspect of the question. The poor middle class throughout the country, and the poorer humbler classes generally, invest their savings, what little they may be, in silver. If the proposed duty is imposed whenever any poor man will buy silver worth Rs. 15, he shall have to pay Rs. 2 extra, and that sum, my Lord, will go for ever to the Imperial exchequer; it can in no way add to the real value of his silver, it gives an artificial and fictitious value to the silver; but so far as its real value is concerned, it remains where it was. When it is said that by enhancement of the duty the value of the silver will be appreciated throughout the country, and that the mass of the population will be benefited, and when surprise is expressed that members who represent the masses do not render support to this proposal to add a further duty on silver, I submit, my Lord, that note is not taken of the important fact that silver is not an article of luxury of the poor but that they use it, when they do, as a matter of necessity or an investment. That being so, my Lord, the next question that arises is, has any necessity been proved for imposing this fresh burden upon the poor? I have listened with the greatest consideration to all that has been said by the Hon'ble Finance Member, the Hon'ble Mr. Meston and the Hon'ble Mr. Brunyate, but I regret to say that I do not see any justification for adding to the burthens of the poor at this moment. What are the exigencies in which the Government finds itself? The budget clearly shows that so far as the people generally are concerned, they have been adding to their contributions to the Imperial Exchequer. The land revenue alone has given 65 lakhs more in the last year than was expected when the budget was framed. It is clear that the contributions of the people have not decreased;

they have increased in many respects ; and, on the whole, I submit that it cannot fairly be said that there is any justification, so far as the collections of the year can show it, for imposing a fresh burden on the people. No circumstances have arisen which would justify a resort to fresh taxation. As my Hon'ble friend Mr Gokhale has pointed out, there is no war threatened, there is no famine impending, and, my Lord, there are no other circumstances which would justify a resort to additional taxation, and particularly to a taxation which would fall heavily on the poor.

" If the Government require more money than the revenues of the year are likely to bring them, then, taking the circumstances of the country as they stand, there are certain courses which are obviously open to the Government. In the first place there is the long standing complaint that the expenditure of the Government generally is extravagant. My Lord, these complaints have been made year after year, but no serious effort has been made to generally recast expenditure. I do not blame the Hon'ble Finance Member for it. I am sure we all respect him for his desire to keep down expenditure and are grateful to him for his expressions of sympathy. The statement which he has made would show that if the Government could be persuaded, he would be more than glad to have a general recasting of expenditure in order to reduce expenditure generally. But while I gratefully recognise that he has taken care, with the knowledge that he had of the circumstances of the country, to frame a budget which he considered would fall in the lightest manner upon the mass of the people, I regret that the result will unfortunately be different from what he desires so far as the tax on silver and petroleum is concerned. And there is a general feeling that it was possible to avoid these taxes by reducing expenditure at least temporarily, or by suspending works which did not press for urgent execution. There seems to me no reason why such suspension should not have taken place. Under Civil Works, for instance, I find that there is an increase nearly 60 lakhs provided for in the next year's budget. I have been unable to understand, my Lord, why this expenditure of 60 lakhs could not be postponed for a year. The expenditure on the Army has been growing, and this in spite of the earnest representations of the people. The expenditure of general administration also has been growing. Take only a few figures so far as the general administration is concerned. In the year 1906-07 the total amount spent was £1,524,835. In the Budget the amount is put at £1,744,500. Now my Lord, I submit that there appears to be no reason why when the Government finds itself not in a position to meet fresh expenditure such expenditure should not be stopped, at any rate for the time being. So also in the case of Stationery and Printing. I find in the Budget of 1909-10 the amount budgeted for was Rs. 89,55,000 for Stationery and Printing. In the budget before us it is Rs. 98,74,000. I do not see why a little curtailment of expenditure should not have been effected there. Then with regard to the programme of railway construction. I do not see any reason why in a season of financial difficulty the Government must borrow the large amount of Rs. 16,30,00,000 to provide for increased expenditure on railways. My Lord, this means a serious hardship to the people as we have to meet the charges of interest on this railway debt from the revenues of the year, and in the Financial Statement I find it stated that the increase in the amount of interest is due to the progress of capital expenditure. My Lord, the Government ought, I submit with great respect to act under such circumstances like any good householder. If it finds that it cannot meet interest on the amount which it wishes to borrow, it should stop borrowing. If the Government find that they are not able to meet interest charges from the ordinary revenues, justice to the tax-payer requires that the borrowing should be postponed for a time. Then with regard to administrative changes, I am unable to understand, my Lord, why for the purpose of meeting the wants of improved administration resort should be had to fresh taxation. Eastern Bengal and Assam stand in need of money. I submit that every province should be required to meet the expenditure, which it has to meet, from its own revenues. I do not understand why my people of the United Provinces should have to pay higher stamp duties, higher court-fees and higher silver and petroleum duties because Eastern Bengal and Assam has been found to be financially a bad administration."

THE PRESIDENT :—"I would remind the Hon'ble Member that he is wandering entirely from the general principles of the Bill. We are now discussing the amendment."

The Hon'ble PANDIT MADAN MOHAN MALAVIYA : "I beg your Lordship's pardon, my Lord. My object was to support the amendment by explaining that it was not necessary to impose the proposed duty on silver. I will confine myself to the amendment. My Lord, I support the amendment as it seeks to prevent an impost being added which will press on the poor people of the country, for which I submit that no justification has been shown. If more money must be found, other sources must be tapped, for there are other articles which can very well bear taxation; but so far as silver is concerned, I hope that the Government will see its way to accept the amendment and not put this further burden on the poor."

The Hon'ble SIR GUY FLEETWOOD WILSON :—"Perhaps your Lordship will allow me to say a word or two in answer to the Hon'ble Pandit Malaviya because otherwise he might think me ungrateful, inasmuch as he has delivered a very valuable lecture on the merit of economy which will help me very much and for which I am very grateful. I do not intend to follow him over the large area which he has covered by his remarks as they are not germane to the amendment which is now before us. I do not propose to say much at this late hour: in fact I propose to say very little. Parenthetically, I would remind my Hon'ble friend behind me that we fully recognise that we shall have to pay more for those little presents which we are all called upon to buy. Even in my race and creed we have to make presents to our female relations and to other peoples' female relations for that matter, and I very greatly regret that when Christmas comes round we shall all have to pay out more rupees; but on the other hand, we shall have the satisfaction of feeling that we are contributing to an increase in the revenue."

"Whatever our views may be on the silver question, we can all join, I think, in congratulating the Hon'ble Mr. Brunyate on his maiden speech, and we may agree that he has shown great grasp of his subject and marked ability in his treatment of it. I certainly do not propose to travel over the same ground, and will merely repeat what I said in my Budget Statement, namely, that the object of the enhanced duty is to raise revenue. But the fact that a tax presents advantages other than the mere production of revenue does not prove that that tax is a bad one. *Inter alia* it will certainly result in an appreciable additional value accruing to the silver hoards in this country. I combat altogether the idea that this increase imposes a loss on the people of the middle class or otherwise. As to the point made, that the people will have to pay more for silver, it is perfectly evident that if the value of the silver is greater, they will get more for their money. The opposition to this tax, I honestly believe, is primarily and mainly the opposition which comes from Bombay mill-owners. It is a perfectly natural opposition, and I sympathise with their anxiety, but I believe their anticipations will to a large extent not be realised; indeed I think Mr. Brunyate has proved this conclusively."

"We must consider the interests of India as a whole, and in the interest of India as a whole I think it is perfectly legitimate to make silver produce revenue when revenue is wanted. Are the Indian Members as a whole going to support this amendment? Are the Indian Members going entirely to ignore the indirect advantage which this tax will confer on their people? Are you going back to your people and tell them that you have opposed a duty which will restore to your people at any rate something of what we are always charged with having taken from them when we closed the mints in 1903? Will you tell your humble artisan, your coolie and your raiyat that you have done your best to prevent an enhancement of the value of their hard-earned savings? Will you tell your lowly-placed women folk that you have opposed to the utmost in your power any increase to the value of their poor little domestic treasures? I am convinced that the Government is right in imposing this tax on silver. It is one which has been advocated by far abler men than myself, and it is one which, after the most

careful consideration, I have advanced with confidence. I am unable to accept the amendment."

The Council divided:—

Ayes 18⁶

The Pandit Madan Mohan Malaviya.
The Hon'ble Maharajadhiraja Bahadur of Burdwan.
The Hon'ble Babu Bhupendra Nath Basu
The Hon'ble Mr M Mazharul Haque
The Hon'ble Nawab Saiyid Muhammad Sahib Bahadur.
The Hon'ble M. R. Ry. Nyapathy Subba Rao.
The Hon'ble Raja Vairicherla Vairabhadra of Kurupam
The Hon'ble Mr G K. Gokhale.
The Hon'ble Mr F Rawson
The Hon'ble Kanwar Sir Randir Singh.
The Hon'ble Rao Bahadur R N Mudholkar
The Hon'ble Mr C H Armstrong.
The Hon'ble Sir Sassoon David
The Hon'ble Mr. M B Didabhoi.
The Hon'ble Mr G M Chitnavis.
The Hon'ble Mr. Mahomed Ali Jinnah.
The Hon'ble Mir Allah Bakhsh Khan
The Hon'ble Sir Vitthal Das D. Thackersey.

Notes—39.

His Honour the Lieutenant-Governor.
His Excellency the Commander-in-Chief.
The Hon'ble Mr. J. O. Miller.
The Hon'ble Sir Guy Fleetwood Wilson
The Hon'ble Mr. S. P. Sinha.
The Hon'ble Sir Harvey Adamson.
The Hon'ble Major-General R. I. Scallan.
The Hon'ble Mr. R. W. Carlyle.
The Hon'ble Mr. L. M. Jacob.
The Hon'ble Mr B Robertson.
The Hon'ble Mr J S Meston.
The Hon'ble Mr. J B Brunyate.
The Hon'ble Sir H. A. Stuart.
The Hon'ble Mr. S H Butler.
The Hon'ble Mahk Umir Hyat Khan.
The Hon'ble Zulfikar Ali Khan.
The Hon'ble Mr M W Fenton
The Hon'ble Mr. F A. Slacke.
The Hon'ble Mr J. M. Holms
The Hon'ble Mr C H Kesteven.
The Hon'ble Mr C G Todhunter.
The Hon'ble Surgeon-General C. P. Lukis
The Hon'ble Mr H W. Orange.
The Hon'ble Mr J M Macpherson.
The Hon'ble Mr J Andrew.
The Hon'ble Mr. H O. Quin.
The Hon'ble Mr W. C. Madge.
The Hon'ble Mr. C. W. N. Graham.
The Hon'ble Mr. F. A. Th Phillips.
The Hon'ble Mr. F. C. Gates.
The Hon'ble Maung Bah Too.
The Hon'ble Mr P C. Lyon.
The Hon'ble Maulvi Abdul Karim Ghuznavi.
The Hon'ble Maulvi Syed Shamsul Huda
The Hon'ble Mr. C. Stewart-Wilson.
The Hon'ble Mr. F E. Dempster.
The Hon'ble Lieutenant-General Sir Douglas Haig
The Hon'ble Sir T. R. Wynne.
The Hon'ble Colonel F. B. Longe.

So the motion was negatived.

The Hon'ble SIR VITHALDAS D. THACKERSEY moved that in item 6 in Schedule III appended to the Bill; as amended by the Select Committee, for the word and figure "annas 4" the word and figures "annas 2½" be substituted. He said.—"My Lord, in moving this amendment I propose to reduce the rate of duty from annas 4 per oz. to annas 2½ per oz. My Lord, so far as the principle of taxing silver is concerned, I hope I have made myself clear in my

previous speech that I am absolutely opposed to it. But without prejudice to that contention, I am moving this amendment with the object of minimising the disturbance in the silver market and the consequent adverse effect on one of the principal industries of India. The Hon'ble Mr. Brunyate in his very able speech has admitted that it would have such adverse effect. The only difference is, as to its extent. With due deference to the Hon'ble Mr. Brunyate, I submit that to speak of 2, 3 and 4 per cent loss on production as negligible, is misleading. Admitting that the extent of the loss is what he estimates it to be, namely, about 3 per cent., it works out at about Rs. 5 p-r bale, taking the average price of Rs. 25 lakhs on 5 lakhs of bales of exports. In order to show what proportion it will bear to the capital cost of a spinning mill, I will take the instance of a mill containing 40,000 ring spindles. The approximate cost of such a mill would be about 20 lakhs, and taking the production of the mill to be 18,600 bales of yarn per year the loss would come to Rs. 93,000 on the basis of Mr. Brunyate's figures or equivalent to nearly 5 per cent on the capital of the mill. Is this loss so small as to be lightly regarded by this Council? It was further argued by the Hon'ble Mr. Brunyate that the silver in London had not gone down to the extent of the new duty and that the share market in Bombay had not been depressed to a considerable extent. Now, my Lord, is it conceivable that the effect of the new legislation should fully come into operation the very next day on the price of silver at home or on the shareholders of mills? The economic laws of supply and demand must ultimately determine prices. The producers of silver could not be expected to reduce their selling-price immediately until the demand slacks off. In the same way, shareholders do not sell away their shares at a greatly reduced price until they find that their dividends are growing less. Therefore, my Lord, we should not judge of the consequences of this enhanced duty by the state of the market within the last week. The economic laws of demand and supply will ultimately assert themselves, and we have only to consider today what the tendency of the new duty is likely to be.

"Then, my Lord, the Hon'ble Mr. Brunyate argued that after the closing of the mints in 1893, although temporarily we shipped less yarn to China, our exports to that country increased in 1905-06. My Lord, I can only say in reply to that, that although the mints were closed in 1893, the rupee did not rise to the level of 1s. 4d for a considerable time and continued low until 1898-99 when the full effect of the currency legislation made itself felt. During this period mills sprung up in China like mushrooms and as a consequence in 1901 in India 20 to 25 mills went into liquidation as has already been pointed out by the Hon'ble Mr. Gokhale. And whatever success the Government may claim for their currency policy, it was on the ruins of these Mill Companies. In the same way, after the legislation of today more mills may go into liquidation and Government may be able to collect an extra revenue of 55 lakhs of rupees out of their wreck. Is that the policy which Government or a responsible Council like this should accept? Have we not to consider the safety of the capital already invested in the spinning industry or that this Council should add to the existing difficulties of the industry which are already very great? I do hope that the Council will accept this amendment as being calculated to minimise the shock to the Indian yarn trade with China."

The Hon'ble SIR GUY FLEETWOOD WILSON said — "I confess that it seems to me that this resolution if carried will produce no good result. It will not produce the effect of removing any of those evils which have been put before us so eloquently and so strongly in regard to the tax on silver in itself, and on the other hand it will produce the evil result of curtailing the revenue of which I stand in need. Therefore, I am sorry to say I must meet it by a direct negative."

The motion was put and negatived.

The Hon'ble SIR VIJHALDAS D. THACKERSEY moved that to sub-clause (ii) of clause 1 of the Bill, as amended by the Select Committee, the following proviso be added, namely :—

"Provided that the silver afloat or in bond on that date shall not be liable to pay the enhanced duty."

He said:—"My Lord, the Hon'ble Mr. Armstrong in his speech with reference to another matter has clearly explained to this Council how it would be unjust to tax trade when that trade has imported certain things honestly. When this duty was declared no one had the slightest idea that Government had the intention of levying duty on silver, and therefore in the natural course of trade the usual consumption of India came in. Apart from the question of banks that are importing silver—I had a conversation with the manager of a bank in Calcutta recently, the banks have not much to lose, I admit, and if they had to lose, I would not press my amendment so strongly because banks are strong enough to bear the burden even if it is unjustly laid,—but the question when a burden is unjustly laid upon the individuals who have purchased from the banks, and who have in their turn sold the silver to all merchants, the burden on that individual, who is not perhaps so strong to bear the burden, is greater than it would be to the bank. So, my Lord, I think that it is quite reasonable that those who have honestly traded should not be made to suffer, and if this amendment is not accepted, I fear there may be many ruins for the little revenue that the Government of India may derive from this. It may be 10 or 15 lakhs of rupees from the few people who hold bullion, but they would be ruined. I, therefore, my Lord, propose this amendment."

The Hon'ble SIR GUY FLEETWOOD WILSON said:—"My Lord, this is an amendment which is deserving of the most sympathetic consideration. It is obvious that the suddenness of the enhancement of additional duties has come somewhat as a shock, not only upon the silver market, but upon many interests not in any way connected with silver. I had hoped that I might be able to meet my Hon'ble friend in regard to this amendment, but I much regret that I cannot accept it. Hon'ble Members will, I think, readily understand that we cannot deal with silver alone in considering this question. There are other imports which are equally hit by the date which we have fixed upon as the one which shall govern the application of the new duty. An alteration of this date, if accepted, would have to apply to the whole of the new taxes, as it would be obviously unreasonable and unfair to extend a concession to silver which I have had to refuse in the case of tobacco, spirits and petroleum."

"I very much regret that I cannot accept this motion. Hon'ble Members will readily understand that I cannot treat it as referring to silver alone. The same principle, if accepted, applies to the whole of the articles which are affected by the new tariff, and it would be unreasonable and unfair to extend the concession to silver which I should have to refuse to liquors or tobacco or petroleum. Had the position been different I should gladly have listened to any reasonable suggestion for avoiding inconvenience to the trade by some concession in regard to goods which are now on their way to India or are stored in our bonded warehouses. It would be impossible, however, as matters stand, to reconcile all the different interests, which have equally strong claims in the matter, without a sacrifice of revenue which our situation renders wholly unjustifiable and which might seriously affect our financial prospects for next year."

"If I were to allow articles which are now in transit to come in at the old rates of duty, how could I refuse the same privilege to articles now in bond? If I admit the issue at the old rates of articles which are now in bond, how could I refuse the same concession to the large quantities of Indian manufactured beer and foreign spirits which are now in bonded warehouses all over the country, or to beer and spirits which are now under the process of manufacture in our local breweries and distilleries, but which will be placed in the market before the arrival in India of the last shipments, or similar articles to which I should be extending the old rates?"

"The only possible way of reconciling all these different interests is clearly to fix one date for everything. That date must, for obvious reasons, be

the date on which our proposals are first made public. We are bound by no precedent in the matter. It is true that, when the mints were closed, certain consignments of silver were accepted at a later date; but that transaction, which, I may remark, has since been almost universally condemned, bears no analogy with what is now suggested. It is true also that four years ago, when the last rise in the spirit duty took place, certain concessions of this character were made; but, on the other hand, when Sir Edward Baker raised the beer duties in 1908, a repetition of these concessions was refused. I should have been very glad to have been able to meet the suggestion implied in this amendment not only in the case of silver but in the case of all these articles which are going to pay additional duty, but I regret to say that I am unable to do so and for the reasons given I am afraid that the 25th February must be the date for the application of the new duties. I therefore cannot accept the amendment."

The motion was put and negatived.

The Hon'ble MR. CHITNAVIS moved that in clause 3, sub-clause (iii), for the words and figures "No. 16", "Petroleum", "One anna" and "One anna and six pies," the words and figures "No. 8," "Sugar", "Five per cent." and "Seven-and-a-half per cent." be substituted, respectively." He said—"My Lord, as could be seen from the tenor of the debate today, sugar, in the opinion of the people of this country, will be far more preferable subject of taxation than petroleum. The suggested increase in the duty on sugar, far from causing irritation, will be more acceptable to the nation. I do not refer here to its probable economic results. It may help the indigenous industry. But we here discuss the tax only as a source of revenue. The imports of sugar are increasing, and should therefore, apart from other considerations, be a fit subject of taxation. According to the Revised Account of the current year, the Customs revenue from sugar is 55 lakhs of rupees, whereas that from petroleum is 47½ lakhs of rupees. An addition of 50 per cent duty should yield more in the one case than in the other. Besides, an additional loading on sugar would be justified by all economic considerations. On the contrary, an additional tax on petroleum will appear to be a violation of the enlightened principles of taxation which this Government has generally followed in the past. Petroleum is almost a necessary of life with the poor middle classes whose standard of comfort has risen, but whose resources have become crippled with the rise in prices. The incidence of further taxation upon it will clearly fall upon these unfortunate people. A rise in the price of the foreign petroleum will cause a sympathetic rise in the price of the Burma oil which is so largely used by the poor, even the very poor in their villages. It may be properly called the poor man's light. These will suffer equally with the higher classes in consequence of the increased duty. On the other hand, imported or refined sugar is largely used by the comparatively richer classes. The poor man is satisfied with molasses and the crude or unrefined country sugar. The imported sugar is an article of luxury of the richer classes, and, if anything is to be taxed, that should be. I therefore suggest the alteration in the subject of taxation on principle as much as for its greater productiveness. I appreciate the motives that have induced the Hon'ble Finance Minister to select petroleum for increased taxation, but, having regard to the general feeling and the many and varied uses to which petroleum is applied in this country, I feel it my duty to make this humble suggestion. I am glad that this suggestion finds strong support both in this Council and outside it. The Press, both Indian and European, which represents a large body of public opinion in the country, cordially supports it, and so also the most prominent mercantile associations in this country."

The Hon'ble MR. CARLYLE said:—"I must say that I was very surprised when I saw that a gentleman who is so well known for his zeal for the welfare of the poor proposed to impose an increased tax on sugar rather than petroleum. But this debate has brought enlightenment, and I see that it is not recognized by all that sugar is an absolute necessary article of diet in some form or other. Petroleum is to a certain extent a luxury, while sugar is an article of necessity. What really makes this proposed tax on sugar popular

is, I have no doubt, the fact that it is believed that it will help to protect a very important home industry which is supposed to be threatened by foreign competition. I have looked through the agricultural statistics very carefully—unfortunately there are no statistics for country refineries in India—and I can find no warrant whatever for the belief that the Indian industry is in any danger whatever. In 1898-99 the acreage under sugar-cane was 2,485,681, it varied with seasons, but its maximum was reached in 1907-08, when it rose to 2,639,200 acres. Since then there has been a considerable drop, but I believe this is entirely due to seasonal causes. There was a very bad monsoon in 1907 and poor rains in 1908. After a drought or famine the poorer cultivator is obliged to give up precarious or expensive crops for other crops which will bring him in a quicker return. I may note that ten years ago there were similar fears of the future of the Indian sugar industry owing to the competition of bounty-fed sugar. The Lieutenant-Governor of the North-Western Provinces wrote in a great alarm on the subject, and his letter very much impressed the Government of India. It was quoted by Sir James Westland in the debate on the amendment of the Tariff Act in order to enable Government to place a countervailing duty on bounty-fed sugar. But events have falsified these forebodings: the cultivation has not decreased, while at the same time imports have very largely increased, and this is largely due to the fact that India is now in a position to buy a larger quantity of a very important article of diet. I may have failed to convince the Hon'ble Member that the increased tax will not be protective. If so, he has to face a somewhat difficult position. In a free trade country a protective duty should as a rule be counterbalanced by an excise-duty, and no one, I think, can look with equanimity at any idea of putting an excise-duty on sugar cultivation in this country. If the Hon'ble Member had brought forward his proposal as part of a general scheme for increasing the tariff for revenue purposes, the matter would have been somewhat different. It is very difficult to fix the exact point where a revenue tariff becomes protective and in raising a revenue tariff all round it is almost impossible to avoid giving slight protection in the case of some items, but this is a very different matter from specially selecting one article for increased taxation. Fortunately the Government of India is not now in a position in which it requires to raise the revenue which might be obtained by an increased tariff all round, and it is unnecessary to consider the matter from this point of view. I hope the Council will agree with me that it would be unwise to accept the resolution now before us. Sugar is a necessary of life and, except on strong grounds of the revenue needs of the State, we should not do anything to raise its price specially, as by doing so we would not be assisting the class whom the Hon'ble Member would like to help."

The motion was put and negatived.

The Hon'ble MR GOKHALE moved that clause 3, sub-clause (iii), of the Bill, as amended by the Select Committee, be omitted. He said:—"My Lord, the object of my amendment is to get rid of the proposed enhancement of duty on petroleum altogether. The Hon'ble Mr. Carlyle just now told us that sugar was a necessary of life, even to a greater extent than petroleum. Well, all I can say is that he was speaking of the poorer classes of some other country and not of India. I am sure that there are tens of thousands of cultivators who do not see sugar from year's end to year's end, whereas they cannot do without petroleum. They must have a little light in their houses and petroleum has now come to take the place of the ordinary vegetable oils. However, I am not going to argue the question about sugar as the amendment relating to it has been rejected: I will only say one or two things about petroleum. Petroleum is recognised to be a necessary of life. The imports of duty-paying petroleum are very considerable and they have been steadily increasing. During the last three years I find that the duty paid on petroleum has risen from about 37 lakhs to 53 lakhs, or about 45 per cent. Burma oil cannot supply the needs of the people altogether, because its supply is not equal to the demand. I think therefore that this duty on petroleum will really fall upon the poorest classes of the community. As I said this morning, the price of Burma oil will go up, if not by the full amount of this duty, at least by something like it. I therefore pro-

pose that the amendment which I have moved should be accepted by the Council."

The Hon'ble MR. GATES said:—"My Lord, it will perhaps be expected of me as representing the Government of a Province which is much interested in the petroleum industry to put before this Council a few facts bearing upon the motion just made by the Hon'ble Member. The Hon'ble Member says that petroleum is much more a necessary of life for the people of India than sugar, and he seems to consider that there are thousands of people in India who have never seen sugar but who use petroleum daily. Well, my Lord, I appeal to the experience of this Council. Is there any one here who wishes to corroborate that statement? (Cries of 'we do.') On the contrary, besides petroleum there are many illuminating oils which are used by the common people in this country. You will find from the trade returns that the quantity of foreign mineral oil imported in the year 1908-09 was about 84 million gallons. There was a drop in the imports in 1909-10 for reasons which I shall touch on later. Well then, it is proposed to charge an extra duty of six pies per gallon on this amount of 84 million gallons. That would amount to about 26 lakhs of rupees in the year. Now what is the population which is going to pay this sum? The population of India at the last Census was 294 millions. I will deduct the populations of Burma and Eastern Bengal and Assam, because, although they take a certain quantity of imported oil, it is not very much. (I think about 2 million gallons were imported into Burma in one year, and a certain amount no doubt goes into Eastern Bengal and Assam, though it is difficult to say how much because it goes through the inland water-ways from Calcutta.) Now deducting the population of Burma and Eastern Bengal and Assam, which is about 42 millions, this leaves 252 millions of people who have to pay 2½ millions of rupees, so that the incidence is one rupee to 100 persons or two pies per head. I know that there are thousands of people in this country who are not reached by railways and who do not use kerosene. According to figures kindly supplied to me by one of the representatives of one of the oil industries, the deliveries of local mineral oil from refineries of any consequence and the deliveries of foreign mineral oil from the ports aggregated about 155 millions of gallons in one year, and that gives us a consumption of 155 millions.

"Now I will try and approach the subject in another way. There was an import from abroad of 84 million gallons and there was a transport from Burma into the Indian Peninsula of 62 million gallons. That makes a total of 146 million gallons. The internal consumption of Burma has been variously estimated at from 8 to 12 million gallons. I will take the higher figure. That produces a total of 158 million gallons. Now the Council will see that these two calculations are not very far apart, one of 158 millions and the other of 155 millions. Well, suppose we strike an average and take the figure at 157 million gallons. Of course this figure neglects certain small producing areas in Baluchistan and a rather larger area in Assam, but the production of these is nothing very great. On the other hand it neglects the export or transport of petroleum by land or by sea from the area to which these figures relate. However, I am not troubling about this. There is a large margin and I will present that margin to the Hon'ble mover of the amendment. Well then, 294 millions of people are consuming these 157 millions of gallons of mineral oil. Now let us suppose for the sake of argument that the whole of this consumption is going to rise in price. I do not admit that point and I shall perhaps return to it later on; but we will suppose it for the present. Then the incidence per head on this rise in price, owing to this extra duty which it is proposed to put on, will be something like 3 pies per head per annum. Now these are merely what I may call control calculations. They fix the figures at which the populace can possibly be affected. But I have made some enquiries as to the actual consumption of petroleum by persons of the middle or poorer classes, say the ordinary cultivating *raiya* and his family. My Hon'ble friend who sits next to me referred when moving his amendment to the burden which would be laid upon the middle classes. He did not appear to care about the poorer classes so

much. It was the middle classes he was considering. I am not going into the budgets of the middle classes, because I think that the argument that was used by the Hon'ble mover of the amendment laid more stress on the burden falling on the poorest. A correspondent in Burma, where there is a fairly high standard of living and where petrolcum is produced, estimated the amount used to be $1\frac{1}{2}$ tins or 6 gallons a year. I have made some other enquiries and I am disposed to think that is a rather low estimate. I will put it at 2 tins a year. I am told that 4 bottles a month is a reasonable consumption for a raiyat's family. That is 48 bottles a year or 8 gallons, and that is just about 2 tins. Now the extra duty on this at 6 pies a gallon would be 4 annas per annum, not per head but per consuming family. Of course 4 annas a year is not to be despised in the budget of the cultivating raiyat, but still, if we must have money, I submit that that is as reasonable and as good a way of getting it as can possibly be devised; and I should like to draw the attention of the Council to the fact that if these duties fall on the poorest classes, they have been relieved not very long ago by the reduction of the salt duty, and this enhancement of the duty on petroleum, if it does fall on them to the extent of 4 annas per family per annum, will not come to so much as they have been relieved of by the reduction of the salt tax.

"Now, my Lord, I desire to say just a few words on the question of whether all the mineral oil, that from Burma as well as that which comes from abroad, is likely to go up in price, and indeed whether the importers of foreign oil will succeed in passing on the extra duty to the consumer. Now, my Lord, that is a very intricate question. The oil companies move in a region of high politics. They have wars and preparation for war and exhaustion after war, and it is very difficult to say what is likely to be the result in any particular case in this extremely artificial condition. But this much we do know. There is some arrangement between the Burma Oil Company and the Asiatic Petroleum Company. When the appearance of new competitors in the Burma Oil Fields caused a fall in prices in the Indian market, the Asiatic Petroleum Company brought in a great deal less of their own oil, and they brought in a great deal more Burma oil, and we may presume that they sold it at a profit. I take it that they would not be content to go on doing it unless they made a profit. Now, in the course of this competition the price fell as low as Rs. 2-4 per unit. A unit is 8 gallons. Two tins are spoken of as a unit, I understand, because even when the oil is sold in bulk it is still sold at so much per unit. Well, as I say, the Asiatic Petroleum Company were taking in a great deal of Burma oil and were selling it through their marketing organization. I believe it paid them better to burn their own oil as fuel at that time. But I understand that they were not content that their own product should disappear from the market altogether. They have to keep it before the public and wait for better times when they will push the sale of their own product once more. Consequently, they went on selling their own product up to a limited extent throughout this competition, and, as they have borne the full brunt of the fall in price which was induced by this competition there seems to be considerable reason to expect that they and the other importers from the United States of America and from Roumania will very likely have to bear this extra duty themselves and that they will not be able to pass it on to the consumer.

"It has been suggested that even if the Burma Oil Company do not raise their prices—and I think there is very strong reason to expect that they will not raise them, at least for the present, while the question of excise duties is not settled—that the importing companies will raise their prices and that the dealers in towns will charge the extra price both on Burma oil and on the other. Well, my Lord, if they all combine that can be done, but if any one of them instead of taking his share of the profits on the rise of price prefers to charge a lower price, and get a greater share of the sales, then the combination will fail and that scheme will not succeed. I do not wish to prophesy, and I do not think any one can prophesy, what may happen, but I think it is not by any means certain that this duty will be passed on to the consumer. There seem to be three possibilities—either that this duty will be passed on to the consumer both for foreign oil and for Burma oil, or else

the prices may be unaffected by it and the importers will have to bear the extra cost, or else in the course of time the Burma oil will drive the other oil out of the market altogether. There is one thing that I note at this point, namely, that prices began to rise owing to the slackening of the competition, before the extra duty was announced. The price had been down as low as Rs. 2-2, but it had been brought up to Rs. 3 before this duty was announced. There is one word more, I might say, on this subject. It has not been said in this Council, but I have seen it said in the newspapers and elsewhere, that the Government was under the impression that the American oil only went to the higher class of consumers or was burnt in the better sort of houses. I think the Government was under a misapprehension on that point. It seems clear that a considerable proportion, about $\frac{1}{5}$ th, of the American oil competes with the Burma oil and with the Borneo oil. The Burma oil is always the cheapest and the other oils generally carry slightly higher prices. I believe they have slightly better illuminating effects. Be that as it may, whatever the price of Burma oil may be, that controls the market; there is not a fair fight between them. Owing to this system of combines, they cannot sell as much as they wish. They have to abide by certain arrangements. We do not know the details of them—of course they are suspected—and consequently the price is never affected as freely and as easily as that of other commodities is affected.

"Then there is one more point which I may mention, although it is not perhaps exactly relevant to this amendment, and that is the question of the excise duty. I think the Hon'ble Mover of the amendment is not averse from some protection for Indian industries, but I don't think his sympathies go as far as Burma. Burma after all is part of India, and surely the Hon'ble mover of the amendment does not wish the people of Burma to think that the enlarged representation of other parts of India on this Council will lead to a less careful consideration of Burman interests than before. The Burma petroleum industry is surely as worthy of encouragement, or even of protection if you like to call it so, as the sugar industry. As to this excise duty it has been stated by the Hon'ble Finance Member that the question of excise is still open, but there are some practical difficulties in the way. Besides the Burma Oil Company's large refineries there are between 30 and 40 small refineries in Burma, each of which would have to be supplied with guards and watchmen and so on. If from a financial point of view it is necessary to counterbalance this import duty, if experience shows that this is so, I think some other way will have to be found of doing it, and perhaps in that case a duty on the transport of oil by sea from Burma to India would be feasible. But I would add one word of caution on the subject, and that is that this would be a new departure and that there is a considerable section in Burma which is apt to dwell more upon the disadvantages of the connection with India than upon the advantages. Perhaps it would not be wise to differentiate against Burma by a new process. However, I think those things are in the future. At present, I believe it is not certain that the Burma oil will drive the other oils out of the market and consequently it is not certain that the Finance Minister will lose the revenue for which he has budgeted, and therefore I think that the question of excise will not come up for consideration just yet. I submit to the Council that this increase of the petroleum duty in the present circumstances of the finances is a praiseworthy item of the Tariff Bill and of the financial arrangements for the coming year."

The Hon'ble MR. GOKHALE said —" My Lord, I am reluctant to address the Council again at this late hour, but I am afraid I must not allow what the Hon'ble Member who has just spoken has said to pass without a reply. The first thing that I would like to say is this. I would invite the Hon'ble gentleman to accompany me to the part of the country from which I have come—the Deccan. I will take him from town to town, village to village, and will show him that here is not a single house which does not use petroleum. I will also show him thousands and thousands of poor raiyats who do not use sugar from year's end to year's end. That is my answer to the first point. Then, my Lord, he said that the incidence of this new enhanced duty would be about 4 annas per annum per family. I accept his calculation. To my mind 4 annas per family is a serious addition to the burdens of the poorest classes of this country. The Hon'ble

Member says that the people have had a relief in the remissions of salt tax. The prices, however, have gone up in every direction, and I am quite sure even 4 annas a year will make a considerable difference to poor people. As regards the question of excise in Burma, I did not refer to it as I had learned from my Hon'ble friend the Finance Minister that that question was under consideration. Moreover my whole fear is that the effect of this duty will be to inflate the profits of the producers in Burma. I understand that all Burma oil that can possibly come to India finds a ready sale; therefore it does not seem that any protection is necessary."

The Hon'ble SIR GUY FLEETWOOD WILSON said:—"We have had an admirable speech, and I think a convincing speech, from the Hon'ble Mr. Gates, and I think he has proved conclusively what we have always been convinced of, and that is that the very fractional amount of cost which will fall upon the poorer Indians is almost a negligible quantity. I do not think that anybody will be willing to charge me with being unsympathetic to the interests of the poorer classes in this country, and if I had thought that this additional tax on petroleum was going really to press heavily upon the poorest Indian class, I would have made every effort to select some other object for taxation. But, when you come to four annas a year per family, I do not think you can say that the taxation is otherwise than fractional. Of course we are all going on the assumption that it is the very poorest who will be affected: but this method of dividing the amount up amongst millions is rather fallacious in this sense that a great proportion of the oil is burnt by the richer people or at any rate by the people who are not so very poor. It also must be remembered that vegetable oil is largely used, particularly I believe in the Punjab—of course on all these matters I have to speak subject to correction because my knowledge of this country is not extensive or based upon a lengthy experience—there is still a great deal of vegetable oil used, and I think I am right in saying that the ray is one of those extremely shrewd persons who believe in the little verse

"Early to bed, and early to rise,
Makes a man healthy, and wealthy, and wise."

"And he does go to bed early and therefore does not burn very much oil. I think that, on the whole, I really am entitled in the words of one of the greatest of English Financial Statesmen in claiming *ex luce lucelum*, and with that I merely have to say that I cannot accept the amendment."

The Council divided:—

Ayes—16.

Noes—41.

The Hon'ble Pandit Madan Mohan Malaviya.
The Hon'ble Zulfikar Ali Khan.
The Hon'ble Maharajadhiraja Bahadur of Burdwan.
The Hon'ble Babu Bhupendra Nath Basu.
The Hon'ble Mr. M. Mazharul Haque.
The Hon'ble Nawab Saiyid Muhammad Sahib Bahadur.
The Hon'ble M. R. Ry. Nyapathy Subba Rao.
The Hon'ble Raja Vairicherla Vairabhadra of Kurupam.
The Hon'ble Mr. G. K. Gokhale.
The Hon'ble Rao Bahadur R. N. Mudholkar.
The Hon'ble Mr. M. B. Dadabhoy.

His Honour the Lieutenant-Governor.
His Excellency the Commander-in-Chief.
The Hon'ble Mr. J. O. Miller.
The Hon'ble Sir Guy Fleetwood Wilson.
The Hon'ble Mr. S. P. Sinha.
The Hon'ble Sir Harvey Adamson.
The Hon'ble Major General R. I. Scallan.
The Hon'ble Mr. R. W. Carlyle.
The Hon'ble Mr. L. M. Jacob.
The Hon'ble Mr. B. Robertson.
The Hon'ble Mr. J. S. Meston.
The Hon'ble Mr. J. B. Brunyate.
The Hon'ble Sir H. A. Stuart.
The Hon'ble Mr. S. H. Butler.
The Hon'ble Malik Umar Hyat Khan.

*Ayes—16.**Noes—41.*

The Hon'ble Mr. G. M. Chitnavis.
 The Hon'ble Raja Pramada Nath
 Ray of Dighapatia.
 The Hon'ble Mr. Mahomed Ali Jinnah.
 The Hon'ble Mir Allah Bakhsh Khan.
 The Hon'ble Sir Vithaldas D.
 Thackersey.

The Hon'ble Mr. M. W. Fenton.
 The Hon'ble Mr. F. A. Slacke.
 The Hon'ble Mr. J. M. Holms.
 The Hon'ble Mr. C. H. Kesteven.
 The Hon'ble Mr. C. G. Todhunter.
 The Hon'ble Surgeon General C. P.
 Lukis.
 The Hon'ble Mr. H. W. Orange.
 The Hon'ble Mr. J. M. Macpherson.
 The Hon'ble Mr. J. Andrew.
 The Hon'ble Mr. H. O. Quin.
 The Hon'ble Mr. F. Rawson.
 The Hon'ble Kanwar Sir Ranbir
 Singh.
 The Hon'ble Mr. W. C. Madge.
 The Hon'ble Mr. C. W. N. Graham.
 The Hon'ble Mr. C. H. Armstrong.
 The Hon'ble Mr. F. A. Th. Phillips.
 The Hon'ble Mr. F. C. Gates.
 The Hon'ble Maung Bah Too.
 The Hon'ble Mr. P. C. Lyon.
 The Hon'ble Maulvi Syed Shamsul
 Huda.
 The Hon'ble Mr. C. Stewart-Wilson.
 The Hon'ble Mr. F. E. Dempster.
 The Hon'ble Lieutenant-General Sir
 Douglas Haig.
 The Hon'ble Sir T. R. Wynne.
 The Hon'ble Mr. G. H. B. Kenrick.
 The Hon'ble Colonel F. B. Longe.

So the motion was negatived.

The Hon'ble SIR G. FLEETWOOD WILSON moved that the Bill further to amend the Indian Tariff Act, 1894, as now amended, be passed. He said —“ My Lord, I have received Your Lordship's permission to say one word in answer to a representation which has been made to me by the Hon'ble Mr. Graham. He, I must say, has fought the battle for all those interests which, as Chairman of the Chamber of Commerce, fell to his lot to defend, so strongly and at the same time so courteously, that it has made it all the more difficult for me to say no to him. But I am happy to say that we propose to meet the case of the rectified spirits which are used in medicines and drugs. We propose to meet the case by asking the Local Governments to give respectable chemists the rectified spirits which they require on the present tariff duty of Rs. 7. I think this will be a reasonable settlement of a small matter, but one which undoubtedly is of considerable importance from the standpoint of medicine.”

The Hon'ble MR. GRAHAM said :—“ My Lord, as one of the Select Committee who has signed the report that we have been considering in connection with this Bill today, I would just like to make one or two remarks in my position as representing the Bengal Chamber of Commerce of Calcutta. I think that though there is a great diversity of opinion over these duties, yet there is a very great volume of opinion in favour of the principles of them, and so far as Calcutta is concerned I should not like to miss this opportunity of saying so. I think there has been a great feeling of sympathy for the people who have been especially hard hit as regards the stuff in bond and transit, but from what we have been told by the Hon'ble the Finance Member there is evidently no help for it, and although our sympathy still remains, personally I feel that his answer is complete and we have nothing more to say in reply to it. That is with regard to the three items tobacco, spirits and silver.

" With reference to spirits the Hon'ble the Finance Member has just made a statement which relieves me from making any further remarks upon the duty on spirits used by chemists here in the manufacture of drugs, that is, drugs manufactured in India, about which I had intended to ask a question.

" As regards the duty on kerosine oil, I understand it is absolutely impossible even to take into consideration anything in the shape of excise-duty on Burma oil at the present time, but I take it that this is not the final statement on the matter and it is still possible for it to come up in future budgets, and I put it forward for further consideration in the future, seeing that the trade has gone on for so long a time with what you may call a one anna per gallon protective duty, and seeing that the Budget purports to be a revenue one, and not protective, any enhancement therefore of that duty might very well have been divided between the two. The trade is practically split between imported oil and Burma oil in equal proportions and a quarter anna on each might fairly have met the case, but of course one understands this is impossible under the conditions existing at the moment, without very full investigation. With these few remarks I beg to support the Bill."

The motion was put and agreed to.

The Council adjourned to Saturday, the 5th March 1910.

J. M. MACPHERSON,

*Secretary to the Government of India
Legislative Department.*

CALCUTTA,

The 17th March 1910.

}

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA,
ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND
REGULATIONS UNDER THE PROVISIONS OF THE
INDIAN COUNCILS ACTS, 1861 TO 1909 '24 & 25 VICT.,
C. 67, 55 & 56 VICT., C. 14, AND 9 EDW. VII, C. 4).

The Council met at Government House on Saturday, the 5th March 1910.

PRESENT :

The Hon'ble SIR HARVEY ADAMSON, K.T., K.C.S.I., *Vice-President*,
presiding, and 54 Members, of whom 51 were Additional Members.

DISCUSSION OF THE FINANCIAL STATEMENT.

The Hon'ble SIR GUY FLEETWOOD WILSON said:—"Sir Harvey Adamson, the Council will now proceed with the first stage of the discussion on the Financial Statement. I have no further explanations to offer regarding the Statement because any change in my estimate of stamp revenue which may be required in consequence of the alterations in the rates of stamp-duty originally proposed will obviously require a little time and consideration and readjustment on account and they will be embodied—I propose to embody them—in the budget when it is presented to the Council on the 23rd of this month. I think that will probably meet with the approval of the Hon'ble Members. The subjects which are open to discussion today, as you are aware, deal with the new taxation, the proposed loan and the additional grants which we mean to give to the Local Governments. The new taxation was very fully and very ably discussed yesterday and has now become law, so I suppose we shall not return to it. The proposed loan for this year is only Rs 1½ crores, and my Hon'ble friend Mr. Gokhale has a resolution on the table proposing to raise it to 187 lakhs. The additional grants to Local Governments, I may mention for the convenience of the Council, are enumerated in paragraph 9 of the explanatory memorandum attached to the Financial Statement. I do not think that there are any other remarks which I am called upon to make with regard to the present stage of the discussion."

The Hon'ble MR. GOKHALE moved the following Resolution:—

"This Council recommends that the amount of loan to be raised during the year 1910-1911 should be £1,245,900 instead of £1,000,000, and that the sum of £245,900, which is the estimated surplus for the current year, should be allotted to the several Provincial Governments to be expended by them in assisting local bodies to carry out projects of sanitary improvement."

He said:—"I must first explain to the Council what my object is in moving this resolution. It is true that the resolution comes before the Council in the shape of a proposal to raise the amount of the loan that the Government want for next year. As a matter of fact, however, it is not an essential part of my proposal at all that the loan should be raised from 1 to 1½ millions. Whether the loan for next year is 1 or 2 millions or half a million is a matter of indifference to me, but I have had to put my motion in this form, because I do not want to disturb the provision made in the budget for capital expenditure and I do not want to disturb the cash balances that the Government expect to have for next year, after making this provision for capital expenditure. My real object

is to secure the surplus of the year for expenditure in the promotion of sanitation throughout the country. What usually happens under the procedure adopted in connection with a surplus is this. The surplus forms part of the cash balances, and out of the cash balances a certain amount is devoted to capital expenditure, whenever this is practicable, and thus the surplus ultimately finds its way into capital expenditure. I want to withdraw the surplus for next year from being expended as capital expenditure, and I would like to have it placed at the disposal of Local Governments in order that they might use it in assisting local bodies, especially municipalities, in carrying out projects of sanitary improvement. The whole of my resolution comes to this, that I want this Council to recommend that all surpluses that are annually realised, whenever they are realised, should, instead of going into the cash balances, and from there going to the construction of Railways and indirectly to the redemption of unproductive debt, should be placed at the disposal of Provincial Governments and be earmarked to assist municipalities in the promotion of sanitation. I have urged this question again and again on the attention of the Council for the past six years. I first raised it in 1904, and I have continued to press it year by year. Two years ago the then Finance Member, Sir Edward Baker, gave us about 30 lakhs to be expended on sanitation by municipalities. That was a small response to the appeal that I made year after year, but, with that exception, my appeals have had no effect. Starting with the year 1898-1899, we find that we have had during the ten years ten consecutive surpluses amounting to 25 millions sterling or 37½ crores. And the bulk of them have under our system of accounts gone first to Railway construction and from there to the reduction of our unproductive debt. Now Railway construction is a most desirable object and so is also the reduction of the unproductive debt. Ordinarily there would be nothing to be said against it, but at present, when there are objects far more pressing and far more important which require money, I do not think the Government is justified in devoting such a large sum out of surplus revenues in the way they have done. If this sum of £25 millions sterling or 37½ crores of rupees, or at any rate the bulk of it, had been devoted to sanitary projects throughout the country, what a difference it would have made in every direction! I do not think I need say much about the needs of sanitation, the ravages of plague, malaria and other diseases in all directions and a death-rate already high and yet steadily rising—for 1907-1908 it was 37 per thousand as against 35 per thousand in the three previous years—all that shows that one of the greatest needs of the country today is improved sanitation. How is the need to be satisfied? Our Municipalities are admittedly very poor, their resources are small and they are already insufficient for their ordinary work. Sanitary projects are very costly, expenditure on them has to be on a Western scale, whereas it has to be carried out in Eastern cities which as I have already said are very poor. If Municipalities are left to themselves to undertake sanitary works, the case is a hopeless one; therefore Government must come to the rescue of the Municipalities. The only way in which Government can do so is either by voting a large permanent annual grant or by placing their surpluses at the disposal of Provincial Governments for assistance to local bodies in carrying out these necessary works. As regards a large permanent grant, I should be very glad to see it, but I foresee obvious difficulties in the way, especially in a year like this, when the Finance Minister has just carried through Bills imposing extra taxation; it is therefore hopeless to expect that Government will make a permanent addition to its recurring expenditure for the purpose of assisting Municipalities in regard to sanitation. But there is an easier way of helping them and it is far more effective, and it is a way that will meet the requirements of the situation. What I propose is this. Whenever a surplus is realised, instead of its being devoted to Railway construction or some such object, it should be placed automatically at the disposal of Local Governments. A surplus is so much excess revenue taken from the people by the Government over and above its requirements. Even the Finance Department, that knows so much more than its critics, cannot calculate to a nicety how much money is required and how much will be raised in a given year. But when a surplus is realised it is clear that the financial authorities have taken

from the people more money than was required. Let this excess therefore go back to the people in the form of expenditure on improved sanitation. I think this is an eminently just plea, and I think that it is also a plea whose force should be recognised in the interests of the masses of the people. I know what was often urged by the late Finance Member, Sir Edward Baker, that it is the practice in other countries to devote surpluses to the reduction of debt. That is true, but I would remind the Council of what Sir Herbert Risley said when carrying through his Press Bill the other day. He said—Let India be guided by her own lights: she has her own problems and must solve them in her own way. Where the debts are huge as in England and other European countries, every opportunity should be taken to reduce the debt by means of a Sinking Fund or in any other way that is practicable. In India the unproductive debt is a mere bagatelle, it is a paltry sum of 40 millions—it should be remembered in this connection that it is only the unproductive debt that matters. The reduction of the productive debt is not a matter of any importance, and should not be undertaken by Government out of the revenues of the country. The unproductive debt has got to be reduced, but as it is only about 40 millions its reduction is not a matter of such immediate or paramount importance as the promotion of sanitation throughout the country. Sir, I have not much more to say. I would only urge this in conclusion, that if the whole of this surplus cannot be made available, I am quite willing to agree to half the surplus being placed at the disposal of Provincial Governments. All that I insist on is that a surplus should not be absorbed by Government in the way it does at present."

The Hon'ble MR. DADABHOY said:—"My Lord, I wish to associate myself entirely with what has fallen from our colleague the Hon'ble Mr. Gokhale. I think he has done admirable service to the country by moving the resolution, and bringing the matter to the notice of this Council. It is a matter on which we are more or less agreed. I have studied the discussions and proceedings of this Council for years together, and I know this much, that on various occasions absolute sympathy has been expressed by responsible officers as regards the inability of Government to appropriate a larger sum as a grant on sanitation. Local Governments have also on various occasions claimed larger grants for these matters, as they have been absolutely handicapped in the past. The proposal made by Mr. Gokhale will relieve Local Governments considerably, and they will be in a position to give larger grants to municipalities. We know that almost all the municipalities everywhere are in a state of financial depression, and that if this proposal is carried and the surpluses are placed at the disposal of Local Governments, a great deal of the tension will be removed, and Local Governments will be placed in a more favourable position. I trust that this Council will give its support to this proposal. It is only right in principle that as the country pays all the taxes, when there is a surplus that surplus should go for distribution among the Provincial Governments for the benefit of the people, and that it should not be given for the benefit of one particular Department like the Railways. This principle of the resolution will, I trust, meet with the universal acceptance of this Council."

The Hon'ble MR. MUDHOLKAR said:—"My Lord, I had no intention in the beginning of interposing in this debate. It is only because our province has not got a Provincial Council of its own and that its requirements are not known that I find it necessary to bring forward our special grievance in this matter of sanitation. It is unnecessary to say much about the necessity which has arisen of incurring expenditure requiring the spending of large sums of money on important sanitary measures. The Malaria Conference which met at Simla in October last made recommendations which require vast outlays of money in the province, affected. The Plague Commission which assembled some years ago made various recommendations which also require vast sums. We have our own experience to show every year the necessity of undertaking sanitation on a much more effective scale than it has been possible till now. We have almost every year in our province a very severe outbreak of the plague. In a town with a population of 35,000 in one visitation in 3 months about 3,500

people fell victims to it, and on the occasion of another visitation about 2,400 people died. Akola is now in the midst of a bad outbreak of the epidemic, and at Nagpur we had a few months ago a most severe outbreak in which the death-rate was almost unheard of in that city. This state of things the sanitary authorities tell us is due to insalubrious conditions. For remedying it money is wanted. Local bodies are asked to provide funds. How are they to do so? They have many of them hardly resources sufficient to meet the needs of ordinary times, much less are they able to spend lakhs for the purpose of supplying fresh drinking water and for other purposes, such as drains which every decent town must have. In Berar there are two important centres of trade in which for years past it has been found impossible to introduce an urgently needed effective drainage scheme, because there is no money for it. It is not that this province does not contribute its fair share, it gives over a crore and one-third to the country, and when a few lakhs are wanted for the most necessary local works it is said that there is no money available. I submit on behalf of my province that we have contributed more than our fair share to the general expenditure of the country. We are now sorely hit by these epidemics. Could not the general revenues come to our aid at such a time as this? That is the ground of our application. If the general revenues are not sufficient to meet this claim of ours, there are other sources, and if a loan is necessary, then I submit, on behalf of my province, the Central Provinces and Berar and others, that it should be raised to supply funds for the purposes of sanitation."

The Hon'ble MR. MESLIN said:—"The Hon'ble Mr. Gokhale has disarmed criticism on the precise form which his resolution has taken. As it stands on the notice paper, the resolution suggests that we should increase the debt of India in order to provide funds for sanitation. In itself most of us would regard this as a somewhat questionable proposition; but I quite understand that the Hon'ble Member had to throw his resolution into this particular form in order to bring it within the rules for this stage of the discussion. I hardly think therefore that Government need read his precise recommendation too literally. It may be regarded—what the speech of the Hon'ble Member clearly shows that he intends it to be regarded—as a proposition expressing the view that ascertained surpluses in the Imperial Budget should be devoted to beneficial and non-recurring expenditure. That is the view which the Hon'ble Member, with all the weight of his eloquence and experience, has impressed upon this Council in no less than five consecutive Budget Debates, and he urges it again today upon a new audience."

"It has always been regarded in modern public finance as a fundamental principle that any actual surplus of revenue over expenditure should be devoted to the redemption of public debt. What actually happens with the revenue surplus of India, when there is one, is that it is thrown into the general cash balances of the country; and as the Hon'ble Finance Member explained very fully a week ago, it is from these cash balances, fed as they are from many other sources, that the capital expenditure of our railways and irrigation projects is drawn. It is therefore true, though in an indirect sense, that our revenue surplus reduces the amount of our indebtedness. That is to say, it saves us from borrowing an equivalent amount, and to that extent keeps down the growth of our debt. Moreover, inasmuch as we spend on productive capital outlay in ordinary years considerably more than we borrow, the effect is that we always reduce our non-productive debt by the amount of our revenue surplus. That of course is simple enough. It simply means a short cut in our accounts. Instead of using our revenue surplus to pay off non-productive debt and borrowing to the full extent for productive works, we borrow the net amount which we require and treat our revenue surplus as enabling us to make a corresponding transfer from non-productive to productive debt. Now the Hon'ble Member considers that this is unnecessary. He thinks that the amount of our non-productive debt is so small that we might very well leave it alone and borrow more freely for productive purposes. I trust the Council will not accept this view. We already borrow as much as we think that we can with safety and without lowering the credit of our public securities. One of the main reasons why the credit of our

public securities stands so high is the knowledge that our non-productive debt is being gradually and steadfastly diminished and that we allow no considerations of expediency to interfere with the steady automatic operation of this well recognised form of national sinking fund. I very much dread that an appreciable change would come over our credit in the markets of the world if we left the paths of financial rectitude to dally in the pleasant harbours into which the Hon'ble Member invites us.

"If in times of peace and prosperity we did not employ all our spare resources to check the growth of our ordinary debt, there is grave reason to fear that our indebtedness would ultimately become heavier than the country can bear. I would ask the Council to look at what happened during the disastrous year 1908-1909, when we were laden with a deficit of nearly 3½ millions. In that year we clearly were unable to employ any of our revenue in discharging debt; on the contrary we had to raise temporary loans and increase our non-productive ordinary debt to that extent. With the small surpluses for which we are now budgeting it may be several years before it is possible again to reduce our ordinary debt to the figure at which it stood at the beginning of 1908. In a country like ours, which is unhappily subject to periodical failures of the rainfall, it is both prudent and necessary that our savings in prosperous years should be used to avoid or cancel borrowings in years of scarcity. Incidentally also it cannot have escaped the Hon'ble Mr. Gokhale's notice that the large surpluses which we have been able in recent years to use for the reduction of debt have represented in the main the net profits from our railways; and there is a certain fitness, which I am sure the Hon'ble gentleman will recognise, in employing for the building up of our magnificent railway property some part of the surplus income which it yields us.

"I have attempted to meet the Hon'ble Member's resolution on broad lines, and I do not propose to examine too critically the minor questions which the resolution opens up. It would be hardly possible however for Government to accept without much consideration the principle of increased grants to local bodies. The precise object to which he would devote our surpluses is an altogether laudable one, but the improvement of sanitation is one of the first duties of local bodies, and it is a duty which it is incumbent upon them to carry out, so far as possible, from their own resources. The Hon'ble gentleman has still to make it clear that local bodies are at the end of their resources, and that, if they have a genuine desire for sanitary reform, they have spent their last available rupee on that object. I would remind the Council that since 1908-09 the Government of India have been giving to the various provinces a total grant of 30 lakhs a year in aid of sanitary improvement, and it is believed that a substantial share of that subsidy has been passed on to municipalities and local boards. We have not made any inquisitorial examination of the use to which these funds have been put; that would be opposed to the general principles which we observe in making such subsidies. But from the figures in provincial budgets we have considerable doubt whether some of the provinces have yet been able to spend the grants they have already got. Would it be reasonable to offer them more? Would it be reasonable to offer them doles, the continuance of which we could not guarantee? Is it not rather their duty and the duty of the local bodies concerned to complete their programme of sanitation, to estimate its cost with care, to devote their energies to finding the necessary revenue and to make themselves independent, so far as possible, of fortuitous assistance from Imperial funds?"

The Hon'ble MR. SLACKE said:—"Regarding sanitary improvements, the Government of India made an allotment of 4½ lakhs yearly for that purpose in Bengal, and the principle followed by the Local Government is to give one-third of the cost for each improvement if the local bodies will find the other two-thirds out of their own resources and the gifts of private individuals. During the past year, I was put on to a Committee by His Honour the Lieutenant-Governor for the purpose of endeavouring to get municipalities to come forward to enable us to spend this 4½ lakhs but after a great deal of work we were unable to allocate those funds. It therefore does not seem to be necessary to increase the grant

which is now given to us by the Government of India, at any rate for the present."

The Hon'ble MR. N. SUBBA RAO said:—"Sir, I have listened with much interest to the remarks that have fallen from the Hon'ble Mr. Meston. He points out that it is the duty of local bodies to find the necessary revenues to meet their wants, and that they should be independent of help from the Government. He questions whether the requirements of local bodies are such as could not be met from their own resources and whether there is any pressing necessity for help from outside. As one intimately acquainted with local self-government in the province of Madras, I submit that the problem which now faces local self-government, or rather municipal administration, is how to make it popular and how to meet its multifarious needs as well, that is the problem now facing the municipal administration, I may say, not only in Madras, but also in other provinces. The taxation provided for in the Act is limited, and almost all municipalities have reached the maximum limit of taxation. Their needs are growing day by day. There are questions connected with water-supply and drainage, the overcrowding of houses, the widening of streets, and the like. Numerous are the demands which municipalities are unable to meet. This is the burning question bound up with the success of local self-government in this country—how to make municipal administration both popular and efficient. Lord Morley as well as the Decentralization Commission has stated that real local self-government should begin in this country and municipal bodies should have a free hand in administering their own affairs. How can municipalities administer their affairs freely and in a way acceptable to the people, unless they have sufficient funds placed at their disposal to meet their pressing requirements? It is indeed a problem of making bricks without straw. One reason why municipal administration is somewhat unpopular is because there is no corresponding benefit from the taxation imposed on the people, as the taxes paid go only a little way, and the return therefrom is not appreciably felt. Analogies from the West have, I submit, no application to a poor country like India. I submit, therefore, to the Council that it is the duty of the Government to take this question into its serious consideration and arrange to place funds at the disposal of local bodies, either by giving a portion of the surplus to Provincial Governments, or by placing additional sources of revenue at the disposal of local bodies. Unless this question is grappled with and satisfactorily solved, I submit that it is not wise to devote the surplus to the reduction of the unproductive debt as pointed out by the Hon'ble Mr. Gokhale, but if their needs are satisfied by all means use the surplus for the reduction of the debt, but so long as they are not satisfied and local bodies are not made to carry on their administrations as going concerns, I submit that it is not wise to divert the surplus in the manner proposed. Unless, therefore, this question is solved, local self-government would become a burden instead of a blessing to the people, and the first duty of the Council is to consider this question and solve it in the way suggested by the Hon'ble Mover or in any other way that will best meet the present situation."

The Hon'ble MR. MADGE said:—"Sir, I should be very sorry to oppose any measure of sanitary reform. The difficulty that this resolution presents to my mind is just this. The Hon'ble the Mover has omitted to suggest any particular method of distribution by which any surpluses should be made over to the various provinces in this country. In the course of the discussions to which we had listened with great interest yesterday, a thought was thrown out that some kind of equity was involved in returning to particular provinces some proportionate portions of the contributions that they had made to the general revenues. Now if that principle were carried out in this particular matter, I am very much afraid that the places which stood most in need of sanitation would have the smallest return. I think, perhaps, that a better direction in which to press this enquiry would be to turn to the proposal that was made by the Government either last year or the year before to extend the principle of the Provincial Loans Act. In one of the societies to which I belong I saw a project mooted somewhat to that effect, and I think that would be the direction in which we should move in this matter by enquiring what has been done with reference to the proposal to pass laws by which local loans should be raised by local bodies. I

think that if that question was fairly considered we might see our way of escape from this difficulty."

The Hon'ble MR. MAZHARUL HAQUE said—"I should like to say a few words on this question. We have heard the Hon'ble Mr. Slacke say that the Government of Bengal could not spend its grant because it had laid down the condition that unless municipalities were ready to find two-thirds of the grant it would not give the remaining one-third. Sir, I think the principle laid down by the Government of Bengal is entirely wrong. It clearly shows that the municipalities of Bengal are very poor, so much so that all the municipalities taken together in Bengal could not scrape together 9 lakhs in order to secure this grant. If the Government of Bengal had not laid down any rule at all and if it had given this grant of 4½ lakhs without any conditions, then I submit the Hon'ble Mr. Slacke would not have been here to say that he could not spend the grant. There is not the least doubt that the country is in great need of sanitation. We see plague, malaria and all sorts of diseases spreading, and I think, Sir, that the time has come when the Government should help these municipalities and I would add district boards as well to improve the sanitation of the country."

The Hon'ble PANDIT MADAN MOHAN MALAVIYA said—"I rise, Sir, to support the resolution which has been moved by the Hon'ble Mr. Gokhale. I have listened, I must say, with a degree of pain to the criticisms that have been offered against the resolution. I thought, Sir, that this was a subject which would elicit the most unstinted sympathy and support from every Member of the Government, and I am both sorry and surprised to find that it is not likely to receive that support. I regret to think that the question of sanitation in this country has not received that measure of attention which it deserves from the Government, and I hope that the Council will recommend that it should receive more attention by adopting the resolution before us. It has been urged that the course suggested by the Hon'ble Mr. Gokhale is an exceptional course, that the orthodox procedure, the path of financial rectitude, as happily put by the Hon'ble Mr. Meston, has been to appropriate surpluses to the reduction of debt. There is no doubt that the course suggested by the Hon'ble Mr. Gokhale is an exceptional course. I quite admit it, but I submit that the conditions which make it necessary for him to adopt that course, and for other Members of this Council to support it, are exceptional also. If in the ordinary course of affairs in the administration of the finances of India, sanitation had received that measure of attention and that proportional share of the revenues of the country which it undoubtedly demands, such a resolution as is before us would not have been necessary. But it has unfortunately not received it, and the sanitary conditions which prevail at this moment in the country loudly call for a larger allotment of the Imperial revenues for the purposes of sanitation. If that allotment were made out of the ordinary revenues of India for the year, none would be happier than my friend Mr. Gokhale—indeed everybody would be glad of it. But if that cannot be done, I think it is the duty of the Council and of the Government to find means, even by recourse to increased borrowing, to promote public health and sanitation rather than allow people to die premature preventible deaths. If it were necessary, I would go even so far as to support fresh taxation for such a purpose. I feel strongly that it is the duty of the Government to find more money to improve the sanitary conditions under which the great bulk of the people live, in order that preventible deaths may be avoided."

"Now, Sir, I wish to draw attention to a few facts relating to the sanitary condition of the country as a whole and of my province in particular. In the whole of India, as my friend Mr. Gokhale has already pointed out, the death-rate stood at over 37 per thousand in 1907, the death-rate in England was 16 per thousand. Sixteen and 37! That makes a tremendous difference; and I submit that if the death-rate cannot be brought to the standard prevailing in England—Sir John Hewett said a little time ago that it was out of the question to expect that the death-rate here should be the same as that in England—there is absolutely no reason why the death-rate in India should not be brought to the level of the death-rate which prevails in jails in India."
